Charakterystyka kierunku, koncepcja i cele kształcenia

Charakterystyka kierunku

The Medical Program at the Faculty of Medicine of the Jagiellonian University Medical College is a dynamic, modern and significant program on the European map of medical universities, boasting excellent scientific and didactic staff consisting of 150 full professors and doctors with habilitation degrees, and over 450 doctors who, drawing on the wealth of centuries-old tradition, set new directions of thought development through the highest quality scientific research and teaching.

Every year over 400 doctors graduate from the Faculty of Medicine, and every year the Faculty of Medicine of the JU MC enjoys great interest among candidates for medical universities.

The current shape of medical studies is the result of many years of experience in professional education of medical staff in the care of human health and life.

Students have a rich, well-equipped scientific and didactic base, highly qualified scientific and didactic staff, specialist clinical base, and modern scientific and research infrastructure at their disposal.

Medical studies are uniform master's studies lasting 12 semesters. The curriculum of the first three years of studies includes teaching in the field of theoretical disciplines of medical sciences, i.e. anatomy with embryology, histology with cytophysiology, biochemistry with elements of chemistry, physiology, biophysics, microbiology, immunology, genetics with molecular biology, pathomorphology, pathophysiology, pharmacology. From the first year of their studies, they are familiarized with the rules of ethics and learn about relations and communication with patients. During the first, second and third year of studies, students are also taught the basics of clinical sciences in the form of first aid and elements of nursing, propedeutics of medicine, pediatrics and internal diseases, as well as epidemiology, history of medicine, history of philosophy, sociology of medicine, medical ethics, psychology, telemedicine with elements of medical simulation, and a foreign language. From the fourth to the sixth year of studies, basic clinical disciplines are taught, i.e. pediatrics with paediatric surgery, internal diseases, surgery, orthopedics and traumatology, gynecology and obstetrics, ophthalmology, infectious diseases, psychiatry, neurology, laryngology, as well as radiology, emergency medicine, public health, nuclear medicine, occupational medicine, clinical immunology and microbiology. The studies also include a program of numerous optional courses in neurology, medical cytobiology, molecular epidemiology, psychoanalysis, and clinical disciplines expanding the mandatory knowledge in cardiology, anesthesiology and intensive care, palliative care, surgery, emergency medicine and methodology of medical research. In order to pass the individual years of studies, it is necessary to complete

program practices in the field of patient care, internal diseases, pediatrics, gynecology, general surgery, emergency aid and out-patient health care (family physician). Graduates of the medical faculty receive a diploma and a professional title of medical doctor (Polish: lekarz).

Koncepcja kształcenia

The aim of medical studies is to teach the fundamental theories and principles of medical practice, to transfer the skills of communication and cooperation with patients, colleagues and other medical professionals, and to prepare to lead human teams. The studies should provide the graduate with the necessary knowledge and skills, as well as ethical principles ensuring professional and safe medical care.

In accordance with the current teaching standards, the graduate has theoretical and practical skills in prevention and treatment necessary to practice the profession of a medical doctor.

In terms of knowledge, the graduate knows and understands the development, structure and functions of the human body in normal and pathological conditions, can recognize the symptoms and course of diseases, knows the methods of diagnostic and therapeutic management appropriate for specific conditions, and also understands the ethical, social and legal conditions of the medical profession and the principles of health promotion, and his/her knowledge is based on scientific evidence and accepted norms, and is also familiarized with methods of conducting scientific research.

In terms of skills, graduates are able to recognize medical problems and priorities in the field of medical management, recognize life-threatening conditions requiring immediate medical intervention, plan diagnostic procedures and interpret their results, as well as implement appropriate and safe therapeutic management and predict its effects. Graduates also know how to plan their own educational activity and constantly improve their education in order to update their knowledge and inspire the learning process of others. Preparation for the medical profession also includes communicating with patients and their families in an atmosphere of trust, taking into account patients' needs, communicating with colleagues in a team, and sharing knowledge, as well as critically evaluating the results of scientific research with appropriate justification of a position.

In terms of social competences, graduates are ready to establish and maintain deep and respectful contact with patients, as well as to show understanding for differences in world-related outlooks and cultures. The main principle for a graduate is to be guided by the well-being of a patient and to respect the medical confidentiality and rights of a patient. Further competences include the ability to take action against patients on the basis of norms and ethical principles with an awareness of social determinants and limitations resulting from the disease, and the ability to see and recognize one's own limitations and to self-assess educational deficits and needs. Graduates are prepared to promote health-promoting behaviors, are taught to use objective sources of information and formulate conclusions from their own measurements or observations. In terms of team work, a student is taught to implement the principles of professional camaraderie and cooperation in a team of specialists, including representatives of other medical professions, including in a multicultural and multinational environment. Graduate is competent to formulate opinions on various aspects of professional activity and has an educated ability to take responsibility for decisions taken in the course of professional activity, including in terms of their own and other people's safety.

Cele kształcenia

1. acquiring the ability to plan and implement preventive, diagnostic and therapeutic procedures on a scientific basis which respects the principles of humanity
2. acquiring the ability to critically assess research results
3. ability to conduct scientific research and to spread their results
4. preparation for cooperation with other health care providers
5. preparation for managing human teams
6. readiness to continue professional education
7. readiness to continue education in doctoral schools and to participate in medical research

Potrzeby społeczno-gospodarcze

Wskazanie potrzeb społeczno-gospodarczych utworzenia kierunku

The statistics of the The Polish Chamber of Physicians and Dentists show that in Poland there is a great need for reliable doctors who are capable of offering appropriate preventive, diagnostic and therapeutic methods, based on solid theoretical foundations and the results of the latest research, adapted to the needs of individuals and groups of people. The need for education in a medical field is therefore one of the most urgent needs in the current medical situation in the country.

Wskazanie zgodności efektów uczenia się z potrzebami społeczno-gospodarczymi

Thanks to the implementation of the assumed learning outcomes, graduates of medical studies, in accordance with their knowledge and skills acquired during their studies, are prepared to work in: public and non-public health care institutions; education; research institutions and research and development centers; institutions dealing with counseling and dissemination of knowledge in the field of health-promoting education, which is the answer to the increase in demand for medical services caused by demographic and civilization trends.

Nauka, badania, infrastruktura

Główne kierunki badań naukowych w jednostce

The academic staff at the Faculty of Medicine, which conducts classes in the field of medicine, participates in the implementation of a number of scientific research and scientific and implementation works in the field of medical and health sciences. Over the last 5 years, the research teams at the Faculty of Medicine participated in the implementation of about 300 projects financed from the National Science Centre, The National Centre for Research and Development, The Ministry of Health, The Ministry of Education and Science, international funds (including other EU programs) and several hundred projects from the university's own funds. The employees of the Faculty of Medicine implement projects in the scope of searching for new pathomechanisms and possibilities of personalized diagnosis and therapy of modern-age diseases (e.g. of the cardiovascular system, malignant tumors, diabetes, obesity, neurological and mental diseases, digestive system diseases, diseases related to the aging of society), interdisciplinary issues (e.g. cardiometabolic, cardiooncological, neuroendocrine problems), reproductive health problems and developmental age medicine, and therapeutic applications of regenerative medicine (e.g. the use of stem cells in the treatment of serious diseases). All units involved in the implementation of the program in the medical field, both in pre-clinical sciences and in clinical subjects, conduct scientific research.

Związek badań naukowych z dydaktyką

The majority of the employees of the Faculty of Medicine combine teaching with scientific work. The knowledge, skills and experience gained by academic teachers as a result of their research and development work are used in the educational process as a basis for modification and modernization of educational content, both in pre-clinical and clinical subjects. There are more than 100 student scientific clubs at the Faculty, at the pre-clinical and clinical units. The students who work there supplement their medical knowledge and learn the methodology of scientific work. The results of their work are presented every year at numerous international scientific conferences. Student scientific circles operating at the Department of Medical Didactics participate in research aimed at the optimization of the education process at the Faculty of Medicine. Doctoral students are involved in the implementation of most of the scientific projects of the Faculty's researchers, while students participate in a large number of projects. Doctoral students may apply for funds for research in the JUMC competition, whereas students may apply for Student Grants. Every year, several "diamond grants" financed by the Ministry of Education and Science are held at the Faculty of Medicine.

Opis infrastruktury niezbędnej do prowadzenia kształcenia

The teaching infrastructure used for the implementation of the medical curriculum is based on three main components: lecture halls (17 in total), seminar and training rooms (over 130 available, in particular organizational units conducting teaching classes), and the hospital (and laboratory) base of the University Hospital in Kraków, the University Children's Hospital in Kraków, as well as units cooperating with the Faculty. These units constitute both the didactic and scientific base of the Faculty, being the seats of appropriate Departments, Clinics and Departments. Lecture halls are equipped with appropriate equipment, i.e. multimedia projectors, computers. Students have access to the resources of the Medical Library and the resources of the Jagiellonian Library. Equipment and infrastructure are constantly updated, supplemented and developed in accordance with the demand resulting from the implementation of the education program. In 2019, a new seat of the University Hospital in Kraków-Prokocim opened, with a teaching base of 51 seminar rooms and a lecture hall, as well as a system of comprehensive sound and image transmission between all operating, endoscopic, imaging diagnostics and teaching rooms. In 2020, the construction of the Centre for Innovative Medical Education (CIEM), located in the immediate vicinity of the new University Hospital headquarters, was completed, including 10 high-fidelity simulation rooms, rooms for technical skills improvement, a laboratory for teaching of clinical skills, low-fidelity simulation rooms and rooms for Objective Structured Clinical Examinations (OSCE).

Program

Podstawowe informacje

Klasyfikacja ISCED:	0912
Liczba semestrów:	12
Tytuł zawodowy nadawany absolwentom:	lekarz

Opis realizacji programu:

The curriculum of studies at the Faculty of Medicine is based on the didactic and research facilities of the Faculty of Medicine of the Jagiellonian University Medical College in cooperation with external entities, thanks to which it is possible to train practical skills of students in various conditions and environments, which prepares them for later employment in the medical profession. The education program is primarily aimed at developing practical/clinical skills based on a reliable theoretical base and gained experience with patients. All students follow the same program.

Liczba punktów ECTS

konieczna do ukończenia studiów	365
w ramach zajęć prowadzonych z bezpośrednim udziałem nauczycieli akademickich lub innych osób prowadzących zajęcia	215
którą student musi uzyskać w ramach zajęć z zakresu nauki języków obcych	18
którą student musi uzyskać w ramach modułów realizowanych w formie fakultatywnej	11
którą student musi uzyskać w ramach praktyk zawodowych	20
którą student musi uzyskać w ramach zajęć z dziedziny nauk humanistycznych lub nauk społecznych	8

Liczba godzin zajęć

Łączna liczba godzin zajęć: 5987

Praktyki zawodowe

Wymiar, zasady i forma odbywania praktyk zawodowych

As part of the medical studies program, students are required to complete work experience in the amount of 600 teaching hours, which corresponds to 20 ECTS credits. Internships are carried out during the summer holidays (July-August-September) between the first and fifth year of studies, in hospitals in the country and abroad. They take place in the area of patient care, internal diseases, pediatrics, gynecology, general surgery, emergency care and out-patient health care (family physician). All apprenticeships are supervised by the internship coordinator.

Ukończenie studiów

Wymogi związane z ukończeniem studiów (praca dyplomowa/egzamin dyplomowy/inne)

The condition for graduation from the Medical Faculty of the Jagiellonian University Medical College is to obtain credit for all subjects and practical training required by the study plan. In accordance with the current teaching standards, the graduate has theoretical and practical skills in prevention and treatment necessary to practice the profession of a medical doctor.

Efekty uczenia się

Wiedza

Ogólne

Absolwent zna i rozumie:

Kod	Treść	PRK
O.W1	rozwój, budowę i funkcje organizmu człowieka w warunkach prawidłowych i patologicznych	P7U_W, P7S_WG
O.W2	objawy i przebieg chorób	P7U_W, P7S_WG
O.W3	sposoby postępowania diagnostycznego i terapeutycznego właściwe dla określonych stanów chorobowych	P7U_W, P7S_WG
O.W4	etyczne, społeczne i prawne uwarunkowania wykonywania zawodu lekarza oraz zasady promocji zdrowia, a swoją wiedzę opiera na dowodach naukowych i przyjętych normach	P7U_W, P7S_WG
O.W5	metody prowadzenia badań naukowych	P7U_W, P7S_WG

Szczegółowe

A. Nauki morfologiczne

Absolwent zna i rozumie:

Kod	Treść	PRK
A.W1	mianownictwo anatomiczne, histologiczne i embriologiczne w językach polskim i angielskim	P7U_W, P7S_WG
A.W2	budowę ciała ludzkiego w podejściu topograficznym (kończyny górna i dolna, klatka piersiowa, brzuch, miednica, grzbiet, szyja, głowa) i czynnościowym (układ kostno-stawowy, układ mięśniowy, układ krążenia, układ oddechowy, układ pokarmowy, układ moczowy, układy płciowe, układ nerwowy i narządy zmysłów, powłoka wspólna)	P7U_W, P7S_WG
A.W3	stosunki topograficzne między poszczególnymi narządami	P7U_W, P7S_WG
A.W4	podstawowe struktury komórkowe i ich specjalizacje funkcjonalne	P7U_W, P7S_WG
A.W5	mikroarchitekturę tkanek, macierzy pozakomórkowej i narządów	P7U_W, P7S_WG
A.W6	stadia rozwoju zarodka ludzkiego, budowę i czynność błon płodowych i łożyska, etapy rozwoju poszczególnych narządów oraz wpływ czynników szkodliwych na rozwój zarodka i płodu (teratogennych)	P7U_W, P7S_WG

B. Naukowe podstawy medycyny

Absolwent zna i rozumie:

Kod	Treść	PRK
B.W1	gospodarkę wodno-elektrolitową w układach biologicznych	P7U_W, P7S_WG
B.W10	budowę prostych związków organicznych wchodzących w skład makrocząsteczek obecnych w komórkach, macierzy zewnątrzkomórkowej i płynów ustrojowych	P7U_W, P7S_WG

Kod	Treść	PRK
B.W11	budowę lipidów i polisacharydów oraz ich funkcje w strukturach komórkowych i pozakomórkowych	P7U_W, P7S_WG
B.W12	struktury I-, II-, III- i IV-rzędową białek oraz modyfikacje potranslacyjne i funkcjonalne białka oraz ich znaczenie	P7U_W, P7S_WG
B.W13	funkcje nukleotydów w komórce, struktury I- i II-rzędową DNA i RNA oraz strukturę chromatyny	P7U_W, P7S_WG
B.W14	funkcje genomu, transkryptomu i proteomu człowieka oraz podstawowe metody stosowane w ich badaniu, procesy replikacji, naprawy i rekombinacji DNA, transkrypcji i translacji oraz degradacji DNA, RNA i białek, a także koncepcje regulacji ekspresji genów	P7U_W, P7S_WG
B.W15	podstawowe szlaki kataboliczne i anaboliczne, sposoby ich regulacji oraz wpływ na nie czynników genetycznych i środowiskowych	P7U_W, P7S_WG
B.W16	profile metaboliczne podstawowych narządów i układów	P7U_W, P7S_WG
B.W17	sposoby komunikacji między komórkami i między komórką a macierzą zewnątrzkomórkową oraz szlaki przekazywania sygnałów w komórce, a także przykłady zaburzeń w tych procesach prowadzące do rozwoju nowotworów i innych chorób	P7U_W, P7S_WG
B.W18	procesy: cykl komórkowy, proliferacja, różnicowanie i starzenie się komórek, apoptoza i nekroza oraz ich znaczenie dla funkcjonowania organizmu	P7U_W, P7S_WG
B.W19	w podstawowym zakresie problematykę komórek macierzystych i ich zastosowania w medycynie	P7U_W, P7S_WG
B.W2	równowagę kwasowo-zasadową i mechanizm działania buforów oraz ich znaczenie w homeostazie ustrojowej	P7U_W, P7S_WG
B.W20	podstawy pobudzenia i przewodzenia w układzie nerwowym oraz wyższe czynności nerwowe, a także fizjologię mięśni prążkowanych i gładkich oraz funkcje krwi	P7U_W, P7S_WG
B.W21	czynność i mechanizmy regulacji wszystkich narządów i układów organizmu człowieka, w tym układu krążenia, układu oddechowego, układu pokarmowego, układu moczowego i powłok skórnych oraz zależności istniejące między nimi	P7U_W, P7S_WG
B.W22	przebieg i regulację funkcji rozrodczych u kobiet i mężczyzn	P7U_W, P7S_WG
B.W23	mechanizm starzenia się organizmu	P7U_W, P7S_WG
B.W24	podstawowe ilościowe parametry opisujące wydolność poszczególnych układów i narządów, w tym zakresy norm i czynniki demograficzne wpływające na wartość tych parametrów	P7U_W, P7S_WG
B.W25	związek między czynnikami zaburzającymi stan równowagi procesów biologicznych a zmianami fizjologicznymi i patofizjologicznymi	P7U_W, P7S_WG
B.W26	podstawowe narzędzia informatyczne i biostatystyczne wykorzystywane w medycynie, w tym medyczne bazy danych, arkusze kalkulacyjne i podstawy grafiki komputerowej	P7U_W, P7S_WG
B.W27	podstawowe metody analizy statystycznej wykorzystywane w badaniach populacyjnych i diagnostycznych	P7U_W, P7S_WG
B.W28	możliwości współczesnej telemedycyny jako narzędzia wspomaganie pracy lekarza	P7U_W, P7S_WG
B.W29	zasady prowadzenia badań naukowych, obserwacyjnych i doświadczalnych oraz badań in vitro służących rozwojowi medycyny	P7U_W, P7S_WG
B.W3	pojęcia: rozpuszczalność, ciśnienie osmotyczne, izotonia, roztwory koloidalne i równowaga Gibbsa-Donnana	P7U_W, P7S_WG
B.W30	podstawowe prawa opisujące zjawiska elektryczne i magnetyczne w organizmie	P7U_W, P7S_WG

Kod	Treść	PRK
B.W31	podstawowe prawa mechaniki odnoszące się do układu szkieletowego i mięśniowego	P7U_W, P7S_WG
B.W32	podstawy biochemiczne procesów przemian ksenobiotyków	P7U_W, P7S_WG
B.W33	patomechanizmy zaburzeń regulacji wszystkich narządów i układów organizmu człowieka, w tym: układów krążenia, oddechowego moczowego i pokarmowego, układu nerwowego (ośrodkowego, obwodowego i autonomicznego)	P7U_W, P7S_WG
B.W34	zasady oceny siły i wiarygodności zaleceń w wytycznych postępowania	P7U_W, P7S_WG
B.W35	rodzaje badań obserwacyjnych i interwencyjnych oraz zasady ich przeprowadzania	P7U_W, P7S_WG
B.W36	techniki prezentacji danych on-line	P7S_WK
B.W37	zasady korzystania z materiałów publikowanych w sieci Internet (prawo autorskie, prawo cytatu, sposoby pozyskiwania bezpłatnych materiałów)	P7U_W, P7S_WG
B.W38	sposoby bezpiecznej komunikacji internetowej	P7S_WK
B.W39	sposoby komputerowego wspomaganie decyzji lekarskich ze szczególnym uwzględnieniem techniki ścieżek klinicznych	P7U_W, P7S_WG
B.W4	podstawowe reakcje związków nieorganicznych i organicznych w roztworach wodnych	P7U_W, P7S_WG
B.W40	podstawowe techniki reprezentacji wiedzy medycznej na potrzeby inteligentnych systemów komputerowych w medycynie	P7U_W, P7S_WG
B.W41	pojęcia związane z transmisją danych on-line	P7S_WK
B.W42	elementy szpitalnego systemu obsługi pacjenta	P7S_WK
B.W43	wybrane, dostępne w Internecie źródła informacji medycznej ze szczególnym uwzględnieniem chorób o podłożu genetycznym	P7S_WK
B.W44	zasady działania i organizacji telekonferencji	P7S_WK
B.W45	typy narzędzi informatycznych wspierających proces zdalnego kształcenia ustawicznego ze szczególnym uwzględnieniem symulatorów dostępnych on-line	P7S_WK
B.W46	szanse i ograniczenia jakie stwarzają nowe informatyczne techniki symulacyjne na przykładach wybranych europejskich projektów badawczych	P7S_WK
B.W47	typy danych wykorzystywane w elektronicznej dokumentacji medycznej	P7S_WK
B.W48	zasady tworzenia baz danych na potrzeby obsługi pacjenta i badań naukowych	P7S_WK
B.W49	zasady działania i wykorzystania elektronicznego rekordu pacjenta	P7U_W, P7S_WG
B.W5	prawa fizyczne opisujące przepływ cieczy i czynniki wpływające na opór naczyniowy przepływu krwi	P7U_W, P7S_WG
B.W50	zasady prawidłowego żywienia osoby zdrowej i chorej oraz metody oceny stanu odżywienia	P7U_W, P7S_WG
B.W6	naturalne i sztuczne źródła promieniowania jonizującego oraz jego oddziaływanie z materią	P7U_W, P7S_WG
B.W7	fizykochemiczne i molekularne podstawy działania narządów zmysłów	P7U_W, P7S_WG
B.W8	fizyczne podstawy nieinwazyjnych metod obrazowania	P7U_W, P7S_WG
B.W9	fizyczne podstawy wybranych technik terapeutycznych, w tym ultradźwięków i naświetlań	P7U_W, P7S_WG

C. Nauki przedkliniczne

Absolwent zna i rozumie:

Kod	Treść	PRK
C.W1	podstawowe pojęcia z zakresu genetyki	P7U_W, P7S_WG
C.W10	korzyści i zagrożenia wynikające z obecności w ekosystemie organizmów modyfikowanych genetycznie (GMO)	P7U_W, P7S_WG
C.W11	genetyczne mechanizmy nabywania lekooporności przez drobnoustroje i komórki nowotworowe	P7U_W, P7S_WG
C.W12	drobnoustroje, z uwzględnieniem chorobotwórczych i obecnych we florze fizjologicznej	P7U_W, P7S_WG
C.W13	epidemiologię zarażeń wirusami i bakteriami oraz zakażeń grzybami i pasożytami, z uwzględnieniem geograficznego zasięgu ich występowania	P7U_W, P7S_WG
C.W14	wpływ abiotycznych i biotycznych (wirusy, bakterie) czynników środowiska na organizm człowieka i populację ludzi oraz drogi ich wnikania do organizmu człowieka	P7S_WK
C.W15	konsekwencje narażenia organizmu człowieka na różne czynniki chemiczne i biologiczne oraz zasady profilaktyki	P7U_W, P7S_WG
C.W16	inwazyjne dla człowieka formy lub stadia rozwojowe wybranych pasożytniczych grzybów, pierwotniaków, helmintów i stawonogów, z uwzględnieniem geograficznego zasięgu ich występowania	P7U_W, P7S_WG
C.W17	zasadę funkcjonowania układu pasożyt – żywiciel i podstawowe objawy chorobowe wywoływane przez pasożyty	P7U_W, P7S_WG
C.W18	objawy zakażeń jatrogennych, drogi ich rozprzestrzeniania się i patogeny wywołujące zmiany w poszczególnych narządach	P7U_W, P7S_WG
C.W19	podstawy diagnostyki mikrobiologicznej i parazytologicznej	P7U_W, P7S_WG
C.W2	zjawiska sprzężenia i współdziałania genów	P7U_W, P7S_WG
C.W20	podstawy dezynfekcji, sterylizacji i postępowania aseptycznego	P7U_W, P7S_WG
C.W21	podstawy rozwoju i mechanizmy działania układu odpornościowego, w tym swoiste i nieswoiste mechanizmy odporności humoralnej i komórkowej	P7U_W, P7S_WG
C.W22	główny układ zgodności tkankowej	P7U_W, P7S_WG
C.W23	typy reakcji nadwrażliwości, rodzaje niedoborów odporności i podstawy immunomodulacji	P7U_W, P7S_WG
C.W24	zagadnienia z zakresu immunologii nowotworów	P7U_W, P7S_WG
C.W25	genetyczne podstawy doboru dawcy i biorcy oraz podstawy immunologii transplantacyjnej	P7U_W, P7S_WG
C.W26	nazewnictwo patomorfologiczne	P7U_W, P7S_WG
C.W27	podstawowe mechanizmy uszkodzenia komórek i tkanek	P7U_W, P7S_WG
C.W28	przebieg kliniczny zapaleń swoistych i nieswoistych oraz procesy regeneracji tkanek i narządów	P7U_W, P7S_WG
C.W29	definicję i patofizjologię wstrząsu, ze szczególnym uwzględnieniem różnicowania przyczyn wstrząsu oraz niewydolności wielonarządowej	P7U_W, P7S_WG
C.W3	prawidłowy kariotyp człowieka i różne typy determinacji płci	P7U_W, P7S_WG
C.W30	etiologię zaburzeń hemodynamicznych, zmian wstecznych i zmian postępowych	P7U_W, P7S_WG
C.W31	zagadnienia z zakresu szczegółowej patologii narządowej, obrazu makro- i mikroskopowe oraz przebieg kliniczny zmian patomorfologicznych w poszczególnych narządach	P7U_W, P7S_WG
C.W32	konsekwencje rozwijających się zmian patologicznych dla sąsiadujących topograficznie narządów	P7U_W, P7S_WG

Kod	Treść	PRK
C.W33	czynniki chorobotwórcze zewnętrzne i wewnętrzne, modyfikowalne i niemodyfikowalne	P7U_W, P7S_WG
C.W34	postacie kliniczne najczęstszych chorób poszczególnych układów i narządów, chorób metabolicznych oraz zaburzeń gospodarki wodno-elektrolitowej, hormonalnej i kwasowo- zasadowej	P7U_W, P7S_WG
C.W35	poszczególne grupy środków leczniczych	P7U_W, P7S_WG
C.W36	główne mechanizmy działania leków i ich przemiany w ustroju zależne od wieku	P7U_W, P7S_WG
C.W37	wpływ procesów chorobowych na metabolizm i eliminację leków	P7U_W, P7S_WG
C.W38	podstawowe zasady farmakoterapii	P7U_W, P7S_WG
C.W39	ważniejsze działania niepożądane leków, w tym wynikające z ich interakcji	P7U_W, P7S_WG
C.W4	budowę chromosomów i molekularne podłoże mutagenyzy	P7U_W, P7S_WG
C.W40	problem lekooporności, w tym lekooporności wielolekowej	P7U_W, P7S_WG
C.W41	wskazania do badań genetycznych przeprowadzanych w celu indywidualizacji farmakoterapii	P7U_W, P7S_WG
C.W42	podstawowe kierunki rozwoju terapii, w szczególności możliwości terapii komórkowej, genowej i celowanej w określonych chorobach	P7U_W, P7S_WG
C.W43	podstawowe pojęcia z zakresu toksykologii ogólnej	P7U_W, P7S_WG
C.W44	grupy leków, których nadużywanie może prowadzić do zatruc	P7U_W, P7S_WG
C.W45	objawy najczęściej występujących ostrych zatruc, w tym alkoholami, narkotykami i innymi substancjami psychoaktywnymi, metalami ciężkimi oraz wybranymi grupami leków	P7U_W, P7S_WG
C.W46	podstawowe zasady postępowania diagnostycznego w zatruciach	P7U_W, P7S_WG
C.W47	wpływ stresu oksydacyjnego na komórki i jego znaczenie w patogenezie chorób oraz w procesach starzenia	P7U_W, P7S_WG
C.W48	konsekwencje niedoboru witamin lub minerałów i ich nadmiaru w organizmie	P7U_W, P7S_WG
C.W49	enzymy biorące udział w trawieniu, mechanizm wytwarzania kwasu solnego w żołądku, rolę żółci, przebieg wchłaniania produktów trawienia	P7U_W, P7S_WG
C.W5	zasady dziedziczenia różnej liczby cech, dziedziczenia cech ilościowych, niezależnego dziedziczenia cech i dziedziczenia pozajądrowej informacji genetycznej	P7U_W, P7S_WG
C.W50	konsekwencje niewłaściwego odżywiania, w tym długotrwałego głodowania, przyjmowania zbyt obfitych posiłków i stosowania niebilansowanej diety oraz zaburzenia trawienia i wchłaniania produktów trawienia	P7U_W, P7S_WG
C.W51	mechanizm działania hormonów	P7U_W, P7S_WG
C.W52	morfologiczne zmiany najważniejszych chorób nienowotworowych dotyczących całego organizmu (np. takich jak: miażdżyca, choroba nadciśnieniowa, cukrzyca, niewydolność krążeniowo-oddechowa, ogólnoustrojowe schorzenia infekcyjne i immunologiczne, najczęstsze zaburzenia hormonalne, najczęstsze schorzenia genetyczne) i potrafi powiązać je z już nabytą wiedzą z zakresu anatomii, biochemii, fizjologii patologicznych w celu wydedukowania objawów klinicznych	P7U_W, P7S_WG
C.W53	stany przednowotworowe i związane z podwyższonym ryzykiem zachorowania na nowotwór, procesy transformacji nowotworowej z ich wykładnikami morfologicznymi, zasady klasyfikacji nowotworów wg WHO, najważniejsze czynniki ryzyka, rokownicze i predykcyjne, oraz metody badania hist-pat i cytologicznego i wspomagających badań molekularnych stosowane w diagnostyce nowotworów i w wykrywaniu i monitorowaniu stanów przednowotworowych a także rozumie znaczenie właściwego rozpoznania hist-pat nowotworu dla prawidłowego leczenia	P7U_W, P7S_WG

Kod	Treść	PRK
C.W54	patogenezę i zmiany morfologiczne schorzeń związanych z zaawansowanym wiekiem, w tym szczególnie istotnych w starzejącym się społeczeństwie, najczęstszych schorzeń neurodegeneracyjne (np. Ch. Alzheimer)	P7U_W, P7S_WG
C.W55	zmiany morfologiczne i rozumie patogenezę krytycznych stanów patologicznych mózgu takich jak obrzęk, niedokrwienie, krwotoki, skutki działania substancji egzogennych (np. alkohol, CO) i urazu mechanicznego	P7U_W, P7S_WG
C.W56	zmiany morfologiczne najczęstszych patologii okresu dziecięcego, w tym w szczególności okołoporodowego oraz chorób genetycznych i zaburzeń (wad) rozwojowych u dzieci i potrafi powiązać je z czynnikami teratogennymi, genetycznymi i urazem okołoporodowym	P7U_W, P7S_WG
C.W57	znaczenie badania pośmiertnego jako badania weryfikującego rozpoznanie i istotnego dla podnoszenia jakości pracy szpitala oraz dla samokształcenia lekarza, a wiedza ta wsparta jest bezpośrednim, tj osobistym aktywnym uczestnictwem w sekcji zwłok	P7U_W, P7S_WG
C.W58	temat podstawowych (w tym histochemia i immunohistochemia) technik stosowanych w diagnostyce patomorfologicznej oraz wybranych technik molekularnych (FISH, itp) i rozumie ich uwarunkowania związane z zabezpieczeniem materiału, oraz zna zasady oceny i interpretacji makro i mikroskopowej materiału przeznaczonego do badania	P7U_W, P7S_WG
C.W6	uwarunkowania genetyczne grup krwi człowieka i konfliktu serologicznego w układzie Rh	P7U_W, P7S_WG
C.W7	aberracje autosomów i heterosomów będące przyczyną chorób, w tym onkogenezy i nowotworów	P7U_W, P7S_WG
C.W8	czynniki wpływające na pierwotną i wtórną równowagę genetyczną populacji	P7U_W, P7S_WG
C.W9	podstawy diagnostyki mutacji genowych i chromosomowych odpowiedzialnych za choroby dziedziczne oraz nabyte, w tym nowotworowe	P7U_W, P7S_WG

D. Nauki behawioralne i społeczne z elementami profesjonalizmu

Absolwent zna i rozumie:

Kod	Treść	PRK
D.W1	społeczny wymiar zdrowia i choroby, wpływ środowiska społecznego (rodziny, sieci relacji społecznych) i nierówności społecznych oraz społeczno-kulturowych różnic na stan zdrowia, a także rolę stresu społecznego w zachowaniach zdrowotnych i autodestrukcyjnych	P7U_W, P7S_WG
D.W10	rolę rodziny pacjenta w procesie leczenia	P7S_WK
D.W11	problematykę adaptacji pacjenta i jego rodziny do choroby jako sytuacji trudnej oraz do związanych z nią wydarzeń, w tym umierania i procesu żałoby rodziny	P7S_WK
D.W12	rolę stresu w etiopatogenezie i przebiegu chorób oraz mechanizmy radzenia sobie ze stresem	P7U_W, P7S_WG
D.W13	mechanizmy, cele i sposoby leczenia uzależnień od substancji psychoaktywnych	P7U_W, P7S_WG
D.W14	zasady promocji zdrowia, jej zadania i główne kierunki działania, ze szczególnym uwzględnieniem znajomości roli elementów zdrowego stylu życia	P7S_WK
D.W15	zasady motywowania pacjenta do prozdrowotnych zachowań i informowania o niepomyślnym rokowaniu	P7U_W, P7S_WG
D.W16	główne pojęcia, teorie, zasady i reguły etyczne służące jako ogólne ramy właściwego interpretowania i analizowania zagadnień moralno-medycznych	P7S_WK
D.W17	prawa pacjenta	P7S_WK

Kod	Treść	PRK
D.W18	zasady pracy w zespole	P7S_WK
D.W19	kulturowe, etniczne i narodowe uwarunkowania zachowań ludzkich	P7U_W, P7S_WG
D.W2	społeczne czynniki wpływające na zachowania w zdrowiu i w chorobie, szczególnie w chorobie przewlekłej	P7U_W, P7S_WG
D.W20	historię medycyny, medycynę ludów pierwotnych i najdawniejszych cywilizacji oraz charakterystyczne cechy medycyny średniowiecznej	P7S_WK
D.W21	cechy medycyny nowożytnej i jej najważniejsze odkrycia	P7S_WK
D.W22	proces kształtowania się nowych specjalności w zakresie dyscypliny naukowej - nauki medyczne i osiągnięcia czołowych przedstawicieli medycyny polskiej i światowej	P7U_W, P7S_WK
D.W23	podstawy medycyny opartej na dowodach	P7S_WK
D.W24	normy odnoszące się do praw pacjenta	P7S_WK
D.W3	formy przemocy, modele wyjaśniające przemoc w rodzinie i przemoc w wybranych instytucjach, społeczne uwarunkowania różnych form przemocy oraz rolę lekarza w jej rozpoznawaniu	P7U_W, P7S_WG
D.W4	postawy społeczne wobec znaczenia zdrowia, choroby, niepełnosprawności i starości, konsekwencje społeczne choroby i niepełnosprawności oraz bariery społeczno-kulturowe, a także koncepcję jakości życia uwarunkowaną stanem zdrowia	P7U_W, P7S_WG
D.W5	zasady i metody komunikacji z pacjentem i jego rodziną, które służą budowaniu empatycznej, opartej na zaufaniu relacji	P7U_W, P7S_WG
D.W6	znaczenie komunikacji werbalnej i niewerbalnej w procesie komunikowania się z pacjentem oraz pojęcie zaufania w interakcji z pacjentem	P7U_W, P7S_WG
D.W7	psychospołeczne konsekwencje hospitalizacji i choroby przewlekłej	P7U_W, P7S_WG
D.W8	funkcjonowanie podmiotów systemu ochrony zdrowia i społeczną rolę lekarza	P7U_W, P7S_WG
D.W9	podstawowe psychologiczne mechanizmy funkcjonowania człowieka w zdrowiu i w chorobie	P7U_W, P7S_WG

E. Nauki kliniczne niezabiegowe

Absolwent zna i rozumie:

Kod	Treść	PRK
E.W1	uwarunkowania środowiskowe i epidemiologiczne najczęstszych chorób	P7U_W, P7S_WG
E.W10	podstawowe zasady farmakoterapii chorób ludzi w podeszłym wieku	P7U_W, P7S_WG
E.W11	zagrożenia związane z hospitalizacją ludzi w podeszłym wieku	P7U_W, P7S_WG
E.W12	podstawowe zasady organizacji opieki nad osobą starszą i obciążenia opiekuna osoby starszej	P7U_W, P7S_WG
E.W13	podstawowe zespoły objawów neurologicznych	P7U_W, P7S_WG

Kod	Treść	PRK
E.W14	przyczyny, objawy, zasady diagnozowania i postępowania terapeutycznego w najczęstszych chorobach układu nerwowego, w tym: 1) bólach głowy: migrenie, napięciowym bólu głowy i zespołach bólów głowy oraz neuralgii nerwu V, 2) chorobach naczyń mózgu, w szczególności udarze mózgu, 3) padaczce, 4) zakażeniach układu nerwowego, w szczególności zapaleniu opon mózgowo-rdzeniowych, boreliozie, opryszczkowym zapaleniu mózgu, chorobach neurotransmisyjnych, 5) otępieniach, w szczególności chorobie Alzheimera, otępieniu czołowym, otępieniu naczyniopochodnym i innych zespołach otępiennych, 6) chorobach jąder podstawy, w szczególności chorobie Parkinsona, 7) chorobach demielinizacyjnych, w szczególności stwardnieniu rozsianym, 8) chorobach układu nerwowo-mięśniowego, w szczególności stwardnieniu bocznym zanikowym i rwie kulszowej, 9) urazach czaszkowo-mózgowych, w szczególności wstrząśnieniu mózgu	P7U_W, P7S_WG
E.W15	podstawowe koncepcje patogenezy zaburzeń psychicznych	P7U_W, P7S_WG
E.W16	symptomatologię ogólną zaburzeń psychicznych i zasady ich klasyfikacji według głównych systemów klasyfikacyjnych	P7U_W, P7S_WG
E.W17	objawy, zasady diagnozowania i postępowania terapeutycznego w najczęstszych zaburzeniach psychicznych, w tym: 1) schizofrenii, 2) zaburzeniach afektywnych, 3) zaburzeniach nerwicowych i adaptacyjnych, 4) zaburzeniach odżywiania, 5) zaburzeniach związanych z przyjmowaniem substancji psychoaktywnych, 6) zaburzeniach snu	P7U_W, P7S_WG
E.W18	zasady diagnostyki i postępowania w stanach nagłych w psychiatrii, z uwzględnieniem problematyki samobójstw	P7U_W, P7S_WG
E.W19	specyfikę zaburzeń psychicznych i ich leczenia u dzieci, młodzieży oraz w okresie starości	P7U_W, P7S_WG
E.W2	zasady żywienia dzieci zdrowych i chorych, w tym karmienia naturalnego, szczepień ochronnych i prowadzenia bilansu zdrowia dziecka	P7U_W, P7S_WG
E.W20	objawy zaburzeń psychicznych w przebiegu chorób somatycznych, ich wpływ na przebieg choroby podstawowej i rokowanie oraz zasady ich leczenia	P7U_W, P7S_WG
E.W21	problematykę seksualności człowieka i podstawowych zaburzeń z nią związanych	P7U_W, P7S_WG
E.W22	przepisy dotyczące ochrony zdrowia psychicznego, ze szczególnym uwzględnieniem zasad przyjęcia do szpitala psychiatrycznego	P7U_W, P7S_WK
E.W23	uwarunkowania środowiskowe i epidemiologiczne najczęstszych nowotworów	P7U_W, P7S_WG
E.W24	podstawy wczesnej wykrywalności nowotworów i zasady badań przesiewowych w onkologii	P7U_W, P7S_WG
E.W25	możliwości współczesnej terapii nowotworów z uwzględnieniem terapii wielomodalnej, perspektywy terapii komórkowych i genowych oraz ich niepożądane skutki	P7U_W, P7S_WG
E.W26	zasady terapii skojarzonych w onkologii, algorytmy postępowania diagnostyczno-leczniczego w najczęściej występujących nowotworach	P7U_W, P7S_WG
E.W27	zasady diagnozowania i postępowania terapeutycznego w najczęstszych problemach medycyny paliatywnej, w tym: 1) leczeniu objawowym najczęstszych objawów somatycznych, 2) postępowaniu w wyniszczeniu nowotworowym i w profilaktyce oraz leczeniu odleżyn, 3) najczęstszych stanach nagłych w medycynie paliatywnej	P7U_W, P7S_WG
E.W28	zasady postępowania paliatywnego z pacjentem w stanie terminalnym	P7U_W, P7S_WG
E.W29	zasady leczenia bólu, w tym bólu nowotworowego i przewlekłego	P7U_W, P7S_WG

Kod	Treść	PRK
E.W3	przyczyny, objawy, zasady diagnozowania i postępowania terapeutycznego w przypadku najczęstszych chorób dzieci: 1) krzywicy, tężyczki, drgawek, 2) wad serca, zapalenia mięśnia sercowego, wsierdzia i osierdzia, kardiomiopatii, zaburzeń rytmu serca, niewydolności serca, nadciśnienia tętniczego, omdleń, 3) ostrych i przewlekłych chorób górnych i dolnych dróg oddechowych, wad wrodzonych układu oddechowego, gruźlicy, mukowiscydozy, astmy, alergicznego nieżytu nosa, pokrzywki, wstrząsu anafilaktycznego, obrzęku naczynioruchowego, 4) niedokrwistości, skaz krwotocznych, stanów niewydolności szpiku, chorób nowotworowych wieku dziecięcego, w tym guzów litych typowych dla wieku dziecięcego, 5) ostrych i przewlekłych bólów brzucha, wymiotów, biegunek, zaparc, krwawień z przewodu pokarmowego, choroby wrzodowej, nieswoistych chorób jelit, chorób trzustki, cholestaz i chorób wątroby oraz innych chorób nabytych i wad wrodzonych przewodu pokarmowego, 6) zakażeń układu moczowego, kamicy nerkowej, ostrej i przewlekłej niewydolności nerek, ostrych i przewlekłych zapaleń nerek, chorób układowych nerek, zaburzeń oddawania moczu, choroby refluksowej pęcherzowo-moczowodowej, 7) zaburzeń wzrastania, chorób tarczycy i przytarczyc, chorób nadnerczy, cukrzycy, otyłości, zaburzeń dojrzewania i funkcji gonad, 8) mózgowego porażenia dziecięcego, zapaleń mózgu i opon mózgowo-rdzeniowych, padaczki, 9) najczęstszych chorób zakaźnych wieku dziecięcego, 10) zespołów genetycznych, 11) chorób tkanki łącznej, gorączki reumatycznej, młodzieńczego zapalenia stawów, tocznia układowego, zapalenia skórno-mięśniowego	P7U_W, P7S_WG
E.W30	pojęcie niepełnosprawności i inwalidztwa	P7U_W, P7S_WG
E.W31	rolę rehabilitacji medycznej i metody w niej stosowane	P7U_W, P7S_WG
E.W32	podstawowe zagadnienia profilaktyki oraz zasady postępowania w przypadku ekspozycji zawodowej na czynniki niebezpieczne i szkodliwe	P7U_W, P7S_WG
E.W33	zasady postępowania w przypadku wykrycia choroby zakaźnej	P7U_W, P7S_WG
E.W34	przyczyny, objawy, zasady diagnozowania i postępowania terapeutycznego oraz profilaktycznego w najczęstszych chorobach bakteryjnych, wirusowych, pasożytniczych i grzybicach, w tym zakażeniach pneumokokowych, wirusowym zapaleniu wątroby, zespole nabytego niedoboru odporności (AIDS), sepsie i zakażeniach szpitalnych	P7U_W, P7S_WG
E.W35	podstawowe cechy, uwarunkowania środowiskowe i epidemiologiczne najczęstszych chorób skóry	P7U_W, P7S_WG
E.W36	przyczyny, objawy, zasady diagnozowania i postępowania terapeutycznego w najczęstszych chorobach przenoszonych drogą płciową	P7U_W, P7S_WG
E.W37	przyczyny, objawy, zasady diagnozowania i postępowania terapeutycznego w najczęstszych chorobach dziedzicznych	P7U_W, P7S_WG
E.W38	przyczyny, objawy, zasady diagnozowania i postępowania terapeutycznego w najczęstszych chorobach i specyficznych problemach w praktyce lekarza rodzinnego	P7U_W, P7S_WG
E.W39	rodzaje materiałów biologicznych wykorzystywanych w diagnostyce laboratoryjnej i zasady pobierania materiału do badań	P7U_W, P7S_WG
E.W4	zagadnienia dziecka maltretowanego i wykorzystywania seksualnego, upośledzenia umysłowego oraz zaburzeń zachowania – psychoz, uzależnień, zaburzeń odżywiania i wydalania u dzieci	P7U_W, P7S_WG
E.W40	podstawy teoretyczne i praktyczne diagnostyki laboratoryjnej	P7U_W, P7S_WG
E.W41	możliwości i ograniczenia badań laboratoryjnych w stanach nagłych	P7U_W, P7S_WG
E.W42	wskazania do wdrożenia terapii monitorowanej	P7U_W, P7S_WG
E.W43	podstawowe pojęcia farmakoekonomiczne	P7S_WK
E.W44	efekty zdrowotne systematycznej aktywności ruchowej dzieci i młodzieży oraz aktywności ruchowej dorosłych w prewencji wybranych chorób	P7U_W, P7S_WG

Kod	Treść	PRK
E.W45	specyfikę badania w zakresie medycyny sportowej z uwzględnieniem prób zdolności wysiłkowych. Zna zasady orzecznictwa lekarskiego u sportowców dzieci i młodzieży oraz dorosłych	P7U_W, P7S_WG
E.W46	specyficzne schorzenia związane z aktywnością fizyczną i wyczynowym współzawodnictwem, także w sporcie niepełnosprawnych oraz u dziewcząt i kobiet	P7U_W, P7S_WG
E.W47	zasady żywienia osób aktywnych fizycznie oraz sportowców. Opisuje różnicę między dopingiem a wspomaganiami	P7U_W, P7S_WG
E.W48	problemy epidemiologiczne chorób zakaźnych na świecie i w Polsce	P7U_W, P7S_WG
E.W49	przyczyny i objawy a) zakażenia HIV i nabytego zespołu niedoboru odporności b) zakażenia wirusami hepatotropowymi HAV, HBV, HCV c) chorób odkleszczowych d) chorób odzwierzęcych e) zakażeń beztlenowcowych f) grzybic narządowych g) chorób zakaźnych wieku dziecięcego h) gorączek nieznanego pochodzenia i) posocznicy i wstrząsu septycznego j) schorzeń infekcyjnych ośrodkowego układu nerwowego k) tężca i zatrucia jadem kiełbasianym l) wybranych chorób tropikalnych m) ostrych zakażeń przewodu pokarmowego n) grypy i SARS	P7U_W, P7S_WG
E.W5	podstawowe sposoby diagnostyki i terapii płodu	P7U_W, P7S_WG
E.W50	objawy i zasady postępowanie w chorobach zakaźnych stanowiących bezpośrednie zagrożenia życia	P7U_W, P7S_WG
E.W51	zasady immunoprofilaktyki chorób zakaźnych	P7U_W, P7S_WG
E.W52	zasady diagnostyki chorób zakaźnych i potrafi zinterpretować wyniki	P7U_W, P7S_WG
E.W53	podstawy terapii wybranych chorób infekcyjnych a) antybiotykoterapia wybranych zakażeń bakteryjnych b) stosowanie leków antyretrowirusowych w zakażeniu HIV c) leczenie przewlekłego WZW typu B i C d) stosowanie leków antywirusowych w wybranych sytuacjach klinicznych	P7U_W, P7S_WG
E.W54	wskazania i zasady wykonywania punkcji lędźwiowej i asystuje przy wykonywaniu zabiegu	P7U_W, P7S_WG
E.W55	wskazania i zasady wykonywania biopsji wątroby i asystuje przy wykonywaniu zabiegu	P7U_W, P7S_WG
E.W56	objawy, rozumie etiologię, zasady leczenia i umie nawiązać kontakt terapeutyczny z pacjentami z najczęstszymi zaburzeniami: a) lękowymi, pod postacią somatyczną i innymi nerwicowymi b) zaburzeniami pourazowymi c) zaburzeniami osobowości i zachowania dorosłych	P7U_W, P7S_WG
E.W57	zasady realizowania dialogu psychoterapeutycznego i rodzaje interwencji terapeutycznych	P7U_W, P7S_WG
E.W58	podstawowe techniki psychoterapeutyczne i zasady łączenia psychoterapii z farmakoterapią	P7U_W, P7S_WG
E.W6	najczęściej występujące stany zagrożenia życia u dzieci i zasady postępowania w tych stanach	P7U_W, P7S_WG

Kod	Treść	PRK
E.W7	przyczyny, objawy, zasady diagnozowania i postępowania terapeutycznego w odniesieniu do najczęstszych chorób wewnętrznych występujących u osób dorosłych oraz ich powikłań: 1) chorób układu krążenia, w tym choroby niedokrwiennej serca, wad serca, chorób wsierdza, mięśnia serca, osierdza, niewydolności serca (ostrej i przewlekłej), chorób naczyń tętniczych i żylnych, nadciśnienia tętniczego - pierwotnego i wtórnego, nadciśnienia płucnego, 2) chorób układu oddechowego, w tym chorób dróg oddechowych, przewlekłej obturacyjnej choroby płuc, astmy oskrzelowej, rozstrzenia oskrzeli, mukowiscydozy, zakażeń układu oddechowego, chorób śródmiąższowych płuc, opłucnej, śródpiersia, obturacyjnego i centralnego bezdechu sennego, niewydolności oddechowej (ostrej i przewlekłej), nowotworów układu oddechowego, 3) chorób układu pokarmowego, w tym chorób jamy ustnej, przełyku, żołądka i dwunastnicy, jelit, trzustki, wątroby, dróg żółciowych i pęcherzyka żółciowego, 4) chorób układu wydzielnego wewnętrznego, w tym chorób podwzgórza i przysadki, tarczycy, przystarczyc, kory i rdzenia nadnerczy, jajników i jąder oraz guzów neuroendokrynych, zespołów wielogruzołowych, różnych typów cukrzycy i zespołu metabolicznego - hipoglikemii, otyłości, dyslipidemii, 5) chorób nerek i dróg moczowych, w tym ostrych i przewlekłych niewydolności nerek, chorób kłębuszków nerkowych i śródmiąższowych nerek, torbieli nerek, kamicy nerkowej, zakażeń układu moczowego, nowotworów układu moczowego, w szczególności pęcherza moczowego i nerki, 6) chorób układu krwiotwórczego, w tym aplazji szpiku, niedokrwistości, granulocytopenii i agranulocytozy, małopłytkowości, białaczek ostrych, nowotworów mieloproliferacyjnych i mielodysplastyczno-mieloproliferacyjnych, zespołów mielodysplastycznych, nowotworów z dojrzałych limfocytów B i T, szkodliwych, trombofilii, stanów bezpośredniego zagrożenia życia w hematologii, zaburzeń krwi w chorobach innych narządów, 7) chorób reumatycznych, w tym chorób układowych tkanki łącznej, układowych zapaleń naczyń, zapaleń stawów z zajęciem kręgosłupa, chorób metabolicznych kości, w szczególności osteoporozy i choroby zwyrodnieniowej stawów, dny moczanowej, 8) chorób alergicznych, w tym anafilaksji i wstrząsu anafilaktycznego oraz obrzęku naczynioruchowego, 9) zaburzeń wodno-elektrolitowych i kwasowo-zasadowych: stanów odwodnienia, stanów przewodnienia, zaburzeń gospodarki elektrolitowej, kwasicy i zasadowicy	P7U_W, P7S_WG
E.W8	przebieg i objawy procesu starzenia się oraz zasady całościowej oceny geriatrycznej i opieki interdyscyplinarnej w odniesieniu do pacjenta w podeszłym wieku	P7U_W, P7S_WG
E.W9	przyczyny i podstawowe odrębności w najczęstszych chorobach występujących u osób starszych oraz zasady postępowania w podstawowych zespołach geriatrycznych	P7U_W, P7S_WG

F. Nauki kliniczne zabiegowe

Absolwent zna i rozumie:

Kod	Treść	PRK
F.W1	przyczyny, objawy, zasady diagnozowania i postępowania terapeutycznego w odniesieniu do najczęstszych chorób wymagających interwencji chirurgicznej, z uwzględnieniem odrębności wieku dziecięcego, w tym w szczególności: 1) ostrych i przewlekłych chorób jamy brzusznej, 2) chorób klatki piersiowej, 3) chorób kończyn i głowy, 4) złamań kości i urazów narządów	P7U_W, P7S_WG
F.W10	problematykę współcześnie wykorzystywanych badań obrazowych, w szczególności: 1) symptomatologię radiologiczną podstawowych chorób, 2) metody instrumentalne i techniki obrazowe wykorzystywane do wykonywania zabiegów leczniczych, 3) wskazania, przeciwwskazania i przygotowanie pacjenta do poszczególnych rodzajów badań obrazowych oraz przeciwwskazania do stosowania środków kontrastujących	P7U_W, P7S_WG

Kod	Treść	PRK
F.W11	zagadnienia z zakresu chorób narządu wzroku, w szczególności: 1) przyczyny, objawy, zasady diagnozowania i postępowania terapeutycznego w najczęstszych chorobach okulistycznych, 2) okulistyczne powikłania chorób ogólnoustrojowych wraz z ich okulistyczną symptomatologią oraz prawidłowe metody postępowania w tych przypadkach, 3) postępowanie chirurgiczne w poszczególnych chorobach oka, 4) podstawowe grupy leków stosowanych w okulistyce, ich działania niepożądane i interakcje, 5) grupy leków stosowanych ogólnie, z którymi wiążą się powikłania i przeciwwskazania okulistyczne oraz ich mechanizm	P7U_W, P7S_WG
F.W12	zagadnienia z zakresu laryngologii, foniatrii i audiologii, w tym: 1) przyczyny, przebieg kliniczny, metody leczenia, powikłania i rokowanie w chorobach ucha, nosa, zatok przynosowych, jamy ustnej, gardła i krtani, 2) choroby nerwu twarzowego i wybranych struktur szyi, 3) zasady postępowania diagnostycznego i terapeutycznego w urazach mechanicznych ucha, nosa, krtani i przełyku, 4) zasady postępowania w stanach nagłych w otorynolaryngologii, w szczególności w duszności krtaniowej, 5) zasady postępowania diagnostycznego i terapeutycznego w zaburzeniach słuchu, głosu oraz mowy, 6) zasady postępowania diagnostycznego i terapeutycznego w nowotworach głowy i szyi	P7U_W, P7S_WG
F.W13	przyczyny, objawy, zasady diagnozowania i postępowania terapeutycznego w przypadku najczęstszych chorób ośrodkowego układu nerwowego w zakresie: 1) obrzęku mózgu i jego następstw, ze szczególnym uwzględnieniem stanów nagłych, 2) innych postaci ciasnoty wewnątrzczaszkowej z ich następstwami, 3) urazów czaszkowo-mózgowych, 4) wad naczyniowych centralnego systemu nerwowego, 5) guzów nowotworowych centralnego systemu nerwowego, 6) chorób kręgosłupa i rdzenia kręgowego	P7U_W, P7S_WG
F.W14	w podstawowym zakresie problematykę transplantologii zabiegowej, wskazania do przeszczepienia nieodwracalnie uszkodzonych narządów i tkanek oraz procedury z tym związane	P7U_W, P7S_WG
F.W15	zasady wysuwania podejrzenia i rozpoznawania śmierci mózgu	P7U_W, P7S_WG
F.W16	algorytm postępowania dla poszczególnych stadiów hipotermii przypadkowej oraz hipotermii pourazowej	P7U_W, P7S_WG
F.W17	przyczyny, objawy, zasady diagnozowania oraz postępowania terapeutycznego w odniesieniu do najczęstszych chorób wymagających interwencji chirurgicznej z uwzględnieniem odrębności wieku dziecięcego w tym w szczególności: e) chorób naczyń tętnicznych i żylnych f) chorób układu moczowego g) chorób serca i naczyń krwionośnych serca h) chorób twarzoczaszki, ostrych i przewlekłych schorzeń centralnego systemu nerwowego	P7U_W, P7S_WG
F.W18	najczęstsze powikłania zabiegów wymienionych w punkcie F.W2	P7U_W, P7S_WG
F.W19	najczęstsze powikłania związane ze znieczuleniem, sedacją i okresem okołoperacyjnym	P7U_W, P7S_WG
F.W2	wybrane zagadnienia z zakresu chirurgii dziecięcej, w tym traumatologii i otorynolaryngologii, oraz wady i choroby nabyte będące wskazaniem do leczenia chirurgicznego u dzieci	P7U_W, P7S_WG
F.W20	zasady kwalifikacji, na czym polegają, jak przebiegają i jakie są możliwe powikłania i konsekwencje zabiegów operacyjnych: a) usunięcia wyrostka robaczkowego, pęcherzyka żółciowego b) wycięcia tarczycy, przytarczycy, nadnercza c) wycięcia części i całości żołądka, jelita grubego d) przepuklin brzusznych z wykorzystaniem siatek syntetycznych e) chirurgicznego leczenia otyłości	P7U_W, P7S_WG

Kod	Treść	PRK
F.W21	zasady kwalifikacji, wie na czym polegają, jak przebiegają i jakie są możliwe konsekwencje i powikłania następujących procedur: a) przezskórnej i wewnątrzprzewodowej ultrasonografii narządów jamy brzusznej b) endoskopowych procedur diagnostycznych i leczniczych przewodu pokarmowego c) endoskopowych procedur diagnostycznych i leczniczych dróg oddechowych (bronchoskopii, bronchoskopii z endoskopową USG) d) endoskopowych procedur diagnostycznych i leczniczych układu moczowego (cystoskopii) e) endoskopowych procedur diagnostycznych i leczniczych narządu ruchu (artroskopii) f) badań przesiewowych stosowanych dla wczesnego wykrywania nowotworów przewodu pokarmowego	P7U_W, P7S_WG
F.W3	zasady kwalifikacji do podstawowych zabiegów operacyjnych i inwazyjnych procedur diagnostyczno-leczniczych, zasady ich wykonywania i najczęstsze powikłania	P7U_W, P7S_WG
F.W4	zasady bezpieczeństwa okołoperacyjnego, przygotowania pacjenta do operacji, wykonania znieczulenia ogólnego i miejscowego oraz kontrolowanej sedacji	P7U_W, P7S_WG
F.W5	leczenie pooperacyjne z terapią przeciwbólową i monitorowaniem pooperacyjnym	P7U_W, P7S_WG
F.W6	wskazania i zasady stosowania intensywnej terapii	P7U_W, P7S_WG
F.W7	wytyczne w zakresie resuscytacji krążeniowo-oddechowej noworodków, dzieci i dorosłych	P7U_W, P7S_WG
F.W8	zasady funkcjonowania zintegrowanego systemu Państwowe Ratownictwo Medyczne	P7U_W, P7S_WG
F.W9	funkcje rozrodcze kobiety, zaburzenia z nimi związane i postępowanie diagnostyczne oraz terapeutyczne dotyczące w szczególności: 1) cyklu miesięczkowego i jego zaburzeń, 2) ciąży, 3) porodu fizjologicznego i patologicznego oraz porodu, 4) zapalenia i nowotworów w obrębie narządów płciowych, 5) regulacji urodzeń, 6) menopauzy, 7) podstawowych metod diagnostyki i zabiegów ginekologicznych	P7U_W, P7S_WG

G. Prawne i organizacyjne aspekty medycyny

Absolwent zna i rozumie:

Kod	Treść	PRK
G.W1	metody oceny stanu zdrowia jednostki i populacji, różne systemy klasyfikacji chorób i procedur medycznych	P7S_WK
G.W10	zasady prawa farmaceutycznego	P7U_W, P7S_WK
G.W11	regulacje prawne dotyczące tajemnicy lekarskiej, prowadzenia dokumentacji medycznej, odpowiedzialności karnej, cywilnej i zawodowej lekarza	P7U_W, P7S_WK
G.W12	pojęcie śmierci gwałtownej i nagłego zgonu oraz różnicę między urazem a obrażeniem	P7U_W, P7S_WG
G.W13	podstawy prawne i zasady postępowania lekarza podczas oględzin zwłok na miejscu ich ujawnienia oraz sądowno-lekarskiego badania zwłok	P7U_W, P7S_WK
G.W14	zasady diagnostyki sądowno-lekarskiej i opiniowania w przypadkach dotyczących dzieciobójstwa i rekonstrukcji okoliczności wypadku drogowego	P7U_W, P7S_WK
G.W15	zasady sporządzania opinii w charakterze biegłego w sprawach karnych	P7U_W, P7S_WK
G.W16	zasady opiniowania sądowno-lekarskiego dotyczące zdolności do udziału w czynnościach procesowych, skutku biologicznego oraz uszczerbku na zdrowiu	P7U_W, P7S_WK
G.W17	pojęcie błędu medycznego, najczęstsze przyczyny błędów medycznych i zasady opiniowania w takich przypadkach	P7U_W, P7S_WK
G.W18	zasady pobierania materiału do badań toksykologicznych i hemogenetycznych	P7U_W, P7S_WG
G.W19	sytuacje, w których dochodzi do konfliktów pomiędzy wartościami i zasadami odnoszącymi się do wykonywania zawodu lekarza oraz udzielania świadczeń zdrowotnych, oraz przedstawia uzasadnienie podejmowanych decyzji	P7U_W, P7S_WG

Kod	Treść	PRK
G.W2	sposoby identyfikacji i badania czynników ryzyka, wady i zalety różnego typu badań epidemiologicznych oraz miary świadczące o obecności zależności przyczynowo-skutkowej	P7U_W, P7S_WG
G.W20	podstawy prawne i zasady przeprowadzania sądowo – lekarskiej sekcji zwłok, stosowania w określonych przypadkach dodatkowych technik sekcyjnych oraz pośmiertnych badań obrazowych	P7U_W, P7S_WK
G.W21	podstawy prawne i zasady postępowania lekarza podczas oględzin zwłok na miejscu ich ujawnienia oraz sądowo-lekarskiego badania zwłok	P7U_W, P7S_WK
G.W22	zasady szacowania czasu zgonu na podstawie znamion śmierci	P7U_W, P7S_WG
G.W23	znaczenie ksenobiotyków środowiskowych z uwzględnieniem ich egzogennej transformacji i roli biomarkerów (ekspozycji, skutków, wrażliwości) w diagnostyce chorób środowiskowych i zawodowych	P7U_W, P7S_WG
G.W3	epidemiologię chorób zakaźnych i przewlekłych, sposoby zapobiegania ich występowaniu na różnych etapach naturalnej historii choroby oraz rolę nadzoru epidemiologicznego	P7U_W, P7S_WG
G.W4	pojęcie zdrowia publicznego, jego cele, zadania oraz strukturę i organizację systemu ochrony zdrowia na poziomie krajowym i światowym, a także wpływ uwarunkowań ekonomicznych na możliwości ochrony zdrowia	P7S_WK
G.W5	regulacje prawne dotyczące udzielania świadczeń zdrowotnych, praw pacjenta, podstaw wykonywania zawodu lekarza i funkcjonowania samorządu lekarskiego	P7U_W, P7S_WK
G.W6	podstawowe regulacje prawne dotyczące organizacji i finansowania służby zdrowia, powszechnego ubezpieczenia zdrowotnego oraz zasady organizacji jednostek wykonujących działalność leczniczą	P7U_W, P7S_WK
G.W7	obowiązki prawne lekarza w zakresie stwierdzenia zgonu	P7U_W, P7S_WK
G.W8	regulacje prawne i podstawowe metody dotyczące eksperymentu medycznego oraz prowadzenia innych badań medycznych, z uwzględnieniem podstawowych metod analizy danych	P7U_W, P7S_WK
G.W9	regulacje prawne dotyczące przeszczepów, sztucznej prokreacji, aborcji, zabiegów estetycznych, leczenia paliatywnego, chorób psychicznych	P7U_W, P7S_WK

Umiejętności

Ogólne

Absolwent potrafi:

Kod	Treść	PRK
O.U1	rozpoznać problemy medyczne i określić priorytety w zakresie postępowania lekarskiego	P7U_U, P7S_UW
O.U2	rozpoznać stany zagrażające życiu i wymagające natychmiastowej interwencji lekarskiej	P7U_U, P7S_UW
O.U3	zaplanować postępowanie diagnostyczne i zinterpretować jego wyniki	P7U_U, P7S_UW, P7S_UU
O.U4	wdrożyć właściwe i bezpieczne postępowanie terapeutyczne oraz przewidzieć jego skutki	P7U_U, P7S_UW

Kod	Treść	PRK
O.U5	planować własną aktywność edukacyjną i stale dokształcać się w celu aktualizacji wiedzy	P7U_U, P7S_UW, P7S_UU
O.U6	inspirować proces uczenia się innych osób	P7U_U, P7S_UW
O.U7	komunikować się z pacjentem i jego rodziną w atmosferze zaufania, z uwzględnieniem potrzeb pacjenta	P7S_UK
O.U8	komunikować się ze współpracownikami w zespole i dzielić się wiedzą	P7S_UK
O.U9	krytycznie oceniać wyniki badań naukowych i odpowiednio uzasadniać stanowisko	P7U_U, P7S_UW

Szczegółowe

A. Nauki morfologiczne

Absolwent potrafi:

Kod	Treść	PRK
A.U1	obsługiwać mikroskop optyczny, w tym w zakresie korzystania z immersji	P7U_U, P7S_UW
A.U2	rozpoznawać w obrazach z mikroskopu optycznego lub elektronowego struktury histologiczne odpowiadające narządom, tkankom, komórkom i strukturom komórkowym, dokonywać opisu i interpretować ich budowę oraz relacje między budową i funkcją	P7U_U, P7S_UW
A.U3	wyjaśniać anatomiczne podstawy badania przedmiotowego	P7U_U, P7S_UW
A.U4	wnioskować o relacjach między strukturami anatomicznymi na podstawie przyżyciowych badań diagnostycznych, w szczególności z zakresu radiologii (zdjęcia prześwietlowe, badania z użyciem środków kontrastowych, tomografia komputerowa i magnetyczny rezonans jądrowy)	P7U_U, P7S_UW
A.U5	posługiwać się w mowie i w piśmie mianownictwem anatomicznym, histologicznym oraz embriologicznym	P7U_U, P7S_UW

B. Naukowe podstawy medycyny

Absolwent potrafi:

Kod	Treść	PRK
B.U1	wykorzystywać znajomość praw fizyki do wyjaśnienia wpływu czynników zewnętrznych, takich jak temperatura, przyspieszenie, ciśnienie, pole elektromagnetyczne i promieniowanie jonizujące, na organizm i jego elementy	P7U_U, P7S_UW
B.U10	korzystać z baz danych, w tym internetowych, i wyszukiwać potrzebne informacje za pomocą dostępnych narzędzi	P7U_U, P7S_UW
B.U11	dobierać odpowiedni test statystyczny, przeprowadzać podstawowe analizy statystyczne, posługiwać się odpowiednimi metodami przedstawiania wyników, interpretować wyniki metaanalizy i przeprowadzać analizę prawdopodobieństwa przeżycia	P7U_U, P7S_UW
B.U12	wyjaśniać różnice między badaniami prospektywnymi i retrospektywnymi, randomizowanymi i kliniczno-kontrolnymi, opisami przypadków i badaniami eksperymentalnymi oraz szeregować je według wiarygodności i jakości dowodów naukowych	P7U_U, P7S_UW
B.U13	planować i wykonywać proste badania naukowe oraz interpretować wyniki i wyciągać wnioski	P7U_U, P7S_UW, P7S_UU
B.U14	wskazać związek między czynnikami zaburzającymi stan równowagi procesów biologicznych a zmianami fizjologicznymi i patofizjologicznymi	P7U_U, P7S_UW

Kod	Treść	PRK
B.U15	zidentyfikować źródła sygnałów elektrycznych w organizmie	P7U_U, P7S_UW
B.U16	dokonać analizy patofizjologicznej wybranych przypadków klinicznych zgodnie z regułą PBCA (Problem Based Case Analysis)	P7U_U, P7S_UW
B.U17	wykonać i zinterpretować antropometryczne pomiary stanu odżywienia, umie zebrać wywiad żywieniowy i dokonać oceny ilościowej i jakościowej spożycia (przy uwzględnieniu suplementów diety) z wykorzystaniem żywieniowego programu komputerowego	P7U_U, P7S_UW
B.U18	ocenić wiarygodność badania klinicznego	P7U_U, P7S_UW
B.U19	zrozumieć pojęcia opisujące siłę działania danej interwencji w badaniu	P7U_U, P7S_UW
B.U2	oceniać szkodliwość dawki promieniowania jonizującego i stosować się do zasad ochrony radiologicznej	P7U_U, P7S_UW
B.U20	zrozumieć pojęcie metaanalizy i sposób przedstawiania jej wyników	P7U_U, P7S_UW
B.U21	korzystać z internetowych bibliotek zdjęć, nagrań audio i wideo	P7U_U, P7S_UW
B.U22	korzystać ze sprzętu do odtwarzania trójwymiarowych obrazów wideo	P7U_U, P7S_UW
B.U23	korzystać z internetowych baz genomu ludzkiego	P7U_U, P7S_UW
B.U24	korzystać z internetowych baz danych o jednostkach chorobowych o podłożu genetycznym	P7U_U, P7S_UW
B.U25	posługiwać się narzędziem telemedycznym do celów telekonsultacji	P7U_U, P7S_UW
B.U26	korzystać z różnego typu symulatorów komputerowych i narzędzi e-nauczania do celów edukacyjnych ze szczególnym uwzględnieniem wirtualnych pacjentów	P7U_U, P7S_UW
B.U27	korzystać z symulatorów komputerowych do wspomaganie procesu podejmowania decyzji medycznych	P7U_U, P7S_UW
B.U28	przedstawić wiedzę ekspercką za pomocą prostych informatycznych technik reprezentacji wiedzy jak np. diagram blokowy lub baza reguł	P7U_U, P7S_UW
B.U29	zabezpieczyć dane kliniczne przed niepożądanym dostępem	P7U_U, P7S_UW
B.U3	obliczać stężenia molowe i procentowe związków oraz stężenia substancji w roztworach izosmotycznych, jedno- i wieloskładnikowych	P7U_U, P7S_UW
B.U30	korzystać z platform e-nauczania	P7U_U, P7S_UW
B.U31	przygotować materiały do prezentacji on-line	P7U_U, P7S_UW
B.U4	obliczać rozpuszczalność związków nieorganicznych, określać chemiczne podłoże rozpuszczalności związków organicznych lub jej braku oraz jej praktyczne znaczenie dla dietytyki i terapii	P7U_U, P7S_UW
B.U5	określać pH roztworu i wpływ zmian pH na związki nieorganiczne i organiczne	P7U_U, P7S_UW
B.U6	przewidywać kierunek procesów biochemicznych w zależności od stanu energetycznego komórek	P7U_U, P7S_UW
B.U7	wykonywać proste testy czynnościowe oceniające organizm człowieka jako układ regulacji stabilnej (testy obciążeniowe, wysiłkowe) i interpretować dane liczbowe dotyczące podstawowych zmiennych fizjologicznych	P7U_U, P7S_UW
B.U8	posługiwać się podstawowymi technikami laboratoryjnymi, takimi jak analiza jakościowa, miareczkowanie, kolorymetria, pehametria, chromatografia, elektroforeza białek i kwasów nukleinowych	P7U_U, P7S_UW
B.U9	obsługiwać proste przyrządy pomiarowe i oceniać dokładność wykonywanych pomiarów	P7U_U, P7S_UW

C. Nauki przedkliniczne

Absolwent potrafi:

Kod	Treść	PRK
C.U1	analizować krzyżówki genetyczne i rodowody cech oraz chorób człowieka, a także oceniać ryzyko urodzenia się dziecka z aberracjami chromosomowymi	P7U_U, P7S_UW
C.U10	interpretować wyniki badań mikrobiologicznych	P7U_U, P7S_UW
C.U11	powiązać obrazy uszkodzeń tkankowych i narządowych z objawami klinicznymi choroby, wywiadem i wynikami oznaczeń laboratoryjnych	P7U_U, P7S_UW
C.U12	analizować zjawiska odczynowe, obronne i przystosowawcze oraz zaburzenia regulacji wywoływane przez czynnik etiologiczny	P7U_U, P7S_UW
C.U13	wykonywać proste obliczenia farmakokinetyczne	P7U_U, P7S_UW
C.U14	dobierać leki w odpowiednich dawkach w celu korygowania zjawisk patologicznych w ustroju i w poszczególnych narządach	P7U_U, P7S_UW
C.U15	projektować schematy racjonalnej chemioterapii zakażeń, empirycznej i celowanej	P7U_U, P7S_UW
C.U16	przygotowywać zapisy wszystkich form recepturowych substancji leczniczych	P7U_U, P7S_UW
C.U17	posługiwać się informatorami farmaceutycznymi i bazami danych o produktach leczniczych	P7U_U, P7S_UW
C.U18	szacować niebezpieczeństwo toksykologiczne w określonych grupach wiekowych i w stanach niewydolności wątroby i nerek oraz zapobiegać zatruciom lekami	P7U_U, P7S_UW
C.U19	interpretować wyniki badań toksykologicznych	P7U_U, P7S_UW
C.U2	identyfikować wskazania do wykonania badań prenatalnych	P7U_U, P7S_UW
C.U20	opisywać zmiany w funkcjonowaniu organizmu w sytuacji zaburzenia homeostazy, w szczególności określać jego zintegrowaną odpowiedź na wysiłek fizyczny, ekspozycję na wysoką i niską temperaturę, utratę krwi lub wody, nagłą pionizację, przejście od stanu snu do stanu czuwania	P7U_U, P7S_UW
C.U3	podejmować decyzje o potrzebie wykonania badań cytogenetycznych i molekularnych	P7U_U, P7S_UW
C.U4	wykonywać pomiary morfometryczne, analizować morfogram i zapisywać kariotypy chorób	P7U_U, P7S_UW
C.U5	szacować ryzyko ujawnienia się danej choroby u potomstwa w oparciu o predyspozycje rodzinne i wpływ czynników środowiskowych	P7U_U, P7S_UW
C.U6	oceniać zagrożenia środowiskowe i posługiwać się podstawowymi metodami pozwalającymi na wykrycie obecności czynników szkodliwych (biologicznych i chemicznych) w biosferze	P7U_U, P7S_UW
C.U7	rozpoznawać najczęściej spotykane pasożyty człowieka na podstawie ich budowy, cykli życiowych i objawów chorobowych	P7U_U, P7S_UW
C.U8	posługiwać się reakcją antygen – przeciwciało w aktualnych modyfikacjach i technikach dla diagnostyki chorób zakaźnych, alergicznych, autoimmunizacyjnych i nowotworowych oraz chorób krwi	P7U_U, P7S_UW
C.U9	przygotowywać preparaty i rozpoznawać patogeny pod mikroskopem	P7U_U, P7S_UW

D. Nauki behawioralne i społeczne z elementami profesjonalizmu

Absolwent potrafi:

Kod	Treść	PRK
D.U1	uwzględniać w procesie postępowania terapeutycznego subiektywne potrzeby i oczekiwania pacjenta wynikające z uwarunkowań społeczno-kulturowych	P7U_U, P7S_UW
D.U10	identyfikować czynniki ryzyka wystąpienia przemocy, rozpoznawać przemoc i odpowiednio reagować	P7U_U, P7S_UW
D.U11	stosować w podstawowym zakresie psychologiczne interwencje motywujące i wspierające	P7U_U, P7S_UW
D.U12	komunikować się ze współpracownikami udzielając konstruktywnej informacji zwrotnej i wsparcia	P7U_U, P7S_UW, P7S_UK
D.U13	przestrzegać wzorców etycznych w działaniach zawodowych	P7U_U, P7S_UW
D.U14	rozpoznawać etyczny wymiar decyzji medycznych i odróżniać aspekty faktualne od normatywnych	P7U_U, P7S_UW
D.U15	przestrzegać praw pacjenta	P7U_U, P7S_UW
D.U16	wykazywać odpowiedzialność za podnoszenie swoich kwalifikacji i przekazywanie wiedzy innym	P7U_U, P7S_UW
D.U17	krytycznie analizować piśmiennictwo medyczne, w tym w języku angielskim, i wyciągać wnioski	P7U_U, P7S_UW
D.U18	porozumiewać się z pacjentem w jednym z języków obcych na poziomie B2+ Europejskiego Systemu Opisu Kształcenia Językowego	P7U_U, P7S_UW
D.U19	podejmować działania zmierzające do poprawy jakości życia pacjenta i zapobiegania jej pogorszeniu się w przyszłości	P7U_U, P7S_UW
D.U2	dostrzegać oznaki zachowań antyzdrowotnych i autodestrukcyjnych oraz właściwie na nie reagować	P7U_U, P7S_UW
D.U20	rozpoznawać i stosować środki przewidziane normatywnie, gdy istnieje konieczność podjęcia działań lekarskich bez zgody lub z zastosowaniem przymusu	P7U_U, P7S_UW
D.U21	wykazywać umiejętność pracy w zespole wieloprofesjonalnym, w środowisku wielokulturowym i wielonarodowościowym	P7U_U, P7S_UW
D.U22	wykazywać odpowiedzialność za swój rozwój zawodowy, wkład w dalszy rozwój nauk medycznych, przekazywanie swojej wiedzy innym	P7U_U, P7S_UW
D.U3	wybierać takie leczenie, które minimalizuje konsekwencje społeczne dla pacjenta	P7U_U, P7S_UW
D.U4	budować atmosferę zaufania podczas całego procesu diagnostycznego i leczenia	P7U_U, P7S_UW
D.U5	przeprowadzać rozmowę z pacjentem dorosłym, dzieckiem i rodziną z zastosowaniem techniki aktywnego słuchania i wyrażania empatii oraz rozmawiać z pacjentem o jego sytuacji życiowej	P7U_U, P7S_UW
D.U6	informować pacjenta o celu, przebiegu i ewentualnym ryzyku proponowanych działań diagnostycznych lub terapeutycznych oraz uzyskać jego świadomą zgodę na podjęcie tych działań	P7U_U, P7S_UW
D.U7	angażować pacjenta w proces terapeutyczny	P7U_U, P7S_UW
D.U8	przekazać pacjentowi i jego rodzinie informacje o niekorzystnym rokowaniu	P7U_U, P7S_UW
D.U9	udzielać porad w kwestii przestrzegania zaleceń terapeutycznych i prozdrowotnego trybu życia	P7U_U, P7S_UW

E. Nauki kliniczne niezabiegowe

Absolwent potrafi:

Kod	Treść	PRK
E.U1	przeprowadzać wywiad lekarski z pacjentem dorosłym	P7U_U, P7S_UW
E.U10	oceniać stopień zaawansowania dojrzewania płciowego	P7U_U, P7S_UW
E.U11	przeprowadzać badania bilansowe	P7U_U, P7S_UW
E.U12	przeprowadzać diagnostykę różnicową najczęstszych chorób osób dorosłych i dzieci	P7U_U, P7S_UW
E.U13	oceniać i opisywać stan somatyczny oraz psychiczny pacjenta	P7U_U, P7S_UW
E.U14	rozpoznawać stany bezpośredniego zagrożenia życia	P7U_U, P7S_UW
E.U15	rozpoznawać stan po spożyciu alkoholu, narkotyków i innych używek	P7U_U, P7S_UW
E.U16	planować postępowanie diagnostyczne, terapeutyczne i profilaktyczne	P7U_U, P7S_UW, P7S_UU
E.U17	przeprowadzać analizę ewentualnych działań niepożądanych poszczególnych leków i interakcji między nimi	P7U_U, P7S_UW
E.U18	proponować indywidualizację obowiązujących wytycznych terapeutycznych i inne metody leczenia wobec nieskuteczności albo przeciwwskazań do terapii standardowej	P7U_U, P7S_UW
E.U19	rozpoznawać objawy lekozależności i proponować postępowanie lecznicze	P7U_U, P7S_UW
E.U2	przeprowadzać wywiad lekarski z dzieckiem i jego rodziną	P7U_U, P7S_UW
E.U20	kwalifikować pacjenta do leczenia domowego i szpitalnego	P7U_U, P7S_UW
E.U21	rozpoznawać stany, w których czas dalszego trwania życia, stan funkcjonalny lub preferencje pacjenta ograniczają postępowanie zgodne z wytycznymi określonymi dla danej choroby	P7U_U, P7S_UW
E.U22	dokonywać oceny funkcjonalnej pacjenta z niepełnosprawnością	P7U_U, P7S_UW
E.U23	proponować program rehabilitacji w najczęstszych chorobach	P7U_U, P7S_UW
E.U24	interpretować wyniki badań laboratoryjnych i identyfikować przyczyny odchyłań od normy	P7U_U, P7S_UW
E.U25	stosować leczenie żywieniowe, z uwzględnieniem żywienia dojelitowego i pozajelitowego	P7U_U, P7S_UW
E.U26	planować postępowanie w przypadku ekspozycji na zakażenie przenoszone drogą krwi	P7U_U, P7S_UW
E.U27	kwalifikować pacjenta do szczepień	P7U_U, P7S_UW
E.U28	pobierać i zabezpieczać materiał do badań wykorzystywanych w diagnostyce laboratoryjnej	P7U_U, P7S_UW
E.U29	wykonywać podstawowe procedury i zabiegi medyczne w tym: 1) pomiar temperatury ciała (powierzchniowej oraz głębokiej), pomiar tętna, nieinwazyjny pomiar ciśnienia tętniczego, 2) monitorowanie parametrów życiowych przy pomocy kardiomonitora, pulsoksymetrię, 3) badanie spirometryczne, leczenie tlenem, wentylację wspomaganą i zastępczą, 4) wprowadzenie rurki ustno-gardłowej, 5) wstrzyknięcia dożylnie, domięśniowe i podskórne, kaniulację żył obwodowych, pobieranie obwodowej krwi żyłnej, pobieranie krwi na posiew, pobieranie krwi tętniczej, pobieranie arterializowanej krwi włośniczkowej, 6) pobieranie wymazów z nosa, gardła i skóry, 7) cewnikowanie pęcherza moczowego u kobiet i mężczyzn, zgłębnikowanie żołądka, płukanie żołądka, enemę, 8) standardowy elektrokardiogram spoczynkowy wraz z interpretacją, kardiowersję elektryczną i defibrylację serca, 9) proste testy paskowe i pomiar stężenia glukozy we krwi	P7U_U, P7S_UW
E.U3	przeprowadzać pełne i ukierunkowane badanie fizykalne pacjenta dorosłego	P7U_U, P7S_UW

Kod	Treść	PRK
E.U30	asystować przy przeprowadzaniu następujących procedur i zabiegów lekarskich: 1) przetaczaniu preparatów krwi i krwiopochodnych, 2) drenażu jamy opłucnowej, 3) nakłuciu worka osierdziowego, 4) nakłuciu jamy otrzewnowej, 5) nakłuciu lędźwiowym, 6) biopsji cienkoigłowej, 7) testach naskórkowych, 8) próbach śródskórnych i skaryfikacyjnych oraz interpretować ich wyniki	P7U_U, P7S_UW
E.U31	interpretować charakterystyki farmaceutyczne produktów leczniczych i krytycznie oceniać materiały reklamowe dotyczące leków	P7U_U, P7S_UW
E.U32	planować konsultacje specjalistyczne	P7U_U, P7S_UW, P7S_UU
E.U33	wdrażać podstawowe postępowanie lecznicze w ostrych zatruciach	P7U_U, P7S_UW
E.U34	monitorować stan pacjenta zatrutego substancjami chemicznymi lub lekami	P7U_U, P7S_UW
E.U35	oceniać odleżyny i stosować odpowiednie opatrunki	P7U_U, P7S_UW
E.U36	postępować w przypadku urazów (zakładać opatrunek lub unieruchomienie, zaopatrywać i zszywać ranę)	P7U_U, P7S_UW
E.U37	rozpoznać agonię pacjenta i stwierdzić jego zgon	P7U_U, P7S_UW
E.U38	przewodzą dokumentację medyczną pacjenta	P7U_U, P7S_UW
E.U39	asystować przy przeprowadzeniu następujących procedur i zabiegów lekarskich: i) biopsji aspiracyjnej szpiku kostnego	P7U_U, P7S_UW
E.U4	przeprowadzać badanie fizykalne dziecka w każdym wieku	P7U_U, P7S_UW
E.U40	dobierać odpowiednią aktywność fizyczną w okresie rozwojowym dzieci i młodzieży oraz zaproponuje trening zdrowotny w wieku dorosłym zarówno w zdrowiu i chorobie	P7U_U, P7S_UW
E.U41	przeprowadzić kwalifikacje dzieci i młodzieży do wf i uprawiania sportu oraz dorosłych do odpowiedniej aktywności fizycznej. Interpretuje testy zdolności wysiłkowych	P7U_U, P7S_UW
E.U42	rozpoznawać stan przetrenowania oraz przeciążenia narządów wewnętrznych i narządu ruchu związane z uprawianiem sportu. Umie zapobiegać oraz postępować w odwodnieniu oraz w zaburzeniach wynikających z wysiłku fizycznego w różnych warunkowych środowiskowych	P7U_U, P7S_UW
E.U43	zaproponować właściwe postępowanie żywieniowe osobom w wieku rozwojowym i dorosłym obciążonym intensywnym wysiłkiem Interpretuje środki zabronione w sporcie. Identyfikuje rodzaje i środki wspomaganie	P7U_U, P7S_UW
E.U44	zdefiniować pojęcia medycyny nuklearnej, radiofarmacji oraz radioimmunologii	P7U_U, P7S_UW
E.U45	opisać procesy fizyczne będące podstawą obrazowania z zastosowaniem radiofarmaceutyków	P7U_U, P7S_UW
E.U46	wymienić radiofarmaceutyki wykorzystywane do diagnostyki scyntygraficznej oraz PET, podać wskazania do wykonania różnych typów badań diagnostycznych i zasady interpretacji uzyskanych obrazów	P7U_U, P7S_UW
E.U47	wymienić izotopy promieniotwórcze wykorzystywane do terapii w medycynie nuklearnej oraz uzasadnić swój wybór, a także wymienić podstawowe terapie izotopowe, wskazania do zastosowania terapii radionuklidowej, sposobu oceny skuteczności terapii, możliwe powikłania po terapii	P7U_U, P7S_UW
E.U48	wymienić sposoby praktycznej realizacji zasady ochrony radiologicznej ALARA w odniesieniu do medycyny nuklearnej	P7U_U, P7S_UW
E.U49	wykonać rozmazy w kierunku malarii	P7U_U, P7S_UW
E.U5	przeprowadzać badanie psychiatryczne	P7U_U, P7S_UW

Kod	Treść	PRK
E.U50	negocjować skierowanie pacjenta do psychoterapii i empatycznego wspierania pacjenta podczas kryzysu	P7U_U, P7S_UW
E.U51	zrozumieć znaczenie oraz organizację grup wsparcia dla chorych przewlekle i ich rodzin, oraz grup Balinta dla personelu medycznego	P7U_U, P7S_UW
E.U6	przeprowadzać orientacyjne badanie słuchu i pola widzenia oraz badanie otoskopowe	P7U_U, P7S_UW
E.U7	oceniać stan ogólny, stan przytomności i świadomości pacjenta	P7U_U, P7S_UW
E.U8	oceniać stan noworodka w skali Apgar i jego dojrzałość oraz badać odruchy noworodkowe	P7U_U, P7S_UW
E.U9	zestawiać pomiary antropometryczne i ciśnienia krwi z danymi na siatkach centylowych	P7U_U, P7S_UW

F. Nauki kliniczne zabiegowe

Absolwent potrafi:

Kod	Treść	PRK
F.U1	asystować przy typowym zabiegu operacyjnym, przygotowywać pole operacyjne i znieczulać miejscowo okolicę operowaną	P7U_U, P7S_UW
F.U10	wykonywać podstawowe zabiegi resuscytacyjne z użyciem automatycznego defibrylatora zewnętrznego i inne czynności ratunkowe oraz udzielać pierwszej pomocy	P7U_U, P7S_UW
F.U11	działać zgodnie z algorytmem zaawansowanych czynności resuscytacyjnych	P7U_U, P7S_UW
F.U12	monitorować stan pacjenta w okresie pooperacyjnym w oparciu o podstawowe parametry życiowe	P7U_U, P7S_UW
F.U13	rozpoznawać objawy podmiotowe i przedmiotowe świadczące o nieprawidłowym przebiegu ciąży (nieprawidłowe krwawienia, czynność skurczową macicy)	P7U_U, P7S_UW
F.U14	interpretować wyniki badania fizykalnego ciężarnej (ciśnienie tętnicze, czynność serca matki i płodu) i wyniki badań laboratoryjnych świadczących o patologii ciąży	P7U_U, P7S_UW
F.U15	interpretować zapis kardiokografii (KTG)	P7U_U, P7S_UW
F.U16	rozpoznawać rozpoczynający się poród i nieprawidłowy czas jego trwania	P7U_U, P7S_UW
F.U17	interpretować objawy podmiotowe i przedmiotowe w czasie połogu	P7U_U, P7S_UW
F.U18	ustalać zalecenia, wskazania i przeciwwskazania dotyczące stosowania metod antykoncepcji	P7U_U, P7S_UW
F.U19	przeprowadzać okulistyczne badania przesiewowe	P7U_U, P7S_UW
F.U2	posługiwać się podstawowymi narzędziami chirurgicznymi	P7U_U, P7S_UW
F.U20	rozpoznawać stany okulistyczne wymagające natychmiastowej pomocy specjalistycznej i udzielać wstępnej, kwalifikowanej pomocy w przypadkach urazów fizycznych i chemicznych oka	P7U_U, P7S_UW
F.U21	oceniać stan pacjenta nieprzytomnego zgodnie z międzynarodowymi skalami punktowymi	P7U_U, P7S_UW
F.U22	rozpoznawać objawy narastającego ciśnienia śródczaszkowego	P7U_U, P7S_UW
F.U23	oceniać wskazania do wykonania punkcji nadłonowej i uczestniczyć w jej wykonaniu	P7U_U, P7S_UW
F.U24	asystować przy typowych procedurach urologicznych (endoskopii diagnostycznej i terapeutycznej układu moczowego, litotrypsji, punkcji prostaty)	P7U_U, P7S_UW

Kod	Treść	PRK
F.U25	wykonywać podstawowe badanie laryngologiczne w zakresie ucha, nosa, gardła i krtani	P7U_U, P7S_UW
F.U26	przeprowadzać orientacyjne badanie słuchu	P7U_U, P7S_UW
F.U27	działać zgodnie z aktualnym algorytmem zaawansowanych czynności resuscytacyjnych a) potrafi udrożnić drogi oddechowe przy pomocy technik bezprzyrządowych i przyrządowych b) potrafi prowadzić wentylację pacjenta workiem samorozprężalnym z maską twarzą c) potrafi bezpiecznie obsługiwać defibrylator manualny	P7U_U, P7S_UW
F.U28	związać węzeł pojedynczy i chirurgiczny	P7U_U, P7S_UW
F.U29	zbadać sutki, jamę brzuszną oraz wykonać badanie palcem przez odbyt	P7U_U, P7S_UW
F.U3	stosować się do zasad aseptyki i antyseptyki	P7U_U, P7S_UW
F.U30	wykonać i zinterpretować USG wg FAST (Focused Assessment with Sonography for Trauma)	P7U_U, P7S_UW
F.U31	wprowadzić dren do jamy opłucnej i podłączyć zestaw do czynnego drenażu opłucnej	P7U_U, P7S_UW
F.U32	wprowadzić cewnik do pęcherza moczowego	P7U_U, P7S_UW
F.U33	odebrać świadomą i skuteczną prawnie zgodę na: a) na procedury diagnostyczne podwyższonego ryzyka (np. gastroskopia, kolonoskopia, endoskopowa wsteczna cholangiopankreatografia) b) na procedury diagnostyczne podwyższonego ryzyka (biopsja przezskórna pod kontrolą USG) c) zabieg operacyjny usunięcia pęcherzyka żółciowego	P7U_U, P7S_UW
F.U34	przekazać informację o śmierci bliskiej osoby	P7U_U, P7S_UW
F.U35	przekazać rodzinie informacje dotyczące możliwości przeszczepienia narządów osoby u której orzeciono śmierć mózgu	P7U_U, P7S_UW
F.U36	rozponawać i wskazać metody postępowania w urazowym uszkodzeniu nerwów obwodowych	P7U_U, P7S_UW
F.U4	zaopatrywać prostą ranę, zakładać i zmieniać jałowy opatrunek chirurgiczny	P7U_U, P7S_UW
F.U5	zakładać wkłucie obwodowe	P7U_U, P7S_UW
F.U6	badac sutki, węzły chłonne, gruczoł tarczowy i jamę brzuszną w aspekcie ostrego brzucha oraz wykonywać badanie palcem przez odbyt	P7U_U, P7S_UW
F.U7	oceniać wynik badania radiologicznego w zakresie najczęstszych typów złamań, szczególnie złamań kości długich	P7U_U, P7S_UW
F.U8	wykonywać doraźne unieruchomienie kończyny, wybierać rodzaj unieruchomienia konieczny do zastosowania w typowych sytuacjach klinicznych oraz kontrolować poprawność ukrwienia kończyny po założeniu opatrunku unieruchamiającego	P7U_U, P7S_UW
F.U9	zaopatrywać krwawienie zewnętrzne	P7U_U, P7S_UW

G. Prawne i organizacyjne aspekty medycyny

Absolwent potrafi:

Kod	Treść	PRK
G.U1	opisywać strukturę demograficzną ludności i na tej podstawie oceniać problemy zdrowotne populacji	P7U_U, P7S_UW
G.U10	podejmować współpracę z przedstawicielami innych zawodów w zakresie ochrony zdrowia	P7U_U, P7S_UW

Kod	Treść	PRK
G.U11	odnaleźć odpowiednie akty prawne zawierające normy dotyczące udzielania świadczeń zdrowotnych i wykonywania zawodu lekarza	P7U_U, P7S_UW
G.U12	podczas udzielania nagłej pomocy podjąć starania o niezacieranie istotnych śladów kryminalistycznych, nie kolidujące z podstawowym celem interwencji medycznej (ratowanie życia / zdrowia)	P7U_U, P7S_UW
G.U13	przewodzą wywiad środowiskowy, umie zinterpretować poziomy zanieczyszczeń w aspekcie obowiązujących norm oraz umie wskazać narządy i układy podatne na szkodliwe działanie poszczególnych ksenobiotyków obecnych w środowisku bytowania i środowisku pracy	P7U_U, P7S_UW
G.U2	zbierać informacje na temat obecności czynników ryzyka chorób zakaźnych i przewlekłych oraz planować działania profilaktyczne na różnym poziomie zapobiegania	P7U_U, P7S_UW, P7S_UU
G.U3	interpretować miary częstości występowania chorób i niepełnosprawności	P7U_U, P7S_UW
G.U4	oceniać sytuację epidemiologiczną chorób powszechnie występujących w Rzeczypospolitej Polskiej i na świecie	P7U_U, P7S_UW
G.U5	wyjaśniać osobom korzystającym ze świadczeń medycznych ich podstawowe uprawnienia oraz podstawy prawne udzielania tych świadczeń	P7U_U, P7S_UW
G.U6	sporządzać zaświadczenia lekarskie na potrzeby pacjentów, ich rodzin i innych podmiotów	P7U_U, P7S_UW
G.U7	rozpoznawać podczas badania dziecka zachowania i objawy wskazujące na możliwość wystąpienia przemocy wobec dziecka	P7U_U, P7S_UW
G.U8	działać w sposób umożliwiający unikanie błędów medycznych	P7U_U, P7S_UW
G.U9	pobierać krew do badań toksykologicznych i zabezpieczać materiał do badań hemogenetycznych	P7U_U, P7S_UW

Kompetencje społeczne

Ogólne

Absolwent jest gotów do:

Kod	Treść	PRK
O.K1	nawiązania i utrzymania głębokiego oraz pełnego szacunku kontaktu z pacjentem, a także okazywania zrozumienia dla różnic światopoglądowych i kulturowych	P7S_KK, P7S_KO, P7S_KR
O.K10	formułowania opinii dotyczących różnych aspektów działalności zawodowej	P7S_KK, P7S_KR
O.K11	przyjęcia odpowiedzialności związanej z decyzjami podejmowanymi w ramach działalności zawodowej, w tym w kategoriach bezpieczeństwa własnego i innych osób	P7U_K, P7S_KR
O.K2	kierowania się dobrem pacjenta	P7S_KK
O.K3	przestrzegania tajemnicy lekarskiej i praw pacjenta	P7S_KK, P7S_KR
O.K4	podejmowania działań wobec pacjenta w oparciu o normy i zasady etyczne, ze świadomością społecznych uwarunkowań i ograniczeń wynikających z choroby	P7S_KK
O.K5	dostrzegania i rozpoznawania własnych ograniczeń oraz dokonywania samooceny deficytów i potrzeb edukacyjnych	P7S_KK, P7S_KR

Kod	Treść	PRK
O.K6	propagowania zachowań prozdrowotnych	P7U_K, P7S_KK, P7S_KO
O.K7	korzystania z obiektywnych źródeł informacji	P7S_KK
O.K8	formułowania wniosków z własnych pomiarów lub obserwacji	P7S_KR
O.K9	wdrażania zasad koleżeństwa zawodowego i współpracy w zespole specjalistów, w tym z przedstawicielami innych zawodów medycznych, także w środowisku wielokulturowym i wielonarodowościowym	P7U_K, P7S_KK, P7S_KO

Plany studiów

Semestr 1

Przedmiot	Grupa standardu	Liczba godzin	Punkty ECTS	Forma weryfikacji		
Physical Education		ćwiczenia: 30	-	-	0	Os
Anatomy with Embryology	A	ćwiczenia prosektoryjne: 76 wykłady e-learning: 18	-	-	0	Os
Biochemistry with Elements of Chemistry	B	seminarium: 12 ćwiczenia laboratoryjne: 23 wykłady e-learning: 24	-	-	0	Os
Physiology	B	ćwiczenia laboratoryjne: 23 wykłady e-learning: 65	-	-	0	Os
Histology with Cytophysiology	A	ćwiczenia laboratoryjne: 36 wykłady e-learning: 24	-	-	0	Os
History of Medicine	D	seminarium: 1 wykłady e-learning: 24	2,0	egzamin	0	Os
First Aid	F	ćwiczenia: 20 wykłady e-learning: 10	2,0	zaliczenie	0	Os
Medical Polish	D	lektorat: 60	-	-	0	Os
Health and Safety		szkolenie BHK: 5	-	zaliczenie	0	Os

Semestr 2

Przedmiot	Grupa standardu	Liczba godzin	Punkty ECTS	Forma weryfikacji		
Physical Education		ćwiczenia: 30	-	zaliczenie	0	Os
Anatomy with Embryology	A	ćwiczenia prosektoryjne: 76 wykłady e-learning: 18	13,0	egzamin	0	Os
Biochemistry with Elements of Chemistry	B	seminarium: 20 ćwiczenia laboratoryjne: 19 wykłady e-learning: 18	10,0	zaliczenie	0	Os
Ethics in Medicine	D	seminarium: 30	2,0	zaliczenie na ocenę	0	Os
Physiology	B	ćwiczenia laboratoryjne: 22 wykłady e-learning: 65	12,0	egzamin	0	Os
Genetics with Molecular Biology	B, C	seminarium: 6 ćwiczenia laboratoryjne: 2 wykłady e-learning: 22	2,0	zaliczenie na ocenę	0	Os
Histology with Cytophysiology	A	ćwiczenia laboratoryjne: 28 wykłady e-learning: 20	11,0	egzamin	0	Os

Przedmiot	Grupa standardu	Liczba godzin	Punkty ECTS	Forma weryfikacji		
First Aid	F	ćwiczenia: 20 wykłady e-learning: 10	2,0	zaliczenie	O	Os
Medical Polish	D	lektorat: 60	5,0	zaliczenie	O	Os
Patient Care - summer clerkship	I	praktyka zawodowa: 120	4,0	zaliczenie	O	Os

It is necessary to choose 1 elective subject from each group – total 5 electives (one during 2nd year, two during 3rd year and two during 5th year).

Semestr 3

Przedmiot	Grupa standardu	Liczba godzin	Punkty ECTS	Forma weryfikacji		
Biochemistry with Elements of Chemistry	B	seminarium: 28 ćwiczenia laboratoryjne: 12 wykłady e-learning: 34	6,0	egzamin	O	Os
Medical Polish	D	lektorat: 60	-	-	O	Os
Laboratory Diagnostics	E	ćwiczenia: 16 seminarium: 8 wykłady e-learning: 4	2,0	zaliczenie	O	Os
Laboratory Training of Clinical Skills	D	symulacje: 39	2,0	zaliczenie	O	Os
Pathology	C	ćwiczenia: 54 seminarium: 38 ćwiczenia prosektoryjne: 4 wykłady e-learning: 15	-	-	O	Os
Medical Psychology	D	seminarium: 45	2,0	zaliczenie na ocenę	O	Os
Medical Sociology	D	seminarium: 26 e-learning: 4	2,0	zaliczenie na ocenę	O	Os
Introduction to Clinical Sciences	B, D	ćwiczenia: 63 wykłady e-learning: 3	3,0	zaliczenie na ocenę	O	Os
HUMANITIES IN MEDICINE	D				O	Os
Philosophy of Medicine	D	seminarium: 30	3,0	zaliczenie na ocenę	F	Os
Main problems of human philosophy	D	seminarium: 30	3,0	zaliczenie na ocenę	F	Os
Medicine of the Third Reich	D	wykłady e-learning: 30	3,0	zaliczenie na ocenę	F	Os
Neuroethics	D	seminarium: 30	3,0	zaliczenie na ocenę	F	Os

Przedmiot	Grupa standardu	Liczba godzin	Punkty ECTS	Forma weryfikacji		
Crossing the limits of humanity - Ethics towards the scientific challenges of progress in medicine	D	seminarium: 30	3,0	zaliczenie na ocenę	F	Os
Introduction to the philosophy of science	D	seminarium: 30	3,0	zaliczenie na ocenę	F	Os
History of Philosophy	D	seminarium: 30	3,0	zaliczenie na ocenę	F	Os
Neurodegeneration, diseases in art and famous forgers	D	seminarium: 15 wykłady e-learning: 15	3,0	zaliczenie na ocenę	F	Os
Psychology of patients with chronic conditions and elderly patients.	D	seminarium: 30	3,0	zaliczenie na ocenę	F	Os

Semestr 4

Przedmiot	Grupa standardu	Liczba godzin	Punkty ECTS	Forma weryfikacji		
First Aid	F	ćwiczenia: 24 seminarium: 6	2,0	zaliczenie na ocenę	O	Os
Medical Biophysics	B	seminarium: 6 ćwiczenia laboratoryjne: 36 seminarium e-learning: 6	3,0	egzamin	O	Os
Pharmacology	C	seminarium: 25 wykłady e-learning: 25	4,0	zaliczenie	O	Os
Hygiene	G	seminarium: 20	1,0	zaliczenie na ocenę	O	Os
Medical Polish	D	lektorat: 30	4,0	zaliczenie	O	Os
Microbiology with Parasitology and Immunology	C	seminarium: 16 ćwiczenia laboratoryjne: 27 wykłady e-learning: 37	6,0	egzamin	O	Os
Pathology	C	ćwiczenia: 54 seminarium: 38 ćwiczenia prosektoryjne: 4 wykłady e-learning: 14	15,0	egzamin	O	Os
Telemedicine with Elements of Medical Simulation	B	ćwiczenia: 30	2,0	zaliczenie na ocenę	O	Os
Primary Care - summer clerkship	I	praktyka zawodowa: 90	3,0	zaliczenie	O	Os
Emergency Medicine - summer clerkship	I	praktyka zawodowa: 30	1,0	zaliczenie	O	Os

Przedmiot	Grupa standardu	Liczba godzin	Punkty ECTS	Forma weryfikacji		
HUMANITIES IN MEDICINE	D				O	Os
Philosophy of Medicine	D	seminarium: 30	3,0	zaliczenie na ocenę	F	Os
Main problems of human philosophy	D	seminarium: 30	3,0	zaliczenie na ocenę	F	Os
Medicine of the Third Reich	D	wykłady e-learning: 30	3,0	zaliczenie na ocenę	F	Os
Neuroethics	D	seminarium: 30	3,0	zaliczenie na ocenę	F	Os
Crossing the limits of humanity - Ethics towards the scientific challenges of progress in medicine	D	seminarium: 30	3,0	zaliczenie na ocenę	F	Os
Introduction to the philosophy of science	D	seminarium: 30	3,0	zaliczenie na ocenę	F	Os
History of Philosophy	D	seminarium: 30	3,0	zaliczenie na ocenę	F	Os
Neurodegeneration, diseases in art and famous forgers	D	seminarium: 15 wykłady e-learning: 15	3,0	zaliczenie na ocenę	F	Os
Psychology of patients with chronic conditions and elderly patients.	D	seminarium: 30	3,0	zaliczenie na ocenę	F	Os

It is necessary to choose 1 elective subject from each group – total 5 electives (one during 2nd year, two during 3rd year and two during 5th year)

Semestr 5

Przedmiot	Grupa standardu	Liczba godzin	Punkty ECTS	Forma weryfikacji		
Surgery	F, C, B, A	ćwiczenia: 57 seminarium: 35 wykłady e-learning: 34	7,0	zaliczenie	O	Or
Internal Medicine	E	ćwiczenia: 78 seminarium: 52	7,0	zaliczenie	O	Or
Dermatology and Venerology	E	ćwiczenia: 28 seminarium: 30	3,0	egzamin	O	Os
Laboratory Diagnostics	E	seminarium: 20 wykłady e-learning: 6	2,0	egzamin	O	Or
Epidemiology	G	seminarium: 25	2,0	zaliczenie na ocenę	O	Os
Pharmacology	C	seminarium: 22 wykłady e-learning: 23	-	-	O	Or

Przedmiot	Grupa standardu	Liczba godzin	Punkty ECTS	Forma weryfikacji		
Obstetrics and Gynecology	F	ćwiczenia: 20 seminarium: 20	3,0	zaliczenie	O	Or
Medical Polish	D	lektorat: 60	-	-	O	Or
Laboratory Training of Clinical Skills	E, F	ćwiczenia: 18 ćwiczenia e-learning: 12	2,0	zaliczenie	O	Or
Pediatrics	E, C	ćwiczenia: 66 seminarium: 68	7,0	zaliczenie	O	Or
Psychiatry	E	seminarium: 20	1,0	zaliczenie	O	Or
Radiology and Basis of Ultrasonography	F	ćwiczenia: 14 seminarium: 37 wykłady e-learning: 16	4,0	egzamin	O	Os
PRECLINICAL SCIENCES	C				O	Os
Potable water and health	C	seminarium: 30	2,0	zaliczenie na ocenę	F	Os
Biostatistics	C	ćwiczenia: 20 seminarium: 10	2,0	zaliczenie na ocenę	F	Os
Medicine in "OMICS"	C	ćwiczenia: 15 seminarium: 15	2,0	zaliczenie na ocenę	F	Os
Practical aspects of diagnostics of genetically determined diseases	C	ćwiczenia: 20 seminarium: 10	2,0	zaliczenie na ocenę	F	Os
Trends in nutrition of healthy people	C	seminarium: 18 seminarium e-learning: 12	2,0	zaliczenie na ocenę	F	Os
Diet-sensitive genes - e-learning course	C	wykłady e-learning: 30	2,0	zaliczenie na ocenę	F	Os
Introduction to Neurology	C	seminarium: 30	2,0	zaliczenie na ocenę	F	Os
Behavioral and Social Sciences with Elements of Professionalism	D				O	Os
Philosophy and ethics of public health	D	seminarium: 30	2,0	zaliczenie na ocenę	F	Os
Limit problems of human existence: suicide, assisted suicide, euthanasia	D	seminarium: 30	2,0	zaliczenie na ocenę	F	Os
Body's circadian rhythm in health and diseases	D	seminarium: 30	2,0	zaliczenie na ocenę	F	Os
Business plan and marketing communication	D	ćwiczenia: 20 wykłady e-learning: 10	2,0	zaliczenie na ocenę	F	Os
Management and decision making	D	ćwiczenia: 10 seminarium: 20	2,0	zaliczenie na ocenę	F	Os
Medical Writing	D	seminarium: 15 wykłady e-learning: 15	2,0	zaliczenie na ocenę	F	Os

Przedmiot	Grupa standardu	Liczba godzin	Punkty ECTS	Forma weryfikacji		
Disability and independent living. The social dimension.	D	ćwiczenia: 20 seminarium e-learning: 10	2,0	zaliczenie na ocenę	F	Os
Ethical aspects of interpersonal communication in medicine	D	seminarium: 15 wykłady e-learning: 15	2,0	zaliczenie na ocenę	F	Os
Ethics of research involving human participants in medicine	D	seminarium: 30	2,0	zaliczenie na ocenę	F	Os
Therapeutic contact	D	seminarium: 30	2,0	zaliczenie na ocenę	F	Os
Medical simulations. Teamwork and communication in an international environment	D	ćwiczenia: 20 seminarium: 10	2,0	zaliczenie na ocenę	F	Os
How to deal with difficult behaviours	D	seminarium: 15 wykłady e-learning: 15	2,0	zaliczenie na ocenę	F	Os
Neurobiological basis of behaviour and drug dependence	D	seminarium: 10 wykłady e-learning: 20	2,0	zaliczenie na ocenę	F	Os

Semestr 6

Przedmiot	Grupa standardu	Liczba godzin	Punkty ECTS	Forma weryfikacji		
Surgery	C, B, F, A	ćwiczenia: 57 seminarium: 35 wykłady e-learning: 34	7,0	zaliczenie	O	Or
Internal Medicine	E	ćwiczenia: 78 seminarium: 52	7,0	zaliczenie	O	Or
Dermatology and Venerology	E	ćwiczenia: 28 seminarium: 30	3,0	egzamin	O	Os
Laboratory Diagnostics	E	seminarium: 20 wykłady e-learning: 6	2,0	egzamin	O	Or
Epidemiology	G	seminarium: 25	2,0	zaliczenie na ocenę	O	Os
Pharmacology	C	seminarium: 23 wykłady e-learning: 22	9,0	egzamin	O	Or
Obstetrics and Gynecology	F	ćwiczenia: 20 seminarium: 20	3,0	zaliczenie	O	Or
Medical Polish	D	lektorat: 60	5,0	zaliczenie	O	Or
Laboratory Training of Clinical Skills	F, E	ćwiczenia: 18 ćwiczenia e-learning: 12	2,0	zaliczenie	O	Or

Przedmiot	Grupa standardu	Liczba godzin	Punkty ECTS	Forma weryfikacji		
Pediatrics	C, E	ćwiczenia: 66 seminarium: 68	7,0	zaliczenie	O	Or
Psychiatry	E	seminarium: 20	1,0	zaliczenie	O	Or
Radiology and Basis of Ultrasonography	F	ćwiczenia: 14 seminarium: 37 wykłady e-learning: 16	4,0	egzamin	O	Os
Internal Medicine - summer clerkship	I	praktyka zawodowa: 120	4,0	zaliczenie	O	Os
PRECLINICAL SCIENCES	C				O	Os
Potable water and health	C	seminarium: 30	2,0	zaliczenie na ocenę	F	Os

Goals

C1	Universal physical development of the body. Education, improvement and keeping of basic motor skills, such as strength, endurance, quickness and motor coordination.
C2	Development of an attitude of conscious and permanent participation in various forms of sports and recreational activities in the course of education and upon its completion for the purpose of keeping physical and mental health.
C3	Development of personality attitudes: self-esteem, respect to others, especially those weaker and with lesser abilities.
C4	Learning to cooperate in a team, group, self-acceptance and acceptance of others, the culture of sports fan support, the following of the "fair play" rule in sports and in life.

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	ethical, social and legal conditions for practicing the medical profession and the principles of health promotion, based on scientific evidence and accepted standards	O.W4	classroom observation
Skills - Student can:			
U1	plan own learning activities and constantly learn in order to update own knowledge	O.U5	classroom observation
Social competences - Student is ready to:			
K1	promote health-promoting behaviors	O.K6	classroom observation

Calculation of ECTS points

Semester 1

Activity form	Activity hours*
classes	30
Student workload	Hours 30
Workload involving teacher	Hours 30
Practical workload	Hours 30

* hour means 45 minutes

Semester 2

Activity form	Activity hours*
---------------	-----------------

classes	30
Student workload	Hours 30
Workload involving teacher	Hours 30
Practical workload	Hours 30

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Discussion of the rules of occupational health and safety during physical education classes. Learning about the conditions of passing the subject, the regulations of the Physical Education and Sports Department at the Jagiellonian University Medical College and rules of using an external complex of sports facilities.	W1, U1, K1	classes
2.	Learning about basic technical and tactical elements of team games; - Volleyball: volleyball player's attitude, overhand pass and forearm pass, tennis serve, bump and forearm hitting, ball setting forward and backward, attack, block, playing.	W1, U1, K1	classes
3.	Learning about basic technical and tactical elements of team games; Basketball: moving around the field, passes and grips, dribbling with a right hand and left hand, shot while running from the right or left, set shot, 1:1 defence, feints with or without a ball, half-court offence and fast break, playing.	W1, U1, K1	classes
4.	Various forms of physical activity of adults accompanied by music - aerobics as a form of monostructural exercises; exercises to strengthen and shape arm, back, stomach and leg muscles. Dance aerobics: use of basic steps like step, touch, double step out, heel back, knee up, grapevine, V step, A step, forming choreography.	W1, U1, K1	classes
5.	Fitness: exercises on step platforms, forming choreography.	W1, U1, K1	classes
6.	Fitness: exercises with balls - ball exercising technique, correct performance exercising.	W1, U1, K1	classes
7.	Fitness: TBC - Total Body Conditioning, body shaping; ABT - abdominal, buttocks, thighs.	W1, U1, K1	classes
8.	Fitness: exercises with weights and barbells.	W1, U1, K1	classes
9.	Fitness: stretching exercises with elements of yoga, callanetics and stretching.	W1, U1, K1	classes

10.	Gym: strengthening all muscle groups on weight training and aerobic training equipment; cardio workout: bicycles, elliptical trainers, treadmills, indoor rowers; weight lifting: multigym, gym benches with racks for weights, decline benches, indoor rowers, dumbbell set.	W1, U1, K1	classes
11.	Table tennis: posture at the table and movements during the game, ways to hold the racket, forehand, backhand, serve, attack, defence, indirect shot, playing.	W1, U1, K1	classes
12.	Elements of biological regeneration after physical exertion with use of rubber bands, rollers, stretching exercises with elements of yoga, callanetics and stretching.	W1, U1, K1	classes
13.	Therapeutic gymnastics: exercises strengthening postural muscles, upper and lower limbs, torso and deep muscles. The use of isometric exercises, balance exercises, stretching, disease-related exercises, exercises with equipment and relaxation. Exercises in isolated positions, the role of proper breathing during exercises.	W1, U1, K1	classes
14.	Floorball: moving on the pitch, forehand and backhand pass, receiving the ball, shot on goal from the spot and in motion, dribbling, feints, defense, goalkeeping.	W1, U1, K1	classes
15.	Nordic Walking: selection and adjustment of the length of poles to height, RR and NN technique, technique of walking in flat terrain, uphill and downhill, general development exercises with the use of poles, selection of distance and pace of walking.	W1, U1, K1	classes

Course advanced

Semester 1

Teaching methods:

classes / practicals, demonstration, presentation, group work, practical classes

Activities	Examination methods	Credit conditions
classes	classroom observation	Attendance at all 15 classes in a semester are obligatory.

Semester 2

Teaching methods:

classes / practicals, demonstration, presentation, group work, practical classes

Activities	Examination methods	Credit conditions
classes	classroom observation	Attendance at all 15 classes in a semester are obligatory.

Entry requirements

[No medical contraindications to active participation in physical education classes provided for in the curriculum. Basic fitness. Attendance at all 15 classes in a semester are obligatory.](#)

Anatomy with Embryology

Goals

C1	To familiarize students with the structure of the human body in terms of topography, functional and clinical anatomy.
C2	To present students structures of the human body in terms of topography, functional and clinical anatomy and basics of the diagnostic.
C3	To make students aware of the anatomical terms in clinical aspect.

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	development, structure and functions of the human body in normal and pathological conditions	O.W1	written examination, theoretical colloquiums, test
W2	anatomical, histological and embryological denominations in Polish and English	A.W1	written examination, theoretical colloquiums, test
W3	structure of human body in topographic (upper and lower extremities, thorax, abdomen, pelvis, back, neck, head) and functional (osteoarticular system, muscular system, circulatory system, respiratory system, digestive system, urinary system, genital system, nervous system and sensory organs, integuments) approaches	A.W2	written examination, theoretical colloquiums, test
W4	topographical relations between individual organs	A.W3	written examination, theoretical colloquiums, test
W5	stages of development of the human embryo, the structure and function of the membranes and placenta, stages of development of individual organs and the influence of harmful factors on the development of the embryo and fetus (teratogenic)	A.W6	written examination, theoretical colloquiums, test
Skills - Student can:			
U1	explain the anatomical basis of the physical examination	A.U3	written examination, theoretical colloquiums, test
U2	propose relations between anatomical structures on the basis of life-threatening diagnostic tests, in particular in the field of radiology (plain scans, contrast tests, computed tomography and nuclear magnetic resonance imaging)	A.U4	written examination, theoretical colloquiums, test
U3	use anatomical, histological and embryological denominations in speech and writing	A.U5	written examination, theoretical colloquiums, test
Social competences - Student is ready to:			
K1	assume responsibility for decisions taken in the course of their professional activities, including in terms of the safety of oneself and others	O.K11	written examination, theoretical colloquiums, test

K2	formulate opinions on the various aspects of the professional activity	O.K10	written examination, theoretical colloquiums, test
K3	implement the principles of professional camaraderie and cooperation in a team of specialists, including representatives of other medical professions, also in a multicultural and multinational environment	O.K9	written examination, theoretical colloquiums, test
K4	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	written examination, theoretical colloquiums, test
K5	use objective sources of information	O.K7	written examination, theoretical colloquiums, test

3.	<p>The Meninges. Epi-, subdural space, subarachnoid space. Production of the cerebrospinal fluid and its circulation. The arterial supply and venous drainage of the CNS. The spinal cord. The spinal nerve. Cerebral tracts. The main anatomical terms related to the CNS.</p> <p>The brainstem - the medulla, pons and midbrain. The cerebellum. Fourth ventricle.</p> <p>Central nervous system - overview. The Meninges. Epi-, subdural space, subarachnoid space. Production of the cerebrospinal fluid and its circulation. The arterial supply and venous drainage of the CNS. The diencephalon. (thalamus, hypothalamus, epithalamus, metathalamus). III-rd ventricle.</p> <p>The telencephalon. The cerebral lobes.</p> <p>Development of central nervous system CNS - clinical aspects</p> <p>Ascending tracts of CNS</p> <p>Descending tracts of central nervous system. CNS - clinical aspects</p>	W1, W2, W3, W4, W5, U1, U2, U3, K1, K2, K3, K4, K5	dissection classes, e-learning lecture
4.	<p>Surface anatomy of the thorax (lines of orientation). Thoracic walls - muscles, vessels, nerves (intercostal spaces). The mammary gland. Diaphragm. The thoracic cavity. Mediastinum</p> <p>Pleurae. Trachea. Lungs. The Mechanism of Respiration. Endothoracic Fascia.</p> <p>Heart development. Heart defects</p> <p>Pericardium. Structure of the Heart (Chambers of the Heart) Conducting System of the Heart. Arterial Supply & Venous Drainage of the Heart.</p> <p>Thymus. Large Vessels of the Thorax: Superior & Inferior Vena Cava. Aorta. Pulmonary Veins. Pulmonary Trunk. Esophagus. Lymph Drainage of the Thorax. Azygos veins.</p> <p>Development of the vessels. Fetal circulation Thorax - innervation Vagus nerves. Phrenic nerves. Thoracic part of the sympathetic trunk.</p> <p>The axilla & its contents. Axillary artery, vein, and lymph nodes. Brachial plexus. Muscles of the scapula</p> <p>Skeletal system. Development of the bones and cartilages. Limbs development. Limbs defects. Thorax - innervation Muscles of the arm. Brachial artery & vein. Nerves of the arm</p> <p>The cubital fossa. Elbow joint. Fascial compartments of the forearm. Muscles of the anterior compartment of the forearm. Radial and ulnar artery & veins. Superficial veins of the upper limb. Nerves of the forearm.</p> <p>Examination of musculo-skeletal system - anatomical aspects Nerve/vessels compression syndromes Muscles of the lateral & posterior compartment of the forearm. Muscles of the hand. The carpal tunnel. Superficial & deep palmar arch. Skin innervation of the upper limb. Lymph nodes & lymph drainage of the upper limb.</p> <p>Upper limb - clinical correlations. Nerve/vessels compression syndromes.</p>	W1, W2, W3, W4, W5, U1, U2, U3, K1, K2, K3, K4, K5	dissection classes, e-learning lecture

5.	<p>Development of the gastrointestinal system Abdomen – the main divisions. Abdominal lines and planes. Abdominal wall (structure) - muscles, blood supply, innervation. Inguinal canal. Fascial & peritoneal lining of the abdominal walls. Surface anatomy – (landmarks): xiphoid process, costal margin, iliac crest, pubic tubercle, symphysis pubis, inguinal ligament, linea alba, umbilicus. Peritoneal cavity. Peritoneal pouches, fossae, spaces and gutters. Bursa omentalis. Peritoneal ligaments, omenta and mesenteria.</p> <p>Gastrointestinal tract: abdominal portion of esophagus, stomach, small intestine (duodenum, jejunum, ileum). Celiac artery. Superior mesenteric artery.</p> <p>Abdomen: walls and main divisions – clinical correlations. Development of the gastrointestinal system</p> <p>The large intestine (ileocecal valve, cecum, vermiform appendix, colon). Inferior mesenteric artery and vein. Pancreas. Spleen.</p> <p>The liver. Portal vein. Porto-systemic anastomoses. Gallbladder. Bile ducts.</p> <p>Abdominal organs – topography, relations. Abdomen and pelvis – imaging Retroperitoneal space. Kidneys. Suprarenal glands. Ureters. Abdominal aorta. Inferior vena cava. Lymph drainage of the abdomen.</p> <p>Orientation of the pelvis. False & true pelvis. Pelvic walls. Pelvic floor. Pelvic peritoneum. Nerves and vessels of the pelvis. Surface landmarks of the pelvis. Pelvic joints. Rectum. Urinary system –development. Urinary bladder. Urinary tract.</p> <p>Development of the genital system. Male genital organs. Perineum.</p> <p>Female genital organs.</p> <p>Clinical correlations on the pelvis (pelvic measurements in obstetrics, abnormalities and varieties of the female pelvis, fractures of the pelvis. Anatomical aspects of pregnancy.</p> <p>Regions of the lower limb. Muscles of the anterior & medial fascial compartment of the thigh. Femoral sheath. Femoral triangle. Femoral artery and vein. Subsartorial canal. Lumbar plexus.</p> <p>Clinical aspects of abdomen. Surgical anatomy. Autonomic plexuses of the abdomen and pelvis. Muscles of the buttock, subgluteal space. Greater & lesser sciatic foramina. Muscles of the posterior fascial compartment of the thigh. Sacral plexus. Pudendal nerve.</p> <p>Muscles of the posterior compartment of the leg. Posterior tibial vessels. Tibial nerve. Lymph drainage of the lower limb. Superficial veins of the lower limb. Muscles of the foot. Arterial & venous supply of the foot. Foot as a functional unit. Innervation of the skin of the lower limb.</p> <p>Clinical aspects of lower limb</p> <p>The back.</p>	W1, W2, W3, W4, W5, U1, U2, U3, K1, K2, K3, K4, K5	dissection classes, e-learning lecture
----	---	--	--

Course advanced

Semester 1

Teaching methods:

classes / practicals, dissection classes, e-learning, seminar, lecture, practical classes

Activities	Examination methods	Credit conditions
e-learning lecture	theoretical colloquiums, test	Participation in classes and lectures is obligatory.
dissection classes	theoretical colloquiums, test	Participation in classes and lectures is obligatory.

Semester 2**Teaching methods:**

classes / practicals, dissection classes, e-learning, seminar, lecture, practical classes

Activities	Examination methods	Credit conditions
e-learning lecture	written examination, theoretical colloquiums, test	Participation in classes and lectures is obligatory.
dissection classes	written examination, theoretical colloquiums, test	Participation in classes and lectures is obligatory.

Additional info

1. Credit requirements

The whole material of the course has been divided into 5 parts including:

- 1) general anatomy (incl. osteology and arthrology), skull, general embryology
- 2) head and neck
- 3) central nervous system
- 4) thorax, upper limb
- 5) abdomen and pelvis; lower limb.

CAUTION: During the course of anatomy, the student is supposed to have the knowledge acquired from all previous practical and theoretical classes.

Much of the course work is carried out in the dissection rooms. Student will need to provide and bring a clean white lab coat to the dissection room, with name on the front where it can be read by staff, and wear it always in the dissection room.

Unauthorized persons are not allowed to enter the dissection rooms.

The mid-semester exams will

consist of two parts:

a) laboratory (identification of parts of organs) - 20 questions (for each correct answer one can receive maximally 1 point), there is 30 seconds per each specimen for its recognition.

Passing the laboratory part is NOT a prerequisite for participation in the second part of the mid-semester test.

b) theoretical (multiple choice test, matching, etc.) - 40 questions. For each correct answer you receive 1 point. The test includes embryology questions.

The list of specimens placed in the end of syllabus is a supplementary list only (it is only a help for the Students), so both during the mid-semester and final practical exams specimens out of the list can be used.

It is not possible to postpone a mid-semester test.

Only students who received ≥ 150 points ($\geq 50\%$) of all mid-semester tests get the credit and are allowed to take the final exam.

Student who received less than 150 points to be allowed to take the final exam will have to pass a credit test ($>50\%$).

2. Attendance requirements

Participation in classes and lectures is obligatory.

Maximum six absences per two semesters are allowed - student who exceeds the allowed number of six absences fails to get the credit.

3. Type of the final exam

The final exam, held in July, is the ultimate basis for the completion of the course.

Only students who have not exceeded the allowed number of absences and have received at least 150 points (50%) of all

tests are allowed to take the final exam.

Evaluation of the anatomy course is based on the results of the final exam, however we consider also the results of the mid-semester tests.

The final exam, covering the whole material of the course consists of two parts:

a) laboratory: identification of specific structures shown on cadavers; their parts; separate organs or bones (20 questions: bones (3), skull (1), upper & lower limb (4), thorax (2), abdomen & pelvis (3), head & neck (3), central nervous system (4). A Student receives 2 points for correct answer.

Passing the laboratory part is NOT a prerequisite for participation in the second part of the final exam!!! This rule is valid for the make-up exam, as well.

b) theoretical: (multiple choice test, matching, etc., similar form to the mid-semester tests). Questions may also include problems based on histology and embryology. The test consists of 100 questions which cover the whole theoretical material.

Grading system for the final exam is as follows:

- very good (5.0) approximately $\geq 90\%$ of all available points
- good plus (4.5) $\geq 80\%$
- good (4.0) $\geq 70\%$
- satisfactory plus (3.5) $\geq 60\%$
- satisfactory (3.0) $\geq 50\%$
- failed (2.0) $< 50\%$.

A Student is exempted from the final practical exam if results of practical mid-semester tests exceed 90%.

To pass the exam one should receive at least 50% on practical and 50% on test separately.

The final grade consists of: value of points received during final practical + number of points received during final test and a bonus points (1 point for each next 10 points above 200) received during the mid-semester tests, i.e. a Student A received 218 points during all six mid-semester tests, later on the final practical exam he (she) received 28 points out of 40 and on the final test 68 points out of 100. His (her) final grade is: 2 (18 points above 200) + 28 + 65 = 95 points (63,3%) = satisfactory plus

4. Retake information

The make-up exam (held in September) has a form of both practical exam and test. The test consists of 60 questions (multiple choice and matchings). Students who passed practical exam during first option DO NOT have to repeat it in September

Entry requirements

Biochemistry with Elements of Chemistry

Goals

C1	To provide students with the knowledge about basic biochemical processes and the molecular basis of life in order to understand physiological and pathological phenomena learned during the studies.
C2	To familiarize students with basic biochemical laboratory techniques, the analysis of quantitative data and using modern sources of information (databases).
C3	To provide students with the skills for searching and selecting useful information concerning the biochemical basis of physiological and pathological processes

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	water and electrolyte management in biological systems	B.W1	written examination, oral answer, test, gap filling test, multiple choice test
W2	acid-base balance and buffer mechanism, and their importance in systemic homeostasis	B.W2	written examination, oral answer, assignment report, test, gap filling test, multiple choice test
W3	terms: solubility, osmotic pressure, isotonia, colloidal solutions and Gibbs-Donnan equilibrium	B.W3	oral answer, test, gap filling test, multiple choice test
W4	basic reactions of inorganic and organic compounds in aqueous solutions	B.W4	written examination, oral answer, assignment report, test, gap filling test, multiple choice test
W5	structure of simple organic compounds included in macromolecules present in cells, extracellular matrix and body fluids	B.W10	oral answer, test, gap filling test, multiple choice test
W6	structure of lipids and polysaccharides and their functions in cellular and extracellular structures	B.W11	oral answer, test, gap filling test, multiple choice test
W7	primary, secondary, tertiary and quaternary structure of proteins, as well as post-translational and functional modifications of proteins and their importance	B.W12	oral answer, assignment report, test, gap filling test, multiple choice test
W8	nucleotide functions in the cell, primary and secondary DNA and RNA structures and chromatin structure	B.W13	oral answer, test, gap filling test, multiple choice test

W9	functions of the genome, transcriptome and human proteome, and basic methods used in their examination, processes of DNA replication, repair and recombination, transcription and translation and degradation of DNA, RNA and proteins, as well as concepts for regulation of gene expression	B.W14	oral answer, assignment report, test, gap filling test, multiple choice test
W10	basic catabolic and anabolic pathways, ways of regulating them, and the influence of genetic and environmental factors on them	B.W15	oral answer, assignment report, test, gap filling test, multiple choice test
W11	metabolic profiles of basic organs and systems	B.W16	oral answer, test, gap filling test, multiple choice test
W12	methods of intercellular communication, as well as between the cell and the extracellular matrix, and signal pathways in the cell, and examples of disorders in these processes leading to the development of cancer and other diseases	B.W17	oral answer, test, gap filling test, multiple choice test
W13	processes: cell cycle, cell proliferation, differentiation and aging, apoptosis and necrosis and their importance for the functioning of the body	B.W18	oral answer, test, gap filling test, multiple choice test
W14	principles of conducting scientific, observational and experimental studies and in vitro studies for the development of medicine	B.W29	oral answer, test, gap filling test, multiple choice test
W15	biochemical fundamentals of xenobiotic metabolic processes	B.W32	oral answer, test, gap filling test, multiple choice test
Skills - Student can:			
U1	calculate the molar and percentage concentrations of compounds and the concentrations of substances in isoosmotic, mono- and multicomponent solutions	B.U3	oral answer, assignment report, test
U2	calculate the solubility of inorganic compounds, determine the chemical background to the solubility or absence of organic compounds and its practical importance for dietetics and therapy	B.U4	oral answer, assignment report, test
U3	determine the pH of the solution and the effect of changes in pH on inorganic and organic compounds	B.U5	oral answer, assignment report, multiple choice test
U4	predict the direction of biochemical processes depending on the energetic state of cells	B.U6	oral answer, assignment report, multiple choice test
U5	use basic laboratory techniques such as qualitative analysis, titration, colorimetry, pH-metry, chromatography, electrophoresis of proteins and nucleic acids	B.U8	assignment report
U6	use databases, including online databases, and search for the necessary information using the available tools	B.U10	oral answer, assignment report
U7	use on-line databases of the human genome	B.U23	oral answer, assignment report
U8	operate simple measuring instruments and evaluate the accuracy of measurements made	B.U9	assignment report
U9	plan and perform simple scientific research and interpret its results and draw conclusions	B.U13	assignment report

Social competences - Student is ready to:			
K1	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	oral answer
K2	use objective sources of information	O.K7	oral answer
K3	formulate conclusions from own measurements or observations	O.K8	oral answer, assignment report

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Types of chemical bonds. Organization of macromolecules. The importance of weak interactions. Chemical reactions in solutions. Steady state. Electrolytic dissociation, the ionic product of water, solubility equilibrium, pH of acids and bases solutions. Buffer mixtures. The role of physiological buffers. Equilibria in ligand- protein binding - ligand saturation, dissociation constants of complexes. Colligative properties of solutions. Osmosis. Osmotic and oncotic pressure. Colloidal solutions. Elements of thermodynamics and chemical kinetics. Concepts: internal energy of the system, entropy, free enthalpy. Rate constant of the reaction. Activation energy. Catalysis. Redox reactions, Standard and biological reduction potentials:	W1, W2, W3, W4, W5, U1, U2, U3, U4, U5, U8, K2, K3	seminar, laboratory, e-learning lecture

2.	Basic concepts in organic chemistry. Types of isomerism. Aromatic rule. Derivatives of hydrocarbons: alcohols, thiols, phenols, aldehydes, ketones (reactions of their oxidation and reduction). Keto-enol tautomerism. Biologically important carboxylic acids and their derivatives. Hydroxy and keto acids. Active derivatives of carboxylic acids. Transfer Potential. Biological phosphorylation reactions - the role of ATP. Lipids - classification, properties.	W4, W5, W6, U4, K2	seminar
3.	Carbohydrates - classification, nomenclature, stereo-isomerism, reducing properties. Formation of O- and N-glycosides, esterification, formation of amino sugars. Di-, oligo- and polysaccharides. Heteroglycans. Amines and amides. Heterocyclic compounds. Bases found in DNA and RNA. Nucleosides and nucleotides. Reactions of amines with nitric acid (III). Carbonic acid amides - carbamates, urea.	W4, W5, W6, W8, K2	seminar
4.	Amino acids - classification. Peptides - peptide unit structure. Calculation of pI values of amino acids and peptides. Proteins - structure, physicochemical properties. Globular proteins. Myoglobin and hemoglobin - structure and function. Fibrous proteins (collagen, keratin). Plasma proteins.	W5, W7, U3, U5, U8, K2, K3	seminar, laboratory, e-learning lecture
5.	Enzymes. Specificity and catalytic efficiency. Kinetics of the enzymatic reaction. Enzyme classes. Coenzymes (the role of vitamins). Regulation of activity (allosteric enzymes). Examples of the mechanism of enzyme action. The role of enzymes in diagnostics. Enzyme inhibitors.	W10, W7, U5, U8, U9, K2, K3	seminar, laboratory, e-learning lecture
6.	Fundamentals of bioenergetics. The role of ATP. Anabolism and catabolism. Respiratory chain, oxidative phosphorylation. Krebs cycle. Reactive oxygen species - formation in the body, effects, methods of disposal.	W10, W4, U4, U5, U8, U9, K2, K3	seminar, laboratory, e-learning lecture
7.	Carbohydrate digestion and absorption. Glycolysis. Substrate-level phosphorylation. Pentose phosphate pathway. Glycogen metabolism. Gluconeogenesis. Fructose and galactose metabolism. Coordination of carbohydrate metabolism at the body level. Glucose homeostasis and its disorders.	W10, W5, W6, U4, U5, K2, K3	seminar, laboratory, e-learning lecture
8.	Digestion, absorption and transport of lipids. Lipases. Plasma lipoproteins (types, metabolism, role). Oxidation of fatty acids. Synthesis and role of ketone bodies. Synthesis of saturated and unsaturated fatty acids. Lipid synthesis. Intracellular degradation of complex lipids. Synthesis of cholesterol and its derivatives (bile acids, hormones). Eicosanoid metabolism.	W10, W5, W6, K1, K2	seminar, e-learning lecture

9.	Protein digestion. Absorption and fate of amino acids. Protein nitrogen removal. Urea synthesis. Ammonia toxicity. Gluco and ketogenic amino acids. Degradation of selected amino acids and synthesis of endogenous amino acids. The role of one-carbon fragments and transmethylation in the metabolism of amino acids and their derivatives. Conversion of phenylalanine and tyrosine. Metabolism of nitrogen compounds derived from the amino acids: heme, creatine, adrenalin, serotonin. Biosynthesis and degradation of purine and pyrimidine nucleotides.	W10, W11, K2	seminar, e-learning lecture
10.	Nucleic acids: the structure and physico-chemical properties of DNA and RNA. Replication. Mutations and DNA repair mechanisms. Transcription and post-transcriptional modifications. Translation. Post-translational modifications and protein sorting. Cellular protein degradation. Basic methods of molecular biology (PCR, gene expression analysis - RT-PCR, DNA electrophoresis, hybridization).	W8, W9, U5, U6, U7, U8, U9, K1, K2, K3	seminar, laboratory, e-learning lecture
11.	Biochemistry of detoxification processes. The role of cytochromes P450, coupling reactions. Metabolism of ethanol.	W11, W15, K2	seminar, e-learning lecture
12.	Basic concepts of signal transduction. Membrane and nuclear receptors. Signaling cascades of cell cycle regulation. Cellular transformation in tumor development: morphological features and metabolism of the tumor cell. Oncogenes, suppressor genes. Signal transduction disorders. Invasion and metastasis of cancer. Apoptosis.	W10, W12, W13, W14, W9, K2	seminar, e-learning lecture
13.	Integration and coordination of metabolic changes. Energy metabolism of various tissues - after meals, during fasting and starvation. Hormonal regulation of metabolism at the cell and body levels. Metabolic syndrome.	W10, W11, W12, U4, K1, K2	seminar, e-learning lecture

Course advanced

Semester 1

Teaching methods:

computer classes, laboratories (labs), e-learning, seminar, lecture

Activities	Examination methods	Credit conditions
seminar	written examination, oral answer, gap filling test, multiple choice test	At the end of seminars students will be subjected to a closing test. Midterm exams, multiple choice test as final exam. Attendance at seminars is obligatory. Maximum one excused (doctors leave) absence is allowed.
laboratory	oral answer, assignment report, gap filling test, multiple choice test	Attendance at labs is obligatory. Maximum one excused (doctors leave) absence is allowed. Theoretical basis of the labs is included into midterm and final exams. 60% of possible points from quizzes (at the beginning of each lab) and for lab reports are required to get credit for the laboratories.
e-learning lecture	multiple choice test	Attendance is obligatory and will be monitored. Midterm exams, multiple choice test as final exam

Semester 2

Teaching methods:

computer classes, laboratories (labs), e-learning, seminar, lecture

Activities	Examination methods	Credit conditions
seminar	oral answer, gap filling test, multiple choice test	At the end of seminars students will be subjected to a closing test. Midterm exams, multiple choice test as final exam. Attendance at seminars is obligatory. Maximum one excused (doctors leave) absence is allowed.
laboratory	oral answer, assignment report, gap filling test, multiple choice test	Attendance at labs is obligatory. Maximum one excused (doctors leave) absence is allowed. Theoretical basis of the labs is included into midterm and final exams. 60% of possible points from quizzes (at the beginning of each lab) and for lab reports are required to get credit for the laboratories.
e-learning lecture	multiple choice test	Attendance is obligatory and will be monitored. Midterm exams, multiple choice test as final exam.

Semester 3

Teaching methods:

case study, laboratories (labs), discussion, e-learning, presentation, seminar, lecture, lecture with multimedia presentation

Activities	Examination methods	Credit conditions
seminar	oral answer, gap filling test, multiple choice test	At the end of seminars students will be subjected to a closing test. Midterm exams, multiple choice test as final exam. Attendance at seminars is obligatory. Maximum one excused (doctors leave) absence is allowed.
laboratory	oral answer, assignment report, test, gap filling test	Attendance at labs is obligatory. Maximum one excused (doctors leave) absence is allowed. Theoretical basis of the labs is included into midterm and final exams. 60% of possible points from quizzes (at the beginning of each lab) and for lab reports are required to get credit for the laboratories.
e-learning lecture	test	Attendance is obligatory and will be monitored. Midterm exams, multiple choice test as final exam

Additional info

The Students knowledge acquisition in Part I of the Course (semester I and II) will be checked by 3 midterm exams. These midterm exams will be consisting of 40-50 questions each (first midterm will also include open questions -calculations). To get credit for the First part fo the Course students must collect minimum 60% of possible points for the seminars and midterm tests, and also get credit for the labs. Additional test will be organized for students who do not fulfill this requirement - students who receive minimum 60% will receive credit. Only students who get credit for Part I will be allowed to take Part II of the Biochemistry with elements of Chemistry course. Two or three midterm exams will be organized in part II of the course - 40 -50 questions each. To get credit for the second part fo the Course students must collect minimum 60% of possible points for the seminars and midterm tests, and also get credit for the labs. The Final Biochemistry with Elements of Chemistry exam consists of 80-100 multiple choice questions from the entire course with passing threshold at 60%. Final exam grading: > 85% - very good; 81-84% - good plus; 76-80% - good; 71-75% - satisfactory plus; 60-70% - satisfactory. The detailed course rules will be sent to the students before the beginning of the course.

Goals

C1	<p>The major goal of the Physiology course is to provide the clear and up-to-date knowledge on the functions and regulations of the human body for medical students. In particular, our major interest is dedicated to present the medical physiology to medical students in concise, uncomplicated and understandable fashion with focus to the following topics: - Basic principles of body fluids and water-electrolyte balance of the human body - Concepts of: solubility, osmotic pressure, isotonic conditions, colloidal solutions and Gibbs-Donnan balance - Transcellular and intracellular cell communications and the cell signaling - Physiology of skeletal and smooth muscle and the functions of circulating blood - Background necessary to understand the impulse conduction and stimulation in peripheral and central nervous system, higher functions and basic functions of centers in the brain and other centers of central nervous system in order to understand the homeostatic control of body organs and brain special senses - Relevant physical laws explaining the blood flow and gaseous molecules flow along with factors affecting endothelial resistance in circulatory blood vessels and the term of air resistance in airways of respiratory tract - Functions and regulatory mechanisms of all organs and systems of human body including muscular system, cardiovascular and respiratory systems, gastrointestinal tract, endocrine and urinary systems, skin surface system physiology, their interactions and dependence - Metabolic profile of major organs and systems - Acid-base balance, the mechanism of buffer functions and their significance for the future medical practice - Digestive tract enzymes, the mechanism of gastric acid formation and secretion, pancreatic functions, bile synthesis, release and circulation, the course and mechanism of digestion and absorption process of food products and gastrointestinal disorders - The process of food intake and the consequences of bad nutrition leading to nutritional disorders such as cachexia, obesity and unbalanced diet - Hormones and their regulation, release and mechanism of action and hormonal disturbances and disorders - The course and regulation of reproductive functions in female and male - Basic principles and quantitative parameters describing efficiency of particular human organs and systems</p>
----	--

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	development, structure and functions of the human body in normal and pathological conditions	O.W1	written examination, theoretical colloquiums, classroom observation, oral answer, multiple choice test, written credit
W2	water and electrolyte management in biological systems	B.W1	written examination, theoretical colloquiums, classroom observation, oral answer, multiple choice test, written credit
W3	acid-base balance and buffer mechanism, and their importance in systemic homeostasis	B.W2	written examination, theoretical colloquiums, classroom observation, oral answer, multiple choice test, written credit
W4	methods of intercellular communication, as well as between the cell and the extracellular matrix, and signal pathways in the cell, and examples of disorders in these processes leading to the development of cancer and other diseases	B.W17	written examination, theoretical colloquiums, classroom observation, oral answer, multiple choice test, written credit
W5	basics of induction and transmission in the nervous system and higher nervous actions as well as physiology of striated and smooth muscles and blood functions	B.W20	written examination, theoretical colloquiums, classroom observation, oral answer, essay, multiple choice test, written credit

W6	activity and mechanisms of regulation of all organs and systems of the human body, including the cardiovascular system, respiratory system, digestive system, urinary tract and skin layers, and the interrelations existing between them	B.W21	written examination, theoretical colloquiums, classroom observation, oral answer, multiple choice test, written credit
W7	the mechanism of the body's aging	B.W23	written examination, theoretical colloquiums, classroom observation, oral answer, multiple choice test, written credit
W8	basic quantitative parameters describing the capacity of particular systems and organs, including the range of norms and demographic factors influencing the value of these parameters	B.W24	written examination, theoretical colloquiums, classroom observation, oral answer, multiple choice test, written credit
W9	the relationship between factors disturbing the balance of biological processes and physiological and pathophysiological changes	B.W25	written examination, theoretical colloquiums, classroom observation, oral answer, multiple choice test, written credit
Skills - Student can:			
U1	identify medical problems and prioritize medical management	O.U1	written examination, theoretical colloquiums, classroom observation, oral answer, written credit
U2	plan own learning activities and constantly learn in order to update own knowledge	O.U5	written examination, theoretical colloquiums, classroom observation, oral answer, written credit
U3	perform simple functional tests assessing the human body as a stable regulation system (stress tests, exercise tests) and interpret numerical data on basic physiological variables	B.U7	written examination, theoretical colloquiums, classroom observation, oral answer, written credit
U4	use databases, including online databases, and search for the necessary information using the available tools	B.U10	theoretical colloquiums, classroom observation, written credit
U5	indicate the relationship between factors disturbing the balance of biological processes and physiological and pathophysiological changes	B.U14	written examination, theoretical colloquiums, classroom observation, oral answer, written credit
U6	identify sources of electrical signals in the body	B.U15	written examination, theoretical colloquiums, classroom observation, oral answer, written credit
U7	use on-line photo, audio and video libraries	B.U21	classroom observation
U8	use various types of computer simulators and e-learning tools for educational purposes, with particular emphasis on virtual patients	B.U26	classroom observation, oral answer, written credit

U9	provide expert knowledge through simple IT techniques of knowledge representation such as a block diagram or a rule database	B.U28	classroom observation, oral answer, written credit
Social competences - Student is ready to:			
K1	use objective sources of information	O.K7	written examination, theoretical colloquiums
K2	formulate conclusions from own measurements or observations	O.K8	written examination, theoretical colloquiums

Calculation of ECTS points

Semester 1

Activity form	Activity hours*
e-learning lecture	65
laboratory	23
preparation for classes	4
preparation for colloquium	10
preparation for classes	5
preparation for test	10
preparation of multimedia presentation	6
kształcenie samodzielne	25
preparation of a report	4
preparation of a paper	5
Student workload	Hours 157
Workload involving teacher	Hours 88
Practical workload	Hours 23

* hour means 45 minutes

Semester 2

Activity form	Activity hours*
e-learning lecture	65

laboratory	22
preparation for colloquium	10
preparation for classes	5
preparation for test	10
preparation of multimedia presentation	6
kształcenie samodzielne	30
preparation of a report	8
preparation of a paper	10
preparation for examination	25
Student workload	Hours 191
Workload involving teacher	Hours 87
Practical workload	Hours 22

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	1. General Physiology: internal cell environment, homeostasis and cell function control, the plasma membrane, membrane transport and the resting membrane potential, the action potential, synaptic transmission, neuromuscular junction, synaptic events, maintenance of nerve function, skeletal muscle, smooth muscle, muscle tension, skeletal and smooth muscle contractions and their regulation, molecular mechanism of muscle contraction muscle fatigue, the principles of autonomic nervous system.	W1, W4, W5, W6, U3, U6, U8, K1	laboratory, e-learning lecture
2.	2. Neurophysiology: neural organization of nervous system, sensory receptors, nerves and sensory axis, motoneurons of spinal cord and brainstem, sensory and motor neurons of the upper and lower neurons of spinal cord, brain cortex, basal nuclei, cerebellum, speech and its associated brain centers, neural control of emotional behavior, the regulation of sleep, alert (awareness), process of learning and memory, body temperature regulation and brain centers responsible for sense, vision and hearing, vestibular system, sense of smell and taste. Current methods of neurological disorders diagnostics.	W1, W4, W5, W7, U1, U4, U5, U6, K1	laboratory, e-learning lecture

3.	3. Blood: Functions of the blood and its components, plasma composition and morphotic elements of the blood, hematopoiesis, blood groups, blood clotting, immune system, fibrinolysis, lymph circulation.	W1, W4, W6, W8, U2, U3, U5, U9, K1, K2	laboratory, e-learning lecture
4.	4. Cardiovascular physiology: An overview of the cardiovascular system, principles of hemodynamics, the electrical activity of the heart, electrocardiogram, mechanical activity of the heart and cardiac pump, cardiac cycle, regulation of venous return and cardiac output, blood pressure and its regulation, special circulations, capillary flow and filtration-reabsorption processes, control mechanisms in circulatory functions, local and systemic control of blood circulation, cardiovascular reflexes, current methods of determination of cardiovascular functions.	W1, W6, W8, W9, U1, U5, U8, K1, K2	laboratory, e-learning lecture
5.	5. Respiratory Physiology: the structure and function of respiratory tract and airways, the ventilation and the mechanics of breathing, lung spirometry in medicine, gases transfer and transport, oxygen-carbon dioxide exchange in the lungs, pulmonary circulation, the control of ventilation, functional methods of determination of respiratory tract, the respiratory and circulatory adaptation to exercise.	W1, W2, W3, U2, U3, U5	laboratory, e-learning lecture
6.	6. Renal Physiology: structure and functions of kidney, the regulation of fluid and electrolyte balance, renal blood flow and glomerular filtration rate, the role of kidney in homeostasis, reabsorption processes in proximal tubule, loop of Henle, distal tubule and collecting ducts, Urine osmolarity, volume and composition regulations in the kidney and the consequences of kidney disorders, renal regulations of potassium, calcium and magnesium levels by kidney, the role of kidney in maintenance of acid-base balance.	W2, W3, W8, U1, U5, K2	laboratory, e-learning lecture
7.	7. Gastrointestinal Physiology: food intake control and regulation, the neurogastroenterology and motility, the gastrointestinal secretion, digestion and absorption, physiology of gastrointestinal hormones, intestinal transport mechanisms of water, electrolytes and food digestion products, brain-gut axis, major gastrointestinal disorders and methods of investigation of gastrointestinal tract.	W6, W7, W9, U4, U7, U9, K1, K2	laboratory, e-learning lecture
8.	8. Endocrine Physiology: endocrine function mechanisms, the hypothalamic and pituitary gland physiology, the synthesis and regulation of the function of thyroid and adrenal glands, pancreatic endocrine function, the hormonal regulation of body metabolism, the endocrine regulation of calcium, phosphate and bone homeostasis, the hormonal regulation of body growth, female and male reproductive system, control of endocrine function of reproductive tract, physiology of menstrual cycle, fertilization, pregnancy and lactation, an overview of diagnostics in the function of endocrine glands and the consequences of the functional disorders of endocrine system.	W1, W6, W9, U5, U8, K1	laboratory, e-learning lecture

Course advanced

Semester 1

Teaching methods:

case study, brainstorm, computer classes, laboratories (labs), classes in simulated conditions, demonstration, discussion, e-learning, educational film, problem solving method, presentation, group work, lecture, practical classes, practical classes in simulated conditions

Activities	Examination methods	Credit conditions
e-learning lecture	multiple choice test	Attendance is obligatory and will be monitored.
laboratory	multiple choice test	Multiple choice midterm exams, multiple choice test as final exam. No absences are allowed.

Semester 2

Teaching methods:

laboratories (labs), classes in simulated conditions, demonstration, discussion, e-learning, educational film, problem solving method, presentation, group work, lecture, practical classes in simulated conditions

Activities	Examination methods	Credit conditions
e-learning lecture	written examination, classroom observation	Attendance is obligatory and will be monitored.
laboratory	written examination, theoretical colloquiums, classroom observation, oral answer, essay, written credit	Attendance is obligatory. In case of long term, excused absence contact with course coordinator is required

Additional info

The Students knowledge acquisition will be checked by 5 midterm exams from particular Physiology parts. These midterm exams will be consisting of multiple choice questions each within the time of 50 - 60min allowed to solve these questions. The Final Physiology exam is consisting of multiple choice questions from all 5 subsequent parts of Physiology course will last about 2 hours. The Final exam pass mark will be assigned to Students after calculation of Gaussian distribution of their scores.

Histology with Cytophysiology

Goals

C1	To provide students with the knowledge concerning the microscopic and submicroscopic structure and its relations to functions of cells, tissues and organs.
C2	To familiarize students with the morphological features related to functional specialization of cells, tissues, organs.
C3	To provide students with the skills allowing them to identify different cells, tissues and organs in the light and electron microscope.

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	anatomical, histological and embryological denominations in Polish and English	A.W1	practical examination, multiple choice test
W2	basic cellular structures and their functional specializations	A.W4	practical examination, multiple choice test
W3	microarchitecture of tissues, extracellular matrix and organs	A.W5	practical examination, multiple choice test
Skills - Student can:			
U1	operate an optical microscope, including the use of immersion	A.U1	practical examination
U2	recognize histological structures corresponding to organs, tissues, cells and cellular structures in optical or electron microscopy images, describe and interpret their structure and relations between structure and function	A.U2	practical examination
U3	use anatomical, histological and embryological denominations in speech and writing	A.U5	practical examination, multiple choice test
Social competences - Student is ready to:			
K1	use objective sources of information	O.K7	multiple choice test
K2	formulate conclusions from own measurements or observations	O.K8	practical examination, multiple choice test

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Introduction to histology. Light and electron microscopy. Magnification and resolving power. Preparation of the tissues for light and electron microscopy. Basic histological methods. Principles of histochemistry, enzyme histochemistry, immunohistochemistry and hybridization techniques.	W1, U1, K1, K2	laboratory

2.	The cell - The biological membranes. Transport across the membranes. The cell membrane, glycocalyx, adhesion molecules. The cell nucleus. The nucleolus. The nuclear envelope and communication between the nucleus and the cytoplasm. Structure and function of ribosomes, the translation process. The endoplasmic reticulum (smooth and rough). The Golgi apparatus. Exo- and endocytosis, including receptor-mediated endocytosis. Lysosomes. Proteasomes. Mitochondria. Genetic apparatus and biogenesis of mitochondria. Peroxisomes. The cytoskeleton and its involvement in the motility of cells. Cell death: necrosis and apoptosis.	W1, W2, U1, U2, U3, K1, K2	laboratory, e-learning lecture
3.	The epithelial tissue. Definition and components of a tissue. General characteristics and functions of epithelia. Classification and characteristics of different types of epithelia. Introduction to stem cells and renewal of the epithelia. Epithelial cell polarity. Free surface of the epithelial cells and its structures: microvilli and cilia, mechanism of ciliary movement. The basolateral surface: cell-cell and cell-matrix junctions, their structure and functions. Basal lamina. Glands: morphological and functional classification.	W1, W2, W3, U1, U2, U3, K1, K2	laboratory, e-learning lecture
4.	The connective tissue proper. Chemical and structural characteristics of the extracellular substance: matrix and fibers. Stages of collagen fiber production. Mesenchymal stem cells. Origin, structure and function of the connective tissue cells: fibroblasts, plasma cells, mast cells and macrophage family. General classification of connective tissue. Characteristics of connective tissue proper types. The comparative characteristics of white and brown adipose tissue.	W1, W2, W3, U1, U2, U3, K1, K2	laboratory, e-learning lecture
5.	Cartilage and bone. Cartilage: characteristics of the extracellular substance, chondral territories, nourishment of cartilage. Types of cartilage and their mechanical properties. Bone: organic and inorganic components of the extracellular substance. Bone cells: osteoprogenitor cells, osteoblasts, osteocytes, osteoclasts. The bone lamella, organization of cancellous and compact (Haversian) bone. Intramembraneous and endochondral ossification. Growth and remodelling of the bone. Principles of biomineralization. The joint.	W1, W2, W3, U1, U2, U3, K1, K2	laboratory, e-learning lecture
6.	Blood and hemopoiesis. Blood plasma. Blood cells, their counts, characteristics and functional adaptations. Erythrocyte and its cell membrane. Comparative characteristics of granulocytes and agranulocytes. The role of granulocytes in the defense mechanisms: neutrophils and bacteria-killing system, eosinophils, basophils. Lymphocytes - general characteristics. Monocytes and their functions. Blood platelets. The structure of hemopoietic bone marrow: the vascular and hemopoietic compartments. Hemopoiesis: stem cells, progenitor cells, the main hemopoietic lineages (erythroblastic, myeloblastic, megakaryocytic). Factors controlling the hemopoiesis.	W1, W2, W3, U1, U2, U3, K1, K2	laboratory, e-learning lecture

7.	The muscle tissue. The contractile apparatus. Classification of the muscle tissue. Characteristics of smooth, skeletal and cardiac muscle cells/fibres. Structural and biochemical basis of smooth and striated muscle contraction. Sarcomere, its structure, contractile, regulatory and accessory proteins. The role of T-tubules and sarcoplasmic reticulum in excitation-contraction coupling. Motor end plate. Satellite cells. The organization of smooth muscle layer, skeletal muscle, and cardiac muscle including the conduction system. Muscle spindle and Golgi tendon organ. The nonmuscle contractile cells.	W1, W2, W3, U1, U2, U3, K1, K2	laboratory, e-learning lecture
8.	The nerve tissue. Definition of the neuron and its structural characteristics. Classification of neurons. Neural stem cells. Types of nerve fibers. Structural and chemical basis of neural conduction: resting and action potentials, the role of ion channels and myelin sheath. Structure and types of synaptic junctions, neurotransmitters, the synaptic transmission. Paracrine transmission. Types and functions of neuroglial cells. Organization of peripheral nerve and dorsal root ganglion. Central nervous system: composition of white and grey matter, microscopic organization of the spinal cord, cerebral and cerebellar cortex. The blood-brain barrier. Meninges and choroid plexus.	W1, W2, W3, U1, U2, U3, K1, K2	laboratory, e-learning lecture
9.	The vascular system. Components of the vascular wall. Endothelium – structural characteristics and functions. Mechanisms of transendothelial transport of substances and migration of leukocytes. Endothelial progenitor cells. The structure and types of capillaries. Precapillaries (metaarterioles) and postcapillary venules. Regulation of blood flow in capillary bed. Layers of the vascular wall, comparative characteristics of arteries and veins. Arterioles and arteries (muscular and elastic). The veins and their structural variability. Arteriovenous anastomoses. Carotid and aortic bodies, carotid sinus. The heart wall layers.	W1, W2, W3, U1, U2, U3, K1, K2	laboratory, e-learning lecture
10.	The lymphatic system. The innate immunity: pattern recognition receptors, NK cells. The adaptive immunity: cells involved in the immune reactions - antigen presenting cells, T- and B-lymphocytes and their subpopulations, characteristics and cooperation. Humoral and cell-mediated immune response. The lymphoid tissue and its organization. The lymphoid node. Structure and function of the lymph node. Spleen - organization and functions of white and red pulp, the splenic circulation. Thymus: general organization, epithelioreticular cell system and its role in the differentiation and maturation of T lymphocytes. Mucosa-associated lymphoid tissue: the tonsils.	W1, W2, W3, U1, U2, U3, K1, K2	laboratory, e-learning lecture
11.	The integument. Layers of the integument. Epidermis: keratinocytes and the keratinization process, melanocytes, Langerhans and Merkel cells and their functions. Organization of dermis and hypodermis. Eccrine and apocrine sweat glands and sebaceous glands: structure, function and mode of secretion. The hair follicle and its appendages. Epidermal stem cells. Vascularization and innervation of the skin, types of encapsulated mechanoreceptors and their function. Comparative characteristics of thick and thin skin.	W1, W2, W3, U1, U2, U3, K1, K2	laboratory, e-learning lecture

12.	<p>The alimentary system - Oral cavity and salivary glands. Definition and general characteristics of mucosa. Regional differentiation of oral mucosa. The tongue: lingual papillae, taste buds, mechanism of taste perception. Tooth: structure of the mineralized parts, dental pulp and periodontal membrane. The major and minor salivary glands: the secretory portions of serous and mucous type, structure and function of excretory ducts. Comparative characteristics of major salivary glands. General organization of the alimentary canal, characteristics of the wall layers. The esophagus. The wall of stomach: surface lining epithelium and its protective function, characteristics of the gastric glands and their cellular composition. The intestines and their adaptations to function (intestinal epithelium, villi and crypts), segmental differences in the wall structure. The gut-associated lymphoid tissue. Innervation of the alimentary canal. The enteroendocrine cells.</p>	W1, W2, W3, U1, U2, U3, K1, K2	laboratory, e-learning lecture
13.	<p>Large glands of the alimentary system. The pancreas - organization of the exocrine part, characteristics of the secretory pancreatic cell, acini and ducts. General organization of the liver, types of hepatic lobules. Structural and functional characteristics of the hepatocyte and its polarity. The hepatic sinusoids and associated cells. The hepatic circulation. Intra- and extrahepatic bile ducts.</p>	W1, W2, W3, U1, U2, U3, K1, K2	laboratory, e-learning lecture
14.	<p>The respiratory system. The airways - characteristics of the mucosa, the airway epithelium and its cell types, the mucociliary cleaning mechanism. Nasal mucosa: the respiratory and the olfactory regions. Olfactory epithelium: cell types and functions. Pharynx and larynx. The structure of trachea, bronchi and bronchioles. General organization of the lungs. The pulmonary alveoli: types and functions of pneumocytes, air-blood barrier, the surfactant and its role. The alveolar macrophages.</p>	W1, W2, W3, U1, U2, U3, K1, K2	laboratory, e-learning lecture
15.	<p>The endocrine system. General characteristics of endocrine glands. The pituitary gland: adeno- and neurohypophysis. The functional interrelations between hypothalamus and the pituitary, the role of the vascular system. Morphological and functional classification of cells in adeno- and neurohypophysis, structure and function of pars nervosa. General organization of thyroid gland. The thyroid follicle: its cells and stages of thyroid hormone production. The C-cells. Adrenal cortex, its layers and hormones. The ultrastructural features of steroidogenic cells. Adrenal medulla: chromaffin cells and production of catecholamines. The pancreatic islets: ultrastructural and functional characteristics of their cells. The parathyroid glands - cell types and function. The pineal gland. The system of disseminated neuroendocrine cells (DNES, APUD). Molecular mechanisms of chemical signaling. Types of chemical signals and principles of chemical signaling. Receptor types. Membrane receptors. Signal transduction involving G-proteins, second messengers and their action. Enzyme-linked membrane receptors. Intracellular receptors and the mechanisms of cell response.</p>	W1, W2, W3, U1, U2, U3, K1, K2	laboratory, e-learning lecture

16.	<p>The female reproductive system. The ovary - ovarian follicles and their successive developmental stages. The structure of the Graafian follicle. Follicular atresia. Formation, structure and function of corpus luteum, luteolysis and corpus albicans. Endocrine cells of the ovary. The oviduct: layers of the wall, characteristics of epithelium. The structure of uterine wall, changes of endometrium in the course of the menstrual cycle. The uterine cervix and vagina. Exfoliative cytology of cervical smears. Accessory organs of the female reproductive system. General organization of placenta. Formation, development and maturation of placental villi, characteristics of the placental barrier. The syncytiotrophoblast and its function. Decidua and basal plate: decidual cells, extravillous cytotrophoblast and its role. The histological structure of fetal membranes and umbilical cord. Cord blood as a source of stem cells. The mammary gland - general organization and changes related to development and functional status. Structure of secretory portion (alveolus), the secretory cell and mechanisms of milk secretion. The excretory ducts.</p>	W1, W2, W3, U1, U2, U3, K1, K2	laboratory, e-learning lecture
17.	<p>The male reproductive system. The testis - general structure. The seminiferous tubule and its tunica propria. The seminiferous epithelium, spermatogenesis. Structure of the mature spermatozoon. Sertoli cells and their functions, the blood-testis barrier. The interstitial tissue: Leydig cells, testicular macrophages. The excretory passages: tubuli recti, rete testis, epididymis and vas deferens. Structure and function of associated glands: prostate, seminal vesicles and bulbourethral glands.</p>	W1, W2, W3, U1, U2, U3, K1, K2	laboratory, e-learning lecture
18.	<p>The urinary system. The kidney: cortex and medulla. Nephron and the localization of its segments in the renal parenchyma. The renal corpuscle and filtration barrier, mechanism of ultrafiltration. Structural and functional characteristics of the successive segments of the nephron. The collecting tubule and its role in urine condensation. The juxtaglomerular apparatus: its components and their function. Renal blood vessels. The excretory passages: ureter and urinary bladder. Adaptation of the urinary bladder to the filling/voiding cycle.</p>	W1, W2, W3, U1, U2, U3, K1, K2	laboratory, e-learning lecture
19.	<p>The organ of vision. General organization of the eyeball and its layers. The sclera and cornea. The choroid and structures responsible for accommodation and adaptation: ciliary body and iris. Production and circulation of the aqueous humor. The lens. The retina: layers, characteristics of cones and rods, molecular basis of photoreception. Macula lutea and optic disk. The eyelid: conjunctiva, tarsal plate, glands. The lacrimal gland.</p>	W1, W2, W3, U1, U2, U3, K1, K2	laboratory, e-learning lecture

20.	The organ of hearing and balance. External ear: auricle and external auditory meatus, tympanic membrane. Middle ear: tympanic cavity, auditory ossicles, auditory tube, cavities of the mastoid process. Inner ear: bony and membranous labyrinth. Sacculle and utricle, semicircular ducts, endolymphatic duct and sac, cochlear duct. Structure and function of sensory structures: maculae, cristae and the organ of Corti. Characteristics of hair cells and supporting cells, morphological and molecular basis of hearing and balance.	W1, W2, W3, U3, K1, K2	e-learning lecture
-----	--	------------------------	--------------------

Course advanced

Semester 1

Teaching methods:

classes / practicals, e-learning

Activities	Examination methods	Credit conditions
e-learning lecture	multiple choice test	Passing mini-quizes (MCQ) concerning all subjects (approx. 9 questions in each). The mid-term MCQ exam (80 questions, 60% pass level), covering the material concerning the cell and the tissues (Cell & Tissues exam). A student who fails the exam will be allowed to retake it in about two weeks time. The final theoretical exam (MCQ, 100 questions, 60% pass level), covering the material concerning histology of systems and organs.
laboratory	practical examination, multiple choice test	The practical (laboratory) exam: Identification of cells/tissues/organs and their specific structures in 13 microscopic slides and 2 electron micrographs. This part is evaluated on the pass/fail basis, pass level 9 pts. 2. the theoretical part (MCQ, 100 questions, 60% pass level), covering the material concerning histology of systems and organs. Passed lab mini-tests.

Semester 2

Teaching methods:

classes / practicals, e-learning, lecture

Activities	Examination methods	Credit conditions
laboratory	practical examination, multiple choice test	Basic knowledge during labs (minitests). Theory included to mid-term and final exams. The practical (laboratory) exam: Identification of cells/tissues/organs and their specific structures in 13 microscopic slides and 2 electron micrographs. This part is evaluated on the pass/fail basis, pass level 9 pts.
e-learning lecture	multiple choice test	Passing the theoretical part of the final exam (MCQ, 100 questions, 60% pass level), covering the material concerning histology of systems and organs..

Additional info

Requirements to get the credit and to be allowed to take the final exam: Completed labs and e-learning and passed the Cell & Tissues exam. Students who fail the Cell & Tissues retake will have to retake it once more, before the final exam.

Entry requirements

none

History of Medicine

Educational subject description sheet

-------------------------------------	--	---

Goals

C1	To acquaint students with the historical development of the medicine on the grounds of the selected disciplines of basic and clinical sciences.
----	---

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	development, structure and functions of the human body in normal and pathological conditions	O.W1	multiple choice test

W2	cultural, ethnic and national determinants of human behavior	D.W19	multiple choice test
W3	the history of medicine, the medicine of primitive peoples and ancient civilizations and the characteristic features of medieval medicine	D.W20	multiple choice test
W4	the characteristics of modern medicine and its most important discoveries	D.W21	multiple choice test
W5	the process of shaping new specialties in the field of scientific discipline - medical sciences and achievements of leading representatives of Polish and world medicine	D.W22	multiple choice test
Skills - Student can:			
U1	plan own learning activities and constantly learn in order to update own knowledge	O.U5	multiple choice test
U2	critically evaluate the results of scientific research and adequately justify the position	O.U9	multiple choice test
U3	show responsibility for improving your qualifications and transferring knowledge to others	D.U16	multiple choice test
U4	demonstrate responsibility for one's own professional development, contribute to the further development of sciences, transfer own knowledge to others	D.U22	multiple choice test
Social competences - Student is ready to:			
K1	formulate opinions on the various aspects of the professional activity	O.K10	multiple choice test
K2	use objective sources of information	O.K7	multiple choice test
K3	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	multiple choice test
K4	to be guided by the well-being of a patient	O.K2	multiple choice test

Calculation of ECTS points

e-learning lecture	24
seminar	1
preparation for test	10
preparation for examination	10
participation in examination	1
conducting literature research	5
Student workload	Hours 51

Workload involving teacher	Hours 25
-----------------------------------	--------------------

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	HISTORY OF ANATOMY	W1, W2, W3, W4, W5, U1, U2, U3, U4	e-learning lecture
2.	HISTORY OF PHYSIOLOGY	W1, W2, W3, W4, W5, U1, U2, U3, U4	e-learning lecture
3.	HISTORY OF PATHOLOGY	W1, W2, W3, W4, W5, U1, U2, U3, U4	e-learning lecture
4.	HISTORY OF PATHOLOGICAL ANATOMY	W1, W2, W3, W4, W5, U1, U2, U3, U4	e-learning lecture
5.	HISTORY OF INTERNAL MEDICINE: DIAGNOSIS	W1, W2, W3, W4, W5, U1, U2, U3, U4	e-learning lecture
6.	HISTORY OF INTERNAL MEDICINE: THERAPY	W1, W2, W3, W4, W5, U1, U2, U3, U4	e-learning lecture
7.	HISTORY OF SURGERY	W1, W2, W3, W4, W5, U1, U2, U3, U4	e-learning lecture
8.	HISTORY OF BIOCHEMISTRY	W1, W2, W3, W4, W5, U1, U2, U3, U4	e-learning lecture
9.	HISTORY OF GENETICS	W1, W2, W3, W4, W5, U1, U2, U3, U4	e-learning lecture
10.	HISTORY OF RADIOLOGY	W1, W2, W3, W4, W5, U1, U2, U3, U4	e-learning lecture
11.	HISTORY OF HYGIENE AND SOCIAL MEDICINE	W1, W2, W3, W4, W5, U1, U2, U3, U4	e-learning lecture
12.	HISTORY OF NATURAL HEALING AND ALTERNATIVE MEDICINE	W1, W2, W3, W4, W5, U1, U2, U3, U4	e-learning lecture
13.	SUMMARY CLASS OF THE HISTORY OF MEDICINE	W1, W2, W3, W4, W5, U1, U2, U3, U4, K1, K2, K3, K4	seminar

Course advanced

Teaching methods:

textual analysis, discussion, e-learning, seminar

Activities	Examination methods	Credit conditions
e-learning lecture	multiple choice test	Correct answer to control questions included in e-learning presentations
seminar	multiple choice test	Positive passing of the final multiple-choice test containing questions from the topics of lectures and seminar.

Additional info

All e-learning lectures must be positively fulfilled with final mark confirming that course is completed on e-learning platform before the final class and before proceeding to the final test. The grade scale is as follows:

100-95% 5,0

94%-88% 4,5

87%-78% 4,0

77%-71% 3,5

70%-58% 3,0

58% < 2,0

If the final test is missed or the final result is under 58% then retake exam will be available, also in the same test form

Entry requirements

None

First Aid

Goals

C1	First Aid (1st year) 1. Familiar the students with the principles of cardiopulmonary resuscitation in adults, children infants, including: - Assessment of the unconscious victim, - Placing the victim in the recovery position - Chest compression - Perform rescue breathing technique of mouth-to-mouth, mouth-to-nose, using a pocket mask and bag-mask valve - Use of Automated External Defibrillator 2. Familiar the students with the principles of first aid in life-threatening conditions not related to trauma 3. Familiar the students with the basic nursing skills: - iv placement - blood pressure taking - applying urine catheter
C2	First Aid (2nd year) 1. Repetition of the cardiovascular resuscitation rules in adults and children 2. Introduction to ABCDE examination in patient assessment. 3. Airway management: nasopharyngeal tube, laryngeal mask airway, self inflating bag with face mask, set for oxygen therapy, suction devices. 4. Introduction to first aid in medical life-threatening conditions. 5. Introduction to first aid in traumatic life-threatening conditions

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	symptoms and course of diseases	O.W2	practical examination
W2	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	practical examination
Skills - Student can:			
U1	identify medical problems and prioritize medical management	O.U1	practical examination
U2	identify life-threatening conditions that require immediate medical intervention	O.U2	practical examination
U3	plan the diagnostic procedure and interpret its results	O.U3	practical examination
U4	implement appropriate and safe therapeutic treatment and predict its effects	O.U4	practical examination
U5	plan own learning activities and constantly learn in order to update own knowledge	O.U5	practical examination
U6	inspire the learning process of others	O.U6	practical examination
U7	communicate with the patient and his family in an atmosphere of trust, taking into account the needs of the patient	O.U7	practical examination
U8	communicate and share knowledge with colleagues in a team	O.U8	practical examination
Social competences - Student is ready to:			
K1	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	practical examination
K2	to be guided by the well-being of a patient	O.K2	practical examination
K3	respect medical confidentiality and patients' rights	O.K3	practical examination
K4	take actions towards the patient on the basis of ethical norms and principles, with an awareness of the social determinants and limitations of the disease	O.K4	practical examination
K5	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	practical examination

K6	promote health-promoting behaviors	O.K6	practical examination
K7	use objective sources of information	O.K7	practical examination
K8	implement the principles of professional camaraderie and cooperation in a team of specialists, including representatives of other medical professions, also in a multicultural and multinational environment	O.K9	practical examination
K9	assume responsibility for decisions taken in the course of their professional activities, including in terms of the safety of oneself and others	O.K11	practical examination

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Assessment of an unconscious victim, recovery position, calling for help	W1, U1, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4, K5, K6, K7, K8, K9	classes, e-learning lecture
2.	Technique of opening the airway without instruments.	W1, U1, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4, K5, K6, K7, K8, K9	classes, e-learning lecture
3.	Assisted ventilation: mouth-to-mouth, mouth-to-nose, mouth-mouth/nose, pocket mask, bag-mask valve.	W1, U1, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4, K5, K6, K7, K8, K9	classes, e-learning lecture
4.	Technique for chest compression.	W1, U1, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4, K5, K6, K7, K8, K9	classes, e-learning lecture
5.	Technique for cardiopulmonary resuscitation in adults and children.	W1, U1, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4, K5, K6, K7, K8, K9	classes, e-learning lecture
6.	The use of an automated external defibrillator.	W1, U1, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4, K5, K6, K7, K8, K9	classes, e-learning lecture
7.	Principles for giving first aid in the life-threatening situation (choking, fainting, chest pain, stroke, seizures, injuries).	W1, U1, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4, K5, K6, K7, K8, K9	classes, e-learning lecture
8.	Assessment of a conscious patient according to the ABC scheme and performing of the basic SAMPLE interview.	W1, U1, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4, K5, K6, K7, K8, K9	classes, e-learning lecture
9.	Principles of selected nursing activities (blood pressure, getting vascular accesses, urinary catheterization).	W1, U1, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4, K5, K6, K7, K8, K9	classes, e-learning lecture
10.	Ethical issues associated with conducting CPR	W1, U4, U7, U8, K1, K2, K3, K4	classes, e-learning lecture
11.	<p>Second year</p> <ol style="list-style-type: none"> 1. Repetition of the cardiovascular resuscitation rules in adults. 2. Diagnosing and treatment of a patient in shock. 3. Introduction to medical first aid in life-threatening condition in trauma. 4. Introduction to ABCDE examination in trauma patient assessment. 5. Rules of medical equipment use: nasopharyngeal tube, laryngeal mask airway, self inflating bag with face mask, set for oxygen therapy, suction devices, spinal board, scoop stretcher, cervical collar, splint, space blanket. 6. Rules of maintaining safe environment to the patient and the rescuer. 	W1, W2, U1, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4, K5, K6, K7, K8, K9	classes, seminar, e-learning lecture

Course advanced

Semester 1, Semester 2

Teaching methods:

classes / practicals, classes in simulated conditions, e-learning, presentation, simulation, low fidelity simulation, lecture with multimedia presentation, practical classes, practical classes in simulated conditions

Activities	Examination methods	Credit conditions
e-learning lecture	practical examination	- Presence at the exercises - one justified absence is possible. - Active participation in classes - Preparing presentation about the first aid topics (if absent presentation to be sent to coordinator) - Positive completion of a practical exam
classes	practical examination	- Presence at the exercises - one justified absence is possible. - Active participation in classes - Preparing presentation about the first aid topics (if absent presentation to be sent to coordinator) - Positive completion of a practical exam

Semester 4

Teaching methods:

case study, textual analysis, brainstorm, classes / practicals, classes in clinical skills room, classes in simulated conditions, demonstration, discussion, e-learning, educational film, educational game, language conversation classes, project method, case study method, group work, seminar, simulation, low fidelity simulation, high fidelity simulation, practical classes

Activities	Examination methods	Credit conditions
seminar	practical examination	Practical exam with simulated scenarios
classes	practical examination	Practical exam with simulated scenarios

Additional info

First Aid 1/2 Criteria:

Pass/fail practical exam: perform in-hospital CPR according to the checklist.

To pass you need to obtain a flow fraction (measured on feedback device) at least 80%

Retake available same day with different instructor.

First Aid 2/2 Criteria:

Entry requirements

First Aid 1/2

Presence is obligatory, any absence should be justified and made up. Justification needs to be from the doctor (doctor's note or PCR test result) or from the Dean, to be send to the coordinator as soon as possible (before or after the missed class). To make up your absence you need to prepare presentation about the missed subject prior to attempting the exam. Details to be discussed with coordinator.

More absences (or not made up) - unable to get credit. Specific issues to be discused with coordinator.

First Aid 2/2

credit from First Aid (1st year), obligatory presence

Presence is obligatory, any absence should be justified and made up. If two justified absences - prepare an essey (500 words) from missed subject, more justified absences - unable to get credit. Justification needs to be only from the doctor or from the Dean, to be send to the coordinator as soon as possible (before or after the missed class).

To make up your absence please contact coordinator. All absences should be made up before the exam on duty hours.

Details to be discussed with coordinator.

More absences (or not made up) - unable to get credit. Specific issues to be discused with coordinator

1st year Coordinator - Joanna Fařerek (joanna.faferek@uj.edu.pl)

2nd year Coordinator - Anna Źądło (anna.zadlo@uj.edu.pl)

Teaching methods:

textual analysis, classes / practicals, educational game, language conversation classes

Activities	Examination methods	Credit conditions
foreign language course	written examination, oral examination, essay, clinical case presentation	1. The final grade will be a result of the following scores: 50 % (final test) 30 % (partial tests/midterms) 20 % (activity and class work) Grading scale: 0-59 failed (2.0) 60-67 satisfactory (3.0) 68-75 satisfactory + (3.5) 76-83 good (4.0) 84-91 good + (4.5) 92-100 very good (5.0)

Semester 6

Teaching methods:

textual analysis, classes / practicals, educational game, language conversation classes

Activities	Examination methods	Credit conditions
foreign language course	written examination, oral examination, essay, clinical case presentation	1. The final grade will be a result of the following scores: 50 % (final test) 30 % (partial tests/midterms) 20 % (activity and class work) Grading scale: 0-59 failed (2.0) 60-67 satisfactory (3.0) 68-75 satisfactory + (3.5) 76-83 good (4.0) 84-91 good + (4.5) 92-100 very good (5.0)

Semester 7

Teaching methods:

textual analysis, classes / practicals, educational game, language conversation classes

Activities	Examination methods	Credit conditions
foreign language course	written examination, oral examination, essay, clinical case presentation	1. The final grade will be a result of the following scores: 50 % (final test) 30 % (partial tests/midterms) 20 % (activity and class work) Grading scale: 0-59 failed (2.0) 60-67 satisfactory (3.0) 68-75 satisfactory + (3.5) 76-83 good (4.0) 84-91 good + (4.5) 92-100 very good (5.0)

Semester 8

Teaching methods:

textual analysis, classes / practicals, educational game, language conversation classes

Activities	Examination methods	Credit conditions
foreign language course	written examination, oral examination	1. The final grade will be a result of the following scores: 50 % (final test) 30 % (partial tests/midterms) 20 % (activity and class work) Grading scale: 0-59 failed (2.0) 60-67 satisfactory (3.0) 68-75 satisfactory + (3.5) 76-83 good (4.0) 84-91 good + (4.5) 92-100 very good (5.0)

Entry requirements

The attendance is mandatory. 10% justified absences are allowed. In the case of absences student must contact the teacher and catch up the material(exercises recommended by the teacher and essay)

Health and Safety

Educational subject description sheet

Basic information

<p>Department Faculty of Medicine</p> <p>Field of study Medical Program</p> <p>Study level long-cycle master's degree program</p> <p>Study form full-time</p> <p>Education profile general academic</p> <p>Disciplines Medical science</p> <p>ISCED classification 1022 Occupational health and safety</p>	<p>Didactic cycle 2021/22</p> <p>Realization year 2021/22</p> <p>Lecture languages English</p> <p>Block obligatory for passing in the course of studies</p> <p>Mandatory obligatory</p> <p>Examination credit</p> <p>Standard group</p>
---	--

<p>Period Semester 1</p>	<p>Examination credit</p> <p>Activities and hours Health and Safety training: 5</p>	<p>Number of ECTS points 0.0</p>
-------------------------------------	---	---

Goals

C1	Anquainting students and doctoral students starting education in doctoral schools with the provisions and principles of safety and hygiene of education on the basis of selected legal provisions
C2	Getting to know the threats to life and health that occur during classes, how to protect against these threats and how to deal with these threats
C3	Informing students and doctoral students starting education in doktoral schools about the principles of fire protection and in particular about how to prevent fires, fire detection systems, fire - fighting equipment and conducting evacuation in the event of fire and other local threats
C4	Introduction to the general principles of fist aid

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
------	----------------------	---------	---------------------

Knowledge - Student knows and understands:			
W1	ethical, social and legal conditions for practicing the medical profession and the principles of health promotion, based on scientific evidence and accepted standards	O.W4	test
Skills - Student can:			
U1	identify life-threatening conditions that require immediate medical intervention	O.U2	test
Social competences - Student is ready to:			
K1	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	test
K2	assume responsibility for decisions taken in the course of their professional activities, including in terms of the safety of oneself and others	O.K11	test

Calculation of ECTS points

Activity form	Activity hours*
Health and Safety training	5
analysis of the research material	1
Student workload	Hours 6
Workload involving teacher	Hours 5

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Module I Selected legal regulations - legal grounds for safety and hygiene of education - rights and obligations of a student and Rector in the field of safety and hygiene of education - basic safety principles applicable to students during classes organized by the University	W1, U1, K1, K2	Health and Safety training
2.	Module I Conditions of safety and hygiene of education in the University's premises - roads and passages - the University's premises - lighting, heating and ventilation - first aid kit - stand equipped with a screen monitor	W1, U1, K1, K2	Health and Safety training

3.	Module I Educational environment factors and their threats and prevention - dangerous factors - harmful factors - arduous factors	W1, U1, K1, K2	Health and Safety training
4.	Module I Accidents to which students may suffer during classes organized by the University - rules of conduct in the event of accidents and in the event of danger and failure	W1, U1, K1, K2	Health and Safety training
5.	Module I Rules of using student houses	W1, U1, K1, K2	Health and Safety training
6.	Module I Rules of first aid - medical rescue system in Poland - first aid in legal acts - survival chain - lifeguard safety - injured party assessment (ABC) and call for help - safe position - cardiopulmonary resuscitation (CPR) - automatic cardiopulmonary resuscitation AED external defibrillator - emergency procedures	W1, U1, K1, K2	Health and Safety training
7.	Module I Fire protection - legal bases for fire protection - duties of the University, students and doctoral students in the field of fire protection - definition of fire - fire groups - causes of fires - ways of fire fighting - fire fighting equipment - rules of use and operation - rules of behavior during a fire - rules of behavior during evacuation	W1, U1, K1, K2	Health and Safety training
8.	Module II Threats of biological agents in the learning environment - personal protective equipment against biological threats - problems of environmental	W1, U1, K1, K2	Health and Safety training
9.	Module III Threats of chemical agents in the learning environment - personal protective equipment against chemical threats - problems of environmental	W1, U1, K1, K2	Health and Safety training

Course advanced

Teaching methods:

e-learning, e-learning, lecture with multimedia presentation

Activities	Examination methods	Credit conditions
Health and Safety training	test	credit - watching and listening to the presentation is the basis for recognizing participation in compulsory training

Entry requirements

attendance at the training is obligatory

Ethics in Medicine

Educational subject description sheet

Basic information

<p>Department Faculty of Medicine</p> <p>Field of study Medical Program</p> <p>Study level long-cycle master's degree program</p> <p>Study form full-time</p> <p>Education profile general academic</p> <p>Disciplines Medical science</p> <p>ISCED classification 0223 Philosophy and ethics</p> <p>Subject related to scientific research Yes</p>	<p>Didactic cycle 2021/22</p> <p>Realization year 2021/22</p> <p>Lecture languages English</p> <p>Block obligatory for passing in the course of studies</p> <p>Mandatory obligatory</p> <p>Examination graded credit</p> <p>Standard group D. Behavioral and social sciences with elements of professionalism</p>
---	--

<p>Period Semester 2</p>	<p>Examination graded credit</p> <p>Activities and hours seminar: 30</p>	<p>Number of ECTS points 2.0</p>
-------------------------------------	--	---

Goals

C1	Enabling students to perceive ethical dimension of medical practice.
C2	Making students acquainted with the main schools of moral thought, typical methods or ethical reasoning and argumentation, and their application to moral deliberations over medical practice.
C3	Prepare students to self-reliant solving moral dilemmas in medical practice based on rational ethical argumentation.

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			

W1	ethical, social and legal conditions for practicing the medical profession and the principles of health promotion, based on scientific evidence and accepted standards	O.W4	classroom observation, written credit
W2	principles and methods of communication with the patient and his/her family, which are aimed at building empathic, trust-based relationships	D.W5	classroom observation, written credit
W3	the main concepts, theories, principles and ethical rules serving as a general framework for the proper interpretation and analysis of moral and medical issues	D.W16	classroom observation, written credit
W4	patient's rights	D.W17	classroom observation, written credit
W5	standards relating to patients' rights	D.W24	classroom observation, written credit
Skills - Student can:			
U1	communicate with the patient and his family in an atmosphere of trust, taking into account the needs of the patient	O.U7	classroom observation, written credit
U2	comply with ethical standards in professional activities	D.U13	classroom observation, written credit
U3	recognise the ethical dimension of medical decisions and distinguish between factual and normative aspects	D.U14	classroom observation, written credit
U4	follow the patient's rights	D.U15	classroom observation, written credit
U5	recognise and apply measures provided for by law when it is necessary to take medical action without consent or with the use of coercion	D.U20	classroom observation, written credit
Social competences - Student is ready to:			
K1	to be guided by the well-being of a patient	O.K2	classroom observation, written credit
K2	take actions towards the patient on the basis of ethical norms and principles, with an awareness of the social determinants and limitations of the disease	O.K4	classroom observation, written credit
K3	respect medical confidentiality and patients' rights	O.K3	classroom observation, written credit
K4	assume responsibility for decisions taken in the course of their professional activities, including in terms of the safety of oneself and others	O.K11	classroom observation, written credit

Calculation of ECTS points

Activity form	Activity hours*
seminar	30
preparation for classes	20

preparation for colloquium	10
Student workload	Hours 60
Workload involving teacher	Hours 30

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Why does medicine needs ethics? Moral traditions of medicine and contemporary medical practice	W1	seminar
2.	Basic concepts and theories of moral philosophy and main approaches to medical ethics I: utilitarianism and deontological ethics	W3	seminar
3.	Basic concepts and theories of moral philosophy and main approaches to medical ethics II: virtue ethics, 4 principles theory and moral casuistry	W3	seminar
4.	Basic concepts of ethical considerations: person, human dignity and the value of life	W3	seminar
5.	The problem of patient's autonomy - it's sources, extent and limitations	W2, W5, U1	seminar
6.	Theory and practice of informed consent; surrogate consent and treating patients without consent	W2, W4, U1, U4, U5, K2, K4	seminar
7.	Moral quandaries at the beginning of human life	W4, U4, K3	seminar
8.	Ethical assessment of abortion and artificial reproduction	W3, U3, K2	seminar
9.	Ethical controversies surrounding organ transplantations	W3, U3, K2	seminar
10.	Moral significance of new medical technologies - the problem of technological and pharmacological enhancement	W1, U3, K2, K4	seminar
11.	Moral dilemmas at the end of human life I: moral debates on withdrawing and withholding treatment, intensive and palliative care	W2, U1, U3, U5, K1, K2, K4	seminar
12.	Moral dilemmas at the end of human life II: the problem of euthanasia and assisted suicide	W4, K1, K2, K4	seminar
13.	Ethical framework of experimentation on human beings and the limits of scientific progress	W4, U4, K2, K4	seminar
14.	Justice in healthcare - moral dimensions of medical economy	W1, U2, K2, K4	seminar
15.	The physician and the patient - whom they are in clinical encounter nowadays?	W2, U1, U3, K4	seminar

Course advanced

Teaching methods:

case study, textual analysis, discussion, presentation, seminar

Activities	Examination methods	Credit conditions
seminar	classroom observation, written credit	Active participation in seminars, theoretical colloquium based on case analyses.

Additional info

Up to 2 absences is permitted. Absences should be resumed either by oral consultation or by writing short essay concerning the subject of absence.

Entry requirements

Participation to seminars is obligatory.

Genetics with Molecular Biology

Educational subject description sheet

Basic information

<p>Department Faculty of Medicine</p> <p>Field of study Medical Program</p> <p>Study level long-cycle master's degree program</p> <p>Study form full-time</p> <p>Education profile general academic</p> <p>Disciplines Medical science</p> <p>ISCED classification 0912 Medicine</p> <p>Subject related to scientific research Yes</p>	<p>Didactic cycle 2021/22</p> <p>Realization year 2021/22</p> <p>Lecture languages English</p> <p>Block obligatory for passing in the course of studies</p> <p>Mandatory obligatory</p> <p>Examination graded credit</p> <p>Standard groups B. Scientific basics of medicine, C. Preclinical course</p>
--	--

<p>Period Semester 2</p>	<p>Examination graded credit</p> <p>Activities and hours e-learning lecture: 22 seminar: 6 laboratory: 2</p>	<p>Number of ECTS points 2.0</p>
-------------------------------------	--	---

Goals

C1	Knowledge of biological and molecular basis of inheritance, opportunities to study and modify genetically determined traits and availability of tools and techniques. Basic concepts of medical genetics, genetic diagnostics, patterns of inheritance and genotype - phenotype correlations.
C2	Critical evaluation by students of novel concepts and approaches in genetics and molecular medicine. Practice in presentation of students opinions based on their independent literature data analysis.
C3	Learning of the knowledge resources and necessity to systematically and continuously update knowledge in the field of molecular medicine.

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	nucleotide functions in the cell, primary and secondary DNA and RNA structures and chromatin structure	B.W13	test
W2	functions of the genome, transcriptome and human proteome, and basic methods used in their examination, processes of DNA replication, repair and recombination, transcription and translation and degradation of DNA, RNA and proteins, as well as concepts for regulation of gene expression	B.W14	test
W3	processes: cell cycle, cell proliferation, differentiation and aging, apoptosis and necrosis and their importance for the functioning of the body	B.W18	test
W4	in the basic scope, the subject matter of stem cells and their application in medicine	B.W19	test
W5	the mechanism of the body's aging	B.W23	test
W6	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	classroom observation, test
W7	basic concepts in the field of genetics	C.W1	test
W8	phenomena of gene coupling and interaction	C.W2	test
W9	normal human karyotype and different types of sex determination	C.W3	test
W10	chromosome structure and molecular mutagenic background	C.W4	test
W11	the rules for the inheritance of different numbers of traits, the inheritance of quantitative traits, the independent inheritance of traits and the inheritance of non-nuclear genetic information	C.W5	test
W12	genetic determinants of human blood groups and serological conflict in the Rh system	C.W6	test
W13	aberrations of autosomes and heterosomes that cause disease, including oncogenesis and cancer	C.W7	test
W14	factors influencing the primary and secondary genetic balance of the population	C.W8	test
W15	basics of diagnostics of gene and chromosomal mutations responsible for hereditary and acquired diseases, including neoplastic diseases	C.W9	test
W16	benefits and threats resulting from the presence of genetically modified organisms (GMOs) in the ecosystem	C.W10	test
Skills - Student can:			
U1	plan the diagnostic procedure and interpret its results	O.U3	classroom observation, test
U2	use on-line photo, audio and video libraries	B.U21	test
U3	use on-line databases of the human genome	B.U23	test

U4	use the Internet databases of genetic disorders	B.U24	classroom observation, test
U5	explain and prioritize differences between prospective and retrospective, randomized and clinical-control studies, case reports and experimental studies according to the reliability and quality of scientific evidence	B.U12	test
U6	analyze genetic crossbreeds and pedigrees of human traits and diseases, and assess the risk of having a child with chromosome aberrations	C.U1	test
U7	make decisions about the need for cytogenetic and molecular tests	C.U3	classroom observation, test
U8	perform morphometric measurements, analyze morphograms and record karyotypes of diseases	C.U4	test
U9	estimate the risk of a given disease becoming apparent in the offspring based on family predisposition and the influence of environmental factors	C.U5	test
U10	assess environmental hazards and use basic methods to detect the presence of harmful (biological and chemical) factors in the biosphere	C.U6	test
Social competences - Student is ready to:			
K1	take actions towards the patient on the basis of ethical norms and principles, with an awareness of the social determinants and limitations of the disease	O.K4	classroom observation, test
K2	use objective sources of information	O.K7	classroom observation, test

Calculation of ECTS points

Activity form	Activity hours*
e-learning lecture	22
seminar	6
laboratory	2
preparation for classes	6
conducting literature research	6
kształcenie samodzielne	8
participation in examination	2
Student workload	Hours 52
Workload involving teacher	Hours 30

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Function of human genome, transcriptome and proteome and methods to study them. Mechanisms of replication, repair and recombination of DNA. Transcription, translation and degradation of DNA, RNA and proteins. Basic concepts in genetics: linkage and association. Inheritance of quantitative and qualitative traits. Independent segregation of traits and extranuclear genetics.	W1, W12, W2, W7, U3, U4, U6, U8, U9	seminar, laboratory, e-learning lecture
2.	Basic methods of genetic diagnostics: mutations and chromosomal aberrations. Impact on inherited and acquired disorders. The normal human karyotype and the most common chromosomal aberrations.	W10, W11, W13, W14, W15, W6, W8, W9, U1, U2, U4, U7, U9	seminar, e-learning lecture
3.	Cell cycle and the control of genetic expression. Mechanisms of genes regulation. Basic knowledge on stem cells and the use in medicine.	W3, W4, W5, U1, U5, K2	seminar, e-learning lecture
4.	Genetic equilibrium of population, primary and secondary factors impacting the genetic pool. Theoretical risks for genetic traits based on patterns of inheritance and genetic crossings. Measures of genetic association: odds ratio and relative risk.	W14, W6, U1, U5, K1	seminar, laboratory, e-learning lecture
5.	Benefits and risk of the presence of genetically modified organisms in the ecosystem. Genetic mechanisms of acquired drug resistance by microorganisms and cancerous cells.	W16, W2, U10, U2, K2	seminar, e-learning lecture

Course advanced

Teaching methods:

laboratories (labs), discussion, case study method, seminar, lecture

Activities	Examination methods	Credit conditions
e-learning lecture	test	Lab practicals (each student comes once) and seminars - attendance will be checked
seminar	test	A multiple choice test, threshold calculated on the performance of whole class
laboratory	classroom observation	Students' attendance during laboratory practicals is obligatory

Goals

C1	Transfer of knowledge about how the laboratory works, what are the possibilities and limitations of laboratory diagnostics.
C2	To familiarize students with the principles of collecting biological material for laboratory tests, and with factors affecting the course of the analytical process and the result of the test.
C3	To familiarize students with laboratory diagnostic algorithms in diagnosing and differentiating and treatment monitoring of organ and systemic disorders.
C4	Transfer of knowledge regarding the correct interpretation of laboratory test results useful in the diagnosis of diseases.
C5	To familiarize students with the principles of cooperation of a doctor with diagnostic laboratory.

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	classroom observation, multiple choice test

W2	<p>the causes, symptoms, principles of diagnosis and therapeutic management of the most common internal diseases and their complications in adults: 1) cardiovascular diseases, including ischemic heart disease, heart defects, endocarditis, myocardial infarction, pericardial infarction, heart failure (acute and chronic), diseases of arteries and venous vessels, arterial hypertension - primary and secondary, pulmonary hypertension, 2) respiratory system diseases, including respiratory tract diseases, chronic obstructive pulmonary disease, bronchial asthma, bronchial dilatation, cystic fibrosis, respiratory infections, interstitial diseases of the lungs, pleura, mediastinum, obstructive and central sleep apnea, respiratory failure (acute and chronic), respiratory tumors, 3) diseases of the digestive system, including diseases of the mouth, esophagus, stomach and duodenum, intestines, pancreas, liver, bile ducts and gallbladder, 4) diseases of the internal secretion system, including diseases of the hypothalamus and pituitary gland, thyroidism, parathyroidism, adrenal cortex and medulla, ovaries and testicles, and neuroendocrine tumors, polyglandular syndromes, various types of diabetes and metabolic syndrome - hypoglycaemia, obesity, dyslipidemia, 5) diseases of the kidneys and the urinary tract, including acute and chronic renal failure, glomerulonephrine and interstitial kidney diseases, kidney cysts, kidney stones, urinary tract infections, urinary tract neoplasms, in particular of bladder and kidney neoplasms, 6) hematopoietic diseases, including bone marrow aplasia, anemia, granulocytopenia and agranulocytosis, thrombocytopenia, acute leukemia, myeloproliferative and myelodysplastic-myeloproliferative tumours, myelodysplastic syndromes, mature B and T lymphocytes tumors, bleeding diatheses, thrombophilia, life-threatening conditions in hematology, blood disorders in other organ diseases, 7) rheumatic diseases, including systemic connective tissue diseases, systemic vasculitis, joint inflammations involving spinal cord, metabolic bone diseases, osteoporosis and osteoarthritis in particular, gout, 8) allergic diseases, including anaphylaxis and anaphylactic shock and angioedema, 9) water-electrolyte and acid-base disorders: dehydration conditions, overhydration conditions, electrolyte, acidic and alkaline disorders</p>	E.W7	classroom observation, multiple choice test
W3	the types of biological materials to be used for laboratory diagnosis and the rules for the collection of test material	E.W39	classroom observation, multiple choice test
W4	theoretical and practical basics of laboratory diagnostics	E.W40	classroom observation, multiple choice test
W5	possibilities and limitations of laboratory tests in emergency situations	E.W41	classroom observation, multiple choice test

W6	the causes, symptoms, principles of diagnosis and therapeutic management of the most common diseases of children: (1) rickets, tetanus, convulsions, (2) heart defects, myocarditis, endocarditis, pericarditis, cardiomyopathy, arrhythmia, heart failure, hypertension, syncope, (3) acute and chronic diseases of the upper and lower airways, congenital defects of the respiratory system, tuberculosis, cystic fibrosis, asthma, allergic rhinitis, urticaria, anaphylactic shock, angioedema, (4) anemia, hemorrhagic diatheses, conditions of bone marrow failure, pediatric neoplastic diseases, including solid tumors typical of childhood, (5) acute and chronic abdominal pain, vomiting, diarrhea, constipation, gastrointestinal bleeding, peptic ulcer disease, non-specific intestinal diseases, pancreatic diseases, cholestasis and liver diseases, and other acquired diseases and congenital defects of the digestive tract, (6) urinary tract infections, congenital anomalies of the urinary system, nephrotic syndrome, renal stones, acute and chronic renal failure, acute and chronic nephritis, systemic kidney diseases, urinary tract disorders, vesicoureteral reflux disease, (7) growing disorders, thyroid and parathyroid diseases, adrenal diseases, diabetes, obesity, disorders of puberty and gonadal functions, (8) cerebral palsy, encephalomyelitis, meningitis, epilepsy, (9) the most common infectious diseases of childhood, (10) genetic syndromes, (11) diseases of connective tissue, rheumatic fever, juvenile arthritis, systemic lupus, dermatomyositis	E.W3	classroom observation, multiple choice test
W7	basic methods of fetal diagnostics and therapy	E.W5	classroom observation, multiple choice test
W8	causes, symptoms, principles of diagnosis and therapeutic management in the most common diseases of the nervous system, including: 1) headaches: migraines, tension headaches and headache syndromes and neuralgia of the nerve V, 2) cerebral vascular diseases, in particular stroke, 3) epilepsy, 4) infections of the nervous system, in particular meningitis, borreliosis, herpetic encephalitis, neurotransmission diseases, 5) dementia, in particular: Alzheimer's disease, frontal dementia, vascular dementia and other dementia syndromes, 6) basal ganglia diseases, Parkinson's disease in particular, 7) demyelinating diseases, multiple sclerosis in particular, 8) diseases of the neuromuscular system, lateral atrophic sclerosis and sciatic neuralgia in particular, 9) craniocerebral injuries, cerebral palsy in particular	E.W14	classroom observation, multiple choice test
W9	basics of early detection of neoplastic diseases and principles of screening in oncology	E.W24	classroom observation, multiple choice test
W10	causes, symptoms, principles of diagnosis, therapeutic and prophylactic management in the most common bacterial, viral, parasitic and fungal diseases, including pneumococcal infections, viral hepatitis, acquired immunodeficiency syndrome (AIDS), sepsis and hospital infections	E.W34	classroom observation, multiple choice test

W11	causes, symptoms, principles of diagnosis and therapeutic management in the most common diseases and specific problems in the practice of a family physician	E.W38	classroom observation, multiple choice test
W12	principles of diagnostics of infectious diseases and can interpret the results	E.W52	classroom observation, multiple choice test
Skills - Student can:			
U1	plan the diagnostic procedure and interpret its results	O.U3	classroom observation, multiple choice test
U2	perform differential diagnosis of the most common diseases of adults and children	E.U12	classroom observation, multiple choice test
U3	interpret the results of laboratory tests and identify the causes of abnormalities	E.U24	classroom observation, multiple choice test
U4	collect and retain test material for use in laboratory diagnostics	E.U28	classroom observation, multiple choice test
U5	plan diagnostic, therapeutic and prophylactic procedures	E.U16	classroom observation, multiple choice test
Social competences - Student is ready to:			
K1	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	classroom observation
K2	implement the principles of professional camaraderie and cooperation in a team of specialists, including representatives of other medical professions, also in a multicultural and multinational environment	O.K9	classroom observation

Calculation of ECTS points

Semester 3

Activity form	Activity hours*
e-learning lecture	4
seminar	8
classes	16
preparation for classes	12
preparation for colloquium	20
Student workload	Hours 60
Workload involving teacher	Hours 28
Practical workload	Hours 16

* hour means 45 minutes

Semester 5, Semester 6

Activity form	Activity hours*
e-learning lecture	6
seminar	20
preparation for classes	10
preparation for examination	19
participation in examination	1
Student workload	Hours 56
Workload involving teacher	Hours 26

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	2nd year, 3rd semester	W1, W2, W3, W4, W5, W6, W8, U1, U2, U3, U4, K1, K2	classes, seminar, e-learning lecture
2.	E-learning lecture - 4 hours Laboratory tests in the diagnostic process. Diagnostic characteristics of the test. Analytical characteristics of the laboratory method - limit of detection and quantification, linearity, measurable range. Causes of error affecting the result of the laboratory test - pre-laboratory factors and analytical variability.	W1, W4	e-learning lecture
3.	Laboratory tests in life-threatening states. Point-of-care testing.	W4, W5	e-learning lecture
4.	Seminar - 8 hours Causes and types of error affecting the result of laboratory testing. Determining the magnitude of the error.	W4, U3	seminar
5.	Principles of doctor's cooperation with the diagnostic laboratory. Complete blood count - methodology and diagnostic significance.	W1, W2, U4, K2	seminar
6.	Interpretation of complete blood count results - case studies and laboratory results with discussion.	W2, W3, U3	seminar
7.	Laboratory diagnostics in hematology - anemia and proliferative diseases.	W2, W6, U1, U3	seminar
8.	Standard urine analysis - methodology and diagnostic significance.	W2, W3, U3, U4, K1	seminar

9.	Calculating the value of diagnostic characteristics parameters of the test and assessing its usefulness in the diagnostic process - case studies.	W4, U3, K1	seminar
10.	Testing of water-electrolyte metabolism and acid-base balance. Methodology, disturbing factors.	W2, W5, U1, K2	seminar
11.	Diagnostics of blood coagulation and fibrinolysis disorders.	W2, W6, U1, K2	seminar
12.	Classes - 16 hours Rules for collecting material for laboratory tests. Interpretation of test results taking into account bias and random error.	W3, W4, U4, K1	classes
13.	Complete blood count - methodology and diagnostic significance.	W2, W4, U1	classes
14.	Laboratory classes in the CBC laboratory of the University Hospital Diagnostics Department. Presentation of diagnostic methods and hematological analyzers.	W4, U3, K2	classes
15.	Laboratory diagnostics in hematology - interpretation of laboratory test results, clinical case studies.	W1, U3, K2	classes
16.	Interpretation of standard urine analysis results - clinical case studies.	W2, U3, K2	classes
17.	Analytical examinations of cerebrospinal fluid, body cavity fluids, feces - clinical case studies.	W8, U2, U4	classes
18.	Interpretation of water-electrolyte and acid-base disorders - clinical case studies.	W2, U1, U3, K2	classes
19.	Interpretation of coagulation and fibrinolysis test results - clinical case studies.	W2, U2, U3, K2	classes
20.	3rd year, 5th semester	W1, W10, W11, W12, W2, W5, W6, W7, W8, W9, U1, U2, U3, U4, U5, K2	seminar, e-learning lecture
21.	E-learning lecture - 6 hours Diagnostics of civilization diseases - the use of laboratory tests to assess the risk for obesity complications, cardiovascular risk and metabolic syndrome.	W1, W11, W2	e-learning lecture
22.	Laboratory tests in preventive medicine.	W1, W11, W2, W9	e-learning lecture
23.	Personalized medicine - the use of genetic testing.	W1, W6, U5, K2	e-learning lecture
24.	Seminar - 20 hours Clinical biochemistry and laboratory diagnostics of carbohydrate metabolism disorders.	W1, W11, W2, W6, U2, U3, U5	seminar
25.	Clinical biochemistry and laboratory diagnostics of lipid metabolism disorders. Clinical case studies, discussion about laboratory diagnostic strategies and interpretation of laboratory tests results.	W1, W11, W2, U3, U5, K2	seminar
26.	Laboratory diagnosis of cardiovascular diseases. Clinical case studies. Laboratory diagnostic strategies and interpreting laboratory test results.	W1, W2, W5, U2, U3, U4, U5, K2	seminar

27.	Laboratory diagnostics of liver diseases. Clinical case studies. Laboratory diagnostic strategies and interpreting laboratory test results.	W1, W10, W11, W12, W2, U1, U2, U3, K2	seminar
28.	Laboratory diagnostics of endocrine diseases. Clinical case studies discussing laboratory diagnostic strategies and interpreting laboratory test results.	W11, W2, W6, U2, U3, U5	seminar
29.	Laboratory diagnostics of malignancies - tumor markers. Clinical, case studies discussing laboratory diagnostic strategies and interpreting laboratory results.	W1, W2, W9, U2, U3, U5, K2	seminar
30.	Diagnosis of trace elements and vitamins deficiencies. Clinical case studies discussing laboratory diagnostic strategies and interpreting laboratory results.	W2, W6, U1, U3, K2	seminar
31.	Laboratory diagnostics of primary and secondary hypertension. Clinical case studies discussing laboratory diagnostic strategies and interpreting laboratory results.	W11, W2, U1, U3	seminar
32.	Laboratory tests in gynecology and obstetrics. Clinical case studies discussing laboratory diagnostic strategies and interpreting laboratory results.	W12, W2, W7, U1, U3, U5, K2	seminar
33.	Laboratory diagnostics of nervous system diseases. Clinical case studies discussing laboratory diagnostic strategies and interpreting laboratory results.	W2, W6, W8, U1, U2, U3, K2	seminar

Course advanced

Semester 3

Teaching methods:

case study, laboratories (labs), e-learning, problem solving method, case study method, presentation, group work, seminar, lecture with multimedia presentation

Activities	Examination methods	Credit conditions
e-learning lecture	multiple choice test	To pass classes in the form of e-learning, it is necessary to familiarize with the presented materials and correctly answer test questions on the e-learning platform. The final test covering topics from seminars, classes and e-learning lectures consists of 40 questions. Four answers are prepared for each question - only one answer is correct. 60% of correct answers are required to pass the test. The number of credits obtained for passing Laboratory Diagnostics in the second year of study is included in the final score and grade for the course.
seminar	multiple choice test	The final test covering topics from seminars, classes and e-learning lectures consists of 40 questions. Four answers are prepared for each question - only one answer is correct. 60% of correct answers are required to pass the test. The number of credits obtained for passing Laboratory Diagnostics in the second year of study is included in the final score and grade for the course.
classes	classroom observation, multiple choice test	Observation and assessment of student work. The theoretical content is included in the final test.

Semester 5, Semester 6

Teaching methods:

case study, laboratories (labs), e-learning, problem solving method, case study method, situation method, presentation, seminar

Activities	Examination methods	Credit conditions
e-learning lecture	multiple choice test	To pass classes in the form of e-learning, it is necessary to familiarize with the presented materials and correctly answer test questions on the e-learning platform. The final test covering topics from seminars and e-learning lectures consists of 40 questions. Four answers are prepared for each question - only one answer is correct. 60% of correct answers are required to pass the test. Criteria for obtaining an exam grade: 5.0 90% - 100% 4.5 85% - 89 % 4.0 75% - 84% 3.5 70%-74% 3.0 60% -69% 2.0 \leq 60%
seminar	classroom observation, multiple choice test	Observation and assessment of student work. The final test covering topics from seminars and e-learning lectures consists of 40 questions. Criteria for obtaining an exam grade: 5.0 90% - 100% 4.5 85% - 89 % 4.0 75% - 84% 3.5 70%-74% 3.0 60% -69% 2.0 \leq 60%

Additional info

1. Student's absence from classes for excused reasons must complete the classes at a time agreed with the lecturer. The course coordinator gives permission to make up classes. Classes must be done before the credit date.
2. Unexcused absence from obligatory classes (classes, seminars) shall result in not passing the course within the first date.
3. A student who has not been admitted for credit on the first date for unexcused absences may take the second date for credit only after completing the remaining course classes.

Entry requirements

Only students who completed the first part of the laboratory diagnostics course in the 3rd semester can join the laboratory diagnostics classes in the 5th semester. Repetition of the course means the necessity to participate again all classes and credits. In justified cases, however, it is possible to be released from participation in part or the whole course by the Course Coordinator.

Goals

C1	1/4 - To provide the student with knowledge about the obtaining of medical history, biomedical part as well as communication skills and techniques. Shaping and strengthening the patient-centered attitude. Developing the student's physical examination skills, including breast and per rectum examination. Preparing the student for clinical classes. 2/4 - Learn how to effectively communicate information, including obtaining informed consent and the process of involving the patient in making health decisions. 3/4 - Learning to cope with difficult communication situations (e.g. passing unsuccessful information, dealing with patient expectations, aggressive behavior) 4/4 - Teaching teamwork, team management in crisis situations, practical application of communication skills in simulated clinical scenarios.
----	--

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	ethical, social and legal conditions for practicing the medical profession and the principles of health promotion, based on scientific evidence and accepted standards	O.W4	classroom observation
W2	principles and methods of communication with the patient and his/her family, which are aimed at building empathic, trust-based relationships	D.W5	classroom observation
W3	the importance of verbal and non-verbal communication in the process of communicating with the patient and the notion of trust in the interaction with the patient	D.W6	classroom observation
W4	the role of the patient's family in the treatment process	D.W10	classroom observation
W5	forms of violence, models explaining domestic and institutional violence, the social determinants of the various forms of violence and the role of the doctor in recognizing it	D.W3	classroom observation
W6	basic psychological mechanisms of human functioning in health and disease	D.W9	classroom observation
W7	principles of teamwork	D.W18	classroom observation
W8	principles of motivating the patient to health-promoting behaviors and informing about unsuccessful prognosis	D.W15	classroom observation
W9	guidelines for cardiopulmonary resuscitation of newborns, children and adults	F.W7	classroom observation
W10	the principles of health promotion, its tasks and main lines of action, with particular reference to the role of elements of a healthy lifestyle	D.W14	classroom observation

Skills - Student can:			
U1	identify medical problems and prioritize medical management	O.U1	classroom observation
U2	identify life-threatening conditions that require immediate medical intervention	O.U2	classroom observation
U3	plan the diagnostic procedure and interpret its results	O.U3	classroom observation
U4	implement appropriate and safe therapeutic treatment and predict its effects	O.U4	classroom observation
U5	inspire the learning process of others	O.U6	classroom observation
U6	communicate with the patient and his family in an atmosphere of trust, taking into account the needs of the patient	O.U7	classroom observation
U7	communicate and share knowledge with colleagues in a team	O.U8	classroom observation
U8	take into account the subjective needs and expectations of the patient resulting from socio-cultural conditions in the process of therapeutic management	D.U1	classroom observation
U9	build an atmosphere of trust throughout the entire diagnostic and treatment process	D.U4	classroom observation
U10	talk to the adult patient, child and family using active listening and empathy techniques and talk to the patient about his or her life situation	D.U5	classroom observation
U11	inform the patient about the purpose, course and possible risks of the proposed diagnostic or therapeutic measures, and obtain his or her informed consent to take these measures	D.U6	classroom observation
U12	involve the patient in the therapeutic process	D.U7	classroom observation
U13	provide the patient and his or her family with information about unfavorable prognosis	D.U8	classroom observation
U14	provide advice on therapeutic recommendation compliance and following healthy lifestyle	D.U9	classroom observation
U15	communicate with colleagues with constructive feedback and support	D.U12	classroom observation
U16	apply basic psychological motivational and supportive interventions	D.U11	classroom observation
U17	follow the patient's rights	D.U15	classroom observation
U18	be able to work in a multiprofessional team, in a multicultural and multinational environment	D.U21	classroom observation
U19	identify risk factors for violence, recognize violence and respond accordingly	D.U10	classroom observation
U20	carry out a medical history with an adult patient	E.U1	OSCE examination
U21	conduct a full and targeted physical examination of an adult patient	E.U3	OSCE examination
U22	conduct an approximate hearing and field of vision examination, and an otoscopic examination	E.U6	OSCE examination

U23	assess the general condition, state of consciousness and awareness of the patient	E.U7	classroom observation
U24	recognize immediate life-threatening conditions	E.U14	classroom observation
U25	plan diagnostic, therapeutic and prophylactic procedures	E.U16	classroom observation
U26	interpret the results of laboratory tests and identify the causes of abnormalities	E.U24	classroom observation
U27	perform basic procedures and medical procedures including: 1) body temperature measurement, heart rate measurement, non-invasive blood pressure measurement, 2) monitoring of vital signs by means of a patient monitor, pulse oximetry, 3) spirometric examination, oxygen therapy, assisted ventilation and replacement ventilation, 4) introduction of the oropharyngeal tube, 5) intravenous, intramuscular and subcutaneous injections, cannulation of peripheral veins, collection of peripheral venous blood, collection of blood for culture, collection of arterialized capillary blood, collection of arterialized capillary blood, 6) taking nasal, throat and skin swabs, puncturing of the pleural cavity, 7) bladder catheterization in women and men, gastric tube, gastric lavage, gastric lavage, enema, 8) standard resting electrocardiogram with interpretation, electrical cardioversion and cardiac defibrillation, 9) simple strip tests and blood glucose measurements	E.U29	test
U28	plan specialist consultations	E.U32	classroom observation
U29	maintain patient's medical records	E.U38	classroom observation
U30	examine breasts, lymph nodes, thyroid gland and abdominal cavity in terms of acute abdomen and perform digital rectal examination	F.U6	OSCE examination
U31	operate according to the algorithm of advanced resuscitation activities	F.U11	classroom observation
U32	perform ophthalmic screening tests	F.U19	OSCE examination
U33	conduct an approximate hearing test	F.U26	OSCE examination
U34	insert a catheter into the bladder	F.U32	OSCE examination
U35	to take the informed and legally effective consent: a) for high-risk diagnostic procedures (e.g. gastroscopy, colonoscopy), endoscopic retrograde cholangiopancreatography) b) for high-risk diagnostic procedures (transcutaneous biopsy under control) USG) c) surgery to remove the gallbladder	F.U33	classroom observation
U36	to pass on information about the death of a close friend and relative	F.U34	classroom observation
Social competences - Student is ready to:			
K1	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	classroom observation
K2	to be guided by the well-being of a patient	O.K2	classroom observation
K3	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	classroom observation

K4	take actions towards the patient on the basis of ethical norms and principles, with an awareness of the social determinants and limitations of the disease	O.K4	classroom observation
K5	formulate conclusions from own measurements or observations	O.K8	classroom observation
K6	implement the principles of professional camaraderie and cooperation in a team of specialists, including representatives of other medical professions, also in a multicultural and multinational environment	O.K9	classroom observation
K7	assume responsibility for decisions taken in the course of their professional activities, including in terms of the safety of oneself and others	O.K11	classroom observation

Study content

No.	Course content	Subject's learning outcomes	Activities
-----	----------------	-----------------------------	------------

1.	<p>Learning history taking skills. The biomedical part of the history taking. Patient goals identification, screening, summary (and reporting), opened and closed questions (SOCRATES) - exercises using interviews prepared by students. Communication skills: clarifications, signposts, hidden non-verbal cues. Patient's perspective.</p> <p>Improving clinical examination skills. Building a patient-oriented attitude. Head and neck examination. Examination of pupil reaction to light. Reed tests, otoscope and ophthalmoscope examination. Chest examination, lung examination. Listening to lung sounds on the simulator. Learning to examine the heart. Learning to examine peripheral cardiovascular system. Listening to heart sounds and murmurs on the simulator. Learning to exam the abdomen. Learning per rectum examination. Oncological examination. Breast examination. Prostate examination. Neurological examination. Motion system examination. Bladder catheterization skill.</p>	W2, W3, U10, U15, U17, U20, U21, U22, U23, U29, U30, U32, U33, U34, U5, U6, U7, U9, K3, K6	classes, simulations
2.	<p>5th semester. Skills in providing effective information, including obtaining informed consent. Involving the patient in the health decision-making process. Motivating to comply with the recommendations. Basic rules for ECG interpretation.</p>	W10, W2, W3, W4, W6, W8, U11, U12, U14, U16, U17, U35, U5, U6, U8, U9, K1, K2, K3, K4, K5, K7	simulations, e-learning classes
3.	<p>8th semester. Students will practice the skills of conducting medical consultation regarding intimate topics, dealing with patient expectations and aggression, as well as the ability to convey unsuccessful information.</p>	W2, W3, W4, W6, U10, U11, U12, U13, U16, U17, U36, U6, U8, U9, K1, K2, K3, K4, K5, K7	simulations
4.	<p>10th semester Patient turn over using SBAR formula. Non-technical skills in the team. Providing unfavorable information. Communication techniques in collecting an interview. Management of aggression. Management of suspected domestic violence. Verbal and non-verbal communication to patient and team.</p>	W1, W2, W3, W4, W5, W7, W8, W9, U1, U10, U11, U12, U13, U15, U17, U18, U19, U2, U20, U21, U24, U25, U26, U27, U28, U3, U31, U34, U35, U36, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4, K5, K6, K7	simulations, e-learning classes

Course advanced

Semester 3

Teaching methods:

brainstorm, classes in clinical skills room, demonstration, discussion, OSCE examination, educational film, presentation, simulation, low fidelity simulation, virtual patient

Activities	Examination methods	Credit conditions
simulations	OSCE examination	Objective Standardized Clinical Exam (OSCE) - 5 stations. Stations: 1. 10-minute, medical history 2. 5-minute, simulator (lung and heart sound interpretation). 3. Physical examination 1 4. Physical examination 2 5. Physical examination 3 Physical examination stations also include: rectal and prostate exams on the trainer, breasts examination on the trainer, investigations using an ophthalmoscope, otoscope, neurological hammers, and tuning fork, bladder catheterization and IV catheterization on the trainer. Conditions for obtaining credit at the OSCE: - positive passing of the interview station (both checklist and global rating) - positive passing of at least 3 out of 4 remaining stations.

Semester 5, Semester 6

Teaching methods:

demonstration, discussion, e-learning, educational film, simulation, high fidelity simulation

Activities	Examination methods	Credit conditions
classes	classroom observation	Continuous assessment during classes At least one-time participation in a role play with a simulated patient.
e-learning classes	classroom observation	The separate test form for each ECG lesson. The test consists of two parts: theoretical and practical. Completing the theoretical part involves solving the single-choice test on the theoretical basis of the discussed issue (5 questions). The practical part consists of solving the multiple-choice test on the interpretation of the given ECG (1 multiple-choice question). Pass requirements, obtain a total of at least 50% of the points.

Semester 8

Teaching methods:

demonstration, discussion, simulation, simulated patient

Activities	Examination methods	Credit conditions
classes	classroom observation	Continuous assessment during classes At least one-time participation in a role play with a simulated patient.

Semester 9, Semester 10

Teaching methods:

e-learning, high fidelity simulation, simulated patient

Activities	Examination methods	Credit conditions
e-learning classes	test	The separate test form for each ECG lesson. The test consists of two parts: theoretical and practical. Completing the theoretical part involves solving the single-choice test on the theoretical basis of the discussed issue (5 questions). The practical part consists of solving the multiple-choice test on the interpretation of the given ECG (1 multiple-choice question). Pass requirements, obtain a total of at least 50% of the points.

Activities	Examination methods	Credit conditions
simulations	classroom observation	Acting as team leader and team member during simulated scenarios.

Entry requirements

1/4 - Knowledge of normal anatomy and human physiology.

2/4 - Knowledge of normal anatomy, human physiology and the basics of pathology. Student passed the subject Laboratory Training of Clinical Skills for year 2 and passed the OSCE exam year 2. Student already have contact with patients during clinical classes.

3/4 - Completed subjects Laboratory Training of Clinical Skills for year 2 and 3.

4/4 - Subjects passed for the year IV: Internal diseases , Surgery, Pediatrics, Anesthesiology and intensive care, Pharmacology, Laboratory Teaching Clinical Skills.

Pathology

Goals

C1	The educational goal is knowing and understanding etiology, pathogenesis and symptoms of selected human diseases and ability to correlate pathomechanisms of a disease with both gross and microscopic morphological features.
C2	After the course a student should be able to link images of tissue and organ damage with clinical signs of disease, history and results of laboratory tests, to place properly histopathologic examination in diagnostic ladder and to plan the diagnostic procedure and interpret its results,

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	pathomorphological nomenclature	C.W26	classroom observation, multiple choice test
W2	basic mechanisms of cell and tissue damage	C.W27	classroom observation, multiple choice test
W3	clinical course of specific and non-specific inflammations, as well as tissue and organ regeneration processes	C.W28	classroom observation, multiple choice test
W4	definition and pathophysiology of shock, with particular emphasis on differentiation of the causes of shock and multi-organ failure	C.W29	classroom observation, multiple choice test
W5	aetiology of haemodynamic disorders, regressive and progressive changes	C.W30	classroom observation, multiple choice test
W6	issues related to detailed pathology of organs, macro- and microscopic images and clinical course of pathomorphological changes in particular organs	C.W31	classroom observation, multiple choice test
W7	consequences of developing pathological changes for topographically adjacent organs	C.W32	classroom observation, multiple choice test
W8	external and internal pathogens, both modifiable and non-modifiable	C.W33	classroom observation, multiple choice test
W9	clinical forms of the most frequent diseases of particular systems and organs, metabolic diseases and disorders of water-electrolyte, hormonal and acid-base metabolism	C.W34	classroom observation, multiple choice test
W10	the consequences of inadequate nutrition, including prolonged hunger, excessive food intake and unbalanced diet, and disorders of digestion and absorption of digestive products	C.W50	classroom observation, multiple choice test
W11	the consequences of vitamin or mineral deficiencies and their excess in the body	C.W48	classroom observation, multiple choice test
W12	influence of oxidative stress on cells and its importance in the pathogenesis of diseases and aging processes	C.W47	classroom observation, multiple choice test
W13	enzymes involved in digestion, the mechanism of hydrochloric acid production in the stomach, the role of bile, the course of absorption of digestive products	C.W49	classroom observation, multiple choice test

W14	the mechanism of hormone actions	C.W51	classroom observation, multiple choice test
W15	pre-cancerous and high-risk conditions related to cancer, neoplastic transformation processes with their morphological signs, principles of cancer classification according to WHO, the most important risk factors, prognostic and predictive, and methods of histopathological and cytological testing and supporting molecular tests used in cancer diagnosis, detection and monitoring pre-cancerous conditions, and also understands the importance of proper diagnosis of histopathology cancer for proper treatment	C.W53	classroom observation, multiple choice test
W16	pathogenesis and morphological changes of diseases associated with advanced age, including those particularly important in an aging society, the most frequent neurodegenerative diseases (e.g. Alzheimer's disease)	C.W54	classroom observation, multiple choice test
W17	morphological changes, and understands the pathogenesis of critical pathological conditions brain such as swelling, ischemia, hemorrhages, effects of exogenous substances (e.g. alcohol, CO) and mechanical injury	C.W55	classroom observation, multiple choice test
W18	the importance of post-mortem examination as an examination verifying the diagnosis and important for improving the quality of hospital work and for the self-education of a doctor, and this knowledge is supported by direct, i.e. personal active participation in autopsy	C.W57	classroom observation, multiple choice test
W19	the subject of basic (including histochemistry and immunohistochemistry) techniques used in pathomorphological diagnostics and selected molecular techniques (FISH, etc.), and understands their determinants related to the protection of material, and knows the rules of evaluation and interpretation of macro- and microscopic material to be examined	C.W58	classroom observation, multiple choice test
W20	morphological changes in the most important non-cancer diseases affecting the entire organism (e.g. atherosclerosis, hypertension, diabetes, cardiopulmonary insufficiency, systemic infectious and immunological diseases, the most frequent hormonal disorders, the most frequent genetic diseases), and is able to link them with already acquired knowledge of anatomy, biochemistry and pathological physiology in order to deduce clinical symptoms	C.W52	classroom observation, multiple choice test
W21	morphological changes in the most common pathologies of the pediatric period, including in particular perinatal pathologies and genetic diseases and developmental disorders (defects) in children, and is able to link them with teratogenic, genetic factors and perinatal trauma	C.W56	classroom observation, multiple choice test
W22	development, structure and functions of the human body in normal and pathological conditions	O.W1	classroom observation, multiple choice test
W23	symptoms and course of diseases	O.W2	classroom observation, multiple choice test

W24	the consequences of human body exposure to various chemical and biological agents and the principles of prevention	C.W15	classroom observation, multiple choice test
W25	types of hypersensitivity reactions, types of immunodeficiency and basics of immunomodulation	C.W23	classroom observation, multiple choice test
Skills - Student can:			
U1	link images of tissue and organ damage with clinical signs of disease, history and results of laboratory tests	C.U11	classroom observation, multiple choice test
U2	analyze reaction, defense and adaptation phenomena and regulatory disturbances caused by an etiological factor	C.U12	classroom observation, multiple choice test
U3	use the antigen-antibody reaction in current modifications and techniques for the diagnosis of infectious, allergic, autoimmune and neoplastic diseases and blood diseases	C.U8	classroom observation, multiple choice test
U4	identify medical problems and prioritize medical management	O.U1	classroom observation, multiple choice test
U5	identify life-threatening conditions that require immediate medical intervention	O.U2	classroom observation, multiple choice test
U6	plan the diagnostic procedure and interpret its results	O.U3	classroom observation, multiple choice test
U7	implement appropriate and safe therapeutic treatment and predict its effects	O.U4	classroom observation
U8	plan own learning activities and constantly learn in order to update own knowledge	O.U5	classroom observation
U9	inspire the learning process of others	O.U6	classroom observation
U10	critically evaluate the results of scientific research and adequately justify the position	O.U9	classroom observation
Social competences - Student is ready to:			
K1	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	classroom observation
K2	use objective sources of information	O.K7	classroom observation
K3	promote health-promoting behaviors	O.K6	classroom observation
K4	formulate conclusions from own measurements or observations	O.K8	classroom observation

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Introductory topics. Basic concepts of pathology.	W1, W15, W16, W18, W19, W2, W21, W6, W7, U1, U10, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4	seminar, dissection classes

2.	Types of necrosis. Adaptations and degenerative changes	W1, W15, W18, W6, W7, U1, U10, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4	classes
3.	Hemodynamic disorders (congestion, oedema, thrombosis,etc)	W1, W2, W6, W7, U1, U10, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4	classes
4.	Morphology of inflammation	W1, W10, W19, W2, W20, W3, W6, W7, W9, U1, U10, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4	classes
5.	Neoplasms - epidemiology, carcinogenesis, nomenclature	W1, W13, W14, W15, W19, W2, W3, U1, U10, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4	classes, e-learning lecture
6.	Infectious diseases	W1, W10, W13, W14, W15, W19, W2, W20, W3, W6, W7, W8, W9, U1, U10, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4	e-learning lecture
7.	Immunopathology	W1, W14, W15, W16, W17, W19, W2, W21, W3, W6, W7, W8, W9, U1, U10, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4	e-learning lecture
8.	Hematopathology - myelogenous neoplasms, thymus pathology part I	W1, W10, W19, W2, W3, W6, W7, W8, W9, U1, U10, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4	e-learning lecture
9.	Pediatric pathology, selected genetic diseases etc	W1, W11, W14, W15, W16, W19, W2, W20, W6, W7, W8, W9, U1, U10, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4	classes
10.	Blood vessels pathology	W1, W15, W16, W19, W2, W3, W6, W7, W8, W9, U1, U10, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4	classes
11.	Heart pathology (cardiomyopathies, infarction, etc)	W1, W15, W19, W2, W3, W6, W7, W8, W9, U1, U10, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4	e-learning lecture
12.	Hematopathology - myelogenous neoplasms, thymus pathology part II	W1, W14, W15, W16, W19, W2, W3, W6, W7, W8, W9, U1, U10, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4	e-learning lecture

13.	Head and neck pathology	W1, W10, W11, W12, W13, W14, W16, W19, W2, W20, W6, W7, W8, W9	classes
14.	Oesophagus and stomach	W1, W14, W2, W4, W5, W6, W7, W9, U1, U10, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4	classes
15.	Pulmonary pathology	W1, W19, W2, W3, W6, W7, W8, W9, U1, U10, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4	classes
16.	Hematopathology- lymphomas	W1, W15, W18, W19, W2, W3, W6, W7, W8, W9, U1, U10, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4	classes
17.	Female genital tract	W1, W15, W19, W2, W3, W6, W7, W8, W9, U1, U10, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4	classes
18.	Kidney pathology	W1, W10, W15, W19, W2, W20, W3, W6, W7, W8, W9, U1, U10, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4	classes
19.	Small and large intestine	W1, W10, W12, W15, W19, W2, W20, W3, W4, W6, W7, W8, W9, U1, U10, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4	classes
20.	Liver and gallbladder	W1, W10, W12, W15, W19, W2, W20, W3, W4, W5, W6, W7, W8, W9, U1, U10, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4	classes
21.	Lower urinary tract	W1, W15, W16, W19, W2, W20, W3, W6, W7, W8, W9, U1, U10, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4	classes
22.	Pancreas	W1, W10, W11, W14, W15, W17, W18, W19, W2, W21, W5, W6, W7, W8, W9, U1, U10, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4	classes
23.	Male genital tract	W1, W15, W2, W20, W3, W6, W7, W8, U1, U10, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4	classes

24.	Eye and ear pathology	W1, W12, W14, W15, W16, W19, W2, W20, W3, W6, W7, W8, W9, U1, U10, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4	classes, e-learning lecture
25.	Endocrine pathology	W1, W10, W11, W14, W15, W16, W19, W2, W20, W3, W8, W9, U1, U10, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4	classes
26.	Breast pathology	W1, W15, W19, W3, W6, W7, W8, U1, U10, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4	classes
27.	Dermathopathology	W1, W11, W14, W15, W19, W2, W20, W3, W6, W7, W8, W9, U1, U10, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4	classes
28.	Bones and joints	W1, W10, W11, W15, W16, W17, W18, W19, W2, W20, W21, W3, W4, W5, W6, W7, W8, W9, U1, U10, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4	classes
29.	Neuropathology	W11, W2, W22, W23, W24, W25, W8, U1, U2, K1, K2	classes
30.	Soft tissue tumours	W10, W2, W22, W23, W24, W4, W5, W6, W8, U1, U2, K1, K2	classes

Course advanced

Semester 3

Teaching methods:

case study, brainstorm, classes / practicals, laboratories (labs), dissection classes, preclinical classes, demonstration, discussion, e-learning, educational film, case study method, presentation, group work, trip, lecture, lecture with multimedia presentation

Activities	Examination methods	Credit conditions
classes	multiple choice test	1st and 2nd mid-term MCQs tests (credit > 50% of the total points from both tests). Final exam - MCQs test (credit > 50% points)
seminar	classroom observation, multiple choice test	1st and 2nd mid-term MCQs tests (credit > 50% of the total points from both tests). Final exam - MCQs test (credit > 50% points)
dissection classes	classroom observation, multiple choice test	1st and 2nd mid-term MCQs tests (credit > 50% of the total points from both tests). Final exam - MCQs test (credit > 50% points)

Activities	Examination methods	Credit conditions
e-learning lecture	classroom observation	1st and 2nd mid-term MCQs tests (credit> 50% of the total points from both tests). Final exam - MCQs test (credit> 50% points)

Semester 4

Teaching methods:

case study, classes / practicals, laboratories (labs), dissection classes, preclinical classes, demonstration, discussion, e-learning, educational film, case study method, presentation, group work, seminar, trip, lecture

Activities	Examination methods	Credit conditions
e-learning lecture	multiple choice test	1st and 2nd mid-term MCQs tests (credit> 50% of the total points from both tests). Final exam - MCQs test (credit> 50% points)
classes	classroom observation, multiple choice test	1st and 2nd mid-term MCQs tests (credit> 50% of the total points from both tests). Final exam - MCQs test (credit> 50% points)
seminar	classroom observation, multiple choice test	1st and 2nd mid-term MCQs tests (credit> 50% of the total points from both tests). Final exam - MCQs test (credit> 50% points)
dissection classes	classroom observation	1st and 2nd mid-term MCQs tests (credit> 50% of the total points from both tests). Final exam - MCQs test (credit> 50% points)

<p>Period Semester 3</p>	<p>Examination graded credit</p> <p>Activities and hours seminar: 45</p>	<p>Number of ECTS points 2.0</p>
-------------------------------------	--	---

Goals

C1	Knowledge, gaining skills to recognize basic psychological mechanisms of human functioning specifically in medical context. Understanding patient and his family in context of health, illness and treatment process.
----	---

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			

W1	the social dimension of health and disease, the impact of the social environment (family, social networks) and social inequalities and socio-cultural differences on health, and the role of social stress in health and self-destructive behaviors	D.W1	assignment report
W2	principles and methods of communication with the patient and his/her family, which are aimed at building empathic, trust-based relationships	D.W5	classroom observation, assignment report
W3	psychosocial consequences of hospitalization and chronic disease	D.W7	assignment report
W4	basic psychological mechanisms of human functioning in health and disease	D.W9	assignment report
W5	the role of the patient's family in the treatment process	D.W10	assignment report
W6	issues related to the adaptation of patients and their families to disease as a difficult situation and to related events, including dying and family mourning processes	D.W11	assignment report
W7	the role of stress in etiopathogenesis and disease progression, and the mechanisms for coping with stress	D.W12	assignment report
W8	mechanisms, objectives and treatment options for psychoactive substance dependence	D.W13	assignment report
Skills - Student can:			
U1	communicate with the patient and his family in an atmosphere of trust, taking into account the needs of the patient	O.U7	classroom observation, assignment report
U2	identify signs of anti-health and self-destructive behavior and respond appropriately to them	D.U2	classroom observation, assignment report
U3	build an atmosphere of trust throughout the entire diagnostic and treatment process	D.U4	classroom observation
Social competences - Student is ready to:			
K1	promote health-promoting behaviors	O.K6	classroom observation, assignment report
K2	to be guided by the well-being of a patient	O.K2	classroom observation, assignment report

Calculation of ECTS points

Activity form	Activity hours*
seminar	45
preparation for classes	4
preparation of a paper	5
preparation of multimedia presentation	6

Student workload	Hours 60
Workload involving teacher	Hours 45

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Introduction to medical psychology	W1, U2, K1, K2	seminar
2.	Stress coping mechanisms	W4, W7, U2, K1, K2	seminar
3.	Human development 1 the beginning of life : pregnancy,through preschool	W4, W5, U3, K1, K2	seminar
4.	Human development 2 school age, adolescence adulthood	W2, W4, U1, K1, K2	seminar
5.	Family system and illness	W1, W2, W5, W6, U1, U2, K1, K2	seminar
6.	Terminal illness adaptation	W3, W4, W5, W6, U1, U2, U3, K1, K2	seminar
7.	Death, grief, berevment ; family perspective, medical perspective	W2, W3, W5, W6, U1, U2, U3, K1, K2	seminar
8.	Psychosomatic medicine	W2, W4, U1, U2, U3, K1, K2	seminar
9.	Substancje abuse	W4, W8, U2, U3, K1, K2	seminar
10.	Psychological theories defence mechanisms	W4, U2, U3, K1, K2	seminar
11.	Communication ; verbal non-verbal	W2, U1, U2, U3, K1, K2	seminar
12.	The physician - patient relationship	W2, U1, U2, U3, K1, K2	seminar
13.	Biopsychosocial approach in medicine	W1, W2, W3, W5, W7, U1, U2, U3, K1, K2	seminar

Course advanced

Teaching methods:

case study, textual analysis, brainstorm, discussion, case study method, group work, seminar, simulation, lecture, lecture with multimedia presentation

Activities	Examination methods	Credit conditions
seminar	classroom observation, assignment report	The course is assesed on the basis of personal activity and engagement as well as attendance, presentation and essay

Additional info

Specifically valuablle activities of student during seminar:
engagement in disciusion

engagement in analyzing case studies
understanding psychological mechanisms of patients and families
understanding one's own emotional processes triggered in relationship with patients
preparation of strategies involving psychological help for patients when needed

Medical Sociology

Educational subject description sheet

-------------------------------------	--	---

Goals

C1	The aim of this course is to familiarize students with social science as applied to medical practice and to teach them how to use "sociological imagination", that is the ability to see the relationship between individual experiences and the larger society (Mills 1959).
----	---

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			

W1	the social dimension of health and disease, the impact of the social environment (family, social networks) and social inequalities and socio-cultural differences on health, and the role of social stress in health and self-destructive behaviors	D.W1	written examination, classroom observation, oral answer, project, test, gap filling test
W2	social factors influencing behaviour in health and disease, particularly in chronic disease	D.W2	written examination, classroom observation, oral answer, project, test, gap filling test
W3	forms of violence, models explaining domestic and institutional violence, the social determinants of the various forms of violence and the role of the doctor in recognizing it	D.W3	written examination, classroom observation, project, test, gap filling test
W4	social attitudes towards the importance of health, disease, disability and old age, the social consequences of disease and disability and social and cultural barriers, and the concept of quality of life as determined by the state of health	D.W4	written examination, classroom observation, project, test, gap filling test
W5	the importance of verbal and non-verbal communication in the process of communicating with the patient and the notion of trust in the interaction with the patient	D.W6	written examination, classroom observation, project, test, gap filling test
W6	principles and methods of communication with the patient and his/her family, which are aimed at building empathic, trust-based relationships	D.W5	written examination, classroom observation, project, test, gap filling test
W7	psychosocial consequences of hospitalization and chronic disease	D.W7	written examination, classroom observation, project, test, gap filling test
W8	functioning of health care system entities and social role of a physician	D.W8	written examination, classroom observation, project, test, gap filling test
W9	the role of the patient's family in the treatment process	D.W10	written examination, classroom observation, project, test, gap filling test
W10	cultural, ethnic and national determinants of human behavior	D.W19	written examination, classroom observation, project, test, gap filling test
Skills - Student can:			
U1	take into account the subjective needs and expectations of the patient resulting from socio-cultural conditions in the process of therapeutic management	D.U1	classroom observation
U2	choose treatment that minimizes the social consequences for the patient	D.U3	classroom observation
U3	build an atmosphere of trust throughout the entire diagnostic and treatment process	D.U4	classroom observation
U4	identify signs of anti-health and self-destructive behavior and respond appropriately to them	D.U2	classroom observation

U5	involve the patient in the therapeutic process	D.U7	classroom observation
U6	provide advice on therapeutic recommendation compliance and following healthy lifestyle	D.U9	classroom observation
U7	provide the patient and his or her family with information about unfavorable prognosis	D.U8	classroom observation
U8	take action to improve the quality of life of patients and prevent it from deteriorating in the future	D.U19	classroom observation
Social competences - Student is ready to:			
K1	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	classroom observation, project, test, gap filling test
K2	to be guided by the well-being of a patient	O.K2	classroom observation, project, test, gap filling test

Calculation of ECTS points

e-learning	4
information collection	5
preparation of a project	10
preparation for test	15
seminar	26
Student workload	Hours 60
Workload involving teacher	Hours 30

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	The role of Medical Sociology in medicine. Sociological concepts of health and illness. Psychosocial dimensions of subjective health. Illness and sickness role. Symbolic meaning of illness. Psychosocial indicators of health (well-being).	W2, U1	seminar
2.	Sociology of the body. Cultural and social determinants of health and health-related behaviors. Social network, social ties, social capital. Relations between social network and health.	W1, W10, W2, U1, U4, K1	seminar

3.	Social inequalities in health; (gender, age, socio-economic status, ethnic minorities). Role of social network (ties) in health status (scales measuring social support and ties).	W1, U4, K1	seminar
4.	Family and health. The role of the family in creation of health lifestyle. Functions of the family (social support). Early experience during family life and health outcomes in adulthood.	W1, W4, U1, U5, U6, U7	seminar
5.	Domestic violence. The impact of domestic abuse on health. Domestic violence and children. Domestic violence and the elderly. Female victims of violence.	W3	seminar
6.	Psychosocial consequences of chronic disease (changes in family, work activity, social participation). Disability as a social construct. Stigma. Social determinants of adaptation to new health conditions (psychological and social barriers).	W4, U2, U8	seminar
7.	Health related quality of life (concept, psychosocial indicators). Functional status and health-related quality of life in patients with chronic conditions (cardiovascular patients, oncological patients, older people). Scales measuring different dimensions of quality of life.	W4, U8	seminar
8.	Communication between physician and patient (types of questions, language). Patient satisfaction with the medical interview and medical care. Patient in the hospital. Internal environment of the hospital. Formal roles and interpersonal relations. Hospital as a social system. Hospitalization as a stressful life event. Decision-making process in seeking professional help. Professional role of the physician. Feminization of medical profession. Job stress in medical profession. Patient-physician interactions. Parson's model of sick role and physician's role. Types of patient-physician relationships. Paternalistic approach vs mutual cooperation. Process of communication (the role of verbal and nonverbal communication). Patient satisfaction.	W5, W6, W7, W9, U1, U2, U3, K1	seminar
9.	Medical care system - new challenges. The theory of institution. Hospital as a total institution. Patient in the hospital. Internal environment of the hospital. Formal roles and interpersonal relations. Hospital as a social system. Hospitalization as a stressful life event.	W5, W6, W8, U3, K1, K2	seminar, e-learning

Course advanced

Teaching methods:

case study, textual analysis, discussion, educational film, case study method, group work, lecture with multimedia presentation

Activities	Examination methods	Credit conditions
e-learning	project	A group project to be prepared by groups of 3 persons. Each group sign up for one of the topics given. The task is to analyse one of the topics referring to sociological knowledge (from the course) and empirical data: scientific reports or articles, other gathered materials (body of media articles; internet forums; interviews, etc.). The project should contain: <ul style="list-style-type: none"> • Identification of the key problems that you would like to discuss (within the analyzed topic) (1 p.) • A short general description of the problem (1 p.) • Characteristics of the project materials gathered by the group (1 p.) • Findings from the analysis conducted by the group (1 p.) • The possible solutions of the identified problem (good practices; institutional solutions, non-governmental initiatives, group ideas) (1 p.)
seminar	written examination, classroom observation, oral answer, test, gap filling test	Credit conditions: 1. Attendance on each class - absence is available only because of illness and should be confirmed by an appropriate medical leave. Each absence requires an oral/written credit the person leading classes. 2. Power Point presentation; to be prepared in groups of 2 students. Each presentation should consist of: a. theoretical part - based on theoretical, sociological text provided by lecturer (approx. 20 min.) b. empirical part - based on research: each person in the couple finds one article illustrating the theoretical part and presents it to the group (10 minutes per person) c. conclusions + questions for discussion - each presenting group prepares 4 questions (two questions concerning the theoretical part of the presentation and one from each of two research-based parts) Presentation is scored (12 points). Assessment of PP presentation: 5 p. - adequate summary of terms in the given article; 4 p. - additional sources, e.g. adequate data from other research illustrating article's terms; 2 p. - critical, subjective thoughts concerning presented topic in conclusion part, critical thinking questions to the rest of the group 1 p. - presentation skills (e.g. presenting in own words, not reading slides), visual traits of presentation, overall preparation to presentation 3. Active participation in seminars (synchronous e-learning) (max. 8 points) and a group project (asynchronous e-learning): (max. 5 points) 4. Written final exam (max. 50 points): the exam will have form of test consisting of single-choice questions, filling gaps, true/false questions as well as open questions with short answer. The exam will check the sociological knowledge acquired during course (comprising terms, phenomena and theories presented in articles for students' presentations). Student's evaluation: Student may achieve maximum 75 points from the whole course: (1) PP presentation - max. 12 p. (2) Active participation during seminars and group project - max. 13 p. (3) Final exam - max. 50 p. In order to pass the course, student has to achieve 60% of the maximum points. Grading: 45-51 p.- 3; 51,5-57 p. - 3.5; 57,5-63 p. - 4; 63,5-69 p. - 4.5; 69,5-75 p. - 5.

-------------------------------------	--	---

Goals

C1	Students using their knowledge in basic science can solve easy clinical problems, can explain the relation between a disease and physiological issues undergoing in human body. Students can search and critically analyse medical literature, can communicate with team members, share his/hers knowledge and be able to give good feedback to the others.
----	---

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	development, structure and functions of the human body in normal and pathological conditions	O.W1	group assessment

W2	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	group assessment
W3	the relationship between factors disturbing the balance of biological processes and physiological and pathophysiological changes	B.W25	group assessment
Skills - Student can:			
U1	plan own learning activities and constantly learn in order to update own knowledge	O.U5	group assessment
U2	inspire the learning process of others	O.U6	group assessment
U3	communicate and share knowledge with colleagues in a team	O.U8	group assessment
U4	critically evaluate the results of scientific research and adequately justify the position	O.U9	group assessment
U5	assess the reliability of the clinical trial	B.U18	group assessment
U6	critically analyse medical literature, including in English, and draw conclusions	D.U17	group assessment
U7	communicate with colleagues with constructive feedback and support	D.U12	group assessment
Social competences - Student is ready to:			
K1	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	group assessment
K2	use objective sources of information	O.K7	group assessment
K3	formulate conclusions from own measurements or observations	O.K8	group assessment
K4	implement the principles of professional camaraderie and cooperation in a team of specialists, including representatives of other medical professions, also in a multicultural and multinational environment	O.K9	group assessment
K5	assume responsibility for decisions taken in the course of their professional activities, including in terms of the safety of oneself and others	O.K11	group assessment

Goals

C1	The aim of the course is to introduce students into debates about role and place of values in medicine and to encourage them to develop their own thoughts with regard to human nature in face of still evolving the art. of healing.
----	---

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
	Knowledge - Student knows and understands:		

W1	the social dimension of health and disease, the impact of the social environment (family, social networks) and social inequalities and socio-cultural differences on health, and the role of social stress in health and self-destructive behaviors	D.W1	classroom observation, essay, project
W2	social attitudes towards the importance of health, disease, disability and old age, the social consequences of disease and disability and social and cultural barriers, and the concept of quality of life as determined by the state of health	D.W4	classroom observation, essay, project
W3	the importance of verbal and non-verbal communication in the process of communicating with the patient and the notion of trust in the interaction with the patient	D.W6	classroom observation, essay, project
W4	functioning of health care system entities and social role of a physician	D.W8	classroom observation, essay, project
W5	basic psychological mechanisms of human functioning in health and disease	D.W9	classroom observation, essay, project
W6	issues related to the adaptation of patients and their families to disease as a difficult situation and to related events, including dying and family mourning processes	D.W11	classroom observation, essay, project
W7	patient's rights	D.W17	classroom observation, essay, project
W8	the process of shaping new specialties in the field of scientific discipline - medical sciences and achievements of leading representatives of Polish and world medicine	D.W22	classroom observation, essay, project
Skills - Student can:			
U1	follow the patient's rights	D.U15	classroom observation, essay, project
U2	comply with ethical standards in professional activities	D.U13	classroom observation, essay, project
U3	critically analyse medical literature, including in English, and draw conclusions	D.U17	classroom observation, essay, project
Social competences - Student is ready to:			
K1	to be guided by the well-being of a patient	O.K2	classroom observation, essay, project
K2	respect medical confidentiality and patients' rights	O.K3	classroom observation, essay, project
K3	take actions towards the patient on the basis of ethical norms and principles, with an awareness of the social determinants and limitations of the disease	O.K4	classroom observation, essay, project
K4	use objective sources of information	O.K7	classroom observation, essay, project

<p>Periods Semester 3, Semester 4</p>	<p>Examination graded credit</p> <p>Activities and hours e-learning lecture: 30</p>	<p>Number of ECTS points 3.0</p>
--	---	---

Goals

C1	In the Third Reich, medicine has become one of the main instruments of introducing racist policy. Without active participation of many doctors and nurses, the program of compulsory sterilisation, forced euthanasia, and medical experiments in concentration camps would not be fully implemented. Moreover, their involvement in eugenics provided pseudo-scientific justification for anti-Semitism. Therefore, the aim of the course is to describe and analyse eugenic ideas in the Third Reich in comparative context, as well as to raise student's awareness of crucial role of ethics in the profession of doctors.

Teaching methods:

case study, discussion, e-learning, problem solving method, case study method, presentation, group work, seminar, lecture, lecture with multimedia presentation

Activities	Examination methods	Credit conditions
e-learning lecture	written examination, classroom observation, essay, project	attendance + exam / presentation / essay

Additional info

Credit requirements (medical students):

Participation* in (on-line seminars) + multimedia presentation (20-30 min.)

- 2 absences allowed (6 hours)

- 3 absences (9 hours) + multimedia presentation + essay (1500-1800 words)

- 4 absences allowed (12 hours) + multimedia presentation + essay (2100-2400 words)

Additional information:

- Attendance is compulsory;

- Attendance shall be confirmed at any time during online classes;

- Every student shall make a 20-30-minute presentation;

- If, due to specific nature of online classes, a presentation has not been delivered, submitting an essay shall be compulsory.

Entry requirements

Interest in the history of medicine and medical ethics in the interwar period and during WW2.

Neuroethics

Educational subject description sheet

Basic information

<p>Department Faculty of Medicine</p> <p>Field of study Medical Program</p> <p>Study level long-cycle master's degree program</p> <p>Study form full-time</p> <p>Education profile general academic</p> <p>Disciplines Medical science</p> <p>ISCED classification 0912 Medicine</p> <p>Subject related to scientific research Yes</p>	<p>Didactic cycle 2021/22</p> <p>Realization year 2022/23</p> <p>Lecture languages English</p> <p>Block obligatory for passing in the course of studies</p> <p>Mandatory elective</p> <p>Examination graded credit</p> <p>Standard group D. Behavioral and social sciences with elements of professionalism</p>
--	--

<p>Periods Semester 3, Semester 4</p>	<p>Examination graded credit</p> <p>Activities and hours seminar: 30</p>	<p>Number of ECTS points 3.0</p>
--	--	---

Goals

C1	The main objective of the course is to provide students with the fundamental concepts and theories of neuroethics
C2	A student is able to define and discuss the body-mind problem, the distinction between so-called easy- and hard problem of consciousness and other problems of philosophy of mind.
C3	A student is able to define and discuss different types of human behavior: intentional, spontaneous, free, compulsive, and coerced, and is able to applied them into discussions on mental disorder, addiction and free will.
C4	A student is able to define and discuss the concepts of free will, moral responsibility (in moral and legal terms), mental state, state of affairs, and belief.
C5	A student is able to define the field bioethics and neuroethics, as well as their basic problems, theories and arguments.
C6	A student is able to describe and discuss main theories of body-mind problem (e.g. emergency, dualism, monism, anomalous monism) and the philosophical problem of artificial intelligence (e.g. Chinese room thought experiment).
C7	A student is able to define and discuss the concept of personhood, personal identity and their ethical implications.
C8	A students is able to describe and discuss the ethical problems of coercion in psychiatry.
C9	A student is able to define and discuss the concept of criminal accountability and legal capacity in the context of mental disorder.
C10	A student is able describe and discuss the ethical problems of addiction and therapy of patients diagnosed with addiction.
C11	A student is able to discuss the concept of mental disorder/mental illness, as well as theories of illness, disability, disorder and health.
C12	A student is able to define and discuss the concept of enhancement (e.g. cognitive, moral), and a moral implications of interventions designed to improve normal human functioning.

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	methods of conducting scientific research	O.W5	classroom observation, assignment report
W2	ethical, social and legal conditions for practicing the medical profession and the principles of health promotion, based on scientific evidence and accepted standards	O.W4	classroom observation, assignment report
W3	the social dimension of health and disease, the impact of the social environment (family, social networks) and social inequalities and socio-cultural differences on health, and the role of social stress in health and self-destructive behaviors	D.W1	classroom observation, assignment report
W4	social attitudes towards the importance of health, disease, disability and old age, the social consequences of disease and disability and social and cultural barriers, and the concept of quality of life as determined by the state of health	D.W4	classroom observation, assignment report

W5	principles and methods of communication with the patient and his/her family, which are aimed at building empathic, trust-based relationships	D.W5	classroom observation, assignment report
W6	functioning of health care system entities and social role of a physician	D.W8	classroom observation, assignment report
W7	patient's rights	D.W17	classroom observation, assignment report
W8	the main concepts, theories, principles and ethical rules serving as a general framework for the proper interpretation and analysis of moral and medical issues	D.W16	classroom observation, assignment report
W9	standards relating to patients' rights	D.W24	classroom observation, assignment report
Skills - Student can:			
U1	inspire the learning process of others	O.U6	classroom observation, assignment report
U2	communicate and share knowledge with colleagues in a team	O.U8	classroom observation, assignment report
U3	critically evaluate the results of scientific research and adequately justify the position	O.U9	classroom observation, assignment report
U4	recognise and apply measures provided for by law when it is necessary to take medical action without consent or with the use of coercion	D.U20	classroom observation, assignment report
U5	critically analyse medical literature, including in English, and draw conclusions	D.U17	classroom observation, assignment report
U6	follow the patient's rights	D.U15	classroom observation, assignment report
U7	recognise the ethical dimension of medical decisions and distinguish between factual and normative aspects	D.U14	classroom observation, assignment report
U8	comply with ethical standards in professional activities	D.U13	classroom observation, assignment report
Social competences - Student is ready to:			
K1	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	classroom observation, assignment report
K2	to be guided by the well-being of a patient	O.K2	classroom observation, assignment report
K3	respect medical confidentiality and patients' rights	O.K3	classroom observation, assignment report
K4	take actions towards the patient on the basis of ethical norms and principles, with an awareness of the social determinants and limitations of the disease	O.K4	classroom observation, assignment report
K5	use objective sources of information	O.K7	classroom observation, assignment report

5.	The idea of neuroenhancement. Cosmetic pharmacology: tyranny of happiness vs. self-creation.	W2, W3, W4, W5, W6, W8, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4, K5	seminar
6.	The idea of neuroenhancement: memory editing and personal identity.	W2, W3, W4, W6, W7, W8, W9, U1, U2, U3, U4, U5, U6, U7, U8, K1, K3, K4, K5	seminar
7.	Cognitive enhancement in school and in professional life. Should we ban it? Should we regulate it?	W2, W7, W8, W9, U1, U2, U3, U4, U5, U6, U7, U8, K1, K2, K5	seminar
8.	The idea of neuro-moral-enhancement: should we search for drugs that make us morally better humans?	W6, W7, U1, U2, U3, U7, U8, K1, K2, K5	seminar
9.	Informed consent in psychiatry and neurology. The ethics of coercion.	W2, W3, W4, W5, W6, W7, W8, W9, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4, K5	seminar

10.	Confidentiality in psychiatry and psychotherapy	W2, W4, W5, W7, W8, W9, U1, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4, K5	seminar
11.	Research ethics for psychiatry and neurology	W1, W2, W5, W6, W7, W8, W9, U1, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4, K5	seminar

Course advanced

Teaching methods:

case study, textual analysis, brainstorm, classes / practicals, discussion, educational film, project method, group work, seminar, lecture with multimedia presentation

Activities	Examination methods	Credit conditions
seminar	classroom observation, assignment report	Presence is obligatory. A student can be absent two times, without any excuse. In case of further absence a student is obliged to additional work assigned by a teacher. Students activity impacts his final mark (50%) A student has to prepare and perform a presentation (20%) and an essay (30%) (a case study).

Entry requirements

Participation to seminars is obligatory. There is no initial requirements.

Crossing the limits of humanity - Ethics towards the scientific challenges of progress in medicine

Educational subject description sheet

Basic information

<p>Department Faculty of Medicine</p> <p>Field of study Medical Program</p> <p>Study level long-cycle master's degree program</p> <p>Study form full-time</p> <p>Education profile general academic</p> <p>Disciplines Medical science</p> <p>ISCED classification 0912 Medicine</p> <p>Subject related to scientific research Yes</p>	<p>Didactic cycle 2021/22</p> <p>Realization year 2022/23</p> <p>Lecture languages English</p> <p>Block obligatory for passing in the course of studies</p> <p>Mandatory elective</p> <p>Examination graded credit</p> <p>Standard group D. Behavioral and social sciences with elements of professionalism</p>
--	--

<p>Periods Semester 3, Semester 4</p>	<p>Examination graded credit</p> <p>Activities and hours seminar: 30</p>	<p>Number of ECTS points 3.0</p>
--	--	---

Goals

C1	Acquainting students with philosophical and moral problems associated with new technologies in medicine.
C2	Making students aware that every technology imposes certain depicted worldview and embodies particular values.
C3	Elucidating students moral dilemmas stemming from development of science and technology.

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
------	----------------------	---------	---------------------

Knowledge - Student knows and understands:			
W1	the social dimension of health and disease, the impact of the social environment (family, social networks) and social inequalities and socio-cultural differences on health, and the role of social stress in health and self-destructive behaviors	D.W1	classroom observation, project
W2	social factors influencing behaviour in health and disease, particularly in chronic disease	D.W2	classroom observation, project
W3	functioning of health care system entities and social role of a physician	D.W8	classroom observation, project
W4	basic psychological mechanisms of human functioning in health and disease	D.W9	classroom observation, project
W5	the main concepts, theories, principles and ethical rules serving as a general framework for the proper interpretation and analysis of moral and medical issues	D.W16	classroom observation, project
W6	patient's rights	D.W17	classroom observation, project
Skills - Student can:			
U1	identify medical problems and prioritize medical management	O.U1	classroom observation, project
U2	take into account the subjective needs and expectations of the patient resulting from socio-cultural conditions in the process of therapeutic management	D.U1	classroom observation, project
U3	comply with ethical standards in professional activities	D.U13	classroom observation, project
U4	recognise the ethical dimension of medical decisions and distinguish between factual and normative aspects	D.U14	classroom observation, project
Social competences - Student is ready to:			
K1	take actions towards the patient on the basis of ethical norms and principles, with an awareness of the social determinants and limitations of the disease	O.K4	classroom observation, project

Calculation of ECTS points

Activity form	Activity hours*
seminar	30
preparation for classes	30
preparation of a project	30
Student workload	Hours 90
Workload involving teacher	Hours 30

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	What is technology? The concept of technological progress, interrelations between science and technology, and between technology and nature and culture.	W5, U4	seminar
2.	Philosophy, social anthropology: social sciences and humanities vs. medicine and technology.	W1, W5, U4	seminar
3.	How medicine creates its subject? Part I: Body.	W1, W2, U1	seminar
4.	How medicine creates its subject? Part II: Mind and soul.	W1, W2, W4, U2, K1	seminar
5.	Information technologies in medicine and their impact on scientific research, medical practice and patients' life.	W3, W6, U2	seminar
6.	Artificial intelligence in health care.	W3, W6, K1	seminar
7.	New technologies in care of chronically ill patients: analysis of patients' experience.	W1, W2, W4, U2	seminar
8.	Genetic engineering: fundamental ethical and political problems.	W2, U1, U4	seminar
9.	Reproductive cloning: philosophical and ethical aspects.	W5, U4, K1	seminar
10.	Artificial womb - do we really want it? Philosophical and ethical problems connected with technologization of procreation.	W1, W2, W4, W5, U2, U4, K1	seminar
11.	Enhancement: extending capacities of human organism.	W2, U1, U2, K1	seminar
12.	Enhancement: the case of cosmetic psychiatry and neuroscience.	W1, W4, U2, K1	seminar
13.	Borders of human body: technological extension of the body.	W2, W4, U1, U2, K1	seminar
14.	Enhancement and morality: may technology make us more ethical?	W5, U3, U4, K1	seminar
15.	Enhancement and morality: can we take control over technology or would we become its victims?	W5, U3, U4, K1	seminar

Course advanced

Teaching methods:

case study, textual analysis, discussion, presentation, seminar, lecture with multimedia presentation

Activities	Examination methods	Credit conditions
seminar	classroom observation, project	1. Assessment of active participation in seminar discussions 2. Assessment of the project prepared by students.

Additional info

Up to 2 absences is permitted. Absences should be resumed either by oral consultation or by writing short essay concerning the subject of absence.

Entry requirements

Participation to seminars is obligatory. There is no initial requirements.

Introduction to the philosophy of science

Educational subject description sheet

Basic information

<p>Department Faculty of Medicine</p> <p>Field of study Medical Program</p> <p>Study level long-cycle master's degree program</p> <p>Study form full-time</p> <p>Education profile general academic</p> <p>Disciplines Medical science</p> <p>ISCED classification 0223 Philosophy and ethics</p> <p>Subject related to scientific research Yes</p>	<p>Didactic cycle 2021/22</p> <p>Realization year 2022/23</p> <p>Lecture languages English</p> <p>Block obligatory for passing in the course of studies</p> <p>Mandatory elective</p> <p>Examination graded credit</p> <p>Standard group D. Behavioral and social sciences with elements of professionalism</p>

<p>Periods Semester 3, Semester 4</p>	<p>Examination graded credit</p> <p>Activities and hours seminar: 30</p>	<p>Number of ECTS points 3.0</p>
--	--	---

Goals

C1	Providing students with theoretical knowledge and methodological tools allowing them to conceive the character of scientific knowledge.
C2	Revealing historical changeability in understanding of standards of scientificity in various periods.
C3	Acquainting students with description of mechanisms of scientific knowledge development.
C4	Showing students myths and stereotypes in social comprehension of science.
C5	Developing in students rationally critical approach towards science and social expectations from it.

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	methods of conducting scientific research	O.W5	classroom observation, essay
Skills - Student can:			
U1	critically evaluate the results of scientific research and adequately justify the position	O.U9	classroom observation, essay
Social competences - Student is ready to:			
K1	use objective sources of information	O.K7	classroom observation, essay

Calculation of ECTS points

Activity form	Activity hours*
seminar	30
preparation for classes	20
preparation of a paper	40
Student workload	Hours 90
Workload involving teacher	Hours 30

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Philosophy of science as expression of self-awareness of scientists and philosophers with regard to scientific knowledge and its development.	W1, U1, K1	seminar
2.	Theoretical structure of empirical and deductive sciences - similarities and differences.	W1, U1, K1	seminar
3.	Methods of creation of scientific theories in empirical sciences.	W1, U1, K1	seminar
4.	Basic methods of reasoning in empirical sciences: induction, deduction, reduction.	W1, U1, K1	seminar
5.	Interdependence of empirical and theoretical knowledge in the development of science.	W1, U1, K1	seminar
6.	Methods of conducting empirical research and principles of verification of its results.	W1, U1, K1	seminar
7.	The role of fact and discovery in the growth of knowledge.	W1, U1, K1	seminar

8.	Cognitive status of scientific theories and their impact on the development of science.	W1, U1, K1	seminar
9.	Main theories of growth of science: positivistic theories, falsificationism, theory of scientific revolutions, methodological realism and operationalism.	W1, U1, K1	seminar
10.	Specificity of research methods in biomedical sciences.	W1, U1, K1	seminar
11.	Methodology of basic and clinical research.	W1, U1, K1	seminar
12.	Principles of verification and interpretation of research results - methodological traps.	W1, U1, K1	seminar
13.	Concepts of norm and pathology in biomedical sciences.	W1, U1, K1	seminar
14.	The concept of disease and controversies surrounding it.	W1, U1, K1	seminar
15.	Logico-methodological and ethical implications of the theory of empirical research in biomedical sciences.	W1, U1, K1	seminar

Course advanced

Teaching methods:

textual analysis, discussion, presentation, seminar

Activities	Examination methods	Credit conditions
seminar	classroom observation, essay	The final score consists on: - active participation in class discussions - 50% - assessment of critical review of a suggested book relevant to the issues of the course - 50%

Additional info

Up to 2 absences is permitted. Absences should be resumed either by oral consultation or by writing short essay concerning the subject of absence.

Entry requirements

Participation to seminars is obligatory. There is no any initial requirements.

History of Philosophy

--	---	---

Goals

C1	The aim of the course is to acquaint students with the molecular basis of neurodegenerative diseases. The content will also be supported by examples of new therapeutic concepts. In addition, examples of diseases, diagnosed by experts, presented in art objects will also be given. As part of humanizing content, the content will be supplemented with a description of the best-known cases of art forgeries, and a description of detection techniques. After completing the course, the student will acquire knowledge about the mechanisms of neurodegenerative diseases, will also learn a different view of art and gain general knowledge about artists.
----	---

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
------	----------------------	---------	---------------------

Knowledge - Student knows and understands:			
W1	development, structure and functions of the human body in normal and pathological conditions	O.W1	test
W2	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	test
Skills - Student can:			
U1	plan own learning activities and constantly learn in order to update own knowledge	O.U5	test
U2	inspire the learning process of others	O.U6	test
U3	communicate and share knowledge with colleagues in a team	O.U8	test
U4	critically evaluate the results of scientific research and adequately justify the position	O.U9	test
U5	communicate with colleagues with constructive feedback and support	D.U12	test
U6	critically analyse medical literature, including in English, and draw conclusions	D.U17	test
U7	be able to work in a multiprofessional team, in a multicultural and multinational environment	D.U21	test
U8	demonstrate responsibility for one's own professional development, contribute to the further development of sciences, transfer own knowledge to others	D.U22	test
Social competences - Student is ready to:			
K1	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	test
K2	use objective sources of information	O.K7	test
K3	formulate conclusions from own measurements or observations	O.K8	test
K4	implement the principles of professional camaraderie and cooperation in a team of specialists, including representatives of other medical professions, also in a multicultural and multinational environment	O.K9	test

Calculation of ECTS points

Psychology of patients with chronic conditions and elderly patients. Educational subject description sheet

Basic information

<p>Department Faculty of Medicine</p> <p>Field of study Medical Program</p> <p>Study level long-cycle master's degree program</p> <p>Study form full-time</p> <p>Education profile general academic</p> <p>Disciplines Medical science</p> <p>ISCED classification 0912 Medicine</p> <p>Subject related to scientific research Yes</p>	<p>Didactic cycle 2021/22</p> <p>Realization year 2022/23</p> <p>Lecture languages English</p> <p>Block obligatory for passing in the course of studies</p> <p>Mandatory elective</p> <p>Examination graded credit</p> <p>Standard group D. Behavioral and social sciences with elements of professionalism</p>
--	--

<p>Periods Semester 3, Semester 4</p>	<p>Examination graded credit</p> <p>Activities and hours seminar: 30</p>	<p>Number of ECTS points 3.0</p>
--	--	---

Goals

C1	Presentation of knowledge about the psychology of chronically ill and elderly patients.
C2	Acquiring the ability to intervene and communicate effectively with a chronically ill and elderly patients.
C3	Understanding of the patient's adaptation mechanisms in the disease situation and various acute or chronic pain experiences along with the ability to identify psychological and behavioral factors and interaction allowing for the possibility of influencing pain reactions in patients.
C4	Understanding human behavior in illness and shaping the subjective relationship of students with the patient, focused on providing basic mental support, appropriate to the situation and needs of the patient.
C5	Deepening the knowledge about the factors conditioning adaptation to the aging process, psychological needs of elderly, diagnosis of cognitive and emotional changes in elderly.
C6	Understanding the importance of psychosocial consequences of a chronic disease for people, families and society.

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	the social dimension of health and disease, the impact of the social environment (family, social networks) and social inequalities and socio-cultural differences on health, and the role of social stress in health and self-destructive behaviors	D.W1	test
W2	social factors influencing behaviour in health and disease, particularly in chronic disease	D.W2	test
W3	social attitudes towards the importance of health, disease, disability and old age, the social consequences of disease and disability and social and cultural barriers, and the concept of quality of life as determined by the state of health	D.W4	test
W4	principles and methods of communication with the patient and his/her family, which are aimed at building empathic, trust-based relationships	D.W5	test
W5	psychosocial consequences of hospitalization and chronic disease	D.W7	test
W6	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	test
W7	ethical, social and legal conditions for practicing the medical profession and the principles of health promotion, based on scientific evidence and accepted standards	O.W4	test
W8	the importance of verbal and non-verbal communication in the process of communicating with the patient and the notion of trust in the interaction with the patient	D.W6	test
W9	issues related to the adaptation of patients and their families to disease as a difficult situation and to related events, including dying and family mourning processes	D.W11	test
W10	the role of stress in etiopathogenesis and disease progression, and the mechanisms for coping with stress	D.W12	test
Skills - Student can:			
U1	take into account the subjective needs and expectations of the patient resulting from socio-cultural conditions in the process of therapeutic management	D.U1	classroom observation
U2	build an atmosphere of trust throughout the entire diagnostic and treatment process	D.U4	classroom observation
U3	inform the patient about the purpose, course and possible risks of the proposed diagnostic or therapeutic measures, and obtain his or her informed consent to take these measures	D.U6	classroom observation
U4	involve the patient in the therapeutic process	D.U7	classroom observation

U5	provide the patient and his or her family with information about unfavorable prognosis	D.U8	classroom observation
U6	provide advice on therapeutic recommendation compliance and following healthy lifestyle	D.U9	classroom observation
U7	choose treatment that minimizes the social consequences for the patient	D.U3	classroom observation
U8	identify risk factors for violence, recognize violence and respond accordingly	D.U10	classroom observation
U9	apply basic psychological motivational and supportive interventions	D.U11	classroom observation
U10	implement appropriate and safe therapeutic treatment and predict its effects	O.U4	classroom observation
U11	communicate with the patient and his family in an atmosphere of trust, taking into account the needs of the patient	O.U7	classroom observation
Social competences - Student is ready to:			
K1	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	classroom observation
K2	use objective sources of information	O.K7	classroom observation
K3	promote health-promoting behaviors	O.K6	classroom observation

Calculation of ECTS points

seminar	30
preparation for classes	25
preparation for examination	20
Student workload	Hours 75
Workload involving teacher	Hours 30

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
-----	----------------	-----------------------------	------------

1.	Man in a disease situation - disease as a situation difficult, stress-inducing picture of one's own illness and his meaning. Biomedical and biopsychosocial model of diseases. Psychosomatic (psychological determinants of somatic diseases - feature theory, theory psychosocial stress, psychodynamic theory) and somatopsychic relationships.	W1, W2, W3, W4, W5, W6, W7, W8, U1, K1	seminar
2.	Disease stress responses (common emotional and cognitive and adaptive responses occurring in patients in terms of. E. Kubler-Ross and in terms of S. Taylor).	W7, W8, U1, U4	seminar
3.	Disease quality of life - main aspects of quality of life related to health.	W1, W2, W3, W4, W8, U1, K1	seminar
4.	Cognitive consequences of selected chronic diseases, their impact on psychosocial functioning and the way of conducting a therapeutic conversation with the patient.	W5, W6, U2, U3, U5, U6, U9, K1	seminar
5.	Geriatric patient. Mental changes in the functioning of elderly patients conditioned by the developmental and disease factors. Adaptation to the aging process and the psychological needs of the elderly.	W2, W3, W4, W7, K1	seminar
6.	Aggressive behavior the elderly. Difficult situations in contact with the chronically and elderly patients. Manifestations of stress care overload.	W5, W6, W7, U2, U6, U7, U8, U9	seminar
7.	Psychology of pain: psychological theories of pain, psyche-body relationship and pain sensations. Components of the reaction to pain, model of the pain sensation. Personality, emotional and behavioral premises of pain reactions. Modeling and learning pain reactions. Emotions and pain: vicious circle of pain sensations ("spiral of pain"). The types and types of pain, classification of pain sensations, features and psychological measurement of pain. Acute and chronic pain. The phenomenon of phantom pain. Placebo effect and pain. Psychological problems of pain reactions in geriatric patients. Psychosocial problems relating to pain in cancer patients, in terminal diseases and palliative care.	W4, U10, U5, U6, U7, U9	seminar
8.	The importance of social support, motivation, activity and life goals in dealing with pain. Psychotherapy, movement, relaxation, visualization, biofeedback, Tai Chi, acupuncture, music therapy, mental therapy. Role selected psychosocial factors in the fight against poor diagnosis and chronic treatment.	W10, W4, W5, U2, U3, U4, U6, U9, K3	seminar
9.	The role of family and social support in the treatment process of chronically ill patients. Psychological forms of therapy and assistance to elderly patients and their caregivers. Stages in the process of changing health behavior. Methods increasing the sense of effectiveness. Raising and keeping motivation of the patients to change their lifestyle.	W2, W5, W6, W9, U11, U2, U4, U6, U9, K2	seminar

-------------------------------------	--	---

Goals

C1	To familiarize students with the laws and concepts in biophysics used to describe processes taking place in the human body, in particular with: (1) the basics of thermodynamics (solubility, diffusion, osmotic pressure, Donnan equilibrium), (2) biophysical description of cell, tissue and organ functioning and physiological processes in the human body, (3) laws of physics describing fluid flow and functioning of the vascular and respiratory systems, (4) basic laws describing electrical and magnetic phenomena in the human body (resting and action potential of the cell membrane, electrical properties of tissues, effects of electric current flow in the body, safety limits for current/voltage values, pacemaker, defibrillator).
C2	To familiarize students with the effects of physical factors such as temperature, gravity, pressure, acceleration, electromagnetic field and ionizing radiation on the human body, in particular with: (1) the sources of electromagnetic radiation and radiation properties depending on the source type, (2) influence of electromagnetic radiation from various ranges on living organism and its application in diagnostics and therapy, (3) the phenomenon of radioactive decay and various types of ionizing radiation, interaction of ionizing radiation with living matter, (4) risk assessment methods of influence of various physical factors on the human body, (5) dose harmfulness of non-ionizing/ionizing radiation and other physical factors acting on the human body, radiation protection.
C3	To familiarize students with the basics of physical methods used in diagnostics and therapy, in particular with: (1) analysis of biophysical phenomena and processes occurring in therapy and diagnostics, (2) physical background of non-invasive imaging methods, (3) physical description of selected therapeutic techniques e.g. ultrasounds and various types of electromagnetic radiation in a wide range of energies.
C4	To familiarize students with the use of simple measuring instruments, accuracy of measurements and planning experiments to determine the physical parameters of the object, in particular with: (1) operation of selected diagnostic and therapeutic measuring instruments (e.g. multimeter, ECG apparatus, laser, ultrasound apparatus, spirometer, magnetotherapy device, dialyzer, apparatus for electrodiagnostics, X-ray tube, radiometer), (2) using dedicated software supporting or controlling the operation of these devices and assess the accuracy of the performed measurements, (3) using databases, including online ones, and searching for the needed information with the use of available tools, (4) performing a biophysical experiment and analyzing measurement results with the use of statistical programs, spreadsheets and graphic programs.

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	oral answer, assignment report
W2	methods of conducting scientific research	O.W5	assignment report
W3	water and electrolyte management in biological systems	B.W1	assignment report
W4	terms: solubility, osmotic pressure, isotonia, colloidal solutions and Gibbs-Donnan equilibrium	B.W3	assignment report
W5	physical laws describing fluid flow and factors affecting vascular resistance to blood flow	B.W5	assignment report
W6	natural and artificial sources of ionising radiation and their interaction with matter	B.W6	oral answer, assignment report
W7	physicochemical and molecular basis of sensory organs activity	B.W7	assignment report
W8	the physical basis of non-invasive imaging methods	B.W8	oral answer, assignment report
W9	physical fundamentals of selected therapeutic techniques, including ultrasound and irradiation	B.W9	oral answer, assignment report

W10	basics of induction and transmission in the nervous system and higher nervous actions as well as physiology of striated and smooth muscles and blood functions	B.W20	assignment report
W11	activity and mechanisms of regulation of all organs and systems of the human body, including the cardiovascular system, respiratory system, digestive system, urinary tract and skin layers, and the interrelations existing between them	B.W21	assignment report
W12	the relationship between factors disturbing the balance of biological processes and physiological and pathophysiological changes	B.W25	oral answer, assignment report
W13	basic methods of statistical analysis used in population and diagnostic studies	B.W27	assignment report
W14	principles of conducting scientific, observational and experimental studies and in vitro studies for the development of medicine	B.W29	assignment report
W15	basic laws describing electrical and magnetic phenomena in the body	B.W30	oral answer, assignment report
W16	basic laws of mechanics referring to the skeletal and muscular system	B.W31	assignment report
W17	rules of using materials published on the Internet (copyright, quoting law, methods of obtaining free materials)	B.W37	oral answer, assignment report
Skills - Student can:			
U1	plan the diagnostic procedure and interpret its results	O.U3	assignment report
U2	use knowledge of the laws of physics to explain the effects of external factors such as temperature, acceleration, pressure, electromagnetic field and ionising radiation on the body and its elements	B.U1	oral answer, assignment report
U3	assess the harmfulness of the dose of ionising radiation and comply with the principles of radiological protection	B.U2	assignment report
U4	predict the direction of biochemical processes depending on the energetic state of cells	B.U6	oral answer, assignment report
U5	operate simple measuring instruments and evaluate the accuracy of measurements made	B.U9	assignment report
U6	use databases, including online databases, and search for the necessary information using the available tools	B.U10	assignment report
U7	select appropriate statistical tests, conduct basic statistical analyses, use appropriate methods of presenting results, interpret the results of meta-analyses and analyze the probability of survival	B.U11	assignment report
U8	plan and perform simple scientific research and interpret its results and draw conclusions	B.U13	assignment report
U9	indicate the relationship between factors disturbing the balance of biological processes and physiological and pathophysiological changes	B.U14	assignment report
U10	identify sources of electrical signals in the body	B.U15	assignment report
U11	use on-line photo, audio and video libraries	B.U21	assignment report

U12	provide expert knowledge through simple IT techniques of knowledge representation such as a block diagram or a rule database	B.U28	assignment report
U13	use e-learning platforms	B.U30	oral answer, assignment report
Social competences - Student is ready to:			
K1	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	assignment report
K2	use objective sources of information	O.K7	oral answer, assignment report
K3	formulate conclusions from own measurements or observations	O.K8	assignment report
K4	implement the principles of professional camaraderie and cooperation in a team of specialists, including representatives of other medical professions, also in a multicultural and multinational environment	O.K9	assignment report

Study content

No.	Course content	Subject's learning outcomes	Activities
-----	----------------	-----------------------------	------------

1.	Structure and states of matter - atomic nucleus, atom, molecule, gases (partial pressure, Dalton's law, air composition, vapors, liquids (surface tension, viscosity), solids (bone and tooth structure), phase transitions (ebullism), gas solubility in liquids (Henry's law, aeroembolism, caisson disease, oxygen intoxication, nitrogen narcosis). Biophysical description of biological systems, the living organism as a thermodynamic system, mechanisms of heat transport, heat loss of the body, the body's heat balance, basal metabolic rate, work of the heart, lungs and kidneys, hyperthermia, hypothermia and cryotherapy, mechanisms of membrane transport, diffusion phenomenon, Fick's law, osmosis, van't Hoff's law, osmotic pressure, role of the osmotic pressure in transport through the wall of capillary vessel.	W1, W12, W3, W4, U1, U13, U4, U9, K2	seminar, e-learning seminar
2.	Mechanical properties of biological systems, gravity, overloads, traffic accidents, balance and deformation of solids, Hooke's law, mechanical properties of bones. Fluid mechanics, hydrostatics, the effect of hydrostatic pressure on circulatory and respiratory systems functioning, speed distribution of blood in vessel, laminar and turbulent flow, volumetric flow, vascular resistance, pulse wave, description of cardiovascular and respiratory systems functioning based on fluid mechanics, blood pressure measurements.	W1, W11, W16, W5, U1, U13, K2	seminar, e-learning seminar
3.	Electrical and magnetic properties of the biological substances, electrical conductivity of tissues and organs, electric model of tissue, bioimpedance measurements, Hoorweg-Weiss curve, electrodiagnostics and electrotherapy, the effect of electric current flow on the human body, electric shock, pacemaker and defibrillator, magnetic fields, diamagnetic and paramagnetic materials, application of magnetic fields in medicine.	W1, W10, W15, W7, U1, U10, U13, U9, K2	seminar, e-learning seminar
4.	Types and sources of electromagnetic radiation, radio waves and microwaves, antennas, infrared radiation, visible light, photodynamic reactions, ultraviolet, physical background and properties of laser radiation, lasers, X-ray tube and its parameters, properties of X-ray radiation used in medicine, particle accelerators used in medicine. Influence of non-ionizing radiation on biological systems, application of electromagnetic radiation in the range of UV/VIS/IR in medicine, lasers in medicine, therapeutic application of electromagnetic fields in the range of low and high frequencies, specific absorption rate. Influence of ionizing radiation on biological systems, absorption law, quantities used in radiation protection and safety standards, radioactive decay law, characteristics of radioactive sources applied in medicine, brachytherapy and teletherapy, radioactive isotopes in diagnostics, gamma camera, scintigraphy, single photon emission tomography, positron emission tomography.	W1, W11, W12, W6, W9, U1, U13, U2, U3, K2	seminar, e-learning seminar

5.	Imaging diagnostics, X-ray apparatus, roentgenography, minimization of radiation doses and image optimization, pantomography, densitometry, computed tomography and principle of measurement, tomographic window, phenomenon of magnetic resonance, magnetic resonance tomography and principle of measurement, magnetic resonance spectroscopy, advanced ultrasound techniques (Doppler effect, higher harmonics, 3D and 4D imaging), types of contrast agents applied in various method of diagnostic imaging.	W1, W13, W17, W8, U1, U11, U13, U6, K2	seminar, e-learning seminar
6.	Lab classes include self-implementation by students experiments with the use of devices and organ models built at the Biophysics Department. Individual exercises concern the following issues: methodology of physical experiment (error calculation), measurement and data analysis of selected physiological quantities, acquisition and computer processing of diagnostic images, mechanical properties of bones, model of the circulatory system, hemodialysis, pharmacokinetics, subtractive angiography, ultrasonography, electrocardiography and electromyography, model of the respiratory system and spirometry, keratometry (eye model), audiometry (ear model), electrotherapy and magnetotherapy	W13, W14, W2, U11, U12, U5, U6, U7, U8, K1, K3, K4	laboratory

Course advanced

Teaching methods:

laboratories (labs), e-learning, seminar

Activities	Examination methods	Credit conditions
e-learning seminar	oral answer	Participation in seminars, positive assessment of answers.
seminar	oral answer	Participation in seminars, positive assessment of answers.
laboratory	assignment report	Labs: report, each exercise is rated on a scale of 0-10 points. For getting credit it is necessary to get an average grade equal to minimum 6 points from all exercises.

Additional info

Medical Biophysics course completes the final test exam. The final exam is a test exam, 60 questions, 5 possible answers, one point is obtained for each correctly indicated answer. Time duration is 60 minutes. Passing the exam requires collecting 30 points. A lower score means failed exam. The final positive grade is determined by adding all the exam points (if passed) and bonus points collected on seminars and labs.

Entry requirements

Knowledge in physics, mathematics and chemistry at the basic level. Ability to adapt this knowledge to solve problems in biophysics. Ability to prepare for classes with the use of given literature and other learning materials.

Pharmacology

Goals

C1	several groups of drugs
C2	main mechanisms of drug action and its transformation in organism, depending on age
C3	effect of pathological influence on drug metabolism
C4	basic rules of pharmacotherapy
C5	main unwanted action of drugs, deriving from their interaction
C6	drug resistance, including multidrug resistance
C7	indication for genetic research in achievement of individualisation of therapy
C8	main fields of therapeutics future, including possibilities of cell therapy, gene therapy and induction therapy
C9	main subjects from general toxicology
C10	groups of drugs, overuse of which can lead to toxicity
C11	symptoms of the most common drug toxicity
C12	how to treat poisoning

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	basic rules of pharmacotherapy	C.W38	test, multiple choice test, credit
W2	more important side effects of medicines, including those resulting from their interaction	C.W39	test, multiple choice test, credit
W3	the problem of drug resistance, including multi-drug drug resistance	C.W40	test, multiple choice test, credit
W4	indications for genetic tests performed with the aim of individualizing pharmacotherapy	C.W41	test, multiple choice test, credit
W5	basic directions of therapy development, in particular the possibilities of cellular, gene and targeted therapy in specific diseases	C.W42	test, multiple choice test, credit
W6	basic concepts of general toxicology	C.W43	test, multiple choice test, credit
W7	groups of medicines, the abuse of which can lead to poisoning	C.W44	test, multiple choice test, credit
W8	symptoms of the most common acute poisoning, including alcohol, drugs and other psychoactive substances, heavy metals and selected groups of drugs	C.W45	test, multiple choice test, credit
W9	basic principles of diagnostic procedures in poisoning	C.W46	test, multiple choice test, credit
Skills - Student can:			
U1	use pharmaceutical guides and databases on medicinal products	C.U17	test, multiple choice test, credit

U2	assess toxicological hazards in specific age groups and in conditions of hepatic and renal failure, and prevent drug poisoning	C.U18	test, multiple choice test, credit
U3	interpret the results of toxicological tests	C.U19	test, multiple choice test, credit
U4	prepare records of all forms of prescription medicinal substances	C.U16	test, multiple choice test, credit
U5	design schemes of rational chemotherapy of infections, empirical and targeted ones	C.U15	test, multiple choice test, credit
U6	perform simple pharmacokinetic calculations	C.U13	test, multiple choice test, credit
U7	select drugs at appropriate doses in order to correct pathological phenomena in the system and in individual organs	C.U14	test, multiple choice test, credit
Social competences - Student is ready to:			
K1	use objective sources of information	O.K7	test, multiple choice test, credit
K2	promote health-promoting behaviors	O.K6	test, multiple choice test, credit

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Pharmacodynamics	W1, W5, U1, U6, K1, K2	seminar, e-learning lecture
2.	Pharmacokinetics	W1, W2, U1, K1, K2	seminar, e-learning lecture
3.	Chemical mediators in autonomic nervous system - cholinergic transmission - cholinergic agonists and antagonists - neuromuscular blocking drugs - autonomic ganglia drugs	W1, W2, W6, W7, W8, U1, U3, U7, K1	seminar, e-learning lecture
4.	Adrenergic transmission - adrenergic receptors - adrenoceptor agonists and antagonists	W1, W2, W7, W8, U1, U2, U3, U4, U5, U6, U7, K1	seminar, e-learning lecture
5.	Local hormones (autacoids) in inflammation and allergy - histamine, serotonin Nitric oxide and drugs.	W1, W2, W5, U1, U7, K1	seminar, e-learning lecture
6.	Bradykinin, angiotensin II, ACEI, ARB, Endothelin and its blockers.	W1, W2, W5, U1, U7, K1	seminar, e-learning lecture
7.	Eicosanoids and PAF (platelet activating factor) - drugs connected with eicosanoids	W1, W2, W4, W5, W7, W8, U1, U2, U7, K1	seminar, e-learning lecture

8.	Non-steroidal anti-inflammatory drugs - treatment of gout - treatment of rheumatoid arthritis	W1, W2, W3, W4, W5, W6, W7, W8, W9, U1, U2, U3, U4, U5, U6, U7, K1, K2	seminar, e-learning lecture
9.	Chemical transmission in the central nervous system - classification of psychotropic drugs Non-therapeutic drugs (alcohol, others)	W6, W7, W8, W9, U7	seminar, e-learning lecture
10.	Anxiolytic and hypnotic drugs. Opioids. Treatment of pain.	W7, W8, U1, U2, U7, K1	seminar, e-learning lecture
11.	General anaesthesia agents. Local anaesthetic drugs.	W1, W2, W3, W7, W8, W9, U1, U2, U7, K1	seminar, e-learning lecture
12.	Neuroleptic drugs and drugs used in affective disorders.	W1, W2, W3, W4, W5, W7, U1, U2, U7, K1, K2	seminar, e-learning lecture
13.	Treating of motor disorders: epilepsy and Parkinsonism.	W1, W8	seminar, e-learning lecture
14.	Central nervous system stimulants and psychomimetics. Cannabinoids, LSD, heroine, amphetamine, cocaine. Treatment of drug abuse.	W1, W2, W3, W5, W7, U1, U2, U7, K1	seminar, e-learning lecture
15.	Basic principles of chemotherapy - sulphonamides Antibacterial agents Cell wall synthesis inhibitors (penicillin, cephalosporin, monobactams, carbapenems).	W1, W7, U1, U4, U7, K1	seminar, e-learning lecture
16.	Inhibitors of bacterial protein synthesis (tetracyclines, macrolides, aminoglycosides, chloramphenicol, other antibiotics) Fluoroquinolones Antifolate drugs.	W1, W2, W3, U1, U2, U5, U7, K1, K2	seminar, e-learning lecture
17.	Antimycobacterial agents - treatment of tuberculosis and leprosy Antifungal drugs.	W1, W2, W3, U1, U2, U5, U7, K1, K2	e-learning lecture
18.	Antiviral drugs. Antiprotozoal drugs and anthelmintic drugs.	W1, W2, W3, U1, U2, U5, U7, K1, K2	e-learning lecture
19.	Cancer chemotherapy. Progress in cancer immunotherapy.	W1, W2, W3, U1, U2, U5, U7, K1, K2	seminar, e-learning lecture
20.	The endocrine system - anterior pituitary hormones - hypothalamic hormones	W1, W2, W3, U1, U2, U7, K1, K2	seminar, e-learning lecture
21.	Thyroid and parathyroid hormones.	W1, W2, W3, U1, U2, U7, K1, K2	seminar
22.	Adrenal steroids and related drugs The reproductive system - estrogens, androgens, anabolic hormones, contraceptives.	W1, W2, W3, U1, U2, U7, K1, K2	seminar, e-learning lecture
23.	Diabetes Mellitus. Insulin Oral hypoglycaemic agents.	W1, W2, W3, U1, U2, U7, K1, K2	seminar, e-learning lecture
24.	Treatment of diarrhea, constipation, nausea vomiting. Treatment of gastroesophageal reflux disorder (GERD), role of H2 receptors.	W1, W2, W3, W4, W5, U1, U2, U5, U7, K1, K2	e-learning lecture

25.	Peptic ulcers, antiacids; antiseecretory drugs.	W1, W2, W3, U1, U2, U7, K1, K2	e-learning lecture
26.	Agents used to treat liver and pancreas disorders; inflammatory bowel disease, hepatitis.	W1, W2, W3, U1, U2, U7, K1, K2	e-learning lecture
27.	Diuretics, antidiuretic drugs.	W1, W2, W3, W5, U1, U2, U7, K1, K2	seminar, e-learning lecture
28.	Diseases of respiratory tract. Bronchodilator agents; agents used to treat asthma.	W1, W2, W3, W4, W5, U1, U2, U7, K1, K2	seminar, e-learning lecture
29.	Decongestants; cough suppressants; antimicrobial agents used to treat patients with respiratory tract infections.	W1, W2, W3, W4, W5, U1, U2, U7, K1, K2	seminar, e-learning lecture
30.	Anemia. Drugs affecting hematopoiesis Septicemia, bacteremia Blood and blood products.	W1, W2, W4, W5, U1, U2, U7, K1, K2	seminar, e-learning lecture
31.	Introduction to cardiovascular pharmacology Treatment of congestive heart failure and acute heart failure.	W2, W3, W6, W7, W8, W9, U1, U2, U3, U7, K1, K2	e-learning lecture
32.	Antiarrhythmic drugs. Resuscitation, treatment of shocks. Endocarditis.	W1, W2, U6, K1	seminar, e-learning lecture
33.	Pharmacology of coagulation, fibrinolytic drugs.	W1, W2, W3, W4, W5, W6, W7, W8, W9, U1, U2, U3, U4, U5, U6, U7, K1, K2	seminar, e-learning lecture
34.	Pharmacology of platelets and endothelium. Antiplatelet drugs.	W1, W2, W3, W4, W5, W6, W7, W8, W9, U1, U2, U3, U4, U5, U6, U7, K1, K2	seminar, e-learning lecture
35.	Classification of anti-hypertensive drugs, current concepts in treatment of hypertension. Basic and clinical pharmacology of ACE inhibitors and angiotensin receptor antagonists, adrenolytics, diuretics, calcium channel blockers, potassium channels openers, direct vasodilators.	W1, W2, W3, W4, W5, W6	seminar, e-learning lecture
36.	Atherothrombosis - current concepts on prevention and treatment. Drugs used in the treatment of hyperlipidemias Basic and clinical pharmacology of statins, fibrates, niacin, resins. Cholesterol-independent, pleiotropic effects of hypolipemic drugs.	W1, W2, W3, W4, W5, W6, W7, W8, W9, K1, K2	seminar, e-learning lecture
37.	Drugs used in the treatment of ischemic heart disease. Acute coronary syndrome (myocardial infarction).	W1, W2, W3, W4, W5, W6, W7, W8, W9, U1, U2, U3, U4, U5, U6, U7, K1, K2	seminar, e-learning lecture

Course advanced

Semester 4

Teaching methods:

discussion, seminar, lecture

Activities	Examination methods	Credit conditions
seminar	multiple choice test	solving partial tests: I-II
e-learning lecture	credit	attendance

Semester 5

Teaching methods:

case study, discussion, e-learning, seminar, lecture

Activities	Examination methods	Credit conditions
e-learning lecture	credit	attendance
seminar	multiple choice test	solving partial tests: III-IV

Semester 6

Teaching methods:

case study, classes / practicals, discussion, e-learning, seminar, lecture

Activities	Examination methods	Credit conditions
seminar	test	writing partial tests V-VI
e-learning lecture	multiple choice test	For those who will magnage over 80% from 6 test - they can be released from Final Examination Test (90 questions).

Additional info

The knowledge of Pharmacology allows students to learn their tool in clinics.

Entry requirements

basic knowledge of pharmacology

Hygiene

<p>Period Semester 4</p>	<p>Examination graded credit</p> <p>Activities and hours seminar: 20</p>	<p>Number of ECTS points 1.0</p>
-------------------------------------	--	---

Goals

C1	Acquisition of practical skills in health care and health promotion by students.
C2	Acquiring knowledge on estimating and minimizing environmental risks.
C3	Student introduction to selected environmental factors in the place of residence and work that affect human health and methods of monitoring the home and working environment.
C4	Civilizational diseases. To acquaint students with the issues of environmental conditions of carcinogenesis.
C5	To provide the student with the basics of knowledge on the evaluation of the state of nutrition and the manner of human nutrition, including nutrients in food, as well as vitamins and minerals and energy requirements.
C6	Development of awareness of the impact of lifestyle and diet on human health

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	symptoms and course of diseases	O.W2	written credit
W2	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	written credit
W3	methods of individual and population health assessment, different systems of disease classification and medical procedures	G.W1	written credit
W4	ethical, social and legal conditions for practicing the medical profession and the principles of health promotion, based on scientific evidence and accepted standards	O.W4	written credit
W5	the importance of environmental xenobiotics, including their exogenous transformation and the role of biomarkers (exposure, effects, vulnerability) in the diagnosis of environmental and occupational diseases	G.W23	assignment report, written credit
Skills - Student can:			
U1	plan the diagnostic procedure and interpret its results	O.U3	assignment report, written credit
U2	identify medical problems and prioritize medical management	O.U1	written credit
U3	plan own learning activities and constantly learn in order to update own knowledge	O.U5	written credit
U4	communicate and share knowledge with colleagues in a team	O.U8	written credit
U5	collect information on the presence of risk factors for communicable and chronic diseases and plan prevention activities at different levels of prevention	G.U2	written credit
U6	cooperate with other professions in the field of health protection	G.U10	assignment report, written credit
U7	conducts community interview, is able to interpret levels of pollution in the aspect of effective standards, and is able to identify organs and systems susceptible to harmful substances, the performance of individual xenobiotics present in the environment and the working environment	G.U13	assignment report, written credit
Social competences - Student is ready to:			
K1	to be guided by the well-being of a patient	O.K2	written credit
K2	promote health-promoting behaviors	O.K6	written credit

Calculation of ECTS points

seminar	20

preparation for classes	5
preparation for examination	5
Student workload	Hours 30
Workload involving teacher	Hours 20

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Environment and human health	W1, W2, W3, U1, K1, K2	seminar
2.	Environmental biomonitoring: environmental monitoring and biological monitoring	W1, W2, W3, W4, W5, U1, U7, K1, K2	seminar
3.	Occupational diseases and environmental diseases.	W1, W2, W3, W4, W5, U1, U7, K2	seminar
4.	The basics of environmental determinants of civilizational diseases, with special interest on neoplastic diseases. .	W1, W2, W3, U1, K2	seminar
5.	Diet related diseases, hospital malnutrition, medical diets. Parenteral nutrition.	W1, W2, W3, W4, U1, U2, U3, U4, U5, U6, K1, K2	seminar
6.	Tools used for assessment of nutritional status and nutrition. Energy in food: the body's energy needs, fatty acids and their influence on health, practical guidelines fo body mass control. Vitamins and minerals, interactions.	W1, W2, W3, U1, U3, U4, U5, K2	seminar

Course advanced

Teaching methods:

classes / practicals, computer classes, group work, seminar, simulated patient, lecture with multimedia presentation

Activities	Examination methods	Credit conditions
seminar	assignment report, written credit	Presence during all classes. Assignments need to be done correctly. Written examination - if the sufficient number of points after all classes not reached.

Additional info

During each meeting, students get a short test/assignment/quiz and can gain a maximum of 6 points. To credit the course student have to score 65%, or more, of all points (60 points - maximum). In case of a score lower than 65% - one must take the test, consisting of 60 questions and obtain again 65% of correct answers. Criteria for assigned marks:

- 54 - 60 points - 5.0 (90%)
- 51 - 53.5 points - 4.5 (85%)
- 48 - 50.5 points - 4.0 (80%)
- 45 - 47.5 points - 3.5 (75%)

39-44.5 points - 3.0 (65%)

<39 points - 2.0

For a very good mark, a student needs to participate actively and gather 90% of all possible points (from quizzes). To pass the course each student needs to score 65% of the points that can be gathered during the whole course.

In cases of absence (due to health issues or Dean's absent note) student needs to redo the absence in a form of a written assignment directly connected to the missed class. There is no option of an unexcused absence.

Entry requirements

None

Microbiology with Parasitology and Immunology

<p>Period Semester 4</p>	<p>Examination examination</p> <p>Activities and hours e-learning lecture: 37 seminar: 16 laboratory: 27</p>	<p>Number of ECTS points 6.0</p>
-------------------------------------	--	---

Goals

C1	Familiarizing students with the biology and classification principles of pathogenic microorganisms and the mechanisms of their pathogenic impact on the human body.
C2	Presentation of transmission modes and methods to prevent the spread of infectious and parasitic diseases in the human population.
C3	Presentation of the principles of microbiological and parasitological diagnostics, proper collecting and sending samples for testing.
C4	Familiarizing students with the principles of proper aseptic and antiseptic procedures.
C5	Teaching students the correct selection of diagnostic methods and the proper interpretation of microbiological and parasitological tests results in the field of classical (microscopy and culture) as well as serological and molecular diagnostics.
C6	The course aims at presenting the general concepts of immunological processes and mechanisms underlying human immunity, with the special emphasis on those, which understanding is important in the medical profession.

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	micro-organisms, including pathogenic and present in the physiological flora	C.W12	multiple choice test
W2	epidemiology of viral and bacterial infections and infections with fungi and parasites, taking into account their geographical distribution	C.W13	multiple choice test
W3	the impact of abiotic and biotic (viruses, bacteria) environmental factors on the human body and human population and their pathways into the human body	C.W14	multiple choice test
W4	the consequences of human body exposure to various chemical and biological agents and the principles of prevention	C.W15	multiple choice test
W5	the principle of the parasite-host system and the principal disease symptoms caused by the parasites	C.W17	multiple choice test
W6	symptoms of iatrogenic infections, their pathways and pathogens causing changes in individual organs	C.W18	multiple choice test
W7	basics of microbiological and parasitological diagnostics basics of disinfection, sterilization and aseptic management	C.W19	practical test, multiple choice test
W8	basic principles of disinfection, sterilization and aseptic management	C.W20	multiple choice test
W9	genetic mechanisms for the acquisition of drug resistance by microorganisms and cancer cells	C.W11	multiple choice test
W10	human-invasive forms or stages of parasitic fungi, protozoa, helminths and arthropods of selected parasitic species, taking into account their geographical distribution	C.W16	practical test, multiple choice test

W11	basic of development and mechanisms of immune system action, including specific and non-specific mechanisms of humoral and cellular immunity	C.W21	classroom observation, multiple choice test
W12	major histocompatibility complex	C.W22	multiple choice test
W13	types of hypersensitivity reactions, types of immunodeficiency and basics of immunomodulation	C.W23	classroom observation, multiple choice test
W14	issues related to cancer immunology	C.W24	multiple choice test
W15	the genetic basis for donor and recipient selection and the basics for transplantation immunology	C.W25	multiple choice test
W16	benefits and threats resulting from the presence of genetically modified organisms (GMOs) in the ecosystem	C.W10	multiple choice test
Skills - Student can:			
U1	recognize the most frequent human parasites on the basis of their structure, life cycles and symptoms of illnesses	C.U7	practical test, multiple choice test
U2	prepare preparations and identify pathogens under the microscope	C.U9	classroom observation, practical test
U3	interpret the results of microbiological tests	C.U10	classroom observation, practical test, multiple choice test
U4	use the antigen-antibody reaction in current modifications and techniques for the diagnosis of infectious, allergic, autoimmune and neoplastic diseases and blood diseases	C.U8	classroom observation
U5	analyze reaction, defense and adaptation phenomena and regulatory disturbances caused by an etiological factor	C.U12	classroom observation
Social competences - Student is ready to:			
K1	formulate conclusions from own measurements or observations	O.K8	classroom observation, practical test
K2	use objective sources of information	O.K7	classroom observation
K3	promote health-promoting behaviors	O.K6	classroom observation

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Morphology, physiology and methods of bacteria classification. Bacterial cell structure.	W1	e-learning lecture
2.	The genome of bacteria. The basis of variation and transfer of genetic material bacteria. Bacterial resistance to antibiotics and chemotherapeutics.	W16, W9	seminar
3.	Physiological flora and mechanisms of the human microbiome formation.	W1	seminar
4.	Pathogenesis of bacterial infections. Bacterial virulence factors.	W3	seminar
5.	Bacterial etiological factors of infections in humans (Gram-positive and Gram-negative cocci, Gram-negative rods, Gram-positive sporulated and non-sporulated bacilli, anaerobic bacteria, mycobacteria, spirochetes, actinomyces, mycoplasma, chlamydia, rickettsia).	W1	seminar
6.	Epidemiology and prevention of bacterial infections. Anti-bacterial vaccines.	W2, W4	seminar
7.	Sterilization, disinfection and aseptic: principles and methods of disinfection and sterilization, the mechanism of disinfectants action, sterilization process control methods, the principle of good antiseptics.	W8	seminar, laboratory
8.	Hospital infection. Epidemiology and etiology.	W6	e-learning lecture
9.	Basics of bacteriological diagnosis. Rules for collecting and sending of specimens for bacteriological testing. Gram staining and other staining methods. Methods of bacterial culture on artificial growth media. Isolation and selected methods of bacterial identification. Serological and molecular methods. Determination of bacterial resistance to antibiotics and chemotherapeutics. Interpretation of results.	W7, U2, U3, K1	seminar, laboratory
10.	Features of the structure and replication of viruses. Classification criteria for human pathogenic viruses.	W1	e-learning lecture
11.	Biological and pathogenic properties of DNA and RNA viruses. Pathomechanism of viral infections.	W3	seminar

12.	Viral etiological factors of infections in humans: DNA viruses (herpeviruses, adenoviruses, poxviruses, parvoviruses, polyomaviruses, papillomaviruses), RNA viruses (ortomixo- and paramixo-viruses, coronaviruses, picornaviruses, astroviruses, caliciviruses, reoviruses, togaviruses, flaviviruses, filoviruses, rhabdoviruses, bunyaviruses and arenaviruses, retroviruses), hepatitis viruses. Prions.	W1	seminar
13.	Epidemiology of viral infections. Antiviral vaccines.	W2, W4	seminar
14.	Virological diagnostics. Collecting and sending of specimens for virological testing. Methods of virus isolation and identification. Serological and molecular diagnostics. Diagnostics of influenza and rubella viruses, diagnostics of hepatitis viruses, rotaviruses and enteroviruses, HIV diagnostics - methods and interpretation of test results. Molecular methods in the diagnostics of CMV, EBV, HSV and HPV. Resistance to antiviral drugs.	W7, U3, K1	seminar, laboratory
15.	Morphology and physiology of fungi. Classification criteria for human pathogenic fungi.	W1	e-learning lecture
16.	Pathogenesis of fungal infections and etiological factors of fungal infections: yeasts, filamentous fungi (molds), dermatophytes and dimorphic fungi.	W1, W4	seminar
17.	Epidemiology and prevention of fungal infections.	W2, W4	e-learning lecture
18.	Fungi as allergens. Mycotoxins and mycotocscosis.	W4	e-learning lecture
19.	Basics of medical mycological diagnostics. Collecting and sending of materials for mycological testing. Diagnostic methods: microscopy, culture, serological and molecular techniques. Determination of sensitivity to antifungal drugs. Interpretation of mycological test results.	W7, U2, U3, K1	seminar, laboratory
20.	Classification rules and general features of the structure of human parasites.	W1	laboratory
21.	Definition of parasitism. The host-parasite system and mechanisms of pathogenic interaction of parasites on the human (host) body. Basic disease symptoms associated with parasitoses.	W5	seminar
22.	Life cycles and invasive developmental stages of selected protozoa, worms and arthropods that parasitize in humans (<i>Giardia intestinalis</i> , <i>Entamoeba histolytica</i> and other creeps, <i>Cryptosporidium</i> , <i>Balantidium coli</i> , <i>Trichomonas vaginalis</i> , <i>Trypanosoma</i> , <i>Leishmania</i> , <i>Plasmodium</i> , and <i>Babesia</i> , <i>Taenia</i> , <i>Diphyllobothrium</i> , <i>Echinococcus</i> , <i>Enterobius</i> , <i>Ascaris</i> , <i>Trichuris</i> , <i>Strongyloides</i> and <i>Ancylostoma</i> , <i>Trichinella</i> and <i>Toxocara</i> , and ectoparasites: <i>Sarcoptes</i> , <i>Pediculus</i> , <i>Phthirus</i> , <i>Demodex</i>).	W10, U1	seminar, laboratory
23.	Epidemiology and prevention of parasitic infections.	W2, W4	seminar
24.	Parasitological diagnostics. Diagnostic materials - sampling and sending. Methods of parasitological diagnostics: microscopy (coproscopy), macroscopic examination of feces, culture methods (culture of flagellates) as well as serological and molecular diagnostics.	W7, U1, U2, U3, K1	seminar, laboratory

25.	Cells of the immune system. Organs of the immune system. Innate immunity	W11	e-learning lecture
26.	Antigen-antibody interactions, complement system: Precipitation-based immunoassays (diffusion, immune-double diffusion, radial immunodiffusion, immunoelectrophoresis, rocket immunoelectrophoresis, countercurrent electrophoresis)	W11, U4, U5, K1	laboratory
27.	Antigens, Antibodies: Structure, Function. Monoclonal antibodies. Antibody genes and generation of diversity.	W12, W15	e-learning lecture
28.	Major histocompatibility complex. Antigen processing and presentation. Generation of the humoral immune response.	W11, W12	e-learning lecture
29.	Antigen - antibody interactions, complement system: agglutination- based immunoassays (haemagglutination) Enzyme linked immunosorbent assay (ELISA) Immunoblotting (Western blot)	W11, W13, U4, U5, K1, K2, K3	laboratory
30.	Cell-mediated immunity. Classical cellular response and delayed type hypersensitivity.	W11, W13, W14, W15	e-learning lecture
31.	Cellular immunology and cellular immunology basic assays: NBT (Nitro-blue Tetrazolium Test) MACS (microbeads separation of cells) lymphocyte separation on gradient- Ficoll discontinuous gradient separation isolation of lymphocyte subpopulations - rosetting	W13, W15, U5, K2, K3	laboratory
32.	Cellular immunology and cellular immunology basic assays: dissection of mouse (demonstration) contact sensitivity reactions (in vivo assay in contact sensitivity (CS)) modern laboratory techniques in immunology - immunofluorescence (Fluorescence Activated Cell Sorter) FACS	W11, U4, U5, K1	laboratory
33.	Immune regulation and tolerance.	W11, W12, W13, W14, W15	seminar
34.	Inflammation. Hypersensitive reactions mediated by antibodies.	W11, W12, W13, W14	e-learning lecture
35.	Immune responses to infection. Vaccines.	W11, W14, U5	e-learning lecture

Course advanced

Teaching methods:

classes / practicals, laboratories (labs), preclinical classes, discussion, e-learning, educational film, presentation, seminar, lecture, lecture with multimedia presentation

Activities	Examination methods	Credit conditions
e-learning lecture	multiple choice test	Final test (100 multiple-choice questions with one correct answer) covering topics covered during lectures, seminars and exercises in Immunology (40 test questions) and Microbiology with parasitology (60 questions). Assessment threshold: 60% correct answers (a 60% threshold is required for both Immunology and Microbiology with parasitology).

Activities	Examination methods	Credit conditions
seminar	multiple choice test	Theoretical issues (Immunology) are included in the final test exam (MCQ exam) at the end of the course (semester 4).
laboratory	classroom observation, practical test, multiple choice test	Active participation in classes - student is required to perform a particular task (exercise) in accordance with the instructions indicated by the teacher and to interpret the results of microbiological / parasitological testing. Student is obliged to obtain a credit for all practical classes except those he was not present (maximum 2 in Microbiology with parasitology). Assessment of practical skills acquired by the student is carried out in each case during and at the end of the practical classes. Theoretical issues (Microbiology with parasitology and Immunology) are included in the final test exam (MCQ exam) at the end of the course (semester 4).

Additional info

1. Student receives the total final grade from the module: Microbiology with parasitology and Immunology.
2. The final grade is calculated based on the score obtained on the final examination test.
3. Final examination test - to pass the exam is obliged to get 60% correct answers, which is required to provide at least 60% of correct answers in the field of Immunology and at least 60% correct answers of Microbiology with parasitology. Obtaining less than 60% of correct answers in terms of any of the items in the first or in the second term leads to a lack of passing module.
4. Module passing is a subject to the following conditions:
 - o Attendance of exercises and seminars (a maximum of 3 excused absences are allowed, with a maximum of 1 in Immunology classes and a maximum of 2 in Microbiology with parasitology).
 - o Active participation in lab classes and performance a particular task (exercise) indicated by the teacher.
5. Final exam grading scale for Microbiology with Parasitology and Immunology:
 - <60 points.; failed (2.0)
 - 60 - 67; satisfactory (3.0)
 - 68 - 75; satisfactory plus (3.5)
 - 76 - 83; good (4.0)
 - 84 - 91; good plus (4.5)
 - 92 - 100; very good (5.0)
6. NB! Please note! Owing to COVID-19 pandemic situation, there may be last minute modifications regarding the syllabus.
7. E-learning (ONLINE lectures) will currently replace traditional lectures/seminars.
8. We are hoping to conduct the labs and exam at the university facilities.

Entry requirements

Biochemistry with elements of chemistry, Genetics with molecular biology.

Telemedicine with Elements of Medical Simulation

<p>Period Semester 4</p>	<p>Examination graded credit</p> <p>Activities and hours classes: 30</p>	<p>Number of ECTS points 2.0</p>
-------------------------------------	--	---

Goals

C1	acquiring knowledge regarding the use of new information and communication technology (ICT) technologies used in patient diagnostics and therapy
C2	acquiring skills in using computer programs and systems used in modern medicine
C3	getting acquainted with e-learning tools in teaching medicine

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			

W1	basic IT and biostatistical tools used in medicine, including medical databases, spreadsheets and computer graphics basics	B.W26	multiple choice test
W2	the possibilities of modern telemedicine as a tool to support the work of a doctor	B.W28	multiple choice test
W3	on-line data presentation techniques	B.W36	assignment report, multiple choice test
W4	computer-aided decision support for medical decisions with particular emphasis on clinical pathway techniques	B.W39	project, multiple choice test
W5	basic techniques of representation of medical knowledge for intelligent computer systems in medicine	B.W40	multiple choice test
W6	elements of the hospital patient service system	B.W42	assignment report, multiple choice test
W7	selected online sources of medical information, with particular emphasis on genetic diseases, available on the Internet	B.W43	assignment report, multiple choice test
W8	principles of operation and organisation of teleconferences	B.W44	multiple choice test
W9	types of IT tools supporting the process of remote lifelong learning with particular emphasis on simulators available on-line	B.W45	assignment report, multiple choice test
W10	the types of data used in electronic medical records	B.W47	multiple choice test
W11	principles for the operation and use of electronic patient records	B.W49	multiple choice test
W12	the means of secure Internet communication	B.W38	multiple choice test
W13	concepts related to on-line data transmission	B.W41	multiple choice test
W14	the opportunities and limitations offered by new information technology simulation techniques on examples of selected European research projects	B.W46	multiple choice test
W15	principles for the development of databases for patient care and research	B.W48	assignment report, multiple choice test
Skills - Student can:			
U1	use databases, including online databases, and search for the necessary information using the available tools	B.U10	assignment report
U2	use on-line databases of the human genome	B.U23	assignment report
U3	use the Internet databases of genetic disorders	B.U24	assignment report
U4	use a telemedicine tool for teleconsultation purposes	B.U25	classroom observation
U5	use on-line photo, audio and video libraries	B.U21	classroom observation
U6	use various types of computer simulators and e-learning tools for educational purposes, with particular emphasis on virtual patients	B.U26	classroom observation, assignment report
U7	use computer simulators to support the medical decision-making process	B.U27	classroom observation, assignment report

U8	provide expert knowledge through simple IT techniques of knowledge representation such as a block diagram or a rule database	B.U28	project
U9	use e-learning platforms	B.U30	classroom observation
U10	plan and perform simple scientific research and interpret its results and draw conclusions	B.U13	assignment report
U11	use equipment for the reproduction of three-dimensional video images	B.U22	classroom observation
U12	protect clinical data against unauthorized access	B.U29	classroom observation, assignment report
U13	prepare materials for on-line presentations	B.U31	project
U14	understand the concept of meta-analysis and how to present its results	B.U20	classroom observation
Social competences - Student is ready to:			
K1	use objective sources of information	O.K7	classroom observation, assignment report
K2	formulate conclusions from own measurements or observations	O.K8	project
K3	implement the principles of professional camaraderie and cooperation in a team of specialists, including representatives of other medical professions, also in a multicultural and multinational environment	O.K9	classroom observation
K4	to be guided by the well-being of a patient	O.K2	classroom observation, assignment report

Calculation of ECTS points

Activity form	Activity hours*

Study content

No.	Course content	Subject's learning outcomes	Activities
-----	----------------	-----------------------------	------------

1.	Searching for information in medical databases, data processing. Resources of The National Center for Biotechnology Information.	W12, W13, W15, W5, W7, W9, U1, U14, U2, U3, U7, K1, K4	classes
2.	Clinical Decision Support Systems (CDSS) - improving the quality of decision in medicine. Motivation behind CDSS and basic components. Decision trees, machine learning, probabilistic models.	W15, W4, W5, W9, U1, U14, U7, U8, K1	classes
3.	Medical 2D and 3D image processing. Using representative medical image viewers supporting the DICOM standard. Reconstruction of 3D models, performing 3D segmentation.	W3, W5, U1, U11, U5, U7, K3, K4	classes
4.	The use of e-learning methods in medical education. Benefits of using e-learning in various scenarios in order to improve the quality of education in medicine. Virtual Patient.	W14, W5, W9, U5, U6, U7, U9, K1	classes
5.	Clinical pathway. Implementation of your own project regarding the clinical pathway. Discussion in group forum on the presented approach.	W4, W5, U7, U8, K1	classes
6.	Issues of modern telemedicine. A modern approach to support the doctor's work, using remote access technologies. Simulation of remote consulting sessions using TeleDICOM environment (medical teleconsultation system).	W10, W11, W12, W13, W2, W3, W6, W8, U12, U13, U4	classes
7.	Modeling and simulation in medicine. Performing experiments on computer models. Immersive technologies. The use of augmented and virtual reality in medicine. Presentation of holographic structures in the HoloLens system.	W1, W13, W15, W3, W5, W9, U10, U7, K2	classes
8.	Medical robots and tele-surgery. Rules for creating programs controlling the operation of an educational robot with the possibility of interactive impact.	W2, U7, K2	classes
9.	3D technologies in medicine. Presentation of the principles of creating 3D graphics and the use of 3D printing as a rapidly developing and perspective technology in modern medicine.	W1, W3, U11, U5	classes
10.	Applications for mobile devices in medical education. Performing practical exercises and review of the functionality and usefulness of tested applications.	W2, W5, W9, U5, U7, K1	classes

Course advanced

Teaching methods:

case study, computer classes, classes in simulated conditions, demonstration, discussion, e-learning, educational film, group work, computer room, assignments solving, simulation, low fidelity simulation, virtual patient, PBL Problem Based Learning, practical classes in simulated conditions

Activities	Examination methods	Credit conditions
classes	classroom observation, project, assignment report, multiple choice test	attendance and active participation during classes

Entry requirements

no prerequisites

Primary Care - summer clerkship

-----	----------------	-----------------------------	------------

1.	<p>Family Medicine segment:</p> <ol style="list-style-type: none"> 1. obtain information on the scope of family doctor's responsibilities, organization of training and methods of keeping medical records; 2. learn sanitary education methods and participation in prophylactic activities; 3. obtain theoretical and possibly practical knowledge of emergency procedures, including desmurgy techniques; 4. assist family doctors in seeing patients in the clinic and on house calls, helping in minor medical procedures; 5. become acquainted with the organization of diagnostic services system in outpatient care, in the scope of examinations, tests and test specimens collection; 6. if possible, participate in performing chosen diagnostic procedures (blood pressure taking, sugar level measurement with a glucometer, electrocardiography, spirometry). 	W1, U1, U2, U3, U4, K1, K2, K3	professional practice
----	---	--------------------------------	-----------------------

Course advanced

Teaching methods:

professional practice

Activities	Examination methods	Credit conditions
professional practice	booklet of practice	The preceptor is responsible for fulfillment of clerkship outline and grants credit to student by filling out the JU MC SME Certificate of Summer Clerkship Completion. The student is obliged to keep record of all performed procedures and acquired skills in the List of Approved Procedures booklet.

Additional info

Head of Outpatient Clinic (for Family Doctor segment of the clerkship) and Head of the Emergency Care/Chief of the Emergency Medical Ward (for Emergency Medicine segment), or a preceptor assigned by him/her, determines scope of responsibilities and the clerkship schedule, and oversees the student's work. The preceptor should be a physician with adequate general and professional competence.

If possible, student should perform all medical activities under supervision of the preceptor.

Emergency Medicine - summer clerkship

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	booklet of practice
Skills - Student can:			

U1	identify life-threatening conditions that require immediate medical intervention	O.U2	booklet of practice
U2	communicate and share knowledge with colleagues in a team	O.U8	booklet of practice
U3	plan own learning activities and constantly learn in order to update own knowledge	O.U5	booklet of practice
Social competences - Student is ready to:			
K1	to be guided by the well-being of a patient	O.K2	booklet of practice
K2	respect medical confidentiality and patients' rights	O.K3	booklet of practice

Calculation of ECTS points

Activity form	Activity hours*
professional practice	30
Student workload	Hours 30
Workload involving teacher	Hours 30
Practical workload	Hours 30

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Primary Care segment: 1. become acquainted with the scope of duties of an Emergency Unit; 2. assist in giving first aid to patients and examining patients during house calls; 3. serve as paramedics on general medical aid, resuscitation, accident, pediatric, and gynecological-obstetrical ambulance crews; 4. learn procedures used in life threatening conditions.	W1, U1, U2, U3, K1, K2	professional practice

Course advanced

Teaching methods:

professional practice

Activities	Examination methods	Credit conditions
------------	---------------------	-------------------

Activities	Examination methods	Credit conditions
professional practice	booklet of practice	The preceptor is responsible for fulfillment of clerkship outline and grants credit to student by filling out the JU MC SME Certificate of Summer Clerkship Completion. The student is obliged to keep record of all performed procedures and acquired skills in the List of Approved Procedures booklet.

Additional info

Head of Outpatient Clinic (for Family Doctor segment of the clerkship) and Head of the Emergency Care/Chief of the Emergency Medical Ward (for Emergency Medicine segment), or a preceptor assigned by him/her, determines scope of responsibilities and the clerkship schedule, and oversees the student’s work. The preceptor should be a physician with adequate general and professional competence.

If possible, student should perform all medical activities under supervision of the preceptor.

Surgery

Goals

C1	E.U14. recognizes the states of immediate danger of life; E.U35. evaluates bedsores and apply the appropriate dressings; F.W1. knows and understands the causes, symptoms, principles of diagnosis and therapeutic treatment in relation to the most common diseases requiring surgical intervention, taking into account the individuality of childhood, in particular: a) acute and chronic diseases of the abdominal cavity, b) diseases of the chest, c) diseases of limbs and head d) fractures and injuries of organs; F.W3. knows the rules of qualifications and performance and the most common complications of basic surgeries and invasive diagnostic and therapeutic procedures; F.W14. knows in the basic scope the problem of surgical transplantation, indications for transplantation irreversibly damaged organs and tissues and related procedures; F.U1. assists with typical surgery, prepares operative field and locally anesthetized the operated area; F.U2. uses basic medical sharps; F.U3. apply the principles of aseptic and antiseptic; F.U4. supplies a simple wound, assumed and changes sterile surgical dressing; F.U5. assumes the peripheral venous catheter; F.U6. examines nipples, lymph nodes, thyroid gland and the abdominal cavity in terms of acute abdomen and exercise test with finger through the anus;
----	--

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	the causes, symptoms, diagnostic and therapeutic management principles for the most common diseases requiring surgical intervention, taking into account the distinctness of childhood age, including in particular: 1) acute and chronic abdominal diseases, 2) thoracic diseases, 3) diseases of extremities and head, 4) fractures of bones and injuries to organs	F.W1	test, gap filling test
W2	selected issues in the field of pediatric surgery, including traumatology and otorhinolaryngology, as well as acquired defects and diseases being indications for surgical treatment in children	F.W2	test
W3	rules of qualification for basic surgical procedures and invasive diagnostic and therapeutic procedures, rules of their performance and the most frequent complications	F.W3	test
W4	principles of perioperative safety, patient preparation for surgery, general and local anesthesia and controlled sedation	F.W4	test
W5	postoperative treatment with analgesic therapy and postoperative monitoring	F.W5	test

W6	the causes, symptoms, principles of diagnosis and therapeutic management of the most common diseases requiring surgical intervention, taking into account the distinctness of childhood age and in particular: a) diseases of arterial and venous vessels b) diseases of the urinary tract c) heart and blood vessel diseases d) craniofacial diseases, acute and chronic diseases of the central nervous system	F.W17	test
W7	the rules of qualification, what they consist of, how they take place and what are the possible complications and consequences of surgical procedures: a) removal of appendix, gallbladder b) excision of the thyroid, parathyroid, adrenal glands c) excision of part and entirety of the stomach, large intestine d) abdominal hernias, using synthetic mesh e) surgical treatment of obesity	F.W20	test
W8	the qualifications rules, knows what they are, how they work and what are the possible consequences and complications of the following procedures: a) percutaneous and intraductive abdominal organ ultrasonography f) b) endoscopic gastrointestinal diagnostic and therapeutic procedures c) endoscopic diagnostic and respiratory therapeutic procedures (bronchoscopy, endoscopic ultrasound bronchoscopy) d) endoscopic diagnostic and therapeutic procedures for the urinary tract (cystoscopy) e) endoscopic diagnostic and therapeutic procedures for the locomotor system (arthroscopy) f) screening tests used for the early detection of gastrointestinal neoplasms	F.W21	test
W9	the most common complications of the procedures listed in F.W2	F.W18	test
W10	in the basic scope, the issues of surgical transplantation, indications for transplantation of irreversibly damaged organs and tissues and the procedures related thereto	F.W14	test
Skills - Student can:			
U1	assist in a typical surgical procedure, prepare the surgical field and apply local anesthesia to the operated area	F.U1	booklet of practical skills, classroom observation
U2	use basic surgical instruments	F.U2	booklet of practical skills, classroom observation
U3	adhere to the principles of asepsis and antisepsis	F.U3	booklet of practical skills, classroom observation
U4	manage a simple wound, put on and change a sterile surgical dressing	F.U4	booklet of practical skills, classroom observation
U5	make a peripheral puncture	F.U5	booklet of practical skills, classroom observation
U6	examine breasts, lymph nodes, thyroid gland and abdominal cavity in terms of acute abdomen and perform digital rectal examination	F.U6	booklet of practical skills, classroom observation
U7	manage external bleeding	F.U9	booklet of practical skills, classroom observation
U8	can tie a single and surgical knot	F.U28	booklet of practical skills, classroom observation

U9	can perform and interpret FAST ultrasound (Focused Assessment with Sonography for Trauma)	F.U30	booklet of practical skills, classroom observation
U10	insert a drain into the pleural cavity and connect the set for an active pleural drain	F.U31	booklet of practical skills, classroom observation
U11	insert a catheter into the bladder	F.U32	booklet of practical skills, classroom observation
U12	to take the informed and legally effective consent: a) for high-risk diagnostic procedures (e.g. gastroscopy, colonoscopy), endoscopic retrograde cholangiopancreatography) b) for high-risk diagnostic procedures (transcutaneous biopsy under control) USG) c) surgery to remove the gallbladder	F.U33	booklet of practical skills, classroom observation
U13	to pass on information about the death of a close friend and relative	F.U34	booklet of practical skills, classroom observation
U14	assess the indications for suprapubic puncture and participate in its performance	F.U23	booklet of practical skills, classroom observation
U15	assist in typical urological procedures (diagnostic and therapeutic endoscopy of the urinary tract, lithotripsy, prostate puncture)	F.U24	booklet of practical skills, classroom observation
U16	can examine the breasts, the abdomen and perform a digital rectal examination	F.U29	booklet of practical skills, classroom observation
Social competences - Student is ready to:			
K1	to be guided by the well-being of a patient	O.K2	classroom observation
K2	respect medical confidentiality and patients' rights	O.K3	classroom observation
K3	take actions towards the patient on the basis of ethical norms and principles, with an awareness of the social determinants and limitations of the disease	O.K4	classroom observation
K4	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	classroom observation

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Examination and diagnosis of the patient with acute abdomen	W1, U12, U16, U6, U9, K2	seminar, clinical classes, e-learning lecture
2.	Body composition	W6	seminar
3.	Shock	W1, W6, U5, U7, U9	seminar, clinical classes, e-learning lecture
4.	Acute abdomen	W1, W3, W4, W7, U1, U2, U8	seminar, clinical classes, e-learning lecture
5.	Hernias	W1, W3	seminar, clinical classes
6.	Thyroid and parathyroid glands.	W3, W7	seminar, clinical classes
7.	Congenital malformations of the gastrointestinal tract	W2	seminar, clinical classes, e-learning lecture
8.	Burns in children	W2, U3, U4	seminar, clinical classes
9.	Pediatric thoracic surgery	W1, W2, U10	seminar, clinical classes
10.	Head injuries in children. Congenital malformations of the nervous system.	W2, K1, K4	seminar, clinical classes, e-learning lecture
11.	Congenital malformations of the urinary tract.	W2, U11	seminar, clinical classes, e-learning lecture
12.	Congenital heart defects.	W1, W10, W6, U7	seminar, clinical classes, e-learning lecture
13.	Thoracic cavity diseases.	W1	seminar, clinical classes, e-learning lecture
14.	Diseases of the bile ducts.	W3, W7, W9, U1, U2, U4	seminar, clinical classes

15.	Colon cancer.	W1, W7, W9, U13	seminar, clinical classes
16.	Bariatric and metabolic surgery	W4, W7, K3, K4	seminar, clinical classes, e-learning lecture
17.	Perioperative care (ERAS).	W3, W4, W5	seminar, clinical classes
18.	Pancreas.	W1	seminar, clinical classes, e-learning lecture
19.	Rules for qualifying for cardiac surgery and postoperative management.	W6	seminar, clinical classes
20.	Surgery in acute cardiological conditions ("acute heart").	W6	seminar, clinical classes
21.	Principles of anticoagulation (cardiovascular system).	W6	seminar, clinical classes
22.	Anatomy. Abdominal and pelvic walls - abdominal wall structure - groin anatomical structures - laparoscopic images of inguinal region anatomy on a corpse - pelvic wall construction	W1	seminar, clinical classes
23.	Anatomy. Stomach pain - innervation of the abdominal walls and abdominal organs - innervation of the pelvic walls and pelvic organs - visceral pain - somatic painsc	W1	seminar, clinical classes
24.	Abdominal hernia anatomy.	W1	seminar, clinical classes
25.	Anatomy. Peritoneum - peritoneal cavities - mesenteries and their contents	W1	seminar, clinical classes
26.	Anatomy. Glandular floor - topographic anatomy of the esophagus - construction of the esophagus wall - stomach topographic anatomy - vascularization and innervation of the stomach - duodenum - pancreas - liver - spleen	W1	seminar, clinical classes
27.	Anatomy: Pelvic organs - rectum	W1	seminar, clinical classes
28.	Hepatobiliary surgery.	W1, W7	seminar, clinical classes
29.	Gastric surgery	W1, W3, W7	seminar, clinical classes
30.	Endoscopy	W8, U12, U9	seminar, clinical classes
31.	Brest surgery	W1, U6	seminar, clinical classes
32.	Pancreatic cancer	W1, W3	e-learning lecture
33.	Gastric cancer	W1, W7	e-learning lecture
34.	Colorectal cancer	W1, W7	e-learning lecture

35.	Introduction to urology seminars. The role of a family doctor in diagnosing urological diseases. Symptomatology of urological diseases. Imaging diagnostics in urology (USG; CT; MR; scintigraphy; urodynamics). Urological instruments. Basic urological procedures. Specific and unspecific inflammations of the genitourinary organs.	W1, U11, U14, U15	seminar, clinical classes
36.	Neoplasms of urinary organs in both sexes and male reproductive system: kidneys, ureter, bladder, urethra, prostate, testicles, penis.	W1, U11, U14, U15	seminar, clinical classes
37.	Urological emergencies. Urogenital injuries - conservative and surgical treatment.	W1, U11, U14, U15	seminar, clinical classes
38.	Male genital diseases. Diseases of the prostate gland. Andropause. Erectile dysfunction.	W1, U11, U14, U15	seminar, clinical classes
39.	Urolithiasis including modern treatment methods: ESWL, PCNL, URS. Urinary incontinence in men and women. Basic knowledge of gynecological urology.	W1, U11, U14, U15	seminar, clinical classes
40.	Selected problems of maxillofacial surgery.	W6	seminar, clinical classes
41.	Intracranial hypertension. Clinical symptomatology, recognition. Treatment. Craniocerebral injuries. Fractures of the skull bones (vaults and bases). Intracranial hematomas. Diffuse axonal injury.	W6	seminar, clinical classes
42.	Tumors of the brain and spinal canal.	W6	seminar, clinical classes
43.	Central nervous system malformations.	W6	seminar, clinical classes
44.	Spinal pain syndromes.	W6	seminar, clinical classes
45.	Laboratory teaching of surgical skills.	U13, U2, U3, U4, U5, U8	classes, simulations

Course advanced

Semester 5, Semester 6

Teaching methods:

clinical classes, OSCE examination, e-learning, problem solving method, seminar, simulation, workshop

Activities	Examination methods	Credit conditions
seminar	classroom observation, test	Student activity, presence
classes	booklet of practical skills	Student activity, presence
e-learning lecture	test	Written or oral exam, presence

Semester 7, Semester 8

Teaching methods:

case study, clinical classes, e-learning, problem solving method, seminar, simulation, workshop, lecture, PBL Problem Based Learning, practical classes

Activities	Examination methods	Credit conditions
------------	---------------------	-------------------

Activities	Examination methods	Credit conditions
e-learning lecture	gap filling test	Student Activity, presence
seminar	classroom observation	Student activity, presence
classes	classroom observation	Student activity, presence
simulations	classroom observation	Oral exam, presence

Semester 9, Semester 10

Teaching methods:

case study, clinical classes, e-learning, seminar, workshop, lecture, practical classes

Activities	Examination methods	Credit conditions
e-learning lecture	gap filling test	Oral exam, presence
seminar	classroom observation	Student activity, presence
classes	booklet of practical skills	Student activity, presence

Semester 11, Semester 12

Teaching methods:

clinical classes, e-learning, seminar, simulation, lecture

Activities	Examination methods	Credit conditions
clinical classes	classroom observation	Student activity, presence, Written exam

Additional info

To complete the course, the student must be present at all classes. In the case of the student's absence during classes, it is necessary to make up for the absence during the medical duty.

Single-choice test will be required at the end of the course. In order to pass, it will be required to obtain 60% correct answers.

Entry requirements

Passed Anatomy and Laboratory Training of Clinical Skills

Class attendance is obligatory

Internal Medicine

Goals

C1	The primary goal of the Internal Medicine Course is the development of an understanding of the clinical presentation, basic physiology, physical findings, evaluation and management of adult patient diseases. The emphasis of the course is directed toward the integration of basic science with clinical skills.
C2	Practical preparation for practicing the medical doctor profession
C3	Developing communications skills with patients and cooperation ability with members of the interdisciplinary team.

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	development, structure and functions of the human body in normal and pathological conditions	O.W1	oral examination, classroom observation, oral answer, test
W2	symptoms and course of diseases	O.W2	oral examination, classroom observation, oral answer, self-assessment, test
W3	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	oral examination, classroom observation, test
W4	ethical, social and legal conditions for practicing the medical profession and the principles of health promotion, based on scientific evidence and accepted standards	O.W4	oral examination, classroom observation, test
W5	methods of conducting scientific research	O.W5	oral examination, classroom observation, test
W6	principles for the development of databases for patient care and research	B.W48	oral examination, classroom observation, test
W7	principles for the operation and use of electronic patient records	B.W49	classroom observation
W8	principles of proper nutrition of a healthy and sick person and methods of assessing the state of nutrition	B.W50	oral examination, classroom observation, test
W9	elements of the hospital patient service system	B.W42	classroom observation
W10	selected online sources of medical information, with particular emphasis on genetic diseases, available on the Internet	B.W43	classroom observation

W11	the types of observational and interventional studies and the rules governing their conduct	B.W35	oral examination, classroom observation, test
W12	the principles for assessing the power and credibility of the recommendations in the guidelines for action	B.W34	oral examination, classroom observation, test
W13	basic principles of disinfection, sterilization and aseptic management	C.W20	oral examination, classroom observation, test
W14	basic of development and mechanisms of immune system action, including specific and non-specific mechanisms of humoral and cellular immunity	C.W21	oral examination, classroom observation, test
W15	types of hypersensitivity reactions, types of immunodeficiency and basics of immunomodulation	C.W23	oral examination, classroom observation, test
W16	definition and pathophysiology of shock, with particular emphasis on differentiation of the causes of shock and multi-organ failure	C.W29	oral examination, classroom observation, test
W17	aetiology of haemodynamic disorders, regressive and progressive changes	C.W30	oral examination, classroom observation, test
W18	individual groups of therapeutic agents	C.W35	oral examination, classroom observation, test
W19	the main mechanisms of drug action, and their changes in the system depending on age	C.W36	oral examination, classroom observation, test
W20	the influence of disease processes on the metabolism and elimination of medicines	C.W37	oral examination, classroom observation, test
W21	basic rules of pharmacotherapy	C.W38	oral examination, classroom observation, oral answer, test
W22	more important side effects of medicines, including those resulting from their interaction	C.W39	oral examination, classroom observation, test
W23	the problem of drug resistance, including multi-drug drug resistance	C.W40	oral examination, classroom observation, test
W24	basic concepts of general toxicology	C.W43	oral examination, classroom observation, test
W25	environmental and epidemiological determinants of the most frequent diseases	E.W1	oral examination, classroom observation, test

W26	<p>the causes, symptoms, principles of diagnosis and therapeutic management of the most common internal diseases and their complications in adults: 1) cardiovascular diseases, including ischemic heart disease, heart defects, endocarditis, myocardial infarction, pericardial infarction, heart failure (acute and chronic), diseases of arteries and venous vessels, arterial hypertension - primary and secondary, pulmonary hypertension, 2) respiratory system diseases, including respiratory tract diseases, chronic obstructive pulmonary disease, bronchial asthma, bronchial dilatation, cystic fibrosis, respiratory infections, interstitial diseases of the lungs, pleura, mediastinum, obstructive and central sleep apnea, respiratory failure (acute and chronic), respiratory tumors, 3) diseases of the digestive system, including diseases of the mouth, esophagus, stomach and duodenum, intestines, pancreas, liver, bile ducts and gallbladder, 4) diseases of the internal secretion system, including diseases of the hypothalamus and pituitary gland, thyroidism, parathyroidism, adrenal cortex and medulla, ovaries and testicles, and neuroendocrine tumors, polyglandular syndromes, various types of diabetes and metabolic syndrome – hypoglycaemia, obesity, dyslipidemia, 5) diseases of the kidneys and the urinary tract, including acute and chronic renal failure, glomerulonephrine and interstitial kidney diseases, kidney cysts, kidney stones, urinary tract infections, urinary tract neoplasms, in particular of bladder and kidney neoplasms, 6) hematopoietic diseases, including bone marrow aplasia, anemia, granulocytopenia and agranulocytosis, thrombocytopenia, acute leukemia, myeloproliferative and myelodysplastic-myeloproliferative tumours, myelodysplastic syndromes, mature B and T lymphocytes tumors, bleeding diatheses, thrombophilia, life-threatening conditions in hematology, blood disorders in other organ diseases, 7) rheumatic diseases, including systemic connective tissue diseases, systemic vasculitis, joint inflammations involving spinal cord, metabolic bone diseases, osteoporosis and osteoarthritis in particular, gout, 8) allergic diseases, including anaphylaxis and anaphylactic shock and angioedema, 9) water-electrolyte and acid-base disorders: dehydration conditions, overhydration conditions, electrolyte, acidic and alkaline disorders</p>	E.W7	oral examination, classroom observation, test, credit
W27	<p>the indications and rules for performing liver biopsy and assists in performing procedure</p>	E.W55	oral examination, classroom observation, test
W28	<p>processes: cell cycle, cell proliferation, differentiation and aging, apoptosis and necrosis and their importance for the functioning of the body</p>	B.W18	oral examination, classroom observation, test
W29	<p>activity and mechanisms of regulation of all organs and systems of the human body, including the cardiovascular system, respiratory system, digestive system, urinary tract and skin layers, and the interrelations existing between them</p>	B.W21	oral examination, classroom observation, test
W30	<p>basic quantitative parameters describing the capacity of particular systems and organs, including the range of norms and demographic factors influencing the value of these parameters</p>	B.W24	oral examination, classroom observation, test

W31	the relationship between factors disturbing the balance of biological processes and physiological and pathophysiological changes	B.W25	oral examination, classroom observation, test
W32	the mechanism of hormone actions	C.W51	oral examination, classroom observation, test
W33	the consequences of inadequate nutrition, including prolonged hunger, excessive food intake and unbalanced diet, and disorders of digestion and absorption of digestive products	C.W50	oral examination, classroom observation, test
W34	the consequences of human body exposure to various chemical and biological agents and the principles of prevention	C.W15	oral examination, classroom observation, test
W35	groups of medicines, the abuse of which can lead to poisoning	C.W44	oral examination, classroom observation, test
W36	symptoms of the most common acute poisoning, including alcohol, drugs and other psychoactive substances, heavy metals and selected groups of drugs	C.W45	oral examination, classroom observation, test
W37	basic principles of diagnostic procedures in poisoning	C.W46	oral examination, classroom observation, test
W38	computer-aided decision support for medical decisions with particular emphasis on clinical pathway techniques	B.W39	classroom observation
W39	morphological changes in the most important non-cancer diseases affecting the entire organism (e.g. atherosclerosis, hypertension, diabetes, cardiopulmonary insufficiency, systemic infectious and immunological diseases, the most frequent hormonal disorders, the most frequent genetic diseases), and is able to link them with already acquired knowledge of anatomy, biochemistry and pathological physiology in order to deduce clinical symptoms	C.W52	oral examination, classroom observation, test
W40	basic neurological symptom syndromes	E.W13	oral examination
W41	pathomechanisms of regulation disorders of all organs and systems of the human body, including: circulatory, respiratory, urinary and digestive systems, nervous system (central, peripheral and autonomous)	B.W33	oral examination, classroom observation
W42	the concept of impairment and disability	E.W30	oral examination, classroom observation
W43	specific diseases related to physical activity and competitive sports, also in the sports of the disabled and in girls and women	E.W46	classroom observation
W44	principles of nutrition of physically active persons and athletes. Describes the difference between doping and support	E.W47	classroom observation
W45	the role of medical rehabilitation and methods used in it	E.W31	oral examination, classroom observation, test

W46	basics of microbiological and parasitological diagnostics basics of disinfection, sterilization and aseptic management	C.W19	classroom observation
Skills - Student can:			
U1	identify medical problems and prioritize medical management	O.U1	oral examination, classroom observation, self-assessment, test
U2	identify life-threatening conditions that require immediate medical intervention	O.U2	oral examination, classroom observation, test
U3	plan the diagnostic procedure and interpret its results	O.U3	oral examination, classroom observation, test
U4	implement appropriate and safe therapeutic treatment and predict its effects	O.U4	oral examination, classroom observation, test
U5	plan own learning activities and constantly learn in order to update own knowledge	O.U5	classroom observation
U6	inspire the learning process of others	O.U6	classroom observation
U7	communicate with the patient and his family in an atmosphere of trust, taking into account the needs of the patient	O.U7	classroom observation
U8	communicate and share knowledge with colleagues in a team	O.U8	classroom observation
U9	critically evaluate the results of scientific research and adequately justify the position	O.U9	classroom observation
U10	use databases, including online databases, and search for the necessary information using the available tools	B.U10	classroom observation
U11	assess the reliability of the clinical trial	B.U18	oral examination, classroom observation, test
U12	understand the concepts describing the strength of the intervention in the study	B.U19	oral examination, classroom observation, test
U13	use computer simulators to support the medical decision-making process	B.U27	classroom observation
U14	protect clinical data against unauthorized access	B.U29	classroom observation
U15	assess toxicological hazards in specific age groups and in conditions of hepatic and renal failure, and prevent drug poisoning	C.U18	oral examination, classroom observation, test
U16	interpret the results of microbiological tests	C.U10	oral examination, classroom observation, test
U17	carry out a medical history with an adult patient	E.U1	oral examination, classroom observation, test, credit
U18	conduct a full and targeted physical examination of an adult patient	E.U3	oral examination, classroom observation, test, credit

U19	assess the general condition, state of consciousness and awareness of the patient	E.U7	oral examination, classroom observation, test
U20	perform differential diagnosis of the most common diseases of adults and children	E.U12	oral examination, classroom observation, test
U21	evaluate and describe the somatic and mental state of the patient	E.U13	oral examination, classroom observation, test
U22	recognize immediate life-threatening conditions	E.U14	oral examination, classroom observation, test
U23	recognize the condition after drinking alcohol, after using drugs and other substances	E.U15	oral examination, classroom observation, test
U24	plan diagnostic, therapeutic and prophylactic procedures	E.U16	oral examination, classroom observation, test
U25	analyze the potential adverse reactions of individual medicines and the interactions between them	E.U17	oral examination, classroom observation, test
U26	propose individualization of existing therapeutic guidelines and other methods of treatment in the face of ineffectiveness or contraindications to standard therapy	E.U18	oral examination, classroom observation, test
U27	recognize the symptoms of drug dependence and propose treatment	E.U19	oral examination, classroom observation, test
U28	qualify the patient for home and hospital treatment	E.U20	oral examination, classroom observation, test
U29	recognize states in which the duration of life, functional state or patient preferences limit the conduct in accordance with the guidelines specified for a given disease	E.U21	oral examination, classroom observation, test
U30	make a functional assessment of a patient with a disability	E.U22	oral examination, classroom observation, test
U31	interpret the results of laboratory tests and identify the causes of abnormalities	E.U24	oral examination, classroom observation, test
U32	apply nutritional treatment, including enteral and parenteral nutrition	E.U25	oral examination, classroom observation, test
U33	plan the management of exposure to blood-borne infections	E.U26	oral examination, classroom observation, test
U34	qualify the patient for vaccination	E.U27	oral examination, classroom observation, test
U35	collect and retain test material for use in laboratory diagnostics	E.U28	classroom observation

U36	perform basic procedures and medical procedures including: 1) body temperature measurement, heart rate measurement, non-invasive blood pressure measurement, 2) monitoring of vital signs by means of a patient monitor, pulse oximetry, 3) spirometric examination, oxygen therapy, assisted ventilation and replacement ventilation, 4) introduction of the oropharyngeal tube, 5) intravenous, intramuscular and subcutaneous injections, cannulation of peripheral veins, collection of peripheral venous blood, collection of blood for culture, collection of arterialized capillary blood, collection of arterialized capillary blood, 6) taking nasal, throat and skin swabs, puncturing of the pleural cavity, 7) bladder catheterization in women and men, gastric tube, gastric lavage, gastric lavage, enema, 8) standard resting electrocardiogram with interpretation, electrical cardioversion and cardiac defibrillation, 9) simple strip tests and blood glucose measurements	E.U29	classroom observation
U37	assist in the performance of the following procedures and medical procedures: 1) transfusion of blood and blood-derived products, 2) drainage of the pleural cavity, 3) puncture of the pericardial sac, 4) puncture of the peritoneal cavity, 5) lumbar puncture, 6) fine-needle biopsy, 7) epidermal tests, 8) intradermal and scarification tests and interpret their results	E.U30	classroom observation
U38	plan specialist consultations	E.U32	oral examination, classroom observation, self-assessment, test
U39	implement basic treatment for acute poisoning	E.U33	oral examination, classroom observation, test
U40	assess pressure ulcers and use appropriate dressings	E.U35	classroom observation
U41	proceed in case of injuries (dress or immobilize, dress and suture the wound)	E.U36	classroom observation
U42	maintain patient's medical records	E.U38	classroom observation
U43	assist in the performance of the following procedures and medical procedures: (i) bone marrow aspiration biopsy	E.U39	classroom observation
U44	offer appropriate nutritional management to people in developmental age and adults with intensive exercise Interprets measures prohibited in sport. Identifies types and support measures	E.U43	oral examination, classroom observation, test
U45	conduct an approximate hearing and field of vision examination, and an otoscopic examination	E.U6	classroom observation
U46	propose a rehabilitation program for the most common diseases	E.U23	oral examination, classroom observation, test
U47	perform and interpret anthropometric measurements of nutritional status, is able to gather nutritional history and make a quantitative and qualitative assessment of intake (taking into account dietary supplements) using a nutritional computer program	B.U17	oral examination, classroom observation, test
U48	perform a pathophysiological analysis of selected clinical cases according to the PBCA (Problem Based Case Analysis) rule	B.U16	oral examination, classroom observation, test

U49	interpret the results of toxicological tests	C.U19	oral examination, classroom observation, test
U50	monitor the condition of a patient poisoned with chemicals or drugs E.U35. assess bedsores and apply appropriate dressings	E.U34	oral examination, classroom observation, test
U51	recognize the agony of the patient and determine his death	E.U37	classroom observation
U52	recognise the state of overtraining and overloading of internal organs and motor organs associated with practicing sport. Is able to prevent and manage dehydration and physical exercise disorders in various conditional environments	E.U42	classroom observation
U53	describe the changes in function of the organism in homeostasis disorder, determine its integrated reaction to physical effort, high and low temperature, blood or water loss, sudden verticalization, transition from sleep to wakefulness	C.U20	classroom observation
Social competences - Student is ready to:			
K1	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	classroom observation
K2	to be guided by the well-being of a patient	O.K2	classroom observation
K3	respect medical confidentiality and patients' rights	O.K3	classroom observation
K4	take actions towards the patient on the basis of ethical norms and principles, with an awareness of the social determinants and limitations of the disease	O.K4	classroom observation
K5	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	classroom observation
K6	promote health-promoting behaviors	O.K6	classroom observation, self-assessment
K7	use objective sources of information	O.K7	classroom observation
K8	formulate conclusions from own measurements or observations	O.K8	classroom observation
K9	implement the principles of professional camaraderie and cooperation in a team of specialists, including representatives of other medical professions, also in a multicultural and multinational environment	O.K9	classroom observation
K10	formulate opinions on the various aspects of the professional activity	O.K10	classroom observation
K11	assume responsibility for decisions taken in the course of their professional activities, including in terms of the safety of oneself and others	O.K11	classroom observation

Calculation of ECTS points

Semester 5, Semester 6

Activity form	Activity hours*
---------------	-----------------

classes	78
seminar	52
case analysis	30
professional practice	30
preparation for classes	20
Student workload	Hours 210
Workload involving teacher	Hours 130

-----	----------------	-----------------------------	------------

1.	<p>Introduction to Internal Medicine</p> <p>Semester 5</p> <p>Introduction to Internal Medicine Course covers topics concerning the medical history taking, physical examination, and interpretation of ECG, laboratory and radiological tests. The course puts special emphasis on practical exercises. The Course consists of 20 hours of seminars and 40 hours of bed-side teaching, which include: history taking, patient's examination, diagnostic test planing, and discussion of differential diagnosis.</p> <p>Bed-side teaching:</p> <p>H (8h)</p> <ol style="list-style-type: none"> 1 General patient condition, history taking scheme 2 Peripheral vascular system, techniques of examinations (arteries, varicose veins, jugular vein distension), peripheral oedema differentiation) 3 Examination of: Lymph nodes, breast and axilla, spleen examination 4 Musculoskeletal /neurological examination <p>E (8 h)</p> <ol style="list-style-type: none"> 1 Hyper/hypothyroidism, secondary hypertension, diabetes ; 2 Vital signs, skin (stretch marks, hirsutism, ect.); 3 Polyuria, polydipsia, anuria, dysuria, haematuria, renal failure, nephritic syndrome; 4 Head and neck examination (cranial nerves) ; <p>K (8h)</p> <ol style="list-style-type: none"> 1 Chest pain, hypertension (primary); 2 Heart examination (HR, pulse rate, heart sounds, heart murmurs); 3 Cyanosis/ dyspnoea, heart failure; palpitation, syncope; 4 ECG introduction; <p>G (8h)</p> <ol style="list-style-type: none"> 1 Upper GI bleeding; GERD; peptic ulcer; 2 Abdomen examination (general approach), hernias, peritoneal inflammation; 3 Lower GI bleeding; constipation, diarrhoea; 4 Liver, hepatitis, jaundice, pancreas; liver examination; <p>P (8h)</p> <ol style="list-style-type: none"> 1 Asthma, COPD; 2 Sputum, Diagnosis of haemoptysis, Cough, Pneumonia, Pulmonary embolism; 3 Respiratory examinations: thorax, spirometry introduction; 4 Thorax examination, breast assessment; 	<p>W1, W2, W25, W26, W29, W3, W38, W4, W40, W41, W5, W8, W9, U1, U10, U11, U17, U18, U19, U2, U20, U21, U22, U23, U24, U25, U29, U3, U31, U32, U33, U36, U37, U38, U4, U42, U45, U47, U48, U5, U52, U6, U7, U8, U9, K1, K10, K11, K2, K3, K4, K5, K6, K7, K8, K9</p>	<p>classes, seminar, clinical classes</p>
----	---	--	---

2.	<p>Cardiology and Angiology:</p> <p>Semester 6 (Seminar 8 h)</p> <p>ECG: a systematic approach</p> <p>Introduction to heart failure</p> <p>ECHO in cardiology</p> <p>Acute coronary syndromes. Assess coronary risk following myocardial infarction</p> <p>Semester 7/8 (Seminar 12 h)</p> <p>Bradycardia</p> <p>Pacing therapy</p> <p>Narrow / wide QRS tachycardia</p> <p>Ablations</p> <p>Stable angina (recently diagnosed)</p> <p>Pulmonary hypertension</p> <p>Diagnosis and treatment of chronic heart failure</p> <p>Diagnose and manage endocarditis</p> <p>Congenital heart disease in adults.</p> <p>Valve disease in adult</p> <p>Semester 9/10 (Seminar 8 h)</p> <p>Introduction to invasive cardiology. The role for thrombolysis and catheterization /angioplasty in ACS and elective procedures.</p> <p>Differential diagnosis of chest pain and dyspnea - focus on stable angina. Diagnostic workup and treatment of NSTEMI, UA, pulmonary embolism, aortic aneurysm.</p> <p>Angiology:</p> <p>Acute aortic syndromes</p> <p>Peripheral arterial diseases: diagnosis and treatment.</p> <p>Venous thromboembolism: prevention, diagnosis and treatment.</p>	<p>W1, W10, W11, W12, W13, W14, W15, W16, W17, W18, W19, W2, W20, W21, W22, W23, W24, W25, W26, W28, W29, W3, W30, W31, W32, W33, W34, W35, W36, W37, W4, W46, W5, W8, U1, U10, U11, U12, U13, U14, U15, U16, U17, U18, U19, U2, U20, U21, U22, U23, U24, U25, U26, U27, U28, U29, U3, U30, U31, U32, U33, U34, U36, U38, U39, U4, U46, U5, U50, U53, U6, U7, U8, U9, K1, K11, K2, K3, K4, K5, K6, K7, K8, K9</p>	<p>classes, seminar, clinical classes</p>
----	--	---	---

3.	<p>Pulmonology</p> <p>Semester 7/8 (Seminar 6 h)</p> <p>Pulmonary function tests</p> <p>Endoscopy of respiratory tract</p> <p>Chronic obstructive pulmonary disease</p> <p>Interstitial lung diseases.</p> <p>Lung neoplasms</p> <p>Pleural disorders</p> <p>Pulmonary embolism</p> <p>Infections of respiratory system. Tuberculosis.</p>	<p>W1, W2, W26, W3, W4, U1, U17, U18, U19, U2, U20, U21, U22, U24, U28, U29, U3, U31, U36, U37, U4, U42, U7, K1, K10, K11, K2, K3, K4, K5, K6, K7, K8, K9</p>	<p>classes, seminar, clinical classes</p>
4.	<p>Gastroenterology</p> <p>Semester 6 (Seminar 10 h)</p> <p>Dysphagia and Odynophagia</p> <p>Nausea and Vomiting</p> <p>Diarrhea</p> <p>Reflux esophagitis, Peptic ulcer disease</p> <p>Gastrointestinal Causes of Anemia and Occult Bleeding</p> <p>Inflammatory bowel disease</p> <p>Functional disorders of GI tract</p> <p>Chronic liver diseases;</p> <p>Jaundice; Cholelithiasis, Choledocholithiasis, and Cholecystitis</p> <p>Pancreatitis</p>	<p>W2, W26, W3, W9, U1, U17, U18, U19, U20, U21, U22, U24, U25, U26, U27, U28, U29, U3, U30, U31, U32, U35, U36, U38, U4, U42, U5, U6, U7, U8, U9, K1, K10, K11, K2, K3, K4, K5, K6, K7, K8, K9</p>	<p>classes, seminar, clinical classes</p>

5.	<p>Endocrinology and Metabolic Diseases</p> <p>ENDOCRINOLOGY Semester 9/10 (Seminar 8 h)</p> <p>Anterior pituitary: signs and symptoms of Cushing disease, acromegaly and prolactinoma.</p> <p>Disorders of the thyroid gland:</p> <p>Hypothyroidism</p> <p>Hyperthyroidism and thyrotoxicosis</p> <p>Thyroiditis</p> <p>Thyroid nodules and thyroid cancer;</p> <p>Disorders of the parathyroid function</p> <p>Metabolic bone disease: Osteoporosis treatment and prophylaxis</p> <p>The adrenal cortex:</p> <p>Primary adrenocortical insufficiency (Addison's disease)</p> <p>Disorders of adrenal medullary function - pheochromocytoma</p> <p>METABOLIC DISEASES</p> <p>Semester 6 (Seminar 6 h)</p> <p>Classification and clinical features of diabetes. Chronic complications of diabetes</p> <p>Acute complications of diabetes. Diabetic ketoacidosis.</p> <p>Insulinotherapy</p> <p>Familial hypercholesterolemia: diagnosis and treatment</p>	<p>W1, W10, W2, W25, W26, W3, W31, W32, W33, W4, W5, U1, U10, U11, U17, U18, U19, U2, U20, U21, U22, U23, U24, U25, U26, U27, U28, U29, U3, U31, U32, U36, U38, U4, U42, U44, U45, U47, U5, U6, U7, U8, U9, K1, K10, K11, K2, K3, K4, K5, K6, K7, K8, K9</p>	<p>classes, seminar, clinical classes</p>
----	--	--	---

6.	<p>Nephrology</p> <p>Semester 7/8 (Seminar 6 h)</p> <p>Glomerular disease</p> <p>Interstitial disease</p> <p>Reduced renal function</p> <p>Acute kidney injury (and critical care nephrology)</p> <p>The patient on dialysis</p> <p>The patient with urinary tract infection</p> <p>Drugs and renal disease</p>	<p>W1, W12, W13, W17, W18, W19, W2, W20, W21, W22, W25, W26, W29, W3, W30, W31, W32, W33, W34, W35, W36, W37, W4, W5, W8, U1, U10, U11, U12, U13, U14, U15, U16, U17, U18, U19, U2, U20, U21, U22, U23, U24, U25, U26, U27, U28, U29, U3, U30, U31, U32, U33, U34, U35, U36, U38, U39, U4, U46, U47, U48, U5, U6, U7, U8, U9, K1, K11, K2, K3, K4, K5, K6, K7, K8, K9</p>	<p>classes, seminar, clinical classes</p>
7.	<p>Hematology</p> <p>Semester 6 (Seminar 8 h)</p> <p>Symptoms, differential diagnosis and treatment of anemia</p> <p>Acute myeloproliferative and acute lymphoproliferative diseases - diagnosis, treatment and bone marrow transplantation</p> <p>Acute leukemia - diagnosis and treatment.</p> <p>Chronic myeloproliferative and chronic lymphoproliferative diseases - diagnosis and treatment.</p> <p>Chronic myeloid and lymphoid malignancies symptoms and treatment</p> <p>Anemia - symptoms and signs.</p>	<p>W1, W14, W2, W28, W29, W3, W30, W31, U1, U17, U18, U2, U21, U24, U3, U31, U4, U43, K1, K2, K3, K4, K6, K8</p>	<p>classes, seminar</p>
8.	<p>Rheumatology</p> <p>Semester 9/10 (Seminar 6h)</p> <p>Degenerative arthropathies</p> <p>Inflammatory arthropathies (Rheumat Spondyloarthropathiesoid arthritis; Spondyloarthropathies)</p> <p>Systemic conditions and connective tissue diseases</p>	<p>W1, W2, W26, W3, W4, W42, W43, W44, W45, U1, U17, U18, U24, U25, U26, U29, U3, U30, U38, U4, U42, U46, U5, U6, U7, U8, K1, K10, K11, K2, K3, K4, K5, K6, K7, K8, K9</p>	<p>classes, seminar, e-learning lecture</p>

9.	<p>Allergology</p> <p>Semester7/8 (Seminar 6 h)</p> <p>Anaphylaxis - causes, symptoms and treatment</p> <p>Allergic rhinitis</p> <p>Atopic dermatitis</p> <p>Asthma and anaphylaxis.</p> <p>SLE and systemic vasculitis</p> <p>Autoimmune diseases - pathology, symptoms and sign.</p> <p>Hypersensitivity, allergy and atopy.</p> <p>Bronchial asthma - etiology, classification and treatment</p> <p>Aspirin-induced asthma</p> <p>Laboratory diagnosis in allergy and immunology</p> <p>Environmental allergens/ haptens - low and high molecular weight antigens</p> <p>Allergy and hypersensitivity in polluted areas</p> <p>Pathomechanism of allergy in polluted environment</p> <p>Immune recognition of drugs (The hapten and prohaptent concept. The p-i concept)</p> <p>Classification of drug hypersensitivity reactions (Antibody-mediated and T cell-mediated drug hypersensitivity)</p> <p>Systemic drug reactions: severe drug hypersensitivity syndromes</p> <p>Diagnosis of drug hypersensitivity (Clinical diagnosis. Identifying the culprit drug)</p> <p>Therapeutic aspects (Desensitization)</p> <p>In vitro allergy testing in the laboratory</p> <p>Monitoring of concentration of environmental airborne allergens and irritants at the workplace.</p> <p>Bakers' asthma; anaphylactic reactions to latex, skin disorders caused by environmental factors.</p>	<p>W1, W11, W12, W14, W15, W16, W17, W18, W19, W2, W20, W21, W22, W25, W26, W29, W3, W30, W31, W34, W39, W4, W5, U1, U2, U20, U24, U26, U3, U31, K1, K2, K3, K4, K7, K8</p>	<p>classes, seminar</p>
----	--	---	-------------------------

10.	<p>Toxicology</p> <p>Semester 9/10 (Seminar 10h)</p> <p>The role and importance of toxicological information centers</p> <p>Selected pharmacokinetic problems in clinical toxicology</p> <p>Basic principles of therapeutic management in acute poisoning</p> <p>Specific clinical symptoms and organ damage.</p> <p>Selected organ damage: toxic and drug-induced liver damage, rhabdomyolysis.</p> <p>Diagnosis and handling of selected poisons: addictive substances, alcohols, toxic gases, heavy metals, plant protection products, corrosive substances</p>	<p>W18, W19, W2, W20, W21, W24, W25, W3, W34, W35, W36, W37, U1, U15, U19, U2, U21, U22, U23, U24, U3, U31, U39, U4, U49, U50, K3, K4, K6, K8</p>	<p>classes, seminar</p>
11.	<p>Practical occupational learning</p> <p>Semester 11/12 240 hours</p> <p>During course students are assigned to the one hospital department. Student's duties are: active participation in daily doctors' activities, like admission patients to the hospital, patients examination, planning tests and procedures, making differentiative diagnosis, prescribing treatment, discharging from the hospital and planning follow up visits.</p>	<p>W1, W10, W11, W12, W13, W14, W15, W17, W18, W19, W2, W20, W21, W22, W23, W24, W25, W26, W27, W3, W4, W5, W6, W7, W8, W9, U1, U10, U11, U12, U13, U14, U15, U16, U17, U18, U19, U2, U20, U21, U22, U23, U24, U25, U26, U27, U28, U29, U3, U30, U31, U32, U33, U34, U35, U36, U37, U38, U39, U4, U40, U41, U42, U43, U44, U5, U51, U6, U7, U8, U9, K1, K10, K11, K2, K3, K4, K5, K6, K7, K8, K9</p>	<p>clinical classes</p>

Course advanced

Semester 5, Semester 6

Teaching methods:

case study, clinical classes, e-learning, seminar, PBL Problem Based Learning, practical classes in simulated conditions

Activities	Examination methods	Credit conditions
------------	---------------------	-------------------

Activities	Examination methods	Credit conditions
classes	oral answer, test	Active participation in classes, 100% attendance; Upon completion of the introduction to internal medicine course, the following components will constitute the evaluation: assistant evaluation, at least 4 complete patient records (disease history + physical exam + suggested further diagnosis and treatment). Final exam: single - choice test (40 items), passing score 60%. After completing internal medicine course at 3rd year - final exam single - choice test (20 items); passing score 60%.
seminar	oral answer, test	Active participation in classes, 100% attendance; Upon completion of the introduction to internal medicine course, the following components will constitute the evaluation: assistant evaluation, at least 4 complete patient records (disease history + physical exam + suggested further diagnosis and treatment). Final exam: single - choice test (40 items), passing score 60%. After completing internal medicine course at 3rd year - final exam single - choice test (20 items); passing score 60%.

Semester 7, Semester 8

Teaching methods:

case study, classes / practicals, clinical classes, e-learning, seminar, PBL Problem Based Learning

Activities	Examination methods	Credit conditions
e-learning lecture	self-assessment	active participation in classes, 100% attendance, single-choice test (20 items), passing score 60%
seminar	test	active participation in classes, 100% attendance, single-choice test (20 items), passing score 60%
classes	test, credit	active participation in classes, 100% attendance, single-choice test (20 items), passing score 60%

Semester 9, Semester 10

Teaching methods:

case study, classes / practicals, clinical classes, demonstration, discussion, problem solving method, case study method, group work, seminar, PBL Problem Based Learning

Activities	Examination methods	Credit conditions
seminar	test	active participation in classes, 100% attendance, single-choice test (20 items), passing score 60%
classes	classroom observation, test	active participation in classes, 100% attendance, single-choice test (20 items), passing score 60%

Semester 11, Semester 12

Teaching methods:

classes / practicals, clinical classes, discussion, e-learning, problem solving method, group work, professional practice, PBL Problem Based Learning

Activities	Examination methods	Credit conditions
clinical classes	oral examination, classroom observation, test	Active participation in classes, 100% attendance The single-choice test (60 questions with 5 answers - one correct) - to pass at least 60% of correct answers are required. Oral exam including practical examination of the patients.

Additional info

Attendance and active participation in classes.

Upon completion of the introduction to internal medicine course, the following components will constitute the evaluation: At least 4 complete patient records (disease history, physical exam, suggested further diagnosis and treatment), final exam. In each academic year (i.e. 3-5), students will complete the course of internal medicine with exam-test that will serve as a basis for credit.

Following completion of the Internal Medicine module, there is a final exam. A single-choice test (60 questions with 5 answers - one correct answer) - to pass, there must be at least 60% of correct answers. The practical exam will include a physical examination of the patients.

Dermatology and Venerology

Educational subject description sheet

<p>Periods Semester 5, Semester 6</p>	<p>Examination examination</p> <p>Activities and hours seminar: 30 classes: 28</p>	<p>Number of ECTS points 3.0</p>
--	--	---

Goals

C1	Understanding the symptomatology of the most common dermatological diseases and the correct dermatological terminology.
C2	Understanding the etiopathogenesis, epidemiology, clinical picture, diagnostics and dermatological therapy of the most common infectious and non-infectious diseases of the skin, hair, nails and mucous membranes.
C3	Understanding etiopathogenesis, epidemiology, clinical picture, diagnosis and therapy of birthmarks, benign and malignant skin cancers.
C4	Understanding skin changes associated with diseases of internal and systemic organs.
C5	Poznanie etiopatogenezy, epidemiologii, obrazu klinicznego, diagnostyki i terapii chorób przenoszonych drogą płciową.
C6	Acquiring the ability to properly collect anamnesis and conduct a physical examination in terms of dermatological diseases and to draw conclusions in the form of proposals for diagnosis, differentiation, additional tests and treatment.

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	development, structure and functions of the human body in normal and pathological conditions	O.W1	written examination
W2	symptoms and course of diseases	O.W2	written examination
W3	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	written examination
W4	ethical, social and legal conditions for practicing the medical profession and the principles of health promotion, based on scientific evidence and accepted standards	O.W4	oral examination
W5	methods of conducting scientific research	O.W5	written examination
W6	environmental and epidemiological determinants of the most frequent diseases	E.W1	written examination
W7	basic features, environmental and epidemiological conditions of the most common human skin diseases	E.W35	written examination
W8	the causes, symptoms, principles of diagnosis and therapeutic management of the most common sexually transmitted diseases	E.W36	written examination
W9	the types of biological materials to be used for laboratory diagnosis and the rules for the collection of test material	E.W39	written examination
W10	theoretical and practical basics of laboratory diagnostics	E.W40	written examination
W11	epidemiological problems of infectious diseases in the world and in Poland	E.W48	written examination
Skills - Student can:			
U1	identify medical problems and prioritize medical management	O.U1	oral examination

U2	identify life-threatening conditions that require immediate medical intervention	O.U2	oral examination
U3	plan the diagnostic procedure and interpret its results	O.U3	written examination
U4	implement appropriate and safe therapeutic treatment and predict its effects	O.U4	written examination
U5	plan own learning activities and constantly learn in order to update own knowledge	O.U5	written examination
U6	inspire the learning process of others	O.U6	oral examination
U7	communicate with the patient and his family in an atmosphere of trust, taking into account the needs of the patient	O.U7	oral examination
U8	communicate and share knowledge with colleagues in a team	O.U8	oral examination
U9	critically evaluate the results of scientific research and adequately justify the position	O.U9	written examination, oral examination
U10	carry out a medical history with an adult patient	E.U1	oral examination
U11	conduct a full and targeted physical examination of an adult patient	E.U3	oral examination
U12	assess the general condition, state of consciousness and awareness of the patient	E.U7	oral examination
U13	perform differential diagnosis of the most common diseases of adults and children	E.U12	oral examination
U14	plan diagnostic, therapeutic and prophylactic procedures	E.U16	oral examination
U15	analyze the potential adverse reactions of individual medicines and the interactions between them	E.U17	written examination
U16	propose individualization of existing therapeutic guidelines and other methods of treatment in the face of ineffectiveness or contraindications to standard therapy	E.U18	written examination
U17	qualify the patient for home and hospital treatment	E.U20	oral examination
U18	recognize states in which the duration of life, functional state or patient preferences limit the conduct in accordance with the guidelines specified for a given disease	E.U21	oral examination
U19	interpret the results of laboratory tests and identify the causes of abnormalities	E.U24	written examination
U20	interpret pharmaceutical characteristics of medicinal products and critically assess advertising materials for medicines	E.U31	written examination
U21	plan specialist consultations	E.U32	oral examination
U22	maintain patient's medical records	E.U38	oral examination
Social competences - Student is ready to:			
K1	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	oral examination
K2	to be guided by the well-being of a patient	O.K2	oral examination

K3	respect medical confidentiality and patients' rights	O.K3	oral examination
K4	take actions towards the patient on the basis of ethical norms and principles, with an awareness of the social determinants and limitations of the disease	O.K4	oral examination
K5	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	oral examination
K6	promote health-promoting behaviors	O.K6	oral examination
K7	use objective sources of information	O.K7	written examination
K8	formulate conclusions from own measurements or observations	O.K8	written examination
K9	implement the principles of professional camaraderie and cooperation in a team of specialists, including representatives of other medical professions, also in a multicultural and multinational environment	O.K9	oral examination
K10	formulate opinions on the various aspects of the professional activity	O.K10	written examination
K11	assume responsibility for decisions taken in the course of their professional activities, including in terms of the safety of oneself and others	O.K11	oral examination

Calculation of ECTS points

Activity form	Activity hours*
seminar	30
classes	28
preparation for examination	30
Student workload	Hours 88
Workload involving teacher	Hours 58
Practical workload	Hours 28

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Physiology and pathology of the skin	W1, W2, W7, U1, K6, K7, K8	classes, seminar

2.	Bacterial, viral and fungal infections of the skin	W1, W10, W11, W2, W3, W4, W5, W6, W7, W8, W9, U1, U10, U11, U12, U13, U14, U15, U16, U17, U18, U19, U2, U20, U21, U22, U3, U4, U5, U6, U7, U8, U9, K1, K10, K11, K2, K3, K4, K5, K6, K7, K8, K9	classes, seminar
3.	Skin aging	W1, W10, W11, W2, W3, W4, W5, W6, W7, W8, W9, U1, U10, U11, U12, U13, U14, U15, U16, U17, U18, U19, U2, U20, U21, U22, U3, U4, U5, U6, U7, U8, U9, K1, K10, K11, K2, K3, K4, K5, K6, K7, K8, K9	classes, seminar
4.	Erythema and skin drug reactions	W1, W10, W11, W2, W3, W4, W5, W6, W7, W8, W9, U1, U10, U11, U12, U13, U14, U15, U16, U17, U18, U19, U2, U20, U21, U22, U3, U4, U5, U6, U7, U8, U9, K1, K10, K11, K2, K3, K4, K5, K6, K7, K8, K9	classes, seminar
5.	Allergic skin diseases	W1, W10, W11, W2, W3, W4, W5, W6, W7, W8, W9, U1, U10, U11, U12, U13, U14, U15, U16, U17, U18, U19, U2, U20, U21, U22, U3, U4, U5, U6, U7, U8, U9, K1, K10, K11, K2, K3, K4, K5, K6, K7, K8, K9	classes, seminar
6.	sexually transmitted diseases	W1, W10, W11, W2, W3, W4, W5, W6, W7, W8, W9, U1, U10, U11, U12, U13, U14, U15, U16, U17, U18, U19, U2, U20, U21, U22, U3, U4, U5, U6, U7, U8, U9, K1, K10, K11, K2, K3, K4, K5, K6, K7, K8, K9	classes, seminar
7.	Connective tissue diseases	W1, W10, W11, W2, W3, W4, W5, W6, W7, W8, W9, U1, U10, U11, U12, U13, U14, U15, U16, U17, U18, U19, U2, U20, U21, U22, U3, U4, U5, U6, U7, U8, U9, K1, K10, K11, K2, K3, K4, K5, K6, K7, K8, K9	classes, seminar

8.	Basics of dermoscopy. Melanocytic nevi.	W1, W10, W11, W2, W3, W4, W5, W6, W7, W8, W9, U1, U10, U11, U12, U13, U14, U15, U16, U17, U18, U19, U2, U20, U21, U22, U3, U4, U5, U6, U7, U8, U9, K1, K10, K11, K2, K3, K4, K5, K6, K7, K8, K9	seminar
9.	Seborrheic skin diseases	W1, W10, W11, W2, W3, W4, W5, W6, W7, W8, W9, U1, U10, U11, U12, U13, U14, U15, U16, U17, U18, U19, U2, U20, U21, U22, U3, U4, U5, U6, U7, U8, U9, K1, K10, K11, K2, K3, K4, K5, K6, K7, K8, K9	seminar
10.	Bullous skin diseases	W1, W10, W11, W2, W3, W4, W5, W6, W7, W8, W9, U1, U10, U11, U12, U13, U14, U15, U16, U17, U18, U19, U2, U20, U21, U22, U3, U4, U5, U6, U7, U8, U9, K1, K10, K11, K2, K3, K4, K5, K6, K7, K8, K9	seminar
11.	Skin cancers, precancerous conditions, in situ cancers.	W1, W10, W11, W2, W3, W4, W5, W6, W7, W8, W9, U1, U10, U11, U12, U13, U14, U15, U16, U17, U18, U19, U2, U20, U21, U22, U3, U4, U5, U6, U7, U8, U9, K1, K10, K11, K2, K3, K4, K5, K6, K7, K8, K9	seminar
12.	Skin changes in the course of internal medicine diseases	W1, W10, W11, W2, W3, W4, W5, W6, W7, W8, W9, U1, U10, U11, U12, U13, U14, U15, U16, U17, U18, U19, U2, U20, U21, U22, U3, U4, U5, U6, U7, U8, U9, K1, K10, K11, K2, K3, K4, K5, K6, K7, K8, K9	classes, seminar
13.	Selected aspects of pediatric dermatology	W1, W10, W11, W2, W3, W4, W5, W6, W7, W8, W9, U1, U10, U11, U12, U13, U14, U15, U16, U17, U18, U19, U2, U20, U21, U22, U3, U4, U5, U6, U7, U8, U9, K1, K10, K11, K2, K3, K4, K5, K6, K7, K8, K9	classes

14.	Basics of topical treatment in dermatology	W1, W10, W11, W2, W3, W4, W5, W6, W7, W8, W9, U1, U10, U11, U12, U13, U14, U15, U16, U17, U18, U19, U2, U20, U21, U22, U3, U4, U5, U6, U7, U8, U9, K1, K10, K11, K2, K3, K4, K5, K6, K7, K8, K9	classes
15.	Interventional dermatology and dermatosurgery	W1, W10, W11, W2, W3, W4, W5, W6, W7, W8, W9, U1, U10, U11, U12, U13, U14, U15, U16, U17, U18, U19, U2, U20, U21, U22, U3, U4, U5, U6, U7, U8, U9, K1, K10, K11, K2, K3, K4, K5, K6, K7, K8, K9	classes
16.	photodermatoses	W1, W10, W11, W2, W3, W4, W5, W6, W7, W8, W9, U1, U10, U11, U12, U13, U14, U15, U16, U17, U18, U19, U2, U20, U21, U22, U3, U4, U5, U6, U7, U8, U9, K1, K10, K11, K2, K3, K4, K5, K6, K7, K8, K9	classes, seminar
17.	Cutaneous lymphomas	W1, W10, W11, W2, W3, W4, W5, W6, W7, W8, W9, U1, U10, U11, U12, U13, U14, U15, U16, U17, U18, U19, U2, U20, U21, U22, U3, U4, U5, U6, U7, U8, U9, K1, K10, K11, K2, K3, K4, K5, K6, K7, K8, K9	classes, seminar
18.	Alopecia and other hair and scalp diseases. Diseases of the nail.	W1, W10, W11, W2, W3, W4, W5, W6, W7, W8, W9, U1, U10, U11, U12, U13, U14, U15, U16, U17, U18, U19, U2, U20, U21, U22, U3, U4, U5, U6, U7, U8, U9, K1, K10, K11, K2, K3, K4, K5, K6, K7, K8, K9	classes, seminar
19.	Melanoma and NMSC.	W1, W10, W11, W2, W3, W4, W5, W6, W7, W8, W9, U1, U10, U11, U12, U13, U14, U15, U16, U17, U18, U19, U2, U20, U21, U22, U3, U4, U5, U6, U7, U8, U9, K1, K10, K11, K2, K3, K4, K5, K6, K7, K8, K9	classes, seminar

Course advanced

Teaching methods:

case study, brainstorm, classes / practicals, clinical classes, classes in simulated conditions, demonstration, discussion, e-learning, problem solving method, project method, case study method, presentation, group work, assignments solving, seminar, workshop, lecture, lecture with multimedia presentation, PBL Problem Based Learning, practical classes, Tutoring

Activities	Examination methods	Credit conditions
seminar	written examination, oral examination	attendance in all seminars, at the end of the course student takes practical, oral exam to be allowed to sit for the written exam.
classes	written examination, oral examination	attendance in all classes, at the end of the course student takes practical, oral exam to be allowed to sit for the written exam.

Additional info

At the end of the course practical- oral exam that is a credit for written exam.

Written exam - 80 questions , single choice

56-64- grade 3

65-68 - grade 3,5

69-72- grade 4

73-76- grade 4,5

77-80- grade 5

Entry requirements

Epidemiology

Educational subject description sheet

--	--	---

Goals

C1	-to teach students about methods on how to assess population health, and to provide knowledge about modifiable and non-modifiable determinants of health
C2	-to provide knowledge about research methods to identify or confirm an impact of a factor in the disease incidence; how to prove causality
C3	-to disseminate knowledge about communicable disease epidemiology, including methods to identify communicable disease outbreaks, guidelines to control outbreaks and methods to prevent outbreak development and spread
C4	-to create awareness about issues related to epidemics of communicable and non-communicable disease
C5	-to provide students with up-to-date trends in epidemiology development, including the role of molecular epidemiology
C6	-to show the role of epidemiology in the preparation of recommendations

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	the identification and testing of risk factors, the advantages and disadvantages of different types of epidemiological studies and measures demonstrating the presence of cause and effect relationships	G.W2	written examination, test
W2	epidemiology of infectious and chronic diseases, ways of preventing their occurrence at various stages of the natural history of the disease and the role of epidemiological surveillance	G.W3	written examination, group assessment, test
W3	ethical, social and legal conditions for practicing the medical profession and the principles of health promotion, based on scientific evidence and accepted standards	O.W4	written examination, test
W4	methods of conducting scientific research	O.W5	written examination, group assessment, test
W5	legal regulations and basic methods of medical experimentation and other medical research, including basic methods of data analysis	G.W8	written examination, test
W6	methods of individual and population health assessment, different systems of disease classification and medical procedures	G.W1	written examination, group assessment, test
Skills - Student can:			
U1	plan own learning activities and constantly learn in order to update own knowledge	O.U5	classroom observation, group assessment
U2	inspire the learning process of others	O.U6	classroom observation, group assessment
U3	communicate and share knowledge with colleagues in a team	O.U8	classroom observation, group assessment
U4	critically evaluate the results of scientific research and adequately justify the position	O.U9	classroom observation, group assessment
U5	describe the demographic structure of the population, and based on that assess the health problems of the population	G.U1	written examination, classroom observation, group assessment
U6	collect information on the presence of risk factors for communicable and chronic diseases and plan prevention activities at different levels of prevention	G.U2	classroom observation, group assessment
U7	interpret the measures of the incidence of diseases and disabilities	G.U3	written examination, classroom observation, group assessment, test
U8	assess the epidemiological situation of diseases commonly found in the Republic of Poland and in the world	G.U4	classroom observation, group assessment
Social competences - Student is ready to:			
K1	promote health-promoting behaviors	O.K6	classroom observation, group assessment

K2	use objective sources of information	O.K7	classroom observation, group assessment
K3	formulate conclusions from own measurements or observations	O.K8	classroom observation, group assessment

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	The basics of demography. Demographic measures. The role of demography in epidemiology. Demographic determinants of disease prevalence.	W1, W2, U5, K2, K3	seminar
2.	Aims and tasks of epidemiology. The role of epidemiology in the assessment of risk factors responsible for health status of the populations and individuals. The assessment of prevalence and size health related outcomes in human populations. Methods of population health status diagnosis. Source of information. Descriptive epidemiology of non-communicable disease in Poland and worldwide. Communicable and non-communicable disease epidemics.	W2, U6, U7, U8, K2, K3	seminar
3.	Communicable disease epidemiology. Epidemiological process and epidemiological triangle. Types of epidemic. The rules to control communicable disease outbreak.	W1, W2, W6, U1, U6, U7, U8, K2, K3	seminar

4.	The rules and the roles of surveillance. The role of epidemiological research in communicable disease prevention. Epidemiology of hospital acquired infections.	W1, W2, W6, U1, U6, U7, U8, K2, K3	seminar
5.	Epidemiological investigation. The control of communicable disease outbreak in practice.	W1, W2, U1, U2, U3, U6, U7, K2, K3	seminar
6.	The strategy of research in epidemiology. The role of epidemiologic descriptive studies in hypothesis generating about disease etiology and to verify cause-effect relationship. Planning, realization and interpretation of results in case-control studies.	W1, W4, W5, W6, U1, U2, U4, U6, U7, K2, K3	seminar
7.	Planning, realization and interpretation of results in cohort studies. Randomized controlled trials in epidemiology and clinical medicine. Epidemiologic studies in disease of unknown origin.	W1, W4, W5, W6, U1, U2, U3, U4, U7, K2, K3	seminar
8.	Basics of molecular epidemiology. The role of molecular epidemiology in the disease risk assessment. The role of biomarkers.	W1, W3, U1, U6, K2, K3	seminar
9.	The role of epidemiology in the preparation of recommendations in the area of prevention and treatment.	W1, W2, W4, W6, U1, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3	seminar

Course advanced

Teaching methods:

case study, brainstorm, classes / practicals, preclinical classes, discussion, problem solving method, project method, case study method, presentation, group work, assignments solving, seminar, workshop

Activities	Examination methods	Credit conditions
seminar	written examination, classroom observation, group assessment, test	The assessment of knowledge: based on the final exam. The cut-off criterion for the exam $\geq 50\%$. In a case if student failed any term of the final exam, he/she fails the course (grade: 2.0). The assessment of skills: based on: I. given presentation and discussion during the seminar titled 'The role of epidemiology ...' - detailed criteria will be provided during the course, and II: written assignment on an investigation of communicable/or non-communicable disease outbreak - the assessment criteria: student should follow steps/answer questions/give solution proposals or hypotheses required in the investigation, should come to an identification of source, and should propose correct prevention measures (assessment scored in %, depending on the criteria fulfilment 0-100%). The skill part is passed if student receives $>50\%$ of the total score. The first term final exam is a MCQ test, 40 questions. The second term final exam is dated on the exam sessions for re-takers and consists of 5 (five) open questions. Answers for each question are scored from 0 to 5 points (with intervals of 0.5 pts) Final grade takes into account both, the skills and the knowledge parts and is calculated as a weighting average (proportion 1:2 respectively) as a) The skills part being an average from I and II as aforementioned b) The knowledge part being the result from the final exam The final grading scheme: $<50\%$ = failed (2.0) 50.0 - 59.9%:= satisfactory (3.0) 60.0 - 69.9%:= satisfactoty plus (3.5) 70.0 - 79.9%:= good (4.0) 80.0 - 89.0%:= good plus (4.5) 90.0 - 100%:= very good (5.0)

Additional info

To be allowed to take the final exam student should fulfill the attendance criterion, meaning he/she should attend and actively participate in all of scheduled meetings (or make up for absence after the acceptance of the teacher responsible for the meeting). Student should also achieve >50% in the skills part. If the aforementioned criteria are not fulfilled student is not allowed to take the final exam and consequently the term is lost.

Student is obligated to come on time for course meetings. 2 lateness are allowed without punishment, otherwise student is committed to make up for one of the topic she/he has been late, the topic is drawn by the teacher.

Entry requirements

Attendance on the course is obligatory. There are no other special requirements for the attendance in the course.

Goals

C1	To provide the basic resource of information in gynecology and obstetrics.
C2	To introduce the basic diagnostic and therapeutic techniques in the field of obstetrics and gynecology. To acquire the practical skill of gynecological examination with the use of specula and bimanual examination.
C3	To obtain the theoretical knowledge on physiology and pathology of the pregnancy and the delivery.
C4	To obtain the knowledge about prevention and early diagnosis of female genital neoplasms.
C5	To gain basic training in management of obstetrical emergencies.
C6	To obtain practical ability of obstetrical examination during pregnancy, labor and puerperium.
C7	To develop ability to talk with the patient and her family regarding the present or suspected pathology and be able to recognize diagnostic and therapeutic criteria.
C8	To gain basic knowledge in the field of gynecologic and obstetric endocrinology.
C9	To gain basic knowledge in the field of couple infertility, assisted reproductive techniques and oncofertility.

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	development, structure and functions of the human body in normal and pathological conditions	O.W1	written examination, oral credit, credit
W2	symptoms and course of diseases	O.W2	written examination, oral credit, credit
W3	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	written examination, oral credit, credit
W4	ethical, social and legal conditions for practicing the medical profession and the principles of health promotion, based on scientific evidence and accepted standards	O.W4	written examination, oral credit, credit
W5	female reproductive functions, related disorders and diagnostic and therapeutic procedures concerning in particular: 1) the menstrual cycle and its disturbances, 2) pregnancy, 3) physiological and pathological childbirth and postpartum period, 4) genital cancers and inflammations, 5) birth control, 6) menopause, 7) basic diagnostic methods and gynecological procedures	F.W9	written examination, oral credit, credit
W6	rules of qualification for basic surgical procedures and invasive diagnostic and therapeutic procedures, rules of their performance and the most frequent complications	F.W3	written examination, oral credit, credit

W7	principles of perioperative safety, patient preparation for surgery, general and local anesthesia and controlled sedation	F.W4	written examination, oral credit, credit
W8	postoperative treatment with analgesic therapy and postoperative monitoring	F.W5	written examination, oral credit, credit
W9	the course and regulation of reproductive functions in women and men	B.W22	written examination, oral credit, credit
W10	aberrations of autosomes and heterosomes that cause disease, including oncogenesis and cancer	C.W7	written examination, oral credit, credit
W11	basics of diagnostics of gene and chromosomal mutations responsible for hereditary and acquired diseases, including neoplastic diseases	C.W9	written examination, oral credit, credit
W12	normal human karyotype and different types of sex determination	C.W3	written examination, oral credit, credit
W13	genetic determinants of human blood groups and serological conflict in the Rh system	C.W6	written examination, oral credit, credit
Skills - Student can:			
U1	identify life-threatening conditions that require immediate medical intervention	O.U2	booklet of practice, oral credit
U2	identify medical problems and prioritize medical management	O.U1	booklet of practice, oral credit
U3	plan the diagnostic procedure and interpret its results	O.U3	booklet of practice, oral credit
U4	implement appropriate and safe therapeutic treatment and predict its effects	O.U4	booklet of practice, oral credit
U5	communicate with the patient and his family in an atmosphere of trust, taking into account the needs of the patient	O.U7	booklet of practice, oral credit
U6	adhere to the principles of asepsis and antisepsis	F.U3	booklet of practice, oral credit
U7	recognize subjective and physical symptoms indicating the abnormal course of pregnancy (abnormal bleeding, contractions of the uterus)	F.U13	booklet of practice, oral credit
U8	interpret the results of physical examination of a pregnant woman (arterial pressure, functioning of the mother's and fetus' heart) and the results of laboratory tests proving the pathologies of pregnancy	F.U14	booklet of practice, oral credit
U9	interpret the cardiotocography (CTG)	F.U15	booklet of practice, oral credit
U10	recognize the beginning of labor and its incorrect duration	F.U16	booklet of practice, oral credit
U11	interpret subjective signs and symptoms during the time of confinement	F.U17	booklet of practice, oral credit
U12	establish recommendations, indications and contraindications concerning the use of contraceptive methods	F.U18	booklet of practice, oral credit
U13	identify indications for prenatal testing	C.U2	booklet of practice, oral credit

U14	make decisions about the need for cytogenetic and molecular tests	C.U3	booklet of practice, oral credit
Social competences - Student is ready to:			
K1	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	booklet of practice, oral credit
K2	to be guided by the well-being of a patient	O.K2	booklet of practice, oral credit
K3	respect medical confidentiality and patients' rights	O.K3	booklet of practice, oral credit
K4	take actions towards the patient on the basis of ethical norms and principles, with an awareness of the social determinants and limitations of the disease	O.K4	booklet of practice, oral credit
K5	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	booklet of practice, oral credit
K6	promote health-promoting behaviors	O.K6	booklet of practice, oral credit
K7	use objective sources of information	O.K7	booklet of practice, oral credit
K8	formulate conclusions from own measurements or observations	O.K8	booklet of practice, oral credit
K9	implement the principles of professional camaraderie and cooperation in a team of specialists, including representatives of other medical professions, also in a multicultural and multinational environment	O.K9	booklet of practice, oral credit
K10	assume responsibility for decisions taken in the course of their professional activities, including in terms of the safety of oneself and others	O.K11	booklet of practice, oral credit
K11	formulate opinions on the various aspects of the professional activity	O.K10	booklet of practice, oral credit

Calculation of ECTS points

Semester 5, Semester 6

Activity form	Activity hours*
seminar	20
classes	20
Student workload	Hours 40
Workload involving teacher	Hours 40
Practical workload	Hours 20

* hour means 45 minutes

Semester 7, Semester 8

Activity form	Activity hours*
seminar	20
classes	20
Student workload	Hours 40
Workload involving teacher	Hours 40
Practical workload	Hours 20

* hour means 45 minutes

Semester 9, Semester 10

Activity form	Activity hours*
seminar	45
classes	35
Student workload	Hours 80
Workload involving teacher	Hours 80
Practical workload	Hours 35

* hour means 45 minutes

Semester 11, Semester 12

Activity form	Activity hours*
clinical classes	60
preparation for examination	200
Student workload	Hours 260
Workload involving teacher	Hours 60
Practical workload	Hours 60

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Anatomy and physiology of the female reproductive system	W1	seminar, clinical classes
2.	Physiological changes during pregnancy. Puerperium.	W1, W10, W2, W5, U11, U13, U14, U6, K1, K2, K6, K7	seminar, clinical classes
3.	Prenatal genetic screening. Fetal therapy. Premature birth.	W1, W2, W3, W5, W6, W7, W8, U10, U13, U2, U3, U5, U9, K1, K3, K8	seminar, clinical classes
4.	Fetal well-being assesment.	W11, W12, W13, W2, W5, W6, W7, W8, U1, U12, U13, U2, U3, U4, U5, U9, K11, K3, K4, K5, K6, K7	classes, seminar, clinical classes
5.	Normal labour and delivery. Operative delivery. Shoulder dystocia.	W10, W11, W2, W3, W4, W5, W6, W7, U14, U5, K5	seminar, clinical classes
6.	Placental abnormalities. Obstetric hemorrhage.	W1, W13, W3, W4, U1, U10, U11, U12, U6, U7, U9, K10, K3, K7, K8	classes, seminar, clinical classes
7.	Introduction to gynecological oncology. Oncological prevention in gynecology.	W2, W3, W4, W5, W6, W7, U2, U5, K10, K2, K3, K4, K5, K7, K8, K9	classes, seminar, clinical classes
8.	Hypertension disease during pregnancy.	W2, W3, W4, W9, U10, U11, U3, U4, U5, U6, U7, U8, U9, K11, K9	classes, clinical classes
9.	Intrauterine fetal growth disorders. Rhesus isoimmunisation. Infectious diseases in pregnancy.	W1, W13, W2, W3, W5, U1, U2, U3, U4, U7	seminar, clinical classes
10.	The most common haematological, and gastrointestinal disorders in pregnant women.	W1, W2, W3, W5, U1, U2, U3	seminar
11.	Ultrasound screening in obstetrics and gynecology.	W2, U2, U3, U8, K8	clinical classes
12.	Endometriosis. Endometrial neoplasms.	W1, W2, W3, W6, W9, K2, K3	seminar, clinical classes
13.	Menstrual cycle. Regulation. Methods of contraception. Menopause.	W1, W2, W3, W9, U2, U3	seminar
14.	Thyroid disease and diabetes mellitus in pregnancy.	W1, W3, U1, U2, U3, U4, K6	seminar
15.	Epidemiology and prevention of cancers of the female genital tract.	W1, W10, W11, W2, W3, W5, W9, U2, U3	seminar
16.	Implantation, embryogenesis, placental development. Fetal malpresentation. Pelvimetry.	W1, W2, W4, W5, W6, W7, W9, U11, U2	seminar
17.	Obstetrical and gynecological examination.	W1, W12, W2, W3, W6, W9, U10, U11, U14, K3	classes, seminar
18.	Phases of parturition. Physiological and biochemical processes regulating parturition. Physiologic delivery.	W1, W2, W3, W4, W5, U10, U11, U5, U6, U9, K2, K3, K6, K7	seminar

19.	Intraepithelial diseases of the cervix, vagina and vulva. Role of colposcopy and HPV infections.	W1, W10, W11, W2, W3, W4, W6, U5, K3, K7	seminar
20.	Breast cancer. Benign breast diseases.	W1, W10, W11, W2, W4, U5	seminar
21.	Intrauterine growth retardation. Intrauterine fetal demise. Infectious diseases during pregnancy.	W1, W12, W2, W3, W4, U13, U14, U2, U3, U9, K8	seminar
22.	Gynecological oncology: benign and malignant tumors of the ovary, management. Cancer and pregnancy.	W1, W10, W11, W2, W3, W6, U5, K2, K7, K8	seminar
23.	Thromboembolic diseases during pregnancy.	W2, W3, W9, U1, U2, U3	seminar
24.	Female and male infertility. Excessive androgen disorders.	W12, W2, U1, U2, U3, U4, K1	seminar, clinical classes
25.	Hemolytic disease of the fetus. Non-immune hydrops. Post-term pregnancy. Amniotic fluid abnormalities.	W1, W3, W5, U10, U13, U2, U4, U8	seminar
26.	Ectopic pregnancy. Gestational throphoblastic disease. Endometriosis. Pelvic pain syndrome.	W1, W2, W3, W4, W9, U2, U3, U7, K6, K7	seminar
27.	Amenorrhea. Menstrual disorders. Abnormal uterine bleeding.	W1, W7, W9, U1, U12, U2, U3	seminar, clinical classes
28.	Diabetes in pregnancy.	W1, W2, W3, W4, U11, U13, U2, K6	seminar
29.	Diseases of the liver, biliary system and pancreas in pregnancy. Pregnancy and autoimmunologic diseases.	W1, W2, W3, U1, U3, K3, K7	seminar

Course advanced

Semester 5, Semester 6

Teaching methods:

case study, brainstorm, classes / practicals, clinical classes, classes in clinical skills room, classes in simulated conditions, demonstration, discussion, e-learning, problem solving method, case study method, presentation, seminar, simulation, low fidelity simulation, high fidelity simulation, lecture, lecture with multimedia presentation, PBL Problem Based Learning, practical classes, practical classes in simulated conditions, self-study; possible participation in research; operating theatre

Activities	Examination methods	Credit conditions
seminar	credit	Student attendance is obligatory. Any absence must be justified in writing and submitted to the Dean's Office. Unauthorized absence will result in failure to complete the course. Form of passing the course: credit for attendance.
classes	oral credit	Student attendance is obligatory. Any absence must be justified in writing and submitted to the Dean's Office. Unauthorized absence will result in failure to complete the course. Form of passing the course: oral credit.

Semester 7, Semester 8

Teaching methods:

case study, brainstorm, classes / practicals, clinical classes, classes in clinical skills room, classes in simulated conditions, demonstration, discussion, e-learning, problem solving method, case study method, presentation, seminar, simulation, low fidelity simulation, high fidelity simulation, lecture, lecture with multimedia presentation, PBL Problem Based Learning, practical classes, practical classes in simulated conditions, self-study; possible participation in research; operating theatre

Activities	Examination methods	Credit conditions
seminar	credit	Student attendance is obligatory. Any absence must be justified in writing and submitted to the Dean's Office. Unauthorized absence will result in failure to complete the course. Form of passing the course: credit for attendance.
classes	oral credit	Student attendance is obligatory. Any absence must be justified in writing and submitted to the Dean's Office. Unauthorized absence will result in failure to complete the course. Form of passing the course: oral credit.

Semester 9, Semester 10

Teaching methods:

case study, brainstorm, classes / practicals, clinical classes, classes in clinical skills room, classes in simulated conditions, demonstration, discussion, e-learning, problem solving method, case study method, presentation, seminar, low fidelity simulation, high fidelity simulation, lecture, lecture with multimedia presentation, PBL Problem Based Learning, practical classes, practical classes in simulated conditions, self-study; possible participation in research; operating theatre

Activities	Examination methods	Credit conditions
seminar	credit	Student attendance is obligatory. Any absence must be justified in writing and submitted to the Dean's Office. Unauthorized absence will result in failure to complete the course. Form of passing the course: credit for attendance.
classes	booklet of practice, oral credit	Student attendance is obligatory. Any absence must be justified in writing and submitted to the Dean's Office. Unauthorized absence will result in failure to complete the course. Form of passing the course: booklet of practice, oral credit.

Semester 11, Semester 12

Teaching methods:

case study, brainstorm, classes / practicals, clinical classes, classes in clinical skills room, classes in simulated conditions, demonstration, discussion, e-learning, problem solving method, case study method, situation method, presentation, seminar, simulation, low fidelity simulation, high fidelity simulation, lecture, lecture with multimedia presentation, practical classes, practical classes in simulated conditions, self-study; possible participation in research; operating theatre

Activities	Examination methods	Credit conditions
clinical classes	written examination	Student attendance is obligatory. Any absence must be justified in writing and submitted to the Dean's Office. Unauthorized absence will result in failure to complete the course. Exam scoring rules: 60-67% = 3; 68-75% = 3.5; 76-83% = 4; 84-91% = 4.5; 92-100% = 5.

Additional info

The presence of the student during the classes is obligatory. Any absence must be justified in writing and submitted to the Dean's office. Unauthorized absence will result in failure to complete the course. It is not possible to make up for the classes. Special situations are adjudicated by the Dean.

Entry requirements

Student has knowledge of pre-clinical subjects: anatomy, physiology and pathophysiology of the female reproductive system. Student is able to collect general medical history and interpret laboratory findings. Student has knowledge of aseptic principles and procedures. Student has completed previous semesters. Student is prepared for classes in the field of theoretical knowledge, which allows active participation in clinical practice.

Goals

C1	To familiarize students with the basic information on developmental medicine
C2	Teaching basic practical skills, including collecting pediatric history and full physical examination of the child
C3	Explaining major issues in the fields of infectious diseases, pulmonology, allergology and children's gastroenterology
C4	Explaining major issues in the fields of cardiovascular, urinary tract, neonatal, connective tissue and environmental diseases
C5	Explaining major issues in the fields of pediatric oncology and hematology, endocrinology and neurology
C6	Teaching practical skills in pediatrics
C7	Preparation for independent work in the field of pediatrics

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	environmental and epidemiological determinants of the most frequent diseases	E.W1	multiple choice test
W2	the principles of nutrition of healthy and sick children, including breastfeeding, preventive vaccination and child health monitoring	E.W2	multiple choice test
W3	issues of abused child and sexual abuse, mental retardation and behavioral disorders - psychoses, addictions, eating disorders and excretion in children	E.W4	multiple choice test
W4	the most common life-threatening conditions in children and the rules of conduct in these conditions	E.W6	multiple choice test

W5	the causes, symptoms, principles of diagnosis and therapeutic management of the most common diseases of children: (1) rickets, tetanus, convulsions, (2) heart defects, myocarditis, endocarditis, pericarditis, cardiomyopathy, arrhythmia, heart failure, hypertension, syncope, (3) acute and chronic diseases of the upper and lower airways, congenital defects of the respiratory system, tuberculosis, cystic fibrosis, asthma, allergic rhinitis, urticaria, anaphylactic shock, angioedema, (4) anemia, hemorrhagic diatheses, conditions of bone marrow failure, pediatric neoplastic diseases, including solid tumors typical of childhood, (5) acute and chronic abdominal pain, vomiting, diarrhea, constipation, gastrointestinal bleeding, peptic ulcer disease, non-specific intestinal diseases, pancreatic diseases, cholestasis and liver diseases, and other acquired diseases and congenital defects of the digestive tract, (6) urinary tract infections, congenital anomalies of the urinary system, nephrotic syndrome, renal stones, acute and chronic renal failure, acute and chronic nephritis, systemic kidney diseases, urinary tract disorders, vesicoureteral reflux disease, (7) growing disorders, thyroid and parathyroid diseases, adrenal diseases, diabetes, obesity, disorders of puberty and gonadal functions, (8) cerebral palsy, encephalomyelitis, meningitis, epilepsy, (9) the most common infectious diseases of childhood, (10) genetic syndromes, (11) diseases of connective tissue, rheumatic fever, juvenile arthritis, systemic lupus, dermatomyositis	E.W3	multiple choice test
W6	development, structure and functions of the human body in normal and pathological conditions	O.W1	multiple choice test
W7	symptoms and course of diseases	O.W2	multiple choice test
W8	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	multiple choice test
W9	basic mechanisms of cell and tissue damage	C.W27	multiple choice test
W10	issues related to detailed pathology of organs, macro- and microscopic images and clinical course of pathomorphological changes in particular organs	C.W31	multiple choice test
W11	clinical forms of the most frequent diseases of particular systems and organs, metabolic diseases and disorders of water-electrolyte, hormonal and acid-base metabolism	C.W34	multiple choice test
W12	micro-organisms, including pathogenic and present in the physiological flora	C.W12	multiple choice test
W13	symptoms of iatrogenic infections, their pathways and pathogens causing changes in individual organs	C.W18	multiple choice test
W14	basics of microbiological and parasitological diagnostics basics of disinfection, sterilization and aseptic management	C.W19	multiple choice test
W15	basic principles of disinfection, sterilization and aseptic management	C.W20	multiple choice test
W16	genetic determinants of human blood groups and serological conflict in the Rh system	C.W6	multiple choice test
Skills - Student can:			

U1	carry out a medical interview with the child and his or her family	E.U2	booklet of professional skills, practical examination
U2	carry out a physical examination of a child of all ages	E.U4	booklet of professional skills, practical examination
U3	conduct routine health checks	E.U11	booklet of professional skills
U4	assess the degree of advancement of puberty	E.U10	practical examination
U5	compile anthropometric and blood pressure measurements with data on centile grids	E.U9	booklet of professional skills, practical examination
U6	perform differential diagnosis of the most common diseases of adults and children	E.U12	practical examination, multiple choice test
U7	plan diagnostic, therapeutic and prophylactic procedures	E.U16	practical examination, multiple choice test
U8	interpret the results of laboratory tests and identify the causes of abnormalities	E.U24	booklet of professional skills, practical examination
U9	apply nutritional treatment, including enteral and parenteral nutrition	E.U25	practical examination, multiple choice test
U10	qualify the patient for vaccination	E.U27	booklet of professional skills
U11	perform basic procedures and medical procedures including: 1) body temperature measurement, heart rate measurement, non-invasive blood pressure measurement, 2) monitoring of vital signs by means of a patient monitor, pulse oximetry, 3) spirometric examination, oxygen therapy, assisted ventilation and replacement ventilation, 4) introduction of the oropharyngeal tube, 5) intravenous, intramuscular and subcutaneous injections, cannulation of peripheral veins, collection of peripheral venous blood, collection of blood for culture, collection of arterialized capillary blood, collection of arterialized capillary blood, 6) taking nasal, throat and skin swabs, puncturing of the pleural cavity, 7) bladder catheterization in women and men, gastric tube, gastric lavage, gastric lavage, enema, 8) standard resting electrocardiogram with interpretation, electrical cardioversion and cardiac defibrillation, 9) simple strip tests and blood glucose measurements	E.U29	booklet of professional skills, practical examination
U12	assist in the performance of the following procedures and medical procedures: 1) transfusion of blood and blood-derived products, 2) drainage of the pleural cavity, 3) puncture of the pericardial sac, 4) puncture of the peritoneal cavity, 5) lumbar puncture, 6) fine-needle biopsy, 7) epidermal tests, 8) intradermal and scarification tests and interpret their results	E.U30	booklet of professional skills
U13	plan specialist consultations	E.U32	practical examination, multiple choice test
U14	maintain patient's medical records	E.U38	booklet of professional skills

U15	assist in the performance of the following procedures and medical procedures: (i) bone marrow aspiration biopsy	E.U39	booklet of professional skills
U16	select appropriate physical activity in the developmental period of children and adolescents and propose health training in adulthood, both in health and disease	E.U40	booklet of professional skills
U17	assess the condition of the newborn on the Apgar scale and its maturity, and examine neonatal reflexes	E.U8	booklet of professional skills
U18	identify medical problems and prioritize medical management	O.U1	booklet of professional skills, practical examination
U19	identify life-threatening conditions that require immediate medical intervention	O.U2	booklet of professional skills
U20	plan the diagnostic procedure and interpret its results	O.U3	booklet of professional skills, practical examination
U21	implement appropriate and safe therapeutic treatment and predict its effects	O.U4	booklet of professional skills, practical examination
U22	communicate with the patient and his family in an atmosphere of trust, taking into account the needs of the patient	O.U7	classroom observation
U23	communicate and share knowledge with colleagues in a team	O.U8	classroom observation
U24	critically evaluate the results of scientific research and adequately justify the position	O.U9	classroom observation
U25	interpret the results of microbiological tests	C.U10	booklet of professional skills, multiple choice test
Social competences - Student is ready to:			
K1	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	classroom observation
K2	to be guided by the well-being of a patient	O.K2	classroom observation
K3	respect medical confidentiality and patients' rights	O.K3	classroom observation
K4	take actions towards the patient on the basis of ethical norms and principles, with an awareness of the social determinants and limitations of the disease	O.K4	classroom observation
K5	promote health-promoting behaviors	O.K6	classroom observation
K6	use objective sources of information	O.K7	classroom observation
K7	formulate conclusions from own measurements or observations	O.K8	classroom observation

Study content

No.	Course content	Subject's learning outcomes	Activities
-----	----------------	-----------------------------	------------

1.	<p>III year</p> <p>Seminars/case presentations:</p> <ol style="list-style-type: none"> 1. Physical development. Assessment of growth 2. Fever 3. Fetal and neonatal circulation. Transition period. 4. Infectious diseases in neonates 5. Differential diagnosis of proteinuria, erythrocyturia and pyuria 6. Congenital defects of kidney and urinary tract 7. Congenital heart defects. History and physical examination. Major and minor clinical signs 8. Vomiting, diarrhoea, dehydration 9. Lymphadenopathy, hepato and splenomegaly 10. Anemias in children, bleeding disorders 11. Normal and abnormal growth 12. Normal and abnormal puberty 13. Assessment of motor, cognitive and speech development 14. Food allergy. Anaphylactic shock. 15. Diagnostic and therapeutic management of children with acute and chronic respiratory disorders 16. Respiratory failure - definition, causes, diagnostics, treatment 17. Allergic diseases: asthma, allergic rhinitis, atopic dermatitis, (definition, diagnostic and therapeutic approach). 18. Genetic lung diseases: Cystic fibrosis (definition, genetics, symptomatology, diagnosis, treatment and screening). Primary ciliary dyskinesia 19. The diagnosis of definitive or probable tuberculosis in children. A child who had a contact with adult with tuberculosis disease. 20. Pneumonia - classification, clinical course, imaging techniques - USG, CT 21. Jaundice 22. Nutrition of a healthy child and with gastrointestinal diseases 23. Development of GI tract and congenital gastrointestinal anomalies 24. Chronic diarrhoea 25. Chronic abdominal pain. Functional disorders of GI tract 26. Arterial hypertension 27. Acute renal injury 28. Chronic renal failure 29. Glomerulopathies - primary and secondary. Nephrotic syndrome 30. Renal failure treatment - peritoneal dialysis, renal transplant 31. Nocturnal enuresis 32. Stones in urinary tract. Nephrocalcinosis 33. Pathology 34. Pathology 	<p>W1, W2, W5, W6, U1, U10, U2, U3, U4, U5, U6, K3, K5</p>	<p>seminar</p>
----	--	--	----------------

2.	<p>III year</p> <p>Practical exercises</p> <ol style="list-style-type: none"> 1. Hospitalized child. The rules of patient and parents respect. Patient's records. 2. Taking history in pediatrics 3. Assessment of general condition. 4. Assessment of growth and nutrition 5. Evaluation of healthy newborn 6. Evaluation of the patients in ICU 7. Skin, subcutaneous tissue, lymph nodes. 8. The chest: inspection, percussion, auscultation. Blood pressure measurement 9. The most common symptoms of respiratory tract disorders: cough, dyspnea, stridor, cyanosis, physiological and pathological auscultatory findings 10. The abdomen-inspection, bowel sounds, percussion and palpation. External genitalia examination 11. The most common symptoms of GI tract disorders: pain, vomiting, diarrhea, constipation, hepatosplenomegaly 12. The muscular strength and tone. Deep tendon reflexes. Meningeal signs in different age. 13. Oral cavity, nose and pharynx. Symptoms of oral cavity disorders. The neck examination. 14. Examination of extremities and joints. Active and passive range of movements. Hips examination. 15. Acute and chronic upper respiratory tract infections. Laryngitis and epiglottitis. 16. Bronchiolitis - management and prevention. 17. Asthma, chronic bronchitis, post nasal drip syndrome. The techniques of inhalations and nebulization. 18. Community acquired pneumonia. Complications - empyema, abscess. Nosocomial pneumonia - prevention. 19. Artificial ventilation. Chronic assisted ventilation. Tracheostomy. Blood gases analysis. 20. Chronic cough - diagnostic and therapeutic management. Pulmonary function tests: spirometry, challenge tests, PEF. Recommendation for flexible bronchoscopy 21. Urticaria/angioedema. Allergy testing: Skin prick tests, intradermal tests, patch tests, blood tests - recommendation and interpretation. 22. Gastroesophageal reflux disease. Infant regurgitation. Stomach ulcers and H. pylori infection. 23. Inflammatory bowel diseases. 24. Additional tests in pediatric gastroenterology (hydrogen breath test, manometry). Endoscopic examinations 25. Acute infections of GI tract. 26. Urgent conditions in pediatric gastroenterology. 27. Approach to neonatal and childhood jaundice. 28. Nephrotic syndrome 29. Urinary tract infections 30. Arterial hypertension 31. Acute kidney injury. Dialysis techniques 32. Urinary tract malformations (Urology) 33. Chronic kidney diseases 	W10, W11, W5, W7, W8, W9, U11, U12, U18, U2	classes

7.	<p>VI</p> <p>Practical occupational learning - 120 hours (114 clinical classes, 6 simulations)</p> <p>Students are assigned to one hospital ward for 4 weeks. Student's duties are: participation in preparation before children's examination, participation in keeping the records - recording the findings in patient's status praesens, recording tests' results in hospital records, participation in examination, participation in consulting at infirmary and different hospital wards and carrying out medical procedures according to the list and principles written in the book called "The List of Medicine Graduate's Skills"</p>	W4, W8, U11, U12, U13, U14, U15, U16, U18, U19, U20, U21, U22, U23, U24, U6, U7, U8, U9, K1, K2, K3, K4, K5, K6, K7	clinical classes, simulations

Course advanced

Semester 5, Semester 6

Teaching methods:

clinical classes, seminar

Activities	Examination methods	Credit conditions
seminar	classroom observation, multiple choice test	active participation in classes, 100% attendance,
classes	classroom observation, multiple choice test	active participation in classes, 100% attendance,

Semester 7, Semester 8

Teaching methods:

clinical classes, seminar

Activities	Examination methods	Credit conditions
seminar	classroom observation	active participation in classes, 100% attendance, multiple choice test (40 items, the examination material scope from III-IV year), passing score 60%
classes	booklet of professional skills, classroom observation	active participation in classes, 100% attendance, multiple choice test (40 items, the examination material scope from III-IV year), passing score 60%

Semester 9, Semester 10

Teaching methods:

clinical classes, seminar, simulation

Activities	Examination methods	Credit conditions
classes	booklet of professional skills, classroom observation, multiple choice test	active participation in classes, 100% attendance,
seminar	classroom observation, multiple choice test	active participation in classes, 100% attendance,
simulations	classroom observation, multiple choice test	active participation in classes, 100% attendance,

Semester 11, Semester 12

Teaching methods:

clinical classes, simulation

Activities	Examination methods	Credit conditions
clinical classes	booklet of professional skills, practical examination, classroom observation, multiple choice test	active participation in classes, 100% attendance, multiple choice test (60 items, the examination material scope from III year - VI year), oral exam at bedside
simulations	booklet of professional skills, classroom observation	100 % attendance

Additional info

Students who receive a test grade of 4.5 or 5.0 are exempt from the oral part of the exam and receive a test grade as the final grade. The final grade is the average of the grades from the test exam and the bedside exam. In order to pass the exam, you must get a passing grade in each part of the exam.

Entry requirements

Completion of subjects: Clinical biochemistry with elements of chemistry, Pathology

Psychiatry

Goals

C1	Introduction to the specifics of psychiatry. To familiarize students with the differences between the problems of the mentally ill and those they have encountered in somatic medicine so far.
C2	Acquiring knowledge and practical skills in the diagnosis and therapy of mental disorders.
C3	Developing practical skills in the diagnosis and therapy of mental disorders
C4	Preparing the student to work independently with a patient with mental disorders
C5	Integrating the acquired knowledge and skills in the field of mental disorders with previously acquired skills and knowledge in other medical specialties

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	symptoms and course of diseases	O.W2	classroom observation, oral credit
W2	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	classroom observation, oral credit
W3	ethical, social and legal conditions for practicing the medical profession and the principles of health promotion, based on scientific evidence and accepted standards	O.W4	classroom observation, oral credit
W4	methods of conducting scientific research	O.W5	classroom observation, oral credit
W5	issues of abused child and sexual abuse, mental retardation and behavioral disorders - psychoses, addictions, eating disorders and excretion in children	E.W4	classroom observation, oral credit
W6	basic concepts of the pathogenesis of mental disorders	E.W15	classroom observation, oral credit
W7	the general symptomatology of mental disorders and the rules for classifying them according to the main classification systems	E.W16	classroom observation, oral credit
W8	symptoms, principles of diagnosis and therapeutic management in the most frequent mental disorders, including 1) schizophrenia, 2) affective disorders, 3) neurotic and adaptive disorders, 4) nutritional disorders, 5) disturbances related to the intake of psychoactive substances, 6) sleep disorders	E.W17	classroom observation, oral credit
W9	principles of diagnostics and emergency management in psychiatry, including suicide issues	E.W18	classroom observation, oral credit
W10	the specificity of mental disorders and their treatment in children, adolescents and in old age	E.W19	classroom observation, oral credit
W11	symptoms of mental disorders in the course of somatic diseases, their influence on the course of the basic disease and prognosis and the principles of their treatment	E.W20	classroom observation, oral credit
W12	the problem of human sexuality and fundamental disorders associated with it	E.W21	classroom observation, oral credit

W13	rules on the protection of mental health, with particular reference to the rules on admission to a mental hospital	E.W22	classroom observation, oral credit
W14	environmental and epidemiological determinants of the most frequent diseases	E.W1	classroom observation, oral credit
W15	basic psychotherapeutic techniques and principles for combining psychotherapy and pharmacotherapy	E.W58	classroom observation, oral credit
Skills - Student can:			
U1	identify medical problems and prioritize medical management	O.U1	classroom observation, oral credit
U2	identify life-threatening conditions that require immediate medical intervention	O.U2	classroom observation, oral credit
U3	plan the diagnostic procedure and interpret its results	O.U3	classroom observation, oral credit
U4	implement appropriate and safe therapeutic treatment and predict its effects	O.U4	classroom observation, oral credit
U5	communicate with the patient and his family in an atmosphere of trust, taking into account the needs of the patient	O.U7	classroom observation, oral credit
U6	communicate and share knowledge with colleagues in a team	O.U8	classroom observation, oral credit
U7	critically evaluate the results of scientific research and adequately justify the position	O.U9	classroom observation, oral credit
U8	carry out a medical history with an adult patient	E.U1	classroom observation, oral credit
U9	carry out a medical interview with the child and his or her family	E.U2	classroom observation, oral credit
U10	conduct a psychiatric examination	E.U5	classroom observation, oral credit
U11	recognize immediate life-threatening conditions	E.U14	classroom observation, oral credit
U12	plan diagnostic, therapeutic and prophylactic procedures	E.U16	classroom observation, oral credit
U13	analyze the potential adverse reactions of individual medicines and the interactions between them	E.U17	classroom observation, oral credit
U14	recognize the symptoms of drug dependence and propose treatment	E.U19	classroom observation, oral credit
U15	qualify the patient for home and hospital treatment	E.U20	classroom observation, oral credit
U16	maintain patient's medical records	E.U38	classroom observation, oral credit
Social competences - Student is ready to:			
K1	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	classroom observation, oral credit
K2	to be guided by the well-being of a patient	O.K2	classroom observation, oral credit

K3	respect medical confidentiality and patients' rights	O.K3	classroom observation, oral credit
K4	take actions towards the patient on the basis of ethical norms and principles, with an awareness of the social determinants and limitations of the disease	O.K4	classroom observation, oral credit
K5	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	classroom observation, oral credit
K6	promote health-promoting behaviors	O.K6	classroom observation, oral credit
K7	use objective sources of information	O.K7	classroom observation, oral credit
K8	implement the principles of professional camaraderie and cooperation in a team of specialists, including representatives of other medical professions, also in a multicultural and multinational environment	O.K9	classroom observation, oral credit
K9	formulate opinions on the various aspects of the professional activity	O.K10	classroom observation, oral credit

Calculation of ECTS points

Semester 5, Semester 6

Activity form	Activity hours*
seminar	20
Student workload	Hours 20
Workload involving teacher	Hours 20

* hour means 45 minutes

Semester 9, Semester 10

Activity form	Activity hours*
e-learning lecture	20
classes	55
preparation for classes	15
professional practice	70
preparation for colloquium	10
preparation for classes	48
consultations with lecturer	2

Student workload	Hours 220
Workload involving teacher	Hours 75
Practical workload	Hours 125

* hour means 45 minutes

Semester 11, Semester 12

Activity form	Activity hours*
clinical classes	60
Student workload	Hours 60
Workload involving teacher	Hours 60
Practical workload	Hours 60

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	General psychopathology	W1, W6, W7, U2, U7, K7	classes, seminar, clinical classes, e-learning lecture
2.	Social context of psychiatry	W14, W3, U15, U5, U7, K1, K2	seminar, e-learning lecture
3.	The development context of psychiatry	W10, W14, W5, U7, U9, K2, K4	seminar, e-learning lecture
4.	Brain and mind	W4, W6, U7, K5, K7	seminar
5.	Psychiatric examination	W1, W2, W8, U10, U2, U5, U8, K1	classes, seminar, clinical classes
6.	Legal aspects of psychiatry	W13, W3, W9, U11, U16, U2, U4, K2, K3, K5, K7, K8, K9	classes, seminar, e-learning lecture
7.	Depressive disorders in medical practice	W1, W14, W15, W2, W4, W6, W8, W9, U10, U11, U12, U13, U14, U15, U16, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4, K6, K7, K8, K9	classes, seminar, clinical classes

8.	Mental disorders in children and adolescents	W1, W10, W13, W14, W15, W2, W3, W4, W5, W6, W8, W9, U1, U10, U11, U12, U13, U15, U16, U2, U3, U4, U5, U6, U7, U9, K1, K2, K3, K4, K5, K6, K7, K8, K9	classes, seminar, clinical classes, e-learning lecture
9.	Elderly mental disorders	W1, W10, W11, W12, W13, W14, W2, W3, W6, W8, W9, U1, U10, U11, U12, U13, U14, U15, U16, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4, K5, K6, K7, K8, K9	classes, seminar, clinical classes, e-learning lecture
10.	Psychosomatic disorders	W1, W11, W15, W4, W6, U1, U3, U4, U7, K1, K2	seminar, e-learning lecture
11.	Schizophrenia and other psychoses	W1, W10, W11, W13, W14, W15, W2, W3, W4, W6, W8, W9, U1, U10, U11, U12, U13, U14, U15, U16, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4, K5, K6, K7, K8, K9	classes, seminar, clinical classes, e-learning lecture
12.	Addiction	W1, W10, W11, W13, W14, W15, W2, W3, W6, W8, W9, U1, U10, U12, U13, U14, U15, U16, U4, U6, U8, K1, K2, K3, K4, K5, K6, K8, K9	classes, seminar, e-learning lecture
13.	Sexual disorders	W1, W12, W14, W15, W2, W3, W4, W6, U1, U12, U3, U7, K1, K2, K4, K5	seminar, e-learning lecture
14.	Systemic conditions of mental disorders	W10, W14, W15, W2, U3, U6, K1, K2, K4, K6, K8	seminar, e-learning lecture
15.	Personality disorders	W1, W14, W15, W2, W6, U1, U12, U3, U4, U5, U6, K1, K2, K3, K4, K5, K6, K8, K9	classes, seminar
16.	Issues of the norm and pathology of mental life	W1, W6, W7, U5, U7, K2, K5, K7, K9	classes, clinical classes
17.	Biological basis of mental disorders	W14, W6, U7	classes, e-learning lecture
18.	Organic mental disorders	W1, W10, W11, W14, W2, W6, W9, U1, U10, U11, U12, U13, U16, U2, U3, U4, U5, U6, U7, U8, K1, K2, K4, K6, K7, K8, K9	classes, clinical classes
19.	Mood disorders	W1, W10, W11, W13, W14, W15, W2, W6, W7, W8, W9, U1, U10, U11, U12, U13, U14, U15, U16, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4, K6, K7, K9	classes, clinical classes, e-learning lecture

20.	Neurotic, stress-related and somatoform disorders	W1, W11, W13, W14, W15, W2, W3, W4, W6, W7, W8, W9, U1, U10, U12, U13, U14, U16, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4, K5, K6, K7, K8, K9	classes, seminar, clinical classes
21.	Behavioral syndromes associated with physiological disorders and physical factors	W1, W11, W13, W14, W15, W2, W3, W4, W6, W7, W8, W9, U1, U10, U12, U13, U14, U16, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4, K6, K7, K8, K9	classes, clinical classes
22.	Psychopharmacotherapy issues	W15, W4, W9, U1, U12, U13, U14, U4, U7, K2, K7, K9	classes, e-learning lecture

Course advanced

Semester 5, Semester 6

Teaching methods:

case study, classes / practicals, clinical classes, demonstration, educational film, seminar

Activities	Examination methods	Credit conditions
seminar	classroom observation	obligatory participation, activity

Semester 9, Semester 10

Teaching methods:

case study, classes / practicals, clinical classes, discussion, educational film, case study method

Activities	Examination methods	Credit conditions
e-learning lecture	classroom observation	obligatory participation, activity
classes	classroom observation	obligatory participation, activity

Semester 11, Semester 12

Teaching methods:

case study, clinical classes, discussion

Activities	Examination methods	Credit conditions
clinical classes	oral credit	obligatory participation, activity

Entry requirements

General knowledge gained during previous years of studies

Radiology and Basis of Ultrasonography

Goals

C1	to familiarize a student with diagnostic imaging methods and diagnostic possibilities in imaging and differentiating diseases of organs and systems of the human body
C2	practical learning of ultrasound examination. Learning images of body structures in ultrasound. presentation of ultrasound images in basic, selected pathological changes

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	written examination, practical colloquiums

W2	problems of modern imaging examinations, in particular: 1) radiological symptomatology of major diseases, 2) instrumental methods and imaging techniques used to perform therapeutic procedures, 3) the indications, contraindications and preparation of the patient for particular types of imaging examination and contraindications for the use of contrast agents	F.W10	written examination, practical colloquiums
Skills - Student can:			
U1	plan the diagnostic procedure and interpret its results	O.U3	written examination, practical colloquiums
U2	evaluate the result of a radiological examination in the most common types of fractures, particularly long bone fractures	F.U7	written examination, practical colloquiums
U3	can perform and interpret FAST ultrasound (Focused Assessment with Sonography for Trauma)	F.U30	written examination, practical colloquiums
Social competences - Student is ready to:			
K1	respect medical confidentiality and patients' rights	O.K3	written examination, practical colloquiums
K2	to be guided by the well-being of a patient	O.K2	written examination, practical colloquiums

Calculation of ECTS points

Activity form	Activity hours*
e-learning lecture	16
seminar	37
classes	14
preparation for classes	22
preparation for examination	22
Student workload	Hours 111
Workload involving teacher	Hours 67
Practical workload	Hours 14

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Fundamentals of physics of diagnostic imaging methods. Radiological protection	W2	seminar, e-learning lecture

2.	Rules for referring to radiological examinations, preparation for examinations, contrast agents.	W1, U1, K2	seminar
3.	Overview pictures and x-rays. Interpretation of test results.	W1, U1	seminar
4.	Basics of ultrasound and CT scan	W1, U3, K1	seminar
5.	Angiography and interventional radiology.	W2, U1	seminar
6.	Chest - lungs, mediastinum, heart and large vessels	W1, W2, U1, K2	classes
7.	Digestive tract	W1, W2, U1, K2	classes
8.	Genitourinary system	W1, W2, U1, K2	classes
9.	The osteoarticular system	W1, W2, U1, U2, K2	classes
10.	Diagnosis of breast diseases	W1, W2, U1, K1	classes
11.	Vascular system and interventional radiology	W1, W2, U1	classes
12.	Neuroradiology	W1, W2, U1, U2, K2	classes
13.	Diagnosis of craniofacial diseases	W1, W2, U1, K1	classes
14.	The structure of the ultrasound scanner. Ultrasound software and functions. Directions of ultrasound development. Ultrasound anatomy of anatomical regions. Methodology of ultrasound examination of individual anatomical regions. Basic pathological changes in ultrasound images.	W1, U3	e-learning lecture
15.	Practical learning of ultrasound examination (abdominal cavity, pelvis, neck, FAST)	U3	classes

Course advanced

Teaching methods:

classes / practicals, clinical classes, computer classes, seminar, lecture

Activities	Examination methods	Credit conditions
e-learning lecture	written examination	Students are required to prepare for classes and seminars and actively participate in them. Completion of classes is based on attendance at seminars and practical classes.
seminar	written examination	Students are required to prepare for classes and seminars and actively participate in them. Completion of classes is based on attendance at seminars and practical classes.
classes	written examination, practical colloquiums	Students are required to prepare for classes and seminars and actively participate in them. Completion of classes is based on attendance at seminars and practical classes.

Entry requirements

Attendance at classes is mandatory.

Potable water and health

Goals

C1	Students are acquainted with the most important physical, chemical and bacteriological hazards which can provide drinking water and learning about new methods of water purification and disinfection water treatment plants. Familiarizing students with the importance of water and its components for proper nutrition and in various disease entities.
----	--

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	development, structure and functions of the human body in normal and pathological conditions	O.W1	credit

W2	ethical, social and legal conditions for practicing the medical profession and the principles of health promotion, based on scientific evidence and accepted standards	O.W4	credit
W3	epidemiology of viral and bacterial infections and infections with fungi and parasites, taking into account their geographical distribution	C.W13	credit
W4	basics of microbiological and parasitological diagnostics basics of disinfection, sterilization and aseptic management	C.W19	credit
W5	basic principles of disinfection, sterilization and aseptic management	C.W20	credit
W6	micro-organisms, including pathogenic and present in the physiological flora	C.W12	credit
Skills - Student can:			
U1	plan the diagnostic procedure and interpret its results	O.U3	self-assessment
U2	plan own learning activities and constantly learn in order to update own knowledge	O.U5	self-assessment
U3	communicate and share knowledge with colleagues in a team	O.U8	self-assessment
U4	critically evaluate the results of scientific research and adequately justify the position	O.U9	self-assessment
U5	assess environmental hazards and use basic methods to detect the presence of harmful (biological and chemical) factors in the biosphere	C.U6	self-assessment
U6	prepare preparations and identify pathogens under the microscope	C.U9	self-assessment
U7	interpret the results of microbiological tests	C.U10	self-assessment
Social competences - Student is ready to:			
K1	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	self-assessment
K2	to be guided by the well-being of a patient	O.K2	self-assessment
K3	promote health-promoting behaviors	O.K6	self-assessment
K4	use objective sources of information	O.K7	self-assessment
K5	formulate conclusions from own measurements or observations	O.K8	self-assessment
K6	formulate opinions on the various aspects of the professional activity	O.K10	self-assessment

Calculation of ECTS points

Activity form	Activity hours*
seminar	30
preparation for classes	10

preparation of multimedia presentation	15
conducting literature research	5
Student workload	Hours 60
Workload involving teacher	Hours 30

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Familiarizing students with the most important physical, chemical and bacteriological threats which can provide drinking water in therapeutic pools and rehabilitation, for the needs of artificial kidneys, for dental and pharmaceutical purposes.	W5, U1, U4, U7, K5	seminar
2.	Impact assessment of macroelements and microelements occurring in drinking water for health. Healing waters and the health benefits and risks of hydrotherapy. European and national guidelines for determining the demand for water and electrolytes for healthy people. Methods of assessing water intake and the occurrence of dehydration in health and disease.	W1, W3, U3, U5, K3, K4	seminar
3.	Familiarizing students with the importance of water and its ingredients for proper nutrition in a variety of disease entities. Proper hydration in metabolic programming for pregnant women and nursing mothers, as well as a young child in health and disease. The importance of water consumption for human cognitive functions.	W4, U2, U6, K2, K6	seminar
4.	Learning new methods of water purification and disinfection in Krakow water treatment plants.	W6, U6, K3, K4	seminar
5.	Interpretation of toxicological test results by biological tests.	W2, W3, U5, U6, K1, K5	seminar
6.	Legal regulations and supervision of the safety and quality of bottled waters.	W1, W6, U2, U4, K3, K6	seminar

Course advanced

Teaching methods:

brainstorm, classes / practicals, discussion, e-learning, educational film, group work, seminar, trip, lecture with multimedia presentation

Activities	Examination methods	Credit conditions
seminar	self-assessment, credit	Preparation of the presentation of research results in the field of the importance of water for human health - obtaining a credit

Entry requirements

Student have the classes passed in semesters I-IV.
70% attendance is required.

Biostatistics

Educational subject description sheet

--	--	---

Goals

C1	Teaching statistical inference
C2	Using medical databases
C3	Operations using statistical software
C4	Presentation of the results obtained

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
------	----------------------	---------	---------------------

Knowledge - Student knows and understands:			
W1	methods of conducting scientific research	O.W5	classroom observation, project
Skills - Student can:			
U1	critically evaluate the results of scientific research and adequately justify the position	O.U9	classroom observation
Social competences - Student is ready to:			
K1	formulate conclusions from own measurements or observations	O.K8	project
K2	use objective sources of information	O.K7	project

Calculation of ECTS points

Activity form	Activity hours*
seminar	10
classes	20
preparation of a report	15
preparation of a project	15
Student workload	Hours 60
Workload involving teacher	Hours 30
Practical workload	Hours 20

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Introduction to statistical software	W1, U1	classes, seminar
2.	Descriptive statistics	W1, U1	classes, seminar
3.	Student's t-test, U Mann-Whitney test (Mann-Whitney-Wilcoxon test)	W1, U1	classes, seminar
4.	ANOVA, Kruskal-Wallis test	W1, U1	classes, seminar
5.	Pearson and Spearman correlation	W1, U1	classes, seminar
6.	Linear regression	W1, U1	classes, seminar
7.	Chi-square	W1, U1	classes, seminar
8.	Survival analysis	W1, U1	classes, seminar

9.	Graphical presentation of the data 1	W1, U1	classes, seminar
10.	Graphical presentation of the data 2	W1, U1	classes, seminar
11.	Final Project - 1	W1, U1	classes
12.	Final Project - 2	W1, U1, K1, K2	classes
13.	Final Project - 3	W1, U1, K1, K2	classes
14.	Presentation of student projects	W1, K1, K2	seminar
15.	Presentation of student projects	W1, K1, K2	seminar

Course advanced

Teaching methods:

computer classes, demonstration, discussion, e-learning, project method, group work, computer room, seminar

Activities	Examination methods	Credit conditions
seminar	project	Assessment of the presentation of the student project
classes	classroom observation, project	Evaluation of class reports and final project.

Entry requirements

no initial requirements

Medicine in "OMICS"

Educational subject description sheet

Basic information

<p>Department Faculty of Medicine</p> <p>Field of study Medical Program</p> <p>Study level long-cycle master's degree program</p> <p>Study form full-time</p> <p>Education profile general academic</p> <p>Disciplines Medical science</p> <p>ISCED classification 0912 Medicine</p> <p>Subject related to scientific research Yes</p>	<p>Didactic cycle 2021/22</p> <p>Realization year 2023/24</p> <p>Lecture languages English</p> <p>Block obligatory for passing in the course of studies</p> <p>Mandatory elective</p> <p>Examination graded credit</p> <p>Standard group C. --	--	---

Goals

C1	Acquiring knowledge and skills on issues related to personalized medicine in terms of OMICs.
C2	Developing awareness of science development, the availability of methods and tools in the field of personalized medicine
C3	General development of mental fitness, cognitive ability with particular emphasis on critical thinking
C4	Implementation for self-study and independent work through project classes and papers

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
------	----------------------	---------	---------------------

Knowledge - Student knows and understands:			
W1	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	project
W2	methods of conducting scientific research	O.W5	project
W3	indications for genetic tests performed with the aim of individualizing pharmacotherapy	C.W41	project
W4	the main mechanisms of drug action, and their changes in the system depending on age	C.W36	project
W5	genetic mechanisms for the acquisition of drug resistance by microorganisms and cancer cells	C.W11	project
W6	basics of diagnostics of gene and chromosomal mutations responsible for hereditary and acquired diseases, including neoplastic diseases	C.W9	project
W7	factors influencing the primary and secondary genetic balance of the population	C.W8	project
W8	basic concepts in the field of genetics	C.W1	project
W9	development, structure and functions of the human body in normal and pathological conditions	O.W1	oral examination, project
Skills - Student can:			
U1	plan the diagnostic procedure and interpret its results	O.U3	classroom observation
U2	inspire the learning process of others	O.U6	oral examination, classroom observation
U3	communicate and share knowledge with colleagues in a team	O.U8	oral examination, classroom observation
U4	critically evaluate the results of scientific research and adequately justify the position	O.U9	classroom observation
U5	estimate the risk of a given disease becoming apparent in the offspring based on family predisposition and the influence of environmental factors	C.U5	classroom observation
U6	describe the changes in function of the organism in homeostasis disorder, determine its integrated reaction to physical effort, high and low temperature, blood or water loss, sudden verticalization, transition from sleep to wakefulness	C.U20	classroom observation
Social competences - Student is ready to:			
K1	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	classroom observation
K2	use objective sources of information	O.K7	oral examination, classroom observation
K3	formulate conclusions from own measurements or observations	O.K8	classroom observation

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Introduction to the course	W1, W2, U2, U3	seminar
2.	Genomics and transcriptomics	W2, W3, U2, U3, U4	seminar
3.	Metabolomics	W2, W4, U2, U3, U4	seminar
4.	Epigenomics	W2, W3, W7, W9, U4, U5, U6	seminar
5.	Biological networks	W2, W9, K1, K2, K3	seminar
6.	Human genome sequences, transcriptome and proteome (BLAST)	W5, W6, W7, W8, U1, U2, U3, K2, K3	classes
7.	Genomics of individual differences in the human population (SNP)	W3, W7, W8, W9, U1, U2, U3, U4, U5, K1, K2, K3	classes
8.	Determining the differences in the activity of human genes in pathological states (GEO, ArrayExpress)	W1, W3, W4, W7, U1, U2, U3, U4, U5, K2, K3	classes
9.	miRNA - gene control (miRNet, MirBase)	W2, U1, U5, K1, K2, K3	classes
10.	Human Epigenome and Metabolome (REACTOME, KEGG)	W1, W2, U1, U5, K2, K3	classes
11.	Integration of "OMICS" data -1	W2, U1, K2, K3	classes
12.	Integration of "OMICS" data -2	W2, U1, K2, K3	classes
13.	Individual project - 1	U4, K1, K2, K3	classes
14.	Individual project - 2	U4, K1, K2, K3	classes
15.	Presentation of the projects	W2, U2, K1, K3	classes

Course advanced

Teaching methods:

case study, computer classes, demonstration, discussion, project method, seminar, workshop, practical classes, online practical classes

Activities	Examination methods	Credit conditions
seminar	oral examination	Positive evaluation of the presentation
classes	classroom observation, project	Positive completing all practical and theoretical tasks and presentation of the final project.

Additional info

The student has to do a list of tasks recommended by the teacher for each class. It will be a condition for passing classes. The list of completed tasks will be attached to the e-learning platform in the form of a report after each exercise. In addition, the student will have to prepare the presentation and conduct a short discussion. The speech should last about 20 minutes. The topic will be implemented alone or in teams of two. The course participant will choose an issue from the list of topics proposed by the teacher. The paper should take into account the literature suggested by the teacher. However, it is expected that the topic will be expanded to include information from independent research into available scientific literature.

The assessment will cover:

- degree of understanding of the developed topic
- diligence in preparing the presentation of the paper
- proper selection of source materials from reliable scientific sources
- ability to interest seminar participants in a selected topic
- ability to conduct discussion after a paper

Entry requirements

Completed biochemistry course

Practical aspects of diagnostics of genetically determined diseases

Educational subject description sheet

Goals

C1	Acquiring information about: • principles of work in the cytogenetic laboratory and molecular biology laboratory • basics of medical genetics and methods of nucleic acid research • cytogenetic testing and principles of chromosome analysis • use of genetic databases
C2	Acquiring skills regarding: • basics of work in the cytogenetic laboratory and molecular biology laboratory • nucleic acid testing methods • cytogenetic methods • basic principles of chromosome analysis, interpretation of cytogenetic and molecular test results • use of genetic databases(basics)

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			

W1	development, structure and functions of the human body in normal and pathological conditions	O.W1	group assessment
W2	normal human karyotype and different types of sex determination	C.W3	group assessment
W3	chromosome structure and molecular mutagenic background	C.W4	group assessment
W4	basic concepts in the field of genetics	C.W1	group assessment
W5	the rules for the inheritance of different numbers of traits, the inheritance of quantitative traits, the independent inheritance of traits and the inheritance of non-nuclear genetic information	C.W5	group assessment
W6	basics of diagnostics of gene and chromosomal mutations responsible for hereditary and acquired diseases, including neoplastic diseases	C.W9	group assessment
W7	aberrations of autosomes and heterosomes that cause disease, including oncogenesis and cancer	C.W7	group assessment
W8	phenomena of gene coupling and interaction	C.W2	group assessment
Skills - Student can:			
U1	identify medical problems and prioritize medical management	O.U1	group assessment
U2	plan own learning activities and constantly learn in order to update own knowledge	O.U5	group assessment
U3	analyze genetic crossbreeds and pedigrees of human traits and diseases, and assess the risk of having a child with chromosome aberrations	C.U1	group assessment
U4	make decisions about the need for cytogenetic and molecular tests	C.U3	group assessment
U5	perform morphometric measurements, analyze morphograms and record karyotypes of diseases	C.U4	group assessment
Social competences - Student is ready to:			
K1	use objective sources of information	O.K7	group assessment
K2	implement the principles of professional camaraderie and cooperation in a team of specialists, including representatives of other medical professions, also in a multicultural and multinational environment	O.K9	group assessment

Calculation of ECTS points

--	---	---

Goals

C1	The aim of the course is to broaden the knowledge about the pros and cons of fashionable diets during the last 5 years. Moreover, students will try to prepare menus according to guidelines specific to each diet using a dietetic program. Students will analyze the health effects of that fad diets.
----	--

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	the consequences of inadequate nutrition, including prolonged hunger, excessive food intake and unbalanced diet, and disorders of digestion and absorption of digestive products	C.W50	assignment report, oral credit

W2	the consequences of vitamin or mineral deficiencies and their excess in the body	C.W48	assignment report
Skills - Student can:			
U1	plan own learning activities and constantly learn in order to update own knowledge	O.U5	assignment report, oral credit
U2	inspire the learning process of others	O.U6	assignment report
Social competences - Student is ready to:			
K1	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	assignment report
K2	to be guided by the well-being of a patient	O.K2	assignment report
K3	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	assignment report
K4	promote health-promoting behaviors	O.K6	assignment report
K5	use objective sources of information	O.K7	assignment report
K6	implement the principles of professional camaraderie and cooperation in a team of specialists, including representatives of other medical professions, also in a multicultural and multinational environment	O.K9	assignment report

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
-----	----------------	-----------------------------	------------

1.	Characteristics (online) of the ketogenic diet (part 1). Preparation of the ketogenic diet for a chosen case according to the rules of the ketogenic diet 4:1 (part 2, onsite).	W1, W2, U1, U2, K1, K2, K3, K4, K5, K6	seminar, e-learning seminar
2.	Characteristics and theoretical background of the SIRT diet (part 1, online). Analysis of health outcomes connected with SIRT (part 2, onsite).	W1, W2, U1, U2, K1, K2, K3, K4, K5, K6	seminar, e-learning seminar
3.	Characteristics and theoretical background of the vegetarian diet (part 1, online). Analysis of health outcomes connected with a vegetarian diet (part 2, onsite).	W1, W2, U1, U2, K1, K2, K3, K4, K5, K6	seminar, e-learning seminar
4.	Characteristics and theoretical background of the Copenhagen diet (part 1, online). Analysis of health outcomes connected with the Copenhagen diet (part 2, onsite).	W1, W2, U1, U2, K1, K2, K3, K4, K5, K6	seminar, e-learning seminar
5.	The theoretical background of the Designing Blood Type and Montigniac's diet (part 1 online). Designing the menus for Blood Type and Montigniac's diets (part 2, onsite)	W1, W2, U1, U2, K1, K2, K3, K4, K5, K6	seminar, e-learning seminar
6.	The theoretical background of intermittent fasting (IF) diet, different types of IF diets (online part 1). Analysis of the health outcomes of different types of IF diets in the form of journal club (part 2, onsite).	W1, W2, U1, U2, K1, K2, K3, K4, K5, K6	seminar, e-learning seminar

Course advanced

Teaching methods:

case study, brainstorm, computer classes, discussion, e-learning, case study method, group work, workshop, lecture with multimedia presentation, practical classes

Activities	Examination methods	Credit conditions
seminar	assignment report	Performing all assigned exercises - each diet means 1 exercise in the form of a properly prepared diet in the form of a menu for at least 3 days or analysis of health outcomes in the form of a rapid review.
e-learning seminar	oral credit	Students must take part in the discussion about physiological mechanisms or biochemical pathways which are involved in a particular diet.

Additional info

Student during a course gets 6 tasks. Each task is assessed and graded from 2.0 - 5.0. The final result is the average of all grades gathered during as course. To finalize the course positively students must participate actively, must be present during classes and must achieve positive results from all assigned tasks. In cases of absence (due to health issues or Dean's absent note) student needs to redo the absence in a form of a written assignment directly connected to the missed class. There is no option of an unexcused absence.

Entry requirements

None

Diet-sensitive genes - e-learning course

Educational subject description sheet

Basic information

<p>Department Faculty of Medicine</p> <p>Field of study Medical Program</p> <p>Study level long-cycle master's degree program</p> <p>Study form full-time</p> <p>Education profile general academic</p> <p>Disciplines Medical science</p> <p>ISCED classification 0912 Medicine</p> <p>Subject related to scientific research Yes</p>	<p>Didactic cycle 2021/22</p> <p>Realization year 2023/24</p> <p>Lecture languages English</p> <p>Block obligatory for passing in the course of studies</p> <p>Mandatory elective</p> <p>Examination graded credit</p> <p>Standard group C. --	---	---

Goals

C1	The purpose of this module is to familiarize students with common complex diseases, gene variability and their possible relationship with diet. The module contains basic information about multifactorial diseases such as obesity and type 2 diabetes; describes the various methods used to search for "candidate genes" in complex and polygenic diseases; provides data showing the importance of genetic and environmental factors interacting in predisposition to these diseases.
----	---

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods

--	--	---

Goals

C1	To learn the anatomical, physiological, and neurochemical basis for normal neural function.
C2	To provide medical students with a sufficient background in neuroscience to permit knowledgeable participation in the diagnosis and care of patients with neurological problems.
C3	To learn how to perform and interpret a neurological examination.
C4	To acquire the many personal attributes necessary for becoming an effective physician, including honesty, compassion, reliability, and effective communication skills.

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			

W1	development, structure and functions of the human body in normal and pathological conditions	O.W1	multiple choice test
Skills - Student can:

Goals

C1	Providing students with knowledge on basic concepts of public health ethics and theories of justice. Providing students with theories of public health, ethics of health management, and philosophical, political and legal dimensions of health policies.
C2	Providing students with utilitarian, liberal, communitarian, and egalitarian theories of justice
C3	Providing students with knowledge of quality of health measurements: QALY, DALY and HYE
C4	Providing students with knowledge on distributive justice, utilitarian distribution, health as a fundamental good, social determinants of health, medical triage, perfect and imperfect moral duty, therapeutic futility, principles of respect of autonomy, beneficence, ageism, quality of life.
C5	Providing students with knowledge on legal and ethical guidelines on epidemiological research (CIOMS, GEP)
C6	Providing students with knowledge on health industry in Europe and USA
C7	Providing students with knowledge on ethical aspects of health care system
C8	Providing students with knowledge and skill allowing them to analyze ethical aspects of public health programs and epidemics
C9	Providing students with knowledge and skills allowing them to analyze ethical aspects of public health policies and public health intervention
C10	Enabling students to present and justify an ethical statement concerning public health

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	the social dimension of health and disease, the impact of the social environment (family, social networks) and social inequalities and socio-cultural differences on health, and the role of social stress in health and self-destructive behaviors	D.W1	written credit
W2	social attitudes towards the importance of health, disease, disability and old age, the social consequences of disease and disability and social and cultural barriers, and the concept of quality of life as determined by the state of health	D.W4	written credit
W3	functioning of health care system entities and social role of a physician	D.W8	written credit
W4	principles of motivating the patient to health-promoting behaviors and informing about unsuccessful prognosis	D.W15	written credit
W5	the main concepts, theories, principles and ethical rules serving as a general framework for the proper interpretation and analysis of moral and medical issues	D.W16	written credit
W6	ethical, social and legal conditions for practicing the medical profession and the principles of health promotion, based on scientific evidence and accepted standards	O.W4	written credit
W7	cultural, ethnic and national determinants of human behavior	D.W19	written credit

W8	patient's rights	D.W17	written credit
Skills - Student can:			
U1	recognise the ethical dimension of medical decisions and distinguish between factual and normative aspects	D.U14	classroom observation, written credit
U2	critically evaluate the results of scientific research and adequately justify the position	O.U9	classroom observation, written credit
U3	communicate and share knowledge with colleagues in a team	O.U8	classroom observation, written credit
Social competences - Student is ready to:			
K1	formulate opinions on the various aspects of the professional activity	O.K10	classroom observation
K2	use objective sources of information	O.K7	classroom observation
K3	promote health-promoting behaviors	O.K6	classroom observation

Calculation of ECTS points

Activity form	Activity hours*
seminar	30
preparation for classes	15
preparation for test	15
Student workload	Hours 60
Workload involving teacher	Hours 30

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	The concept of "public health" and ethical dilemmas of public health	W1, W3, W5, W6, W7, W8, U1, U2, U3, K1, K2, K3	seminar
2.	Politics and public health: political justification of public health intervention	W4, W5, W6, W7, U1, U2, U3, K1, K2, K3	seminar
3.	Theories of justice: utilitarianism, liberalism, egalitarianism and communitarianism	W1, W2, W3, W4, W5, W6, W7, W8, U1, U2, U3, K1, K2, K3	seminar
4.	Justice in healthcare: access to healthcare and social determinants of health	W1, W2, W3, W5, W6, W7, W8, U1, U2, U3, K1, K2, K3	seminar

5.	Rationing in healthcare	W1, W2, W3, W4, W5, W6, W7, W8, U1, U2, U3, K1, K2, K3	seminar
6.	Ethical problem of emergency medicine: triage and micro-rationing	W1, W2, W3, W5, W7, W8, U1, U2, U3, K1, K2, K3	seminar
7.	Aging societies and justice	W4, W5, W6, W8, U1, U2, U3, K1, K2, K3	seminar
8.	Ethics and epidemics and catastrophes	W1, W3, W5, W6, W7, W8, U1, U2, U3, K1, K2, K3	seminar
9.	Ethics and transplantation	W1, W2, W3, W6, W7, W8, U1, U2, U3, K1, K2, K3	seminar
10.	Ethical aspects of public health intervention	W1, W2, W5, W7, W8, U1, U2, U3, K1, K2, K3	seminar
11.	Epidmiological research, learning healthcare system and ethics	W3, W6, W7, W8, U1, U2, U3, K1, K2, K3	seminar

Course advanced

Teaching methods:

case study, textual analysis, brainstorm, discussion, educational film, seminar, lecture, lecture with multimedia presentation

Activities	Examination methods	Credit conditions
seminar	classroom observation, written credit	Presence is obligatory. A student can be absent two times, without any excuse. In case of further absence a student is obliged to additional work assigned by a teacher. Students activity impacts his final mark To pass, student has to receive 50% on writing assignment

Entry requirements

Participation to seminars is obligatory. There is no initial requirements.

Limit problems of human existence: suicide, assisted suicide, euthanasia

Goals

C1	The main purpose of this course is to inform students about ethical and legal problems that are related to death and dying in the era of medicalization
C2	Providing students with knowledge on borderline phenomena concerning human existence and their legal as well as ethical aspects
C3	Enabling students to discern ethical aspects of decision-making process at the last state of human life
C4	Enabling students to discern different ethical and moral perspective at the end-of-life moment of human life (family's perspective, patient's perspective and physician's perspective) as well as cultural dimension of death and dying.

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
------	----------------------	---------	---------------------

Knowledge - Student knows and understands:			
W1	the social dimension of health and disease, the impact of the social environment (family, social networks) and social inequalities and socio-cultural differences on health, and the role of social stress in health and self-destructive behaviors	D.W1	classroom observation, essay, project
W2	social attitudes towards the importance of health, disease, disability and old age, the social consequences of disease and disability and social and cultural barriers, and the concept of quality of life as determined by the state of health	D.W4	classroom observation, essay, project
W3	issues related to the adaptation of patients and their families to disease as a difficult situation and to related events, including dying and family mourning processes	D.W11	classroom observation, essay, project
W4	the main concepts, theories, principles and ethical rules serving as a general framework for the proper interpretation and analysis of moral and medical issues	D.W16	classroom observation, essay, project
Skills - Student can:			
U1	take into account the subjective needs and expectations of the patient resulting from socio-cultural conditions in the process of therapeutic management	D.U1	classroom observation, essay
U2	recognise the ethical dimension of medical decisions and distinguish between factual and normative aspects	D.U14	classroom observation, essay
U3	follow the patient's rights	D.U15	classroom observation, essay
Social competences - Student is ready to:			
K1	formulate opinions on the various aspects of the professional activity	O.K10	classroom observation, essay
K2	use objective sources of information	O.K7	classroom observation, essay
K3	take actions towards the patient on the basis of ethical norms and principles, with an awareness of the social determinants and limitations of the disease	O.K4	classroom observation, essay
K4	respect medical confidentiality and patients' rights	O.K3	classroom observation, essay
K5	to be guided by the well-being of a patient	O.K2	classroom observation, essay
K6	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	classroom observation, essay

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	The phenomenon of suicide and its interpretations: medical, philosophical, religious	W1, W2, W3, W4, U1, U2, U3, K1, K2, K3, K4, K5, K6	seminar
2.	The concept and practice of euthanasia.	W1, W2, W3, W4, U1, U2, U3, K1, K2, K3, K4, K5, K6	seminar
3.	Euthanasia of minors: the practice and ethical justification	W1, W2, W3, W4, U1, U2, U3, K1, K2, K3, K4, K5, K6	seminar
4.	The concept and history of palliative care	W1, W2, W3, W4, U1, U2, U3, K1, K2, K3, K4, K5, K6	seminar
5.	The concept and practice of physician assisted suicide	W1, W2, W3, W4, U1, U2, U3, K1, K2, K3, K4, K5, K6	seminar
6.	The concept of "a duty to die"	W1, W2, U1, U2, U3, K1, K2, K3, K4, K5, K6	seminar
7.	Euthanasia and organ transplantation: legal status and moral controversies	W1, W2, W3, W4, U1, U2, U3, K1, K2, K4	seminar
8.	The future of death. How the progress of medicine will impact the way we die?	W1, W2, W3, W4, U1, U2, U3, K1, K2, K3, K4	seminar

Course advanced

Teaching methods:

case study, textual analysis, brainstorm, classes / practicals, discussion, e-learning, educational film, project method, lecture with multimedia presentation

Activities	Examination methods	Credit conditions
seminar	classroom observation, essay, project	Presence is obligatory. A student can be absent two times, without any excuse. In case of further absence a student is obliged to additional work assigned by a teacher. Students activity impacts his final mark (50%) A student has to prepare and perform a presentation (20%, project) and an essay (30%) (a case study).

Entry requirements

Block

Body's circadian rhythm in health and diseases

Educational subject description sheet

Basic information

<p>Department Faculty of Medicine</p> <p>Field of study Medical Program</p> <p>Study level long-cycle master's degree program</p> <p>Study form full-time</p> <p>Education profile general academic</p> <p>Disciplines Medical science</p> <p>ISCED classification 0912 Medicine</p> <p>Subject related to scientific research Yes</p>	<p>Didactic cycle 2021/22</p> <p>Realization year 2023/24</p> <p>Lecture languages English</p> <p>Block obligatory for passing in the course of studies</p> <p>Mandatory elective</p> <p>Examination graded credit</p> <p>Standard group D. Behavioral and social sciences with elements of professionalism</p>
--	--

<p>Periods Semester 5, Semester 6</p>	<p>Examination graded credit</p> <p>Activities and hours seminar: 30</p>	<p>Number of ECTS points 2.0</p>
--	--	---

Goals

C1	As part of this course, you will learn substantive and practical knowledge in the field of physiology and pathophysiology of the body's functioning in the circadian rhythm and its impact on health and well-being. The regulation and adaption mechanisms in the 24-hour internal clock depend on external factors related to light, such as: sleep-wake cycle, physical activity; and internal factors, such as: endocrine control, autonomic nervous system activity, gastrointestinal activity and food intake. Circadian rhythm disturbances are a risk factor for cardiovascular diseases and metabolic disorders. The student will be able to integrate basic knowledge with specialist knowledge and understand the importance of health behaviors and health promotion/disease prevention.
----	--

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
------	----------------------	---------	---------------------

Knowledge - Student knows and understands:			
W1	basic psychological mechanisms of human functioning in health and disease	D.W9	oral answer, essay
W2	the role of stress in etiopathogenesis and disease progression, and the mechanisms for coping with stress	D.W12	oral answer, essay
W3	the principles of health promotion, its tasks and main lines of action, with particular reference to the role of elements of a healthy lifestyle	D.W14	classroom observation, oral answer
W4	basics of evidence-based medicine	D.W23	oral answer, essay
Skills - Student can:			
U1	take into account the subjective needs and expectations of the patient resulting from socio-cultural conditions in the process of therapeutic management	D.U1	classroom observation, oral answer
U2	identify signs of anti-health and self-destructive behavior and respond appropriately to them	D.U2	classroom observation, oral answer
U3	involve the patient in the therapeutic process	D.U7	classroom observation, oral answer
U4	provide advice on therapeutic recommendation compliance and following healthy lifestyle	D.U9	classroom observation, oral answer
U5	apply basic psychological motivational and supportive interventions	D.U11	classroom observation, oral answer
U6	critically analyse medical literature, including in English, and draw conclusions	D.U17	oral answer, essay
Social competences - Student is ready to:			
K1	to be guided by the well-being of a patient	O.K2	classroom observation, oral answer
K2	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	classroom observation, oral answer
K3	promote health-promoting behaviors	O.K6	classroom observation, oral answer
K4	use objective sources of information	O.K7	oral answer, essay
K5	formulate conclusions from own measurements or observations	O.K8	oral answer, essay

Calculation of ECTS points

Activity form	Activity hours*
seminar	30
preparation for classes	10
kształcenie samodzielne	5
information collection	5

preparation of a project	10
Student workload	Hours 60
Workload involving teacher	Hours 30

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Cycles of nature - an introduction to biological rhythms - chronobiology - circadian rhythms in animals, plants, fungi and cyanobacteria - special properties of circadian clocks: self-sustainment in constant conditions, entrainment to zeitgebers and temperature compensation - chronobiological graphs - free running rhythm	W4, U6, K2, K4	seminar
2.	Circadian clock - molecular basis of circadian rhythms - input, oscillator, output - central clock and peripheral clocks - integration of internal and external factors - SCN - clock genes - neuroscience of sleep and wakefulness - organize your time - time management techniques	W4, U6, K2, K4	seminar
3.	Circadian rhymes in scientific research - types of scientific research: (observation, analysis) and exploratory (clinical) - research challenges, problems and paradigms in sleep medicine, theses and hypotheses - ideas and passion - types of scientific texts (science essay) - bioethics in clinical research - scientific databases	W4, U6, K2, K4, K5	seminar
4.	Sleep-wake cycle - two-process model of sleep regulation of sleep, flip-flop switch model - quality and quantity of sleep - physiology of sleep - sleep architecture: NREM sleep, REM sleep, dreams - polysomnography, hypnogram, norms, assessment of sleep stages (AASM) - age-related changes in sleep	W1, W4, U6, K2, K4, K5	seminar
5.	Diagnosis of sleep-wake disorders - approach to the patient with sleep disorder - screening sleep questionnaires - standard procedures in sleep medicine and practice guideline: polysomnography, actigraphy, MSLT	W1, W3, W4, U2, U6, K1, K2, K4, K5	seminar

6.	<p>ICSD-3 International Classification of Sleep Disorders</p> <ul style="list-style-type: none"> - DSM-5 The Diagnostic and Statistical Manual of Mental Disorders, American Psychiatric Association - dyssomnias (insomnia, hypersomnia, circadian rhythm sleep disorders) - parasomnias (abnormalities that occur while falling asleep, sleeping or during arousal from sleep) - breathing-related sleep disorders - sleep related movement disorders - sleep-related problems in common medical conditions 	W1, W2, W3, W4, U1, U2, U3, U4, U5, U6, K1, K2, K3, K4, K5	seminar
7.	<p>Circadian rhythm sleep disorder</p> <ul style="list-style-type: none"> - ASPS, DSPS - chronotype vs social life; how light affects health - shift work sleep disorder - seasonal affective disorders - circadian rhythm and light exposure impact on human performance and safety - treatment of sleep disorders as well as circadian rhythm disorders - behavioral therapies - sleep hygiene 	W1, W2, W3, W4, U1, U2, U3, U4, U5, U6, K1, K2, K3, K4, K5	seminar
8.	<p>Chronobiology and the impact of rhythm on cardiovascular system and on autonomic nervous system</p> <ul style="list-style-type: none"> - circadian regulation of physiology (neuroendocrine, metabolic and immune regulation) - circadian regulation of mood, behavior and the impact of stress (drowsiness, memory, learning, cognitive and motor functions) - day-night variation in blood pressure and heart rate - disruption of the circadian rhythm as a risk factor for cardiovascular disease - treatment: chronomedicine in clinical practice, chronopharmacology, chronochemotherapy 	W1, W2, W4, U2, U6, K1, K2, K4, K5	seminar
9.	<p>Effect of circadian rhythm on the digestive system and metabolism</p> <ul style="list-style-type: none"> - circadian regulation of metabolism: glucose, insulin - food as a time signal for the body clock in cell - circadian rhythm disturbances as a risk factor for metabolic disorders, obesity and type 2 DM - treatment: chronomedicine in clinical practice, chronopharmacology, chronochemotherapy 	W1, W4, U2, U6, K1, K2, K4, K5	seminar
10.	<p>Examine your circadian rhythm in practice: 24-hour ECG monitoring, 24-hour actigraphic examination.</p> <ul style="list-style-type: none"> - Course evaluation. 	W1, W2, W3, W4, U1, U2, U3, U4, U5, U6, K1, K2, K3, K4, K5	seminar

Course advanced

Teaching methods:

case study, brainstorm, discussion, e-learning, educational film, staging, problem solving method, case study method, group work, seminar, participation in research, lecture with multimedia presentation, PBL Problem Based Learning, Tutoring

Activities	Examination methods	Credit conditions
seminar	classroom observation, oral answer, essay	- positive assessment on the basis of participation and activity during classes - final credit - scientific essay A scientific essay analyzes an individually selected scientific issue or problem related to the knowledge covered during the course on the basis of scientific arguments and factual information, and presents some individual opinions on the matter as well - class attendance (1 absence possible)

Business plan and marketing communication

Educational subject description sheet

Basic information

<p>Department Faculty of Medicine</p> <p>Field of study Medical Program</p> <p>Study level long-cycle master's degree program</p> <p>Study form full-time</p> <p>Education profile general academic</p> <p>Disciplines Medical science</p> <p>ISCED classification 0414 Marketing and advertising</p>	<p>Didactic cycle 2021/22</p> <p>Realization year 2023/24</p> <p>Lecture languages English</p> <p>Block obligatory for passing in the course of studies</p> <p>Mandatory elective</p> <p>Examination graded credit</p> <p>Standard group D. Goals

C1	Delivery of practical knowledge, skills and social competencies rules allowing for running businesses in increasingly competitive environment in medical sector.
----	--

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	functioning of health care system entities and social role of a physician	D.W8	oral answer, project
Skills - Student can:			

U1	plan own learning activities and constantly learn in order to update own knowledge	O.U5	oral answer, project
U2	communicate and share knowledge with colleagues in a team	O.U8	oral answer, project
U3	be able to work in a multiprofessional team, in a multicultural and multinational environment	D.U21	oral answer, project
Social competences - Student is ready to:			
K1	formulate conclusions from own measurements or observations	O.K8	oral answer, project
K2	formulate opinions on the various aspects of the professional activity	O.K10	oral answer, project
K3	implement the principles of professional camaraderie and cooperation in a team of specialists, including representatives of other medical professions, also in a multicultural and multinational environment	O.K9	oral answer, project

Calculation of ECTS points

Activity form	Activity hours*
e-learning lecture	10
classes	20
information collection	5
consultations with lecturer	2
preparation for classes	5
preparation of multimedia presentation	8
Student workload	Hours 50
Workload involving teacher	Hours 30

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Managerial skills and competences among physicians	W1, U1, U2, U3, K1, K2, K3	classes, e-learning lecture
2.	Functions of effective manager in health care sector - review	W1, U1, U2, U3, K1, K2, K3	classes, e-learning lecture

3.	Determinants of competitive advantage in medical sector	W1, U1, U2, U3, K1, K2, K3	classes, e-learning lecture
4.	Innovation in health care system - worldwide perspective	W1, U1, U2, U3, K1, K2, K3	classes, e-learning lecture
5.	Best practices in health care management	W1, U1, U2, U3, K1, K2, K3	classes, e-learning lecture
6.	Stakeholder's analysis and management in medical business projects	W1, U1, U2, U3, K1, K2, K3	classes, e-learning lecture
7.	Strategic analysis in medical sector - review and analysis of tools	W1, U1, U2, U3, K1, K2, K3	classes, e-learning lecture
8.	Risk management in medical business	W1, U1, U2, U3, K1, K2, K3	classes, e-learning lecture
9.	Role of strategic planning in medicine - discussion and best practices	W1, U1, U2, U3, K1, K2, K3	classes, e-learning lecture
10.	Business goals and plans in medical business - workshops	W1, U1, U2, U3, K1, K2, K3	classes, e-learning lecture
11.	Business model and strategies - similarities and differences	W1, U1, U2, U3, K1, K2, K3	classes, e-learning lecture
12.	Financial plan of medical practice budget	W1, U1, U2, U3, K1, K2, K3	classes, e-learning lecture
13.	Marketing communication and strategies in medicine	W1, U1, U2, U3, K1, K2, K3	classes, e-learning lecture
14.	Role of controlling in medical entrepreneurship and health care sector	W1, U1, U2, U3, K1, K2, K3	classes, e-learning lecture
15.	How to create in practice (step by step) professional business plan - workshops for future physicians	W1, U1, U2, U3, K1, K2, K3	classes, e-learning lecture

Course advanced

Teaching methods:

case study, textual analysis, brainstorm, classes / practicals, discussion, e-learning, problem solving method, project method, case study method, presentation, group work, workshop, lecture with multimedia presentation, practical classes, Mentoring

Activities	Examination methods	Credit conditions
e-learning lecture	oral answer, project	Active participation during lectures
classes	oral answer, project	Preparation and presentation of business plan

Additional info

Active participation during the whole course. Preparation and presentation of business plan including strategic recommendation, communication with different internal and external stakeholders and proposal of interpersonal relations model in hospital/medical centre/ corresponding to future professional student's plans of their career as doctors.

Entry requirements

No entry requirements

Management and decision making

Educational subject description sheet

Basic information

<p>Department Faculty of Medicine</p> <p>Field of study Medical Program</p> <p>Study level long-cycle master's degree program</p> <p>Study form full-time</p> <p>Education profile general academic</p> <p>Disciplines Medical science</p> <p>ISCED classification 0413 Management and administration</p>	<p>Didactic cycle 2021/22</p> <p>Realization year 2023/24</p> <p>Lecture languages English</p> <p>Block obligatory for passing in the course of studies</p> <p>Mandatory elective</p> <p>Examination graded credit</p> <p>Standard group D. Behavioral and social sciences with elements of professionalism</p>
--	--

<p>Periods Semester 5, Semester 6</p>	<p>Examination graded credit</p> <p>Activities and hours seminar: 20 classes: 10</p>	<p>Number of ECTS points 2.0</p>
--	--	---

Goals

G1	To familiarize students with basic models of leadership
G2	To familiarize students with basic models of decision making

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	principles of teamwork	D.W18	classroom observation, project

W2	cultural, ethnic and national determinants of human behavior	D.W19	group assessment, project
Skills - Student can:			
U1	inspire the learning process of others	O.U6	group assessment
U2	communicate and share knowledge with colleagues in a team	O.U8	group assessment
U3	build an atmosphere of trust throughout the entire diagnostic and treatment process	D.U4	classroom observation, group assessment
U4	communicate with colleagues with constructive feedback and support	D.U12	classroom observation, group assessment
U5	apply basic psychological motivational and supportive interventions	D.U11	classroom observation, group assessment
U6	comply with ethical standards in professional activities	D.U13	classroom observation, group assessment
U7	be able to work in a multiprofessional team, in a multicultural and multinational environment	D.U21	group assessment
Social competences - Student is ready to:			
K1	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	classroom observation
K2	use objective sources of information	O.K7	classroom observation
K3	formulate conclusions from own measurements or observations	O.K8	classroom observation, group assessment
K4	implement the principles of professional camaraderie and cooperation in a team of specialists, including representatives of other medical professions, also in a multicultural and multinational environment	O.K9	classroom observation, group assessment
K5	assume responsibility for decisions taken in the course of their professional activities, including in terms of the safety of oneself and others	O.K11	classroom observation, group assessment

Calculation of ECTS points

Activity form	Activity hours*
seminar	20
classes	10
case analysis	5
preparation for classes	10
preparation of a project	10
participation in simulation games	5
Student workload	Hours 60

Workload involving teacher	Hours 30
Practical workload	Hours 20

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Attributes of the leader	W1, U2, K1, K2	classes, seminar
2.	Tasks of the leader	W1, U1, U2, U4	classes, seminar
3.	Working with people	U1, U2, K3	classes, seminar
4.	Decision making	K3, K5	classes, seminar
5.	Conflict orchestration	U3, U4, U5, K4	classes, seminar
6.	Team work	W1, U2, U7, K4	classes, seminar
7.	Problem solving	W2, U3, U5, U6, K2	classes, seminar
8.	Change management	U4, U5, K3, K4	classes, seminar
9.	Difficulties and risks of leadership	U5, U6, U7, K1, K5	classes, seminar

Course advanced

Teaching methods:

case study, textual analysis, brainstorm, classes / practicals, discussion, educational game, group work, seminar, lecture with multimedia presentation

Activities	Examination methods	Credit conditions
seminar	classroom observation, group assessment	good understanding of obligatory literature and active participation in the class room activities
classes	classroom observation, group assessment, project	min 50% of points for change management project or leadership skills assessment.

Additional info

This course is about leadership and decision making. We will discuss different alternatives and preferred models of leadership with their possible applications. Strong emphasis will be put on self reflection and self development. The leader is usually a common denominator in all failed projects of the past. Cognitive errors, judgement lapses and assessment bias can lead to professional and private failures. We will learn about strategies to minimize some of factors that increase our decision errors.

Knowledge - Student knows and understands:			
W1	methods of conducting scientific research	O.W5	essay
W2	basics of evidence-based medicine	D.W23	essay

W3	the process of shaping new specialties in the field of scientific discipline - medical sciences and achievements of leading representatives of Polish and world medicine	D.W22	essay
W4	the characteristics of modern medicine and its most important discoveries	D.W21	essay
W5	principles of teamwork	D.W18	essay
Skills - Student can:			
U1	inspire the learning process of others	O.U6	essay
U2	plan own learning activities and constantly learn in order to update own knowledge	O.U5	essay
U3	critically evaluate the results of scientific research and adequately justify the position	O.U9	essay
U4	be able to work in a multiprofessional team, in a multicultural and multinational environment	D.U21	essay
U5	demonstrate responsibility for one's own professional development, contribute to the further development of sciences, transfer own knowledge to others	D.U22	essay
U6	critically analyse medical literature, including in English, and draw conclusions	D.U17	essay
U7	comply with ethical standards in professional activities	D.U13	essay
U8	communicate with colleagues with constructive feedback and support	D.U12	essay
Social competences - Student is ready to:			
K1	formulate opinions on the various aspects of the professional activity	O.K10	essay
K2	assume responsibility for decisions taken in the course of their professional activities, including in terms of the safety of oneself and others	O.K11	essay
K3	formulate conclusions from own measurements or observations	O.K8	essay
K4	use objective sources of information	O.K7	essay
K5	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	essay
K6	implement the principles of professional camaraderie and cooperation in a team of specialists, including representatives of other medical professions, also in a multicultural and multinational environment	O.K9	essay

Goals

C1	To enable students to gain knowledge in the field of disability studies, that focus on the social dimension of disability, especially social processes that influence the independent living.
C2	Acquiring the ability to analyze and understand the social dimensions of the situation of people with disabilities.
C3	Acquiring competence in analyzing and interpreting the global and local social processes connected to independent living of disabled persons.
C4	The course is designed to acquaint students with contemporary debates on disability and independent living. We will discuss global and local social transformations that affect the lives of disabled citizens. The course will be initiated by studying different approaches to disability (the medical model, the social model, the human rights-based approach). Then using the life course approach we will discuss the most important issues connected with disability on different stages of life: childhood, youth, adulthood and old age. We will analyze how contemporary discourses on disability shape the situation of disabled patients including development in accessibility, IT, public policies as well as disability rights movement. Our discussions will be based on international sociological research and the Convention on the Rights of Persons with Disabilities (CRPD). We will discuss dilemmas and diverse solutions that support independent living, and tackle topics such as personal assistance, supported housing, accessibility, parenthood, and reproductive rights and diversity within disability community. Discussing practical solutions will allow students to understand how disabled persons practice independent living, what challenges they face and how to understand the role of medical professionals in the changing social context.

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	the social dimension of health and disease, the impact of the social environment (family, social networks) and social inequalities and socio-cultural differences on health, and the role of social stress in health and self-destructive behaviors	D.W1	classroom observation, test, written credit
W2	social factors influencing behaviour in health and disease, particularly in chronic disease	D.W2	classroom observation, test, written credit
W3	forms of violence, models explaining domestic and institutional violence, the social determinants of the various forms of violence and the role of the doctor in recognizing it	D.W3	classroom observation, test, written credit
W4	social attitudes towards the importance of health, disease, disability and old age, the social consequences of disease and disability and social and cultural barriers, and the concept of quality of life as determined by the state of health	D.W4	classroom observation, test, written credit
W5	functioning of health care system entities and social role of a physician	D.W8	classroom observation, test, written credit
W6	principles and methods of communication with the patient and his/her family, which are aimed at building empathic, trust-based relationships	D.W5	classroom observation, test, written credit
W7	psychosocial consequences of hospitalization and chronic disease	D.W7	classroom observation, test, written credit
W8	the role of the patient's family in the treatment process	D.W10	classroom observation, test, written credit

W9	issues related to the adaptation of patients and their families to disease as a difficult situation and to related events, including dying and family mourning processes	D.W11	classroom observation, test, written credit
W10	cultural, ethnic and national determinants of human behavior	D.W19	classroom observation, test, written credit
W11	standards relating to patients' rights	D.W24	classroom observation, test, written credit
Skills - Student can:			
U1	take into account the subjective needs and expectations of the patient resulting from socio-cultural conditions in the process of therapeutic management	D.U1	classroom observation, written credit
U2	build an atmosphere of trust throughout the entire diagnostic and treatment process	D.U4	classroom observation, written credit
U3	provide advice on therapeutic recommendation compliance and following healthy lifestyle	D.U9	classroom observation, written credit
U4	follow the patient's rights	D.U15	classroom observation, written credit
U5	take action to improve the quality of life of patients and prevent it from deteriorating in the future	D.U19	classroom observation, written credit
U6	inspire the learning process of others	O.U6	classroom observation, written credit
U7	choose treatment that minimizes the social consequences for the patient	D.U3	classroom observation, written credit
U8	talk to the adult patient, child and family using active listening and empathy techniques and talk to the patient about his or her life situation	D.U5	classroom observation, written credit
U9	show responsibility for improving your qualifications and transferring knowledge to others	D.U16	classroom observation, written credit
U10	identify risk factors for violence, recognize violence and respond accordingly	D.U10	classroom observation, written credit
Social competences - Student is ready to:			
K1	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	classroom observation
K2	respect medical confidentiality and patients' rights	O.K3	classroom observation
K3	take actions towards the patient on the basis of ethical norms and principles, with an awareness of the social determinants and limitations of the disease	O.K4	classroom observation
K4	implement the principles of professional camaraderie and cooperation in a team of specialists, including representatives of other medical professions, also in a multicultural and multinational environment	O.K9	classroom observation
K5	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	classroom observation

Goals

C1	The aim of the course is to discuss an overview of different international health communication theories and to assess the feasibility of incorporating therapeutic values contained in medical models of communication into clinical practice based on an analysis of empirical research (taking into account the following models: biomedical, holistic, humanistic, linear, interactive and transactional). In order to communicate effectively with patients, it is necessary to acquire professional knowledge on the principles of medical communication models and the ability to apply them in practice.

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			

W1	standards relating to patients' rights	D.W24	oral answer
W2	principles of motivating the patient to health-promoting behaviors and informing about unsuccessful prognosis	D.W15	classroom observation
W3	functioning of health care system entities and social role of a physician	D.W8	oral answer, multiple choice test
W4	the role of the patient's family in the treatment process	D.W10	classroom observation
W5	the importance of verbal and non-verbal communication in the process of communicating with the patient and the notion of trust in the interaction with the patient	D.W6	group assessment, assignment report, multiple choice test
W6	principles and methods of communication with the patient and his/her family, which are aimed at building empathic, trust-based relationships	D.W5	classroom observation, group assessment
W7	the social dimension of health and disease, the impact of the social environment (family, social networks) and social inequalities and socio-cultural differences on health, and the role of social stress in health and self-destructive behaviors	D.W1	oral answer, multiple choice test
W8	social factors influencing behaviour in health and disease, particularly in chronic disease	D.W2	oral answer
W9	forms of violence, models explaining domestic and institutional violence, the social determinants of the various forms of violence and the role of the doctor in recognizing it	D.W3	oral answer
W10	social attitudes towards the importance of health, disease, disability and old age, the social consequences of disease and disability and social and cultural barriers, and the concept of quality of life as determined by the state of health	D.W4	oral answer, multiple choice test
W11	ethical, social and legal conditions for practicing the medical profession and the principles of health promotion, based on scientific evidence and accepted standards	O.W4	oral answer, multiple choice test
W12	patient's rights	D.W17	group assessment, assignment report
Skills - Student can:			
U1	communicate with the patient and his family in an atmosphere of trust, taking into account the needs of the patient	O.U7	classroom observation
U2	critically evaluate the results of scientific research and adequately justify the position	O.U9	oral answer
U3	take into account the subjective needs and expectations of the patient resulting from socio-cultural conditions in the process of therapeutic management	D.U1	oral answer
U4	talk to the adult patient, child and family using active listening and empathy techniques and talk to the patient about his or her life situation	D.U5	classroom observation

U5	inform the patient about the purpose, course and possible risks of the proposed diagnostic or therapeutic measures, and obtain his or her informed consent to take these measures	D.U6	classroom observation, group assessment
U6	involve the patient in the therapeutic process	D.U7	classroom observation
U7	provide the patient and his or her family with information about unfavorable prognosis	D.U8	classroom observation, group assessment
U8	provide advice on therapeutic recommendation compliance and following healthy lifestyle	D.U9	classroom observation
U9	comply with ethical standards in professional activities	D.U13	classroom observation
U10	follow the patient's rights	D.U15	classroom observation
U11	recognise the ethical dimension of medical decisions and distinguish between factual and normative aspects	D.U14	classroom observation, multiple choice test
U12	show responsibility for improving your qualifications and transferring knowledge to others	D.U16	classroom observation
U13	communicate with colleagues with constructive feedback and support	D.U12	classroom observation
Social competences - Student is ready to:			
K1	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	classroom observation
K2	to be guided by the well-being of a patient	O.K2	assignment report
K3	respect medical confidentiality and patients' rights	O.K3	group assessment, assignment report
K4	take actions towards the patient on the basis of ethical norms and principles, with an awareness of the social determinants and limitations of the disease	O.K4	oral answer
K5	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	oral answer
K6	promote health-promoting behaviors	O.K6	group assessment, oral answer
K7	use objective sources of information	O.K7	classroom observation
K8	formulate conclusions from own measurements or observations	O.K8	classroom observation
K9	implement the principles of professional camaraderie and cooperation in a team of specialists, including representatives of other medical professions, also in a multicultural and multinational environment	O.K9	classroom observation
K10	formulate opinions on the various aspects of the professional activity	O.K10	group assessment, oral answer

Cele kształcenia dla przedmiotu

C1	Studenci zapoznają się z etycznymi aspektami badań naukowych z udziałem ludzi w biomedycynie.
----	---

Efekty uczenia się dla przedmiotu

Kod	Efekty w zakresie	Kierunkowe efekty uczenia się	Metody weryfikacji
Wiedzy - Student zna i rozumie:			
W1	etyczne, społeczne i prawne uwarunkowania wykonywania zawodu lekarza oraz zasady promocji zdrowia, a swoją wiedzę opiera na dowodach naukowych i przyjętych normach	O.W4	zaliczenie pisemne

W2	główne pojęcia, teorie, zasady i reguły etyczne służące jako ogólne ramy właściwego interpretowania i analizowania zagadnień moralno-medycznych	D.W16	zaliczenie pisemne
W3	podstawy medycyny opartej na dowodach	D.W23	zaliczenie pisemne
W4	normy odnoszące się do praw pacjenta	D.W24	zaliczenie pisemne
Umiejętności - Student potrafi:			
U1	krytycznie oceniać wyniki badań naukowych i odpowiednio uzasadniać stanowisko	O.U9	obserwacja pracy studenta, zaliczenie pisemne
U2	przestrzegać wzorców etycznych w działaniach zawodowych	D.U13	obserwacja pracy studenta, zaliczenie pisemne
U3	rozpoznawać etyczny wymiar decyzji medycznych i odróżniać aspekty faktualne od normatywnych	D.U14	obserwacja pracy studenta, zaliczenie pisemne
U4	przestrzegać praw pacjenta	D.U15	obserwacja pracy studenta, zaliczenie pisemne
Kompetencje społecznych - Student jest gotów do:			
K1	kierowania się dobrem pacjenta	O.K2	obserwacja pracy studenta
K2	podejmowania działań wobec pacjenta w oparciu o normy i zasady etyczne, ze świadomością społecznych uwarunkowań i ograniczeń wynikających z choroby	O.K4	obserwacja pracy studenta

--	--	---

Goals

C1	Providing knowledge about the cooperation between the doctor and the patient.
C2	Development of professional communication skills allowing for better treatment outcomes.
C3	Development of skills that help to alleviate the stress of disease and treatment, and to stimulate patients of all ages to cooperate and comply with medical recommendations.

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	social factors influencing behaviour in health and disease, particularly in chronic disease	D.W2	test

W2	the social dimension of health and disease, the impact of the social environment (family, social networks) and social inequalities and socio-cultural differences on health, and the role of social stress in health and self-destructive behaviors	D.W1	test
W3	the importance of verbal and non-verbal communication in the process of communicating with the patient and the notion of trust in the interaction with the patient	D.W6	test
W4	principles and methods of communication with the patient and his/her family, which are aimed at building empathic, trust-based relationships	D.W5	test
W5	psychosocial consequences of hospitalization and chronic disease	D.W7	test
W6	the role of the patient's family in the treatment process	D.W10	test
W7	principles of motivating the patient to health-promoting behaviors and informing about unsuccessful prognosis	D.W15	test
Skills - Student can:			
U1	build an atmosphere of trust throughout the entire diagnostic and treatment process	D.U4	test
U2	take into account the subjective needs and expectations of the patient resulting from socio-cultural conditions in the process of therapeutic management	D.U1	test
U3	talk to the adult patient, child and family using active listening and empathy techniques and talk to the patient about his or her life situation	D.U5	test
U4	inform the patient about the purpose, course and possible risks of the proposed diagnostic or therapeutic measures, and obtain his or her informed consent to take these measures	D.U6	test
U5	provide the patient and his or her family with information about unfavorable prognosis	D.U8	test
U6	provide advice on therapeutic recommendation compliance and following healthy lifestyle	D.U9	test
U7	apply basic psychological motivational and supportive interventions	D.U11	test
Social competences - Student is ready to:			
K1	promote health-promoting behaviors	O.K6	test

Calculation of ECTS points

Activity form	Activity hours*
seminar	30
analysis of the research material	10

preparation for test	10
participation in simulation games	10
Student workload	Hours 60
Workload involving teacher	Hours 30
Practical workload	Hours 20

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Understanding the patient in terms of a bio-psycho-social model and the importance of psychological interactions, in parallel with other medical activities.	W1, W2, W5	seminar
2.	Psychological issues of the doctor - patient - doctor - patient communication, what helps and what disturbs	W3, W4, W7, U1, K1	seminar
3.	Communication errors doctor - patient and patient's family Communication errors doctor - patient and patient's family Communication errors doctor - patient and patient's family	W3, W4, U1, U2	seminar
4.	Principles of building a therapeutic relationship	W4, U1, U2, U3	seminar
5.	The meaning of the first impressions and other communication phenomena	W1, W2, W3, W4, U1, U2	seminar
6.	Principles to help build a good relationship with the patient's family	W2, W4, W6, U3, U5	seminar
7.	Factors influencing compliance. Types of noncompliance. Factors influencing the patient's attitudes and beliefs to treatment	W7, U6, U7, K1	seminar
8.	The importance of stigma and rejection and disease	W1, W2, W5, U2	seminar
9.	Cooperation between a doctor and a patient of different ages	U3, K1	seminar
10.	Principles of cooperation when the patient is impatient with the lack of treatment results. Ways of communicating support and working towards changing the patient's negative beliefs. Conducting a conversation about problems with cooperation, ways of motivating to change behavior to pro-health. Conversation on difficult topics, including the algorithm for transmitting unsuccessful information	W3, W6, W7, U4, U5, U6, U7, K1	seminar
11.	Opportunities and limitations related to maintaining therapeutic contact through various communication channels	W3, U2, U6	seminar

Course advanced

Teaching methods:

brainstorm, seminar, simulation, workshop

Activities	Examination methods	Credit conditions
seminar	test	test

Additional info

Passing the knowledge test - 16 questions - multiple choice test

ASSESSMENT:

Max = 16 points; Minimum to pass: 9 points

9-10pts = dst; 11pt = dst +; 12-13pts = db; 14points = db +; 15-16 points = very good

Entry requirements

Interest in classes related to establishing professional contact with the patient and his family.

Motivation for classes.

Attendance at seminar classes.

Medical simulations. Teamwork and communication in an international environment

Educational subject description sheet

Basic information

<p>Department Faculty of Medicine</p> <p>Field of study Medical Program</p> <p>Study level long-cycle master's degree program</p> <p>Study form full-time</p> <p>Education profile general academic</p> <p>Disciplines Medical science</p> <p>ISCED classification No ISCED cat. found</p>	<p>Didactic cycle 2021/22</p> <p>Realization year 2023/24</p> <p>Lecture languages English</p> <p>Block obligatory for passing in the course of studies</p> <p>Mandatory elective</p> <p>Examination graded credit</p> <p>Standard group D. ---	--

<p>Periods Semester 5, Semester 6</p>	<p>Examination graded credit</p> <p>Activities and hours classes: 20 seminar: 10</p>	<p>Number of ECTS points 2.0</p>
--	--	---

Goals

C1	-Analyzing the needs of the faculty participants -Showing an example of working on medical missions and in international teams -Analyzing the structure of debriefing for the participants
C2	-Integration -CRM -exposure to equipment in simulation rooms -practicing technical skills
C3	-To familiarize students with aspects of caring for a patient at risk of cardiac arrest. -To familiarize students with the opportunities provided by high-fidelity simulation during exercise. -To make students aware of the possibilities and limitations of the use of English at work.
C4	-knowledge in the field of professionalism -summarizing the class

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	development, structure and functions of the human body in normal and pathological conditions	O.W1	practical examination
W2	symptoms and course of diseases	O.W2	practical examination
W3	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	practical examination
W4	ethical, social and legal conditions for practicing the medical profession and the principles of health promotion, based on scientific evidence and accepted standards	O.W4	practical examination
W5	psychosocial consequences of hospitalization and chronic disease	D.W7	practical examination
W6	functioning of health care system entities and social role of a physician	D.W8	practical examination
W7	mechanisms, objectives and treatment options for psychoactive substance dependence	D.W13	practical examination
W8	the role of stress in etiopathogenesis and disease progression, and the mechanisms for coping with stress	D.W12	practical examination
W9	the principles of health promotion, its tasks and main lines of action, with particular reference to the role of elements of a healthy lifestyle	D.W14	practical examination
W10	cultural, ethnic and national determinants of human behavior	D.W19	written examination, practical examination
W11	principles of teamwork	D.W18	practical examination
W12	the characteristics of modern medicine and its most important discoveries	D.W21	written examination, practical examination
Skills - Student can:			
U1	identify medical problems and prioritize medical management	O.U1	practical examination
U2	plan the diagnostic procedure and interpret its results	O.U3	practical examination
U3	identify life-threatening conditions that require immediate medical intervention	O.U2	practical examination
U4	plan own learning activities and constantly learn in order to update own knowledge	O.U5	practical examination
U5	implement appropriate and safe therapeutic treatment and predict its effects	O.U4	practical examination
U6	communicate with the patient and his family in an atmosphere of trust, taking into account the needs of the patient	O.U7	practical examination
U7	communicate and share knowledge with colleagues in a team	O.U8	practical examination

U8	take into account the subjective needs and expectations of the patient resulting from socio-cultural conditions in the process of therapeutic management	D.U1	practical examination
U9	choose treatment that minimizes the social consequences for the patient	D.U3	practical examination
U10	build an atmosphere of trust throughout the entire diagnostic and treatment process	D.U4	practical examination
U11	talk to the adult patient, child and family using active listening and empathy techniques and talk to the patient about his or her life situation	D.U5	practical examination
U12	inform the patient about the purpose, course and possible risks of the proposed diagnostic or therapeutic measures, and obtain his or her informed consent to take these measures	D.U6	practical examination
U13	involve the patient in the therapeutic process	D.U7	practical examination
U14	provide the patient and his or her family with information about unfavorable prognosis	D.U8	practical examination
U15	apply basic psychological motivational and supportive interventions	D.U11	practical examination
U16	communicate with colleagues with constructive feedback and support	D.U12	practical examination
U17	follow the patient's rights	D.U15	practical examination
U18	communicate with the patient in one of the foreign languages at B2+ level of the Common European Framework of Reference for Languages	D.U18	written examination, practical examination
U19	be able to work in a multiprofessional team, in a multicultural and multinational environment	D.U21	practical examination
U20	demonstrate responsibility for one's own professional development, contribute to the further development of sciences, transfer own knowledge to others	D.U22	written examination, practical examination
Social competences - Student is ready to:			
K1	respect medical confidentiality and patients' rights	O.K3	practical examination
K2	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	written examination, practical examination
K3	formulate opinions on the various aspects of the professional activity	O.K10	written examination, practical examination
K4	assume responsibility for decisions taken in the course of their professional activities, including in terms of the safety of oneself and others	O.K11	practical examination
K5	to be guided by the well-being of a patient	O.K2	practical examination

Calculation of ECTS points

classes	20

seminar	10
preparation for classes	10
professional practice	10
analysis of the research material	1
case analysis	6
preparation for examination	3
Student workload	Hours 60
Workload involving teacher	Hours 30
Practical workload	Hours 37

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Seminar using the CLIL approach Storytelling - Self-experiences - stories of medical missions and work abroad. Stories of students and the instructor. Work in 2-person teams. Selection of 2 topics, on the basis of which we will write medical simulation scenarios together. Analysis of excerpts from a film about a medical mission, after the film debriefing - presentation of structure "Our culture" Medical missions conducted in Poland. Students in new pairs prepare 5 examples of missionaries and doctors working abroad.	W10, W11, W12, U19, U20, K1, K2, K3, K4, K5	seminar
2.	Integration activities bridge building/marshmallow challenge 5x5 CRM familiarization with equipment, simulation room workshops on elements selected by students.	W10, W11, U10, U19, U20, K3	classes
3.	Integration activities bridge building/marshmallow challenge 5x5 CRM familiarization with equipment, simulation room workshops on elements selected by students.	W10, W11, U10, U20, U9, K3	classes
4.	Visit to a foundation conducting international projects/meeting with a person participating in international projects.	W10, U18, U19, U4, U8, K2	classes

5.	Conducting 4 scenarios with an English-speaking patient and practiced and debriefed in English.	W1, W10, W11, W12, W2, W3, W4, W5, W6, W7, W8, W9, U1, U10, U11, U12, U13, U14, U15, U16, U17, U18, U19, U2, U20, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4, K5	classes
6.	Professionalism - simulations using "GPCF descriptors" Conducting 4 scenarios with an English-speaking patient and practiced and debriefed in English. Summary of the faculty.	W1, W10, W11, W12, W2, W3, W4, W5, W6, W7, W8, W9, U1, U10, U11, U12, U13, U14, U15, U16, U17, U18, U19, U2, U20, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4, K5	classes

Course advanced

Teaching methods:

case study, brainstorm, clinical classes, laboratories (labs), classes in simulated conditions, demonstration, discussion, educational game, foreign language course, problem solving method, case study method, presentation, group work, professional practice, seminar, simulation, low fidelity simulation, high fidelity simulation, lecture with multimedia presentation, practical classes

Activities	Examination methods	Credit conditions
classes	practical examination	Participation in simulated scenarios
seminar	written examination	Essey 500 words

Entry requirements

Ability to examine a patient and take a history.
Ability to perform a physical examination based on the ABCDE scheme.

How to deal with difficult behaviours

Educational subject description sheet

Basic information

Goals

C1	The aim of the course is to teach students how to deal with the aggressive behaviours of patients and their families.
----	---

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			

W1	ethical, social and legal conditions for practicing the medical profession and the principles of health promotion, based on scientific evidence and accepted standards	O.W4	oral answer, project
W2	forms of violence, models explaining domestic and institutional violence, the social determinants of the various forms of violence and the role of the doctor in recognizing it	D.W3	oral answer
W3	social attitudes towards the importance of health, disease, disability and old age, the social consequences of disease and disability and social and cultural barriers, and the concept of quality of life as determined by the state of health	D.W4	oral answer, project
W4	basic psychological mechanisms of human functioning in health and disease	D.W9	oral answer
Skills - Student can:			
U1	communicate with the patient and his family in an atmosphere of trust, taking into account the needs of the patient	O.U7	oral answer, project
U2	communicate and share knowledge with colleagues in a team	O.U8	oral answer
U3	communicate with colleagues with constructive feedback and support	D.U12	oral answer
U4	identify risk factors for violence, recognize violence and respond accordingly	D.U10	oral answer, project
Social competences - Student is ready to:			
K1	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	oral answer
K2	take actions towards the patient on the basis of ethical norms and principles, with an awareness of the social determinants and limitations of the disease	O.K4	oral answer, project

Calculation of ECTS points

Activity form	Activity hours*
seminar	15
e-learning lecture	15
preparation of a project	15
preparation for classes	15
Student workload	Hours 60

--	---	---

Goals

C1	The aim of the course is to familiarize students with the molecular basis of brain functioning, neurotransmission and the influence of various factors on our behavior and development of substance abuse. The content will be supported by examples of experiments and clinical cases. After completing the course the student will acquire knowledge on the mechanisms of conduction of aggression, hunger and satiety, action of various psychoactive substances on CNS and behavior, damage to various brain structures, etc.
----	---

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			

W1	development, structure and functions of the human body in normal and pathological conditions	O.W1	test
W2	symptoms and course of diseases	O.W2	test
W3	social factors influencing behaviour in health and disease, particularly in chronic disease	D.W2	test
W4	basic psychological mechanisms of human functioning in health and disease	D.W9	test
W5	mechanisms, objectives and treatment options for psychoactive substance dependence	D.W13	test
Skills - Student can:			
U1	plan own learning activities and constantly learn in order to update own knowledge	O.U5	test
U2	inspire the learning process of others	O.U6	test
U3	critically evaluate the results of scientific research and adequately justify the position	O.U9	test
U4	communicate with colleagues with constructive feedback and support	D.U12	test
U5	show responsibility for improving your qualifications and transferring knowledge to others	D.U16	test
U6	critically analyse medical literature, including in English, and draw conclusions	D.U17	test
U7	be able to work in a multiprofessional team, in a multicultural and multinational environment	D.U21	test
U8	demonstrate responsibility for one's own professional development, contribute to the further development of sciences, transfer own knowledge to others	D.U22	test
Social competences - Student is ready to:			
K1	formulate conclusions from own measurements or observations	O.K8	test
K2	use objective sources of information	O.K7	test
K3	formulate opinions on the various aspects of the professional activity	O.K10	test
K4	promote health-promoting behaviors	O.K6	test
K5	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	test

Calculation of ECTS points

Activity form	Activity hours*
seminar	10
e-learning lecture	20
preparation for classes	20

preparation for test	10
Student workload	Hours 60
Workload involving teacher	Hours 30

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Introduction to neurotransmission. neurotransmitters and neuromodulators. Atypical neurotransmitters. Milestones in behavioral research- brain lesions; Hen without head and Phineas Gage and his damaged prefrontal cortex.	W1, W2, W3, W4, W5, U1, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4, K5	seminar, e-learning lecture
2.	Drugs, booze and hangover. Brief history of drug abuse. Basic terms (psychoactive substance, narcotics, addiction, abuse, dependence, tolerance, withdrawal, sensitization). Why brain becomes addicted (theories of dependence). Physical and psychological dependence. Tolerance and withdrawal. Drugs of abuse - various categories of substances. Dependence pathways in CNS. Reward circuit and dopamine. Memory of drugs. Role of genetics and environment in addiction. Stress axis and its influence on drug taking.	W1, W2, W3, W4, W5, U1, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4, K5	seminar, e-learning lecture
3.	The opiate story. Opioid receptors, opioid peptides. Description of drugs of abuse (street names, interactions with other substances, clinical symptoms, detox and therapy). Methadone and buprenorphine maintenance program. Substance abuse vaccines.	W1, W2, W3, W4, W5, U1, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4, K5	seminar, e-learning lecture
4.	Alcohol and its metabolism. GABA and NMDA receptors. Cloninger typology - alcoholism. Alcohol metabolism. Methanol and glycol poisoning. Fetal Alcohol Syndrome (FAS) and Adult Children of Alcoholics (ACA). Wernicke-Korsakoff and delirium tremens.	W1, W2, W3, W4, W5, U1, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4, K5	seminar, e-learning lecture
5.	Psychostimulants and hallucinogens. Nicotine, cannabis, cocaine, amphetamine, LSD. Plants: khat, entheogens, mescaline, psilocybine. Medical marijuana. Is marijuana safe or addictive? Clinical cases.	W1, W2, W3, W4, W5, U1, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4, K5	seminar, e-learning lecture
6.	Rave culture. Drugs used at raves and date rape pills. MDMA, rohypnol, ketamine.	W1, W2, W3, W4, W5, U1, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4, K5	seminar, e-learning lecture
7.	Inhalants: solvents, propellants, medicals (propane/butane, gasoline, ether, chloroform, cleaning solvents, glues, hair sprays, nail polish removers, nitrous oxide, amyl nitrate). Health hazards. Sudden sniffing death syndrome.	W1, W2, W3, W4, W5, U1, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4, K5	seminar, e-learning lecture

8.	Cognitive enhancers. Intelligence, IQ, and potential benefits of being better. The fabulous glutamate receptor and a doogie mouse. Colombian guerilla, London taxi drivers, and their contribution to science. Trendy cognitive enhancers.	W1, W2, W3, W4, W5, U1, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4, K5	seminar, e-learning lecture
9.	Legal highs and designer drugs. Most commonly used substances and additives on the legal and illegal markets. Legal regulations in EU. Bath salts and Spice, cathinones. Head shops.	W1, W2, W3, W4, W5, U1, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4, K5	seminar, e-learning lecture
10.	Impulse-control disorders. Pathological gambling, shopping, adventure seeking, computer games. Iowa Gambling Task as a specific test for PFC damage. Comorbid disorders. Internet addiction, cybersex, computer games.	W1, W2, W3, W4, W5, U1, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4, K5	seminar, e-learning lecture
11.	Neurobiology of aggression. CNS, e as new therapeutic approaches. Emotions, stress. Molecules involved in aggressive behavior. Stanford Prison Experiment, Milgram's Obedience Experiment, Robbers Cave Experiment and conflict resolution. Memory of fear, posttraumatic stress disorder, beta-blockers and MDMA. Implicit association test.	W1, W2, W3, W4, W5, U1, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4, K5	seminar, e-learning lecture
12.	Neurobiology of eating. Neuropeptides involved in regulation of appetite. Reward and delayed reward. Hypothalamus (ventromedial and lateral). Statins, leptin, serotonin, THC receptors and consequences of manipulating brain functions. Anorexia and bulimia. Novel therapies. GLP-1 receptor agonists.	W1, W2, W3, W4, W5, U1, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4, K5	seminar, e-learning lecture
13.	Neurobiology of lie and deception. Deception and camouflage as survival strategies. Lying as part of our nature - personality. Can a liar be caught (lie detectors, brain imaging, ethical issues)? Delusions. Planted memories and mental diet. Our actions toward others - social influence, conformism and Asch's experiment. Delusions and illusions - the cheating brain.	W1, W2, W3, W4, W5, U1, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4, K5	seminar, e-learning lecture
14.	Molecular basis of pain. Pain types. Brain structures involved in pain perception. A-delta, and C-fibers. TRP - type receptors for heat and cold. Neuropeptides involved in pain transmission. Analgesics and analgesic ladder. Stress-induced analgesia and placebo effects. Painful memories - phantom limb pain. Pain models. Modern approaches to pain treatment.	W1, W2, W3, W4, W5, U1, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4, K5	seminar, e-learning lecture
15.	Neurobiology of preference and choice. Peter Paul Rubens and "Paris Judgement". How do we value things and choose between options? Maslow's hierarchy of needs. Decision making process and the Eisenhower Matrix. Cognitive dissonance and its reduction. Hippocampus and frontal lobe in planning and decision making. The "Ultimatum" game. Emotional and logical brain(s). Moral dilemmas. Artificial intelligence.	W1, W2, W3, W4, W5, U1, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4, K5	seminar, e-learning lecture

Course advanced

Teaching methods:

brainstorm, discussion, e-learning, foreign language course, presentation, seminar, lecture

Activities	Examination methods	Credit conditions
seminar	test	written test minimum 50% correct answers attendance minimum 80%
e-learning lecture	test	written test minimum 50% correct answers attendance minimum 80%

Entry requirements

Basic background in biochemistry and physiology
Written test for credit. Minimum 80% attendance.

Internal Medicine - summer clerkship

-------------------------------------	--	---

Goals

C1	Gaining knowledge about the functioning of the internal medicine ward, improving the skills of physical examination, deepening knowledge about the basic laboratory tests, expanding knowledge about imaging tests.
----	---

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	symptoms and course of diseases	O.W2	booklet of practical skills
W2	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	booklet of practical skills
Skills - Student can:			

U1	identify medical problems and prioritize medical management	O.U1	booklet of practical skills
U2	identify life-threatening conditions that require immediate medical intervention	O.U2	booklet of practical skills
U3	plan the diagnostic procedure and interpret its results	O.U3	booklet of practical skills
U4	communicate with the patient and his family in an atmosphere of trust, taking into account the needs of the patient	O.U7	booklet of practical skills
U5	communicate and share knowledge with colleagues in a team	O.U8	booklet of practical skills
Social competences - Student is ready to:			
K1	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	booklet of practical skills
K2	respect medical confidentiality and patients' rights	O.K3	booklet of practical skills
K3	to be guided by the well-being of a patient	O.K2	booklet of practical skills
K4	formulate conclusions from own measurements or observations	O.K8	booklet of practical skills
K5	use objective sources of information	O.K7	booklet of practical skills
K6	implement the principles of professional camaraderie and cooperation in a team of specialists, including representatives of other medical professions, also in a multicultural and multinational environment	O.K9	booklet of practical skills

Calculation of ECTS points

Activity form	Activity hours*
professional practice	120
Student workload	Hours 120
Workload involving teacher	Hours 120
Practical workload	Hours 120

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
-----	----------------	-----------------------------	------------

1.	During clerkship, student should: 1. Learn organization of an internal ward/department and organizational links of the ward/department with outpatient health care system; 2. practice physical examination and medical history collecting skills; 3. learn emergency procedures (resuscitation); 4. practice diagnosing and differentiation of basic disease entities, with special consideration of acute cases; 5. learn to properly interpret laboratory, radiological and pathomorphological tests and examination results; 6. participate in medical rounds; 7. perform routine procedures such as intravenous injections, applying drips, catheterizing etc.; 8. collect specimens for diagnostic tests.	W1, W2, U1, U2, U3, U4, U5, K1, K2, K3, K4, K5, K6	professional practice
----	---	--	-----------------------

Course advanced

Teaching methods:

case study, textual analysis, discussion, e-learning, problem solving method, case study method, group work, professional practice

Activities	Examination methods	Credit conditions
professional practice	booklet of practical skills	The preceptor is responsible for fulfillment of clerkship outline and grants credit to student by filling out the JU MC SME Certificate of Summer Clerkship Completion. The student is obliged to keep record of all performed procedures and acquired skills in the List of Approved Procedures booklet.

Additional info

Head of Department of Internal Diseases / Internal Ward or a preceptor assigned by him/her determines scope of responsibilities and the clerkship schedule, and oversees the student's work. The preceptor should be a physician with adequate general and professional competence.

If possible, student should perform all medical activities under supervision of the preceptor.

4 weeks, 120 h (5 days/week, 6 h/day); can be completed over summer vacation months only (July - September).

During that time, student must complete three on-call duties between 2 pm and 8 pm. Active interns are excused from presence in the obligatory activities the day after the on-call day.

Excused absence can be granted to the active intern only on submitting formal medical certificate. Illness longer than one week causes internship to be lengthened by the time of absence.

Anesthesiology and Intensive Care

---	---	---

Goals

C1	Introduction to the basics of the subject Anesthesiology and Intensive Care, in particular: - principle of perioperative safety, preparing the patient for surgery, performing general anesthesia, local anesthesia and controlled sedation.
C2	Acquainting with current guidelines of cardiopulmonary resuscitation and management of life-threatening states in adult.
C3	Awarning students of the need to systematically supplement and update their knowledge in this area. Acquaintance with the principles of cooperation in a group and taking responsibility for timely and reliable performance entrusted tasks.
C4	Introduction into the intensive care issue

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	symptoms and course of diseases	O.W2	booklet of practical skills, booklet of practice, classroom observation, clinical case presentation, multiple choice test
W2	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	booklet of practical skills, booklet of practice, clinical case presentation, multiple choice test
W3	principles of perioperative safety, patient preparation for surgery, general and local anesthesia and controlled sedation	F.W4	classroom observation, clinical case presentation, multiple choice test
W4	postoperative treatment with analgesic therapy and postoperative monitoring	F.W5	classroom observation, clinical case presentation, multiple choice test
W5	indications and rules for the use of intensive care	F.W6	classroom observation, clinical case presentation, multiple choice test
W6	guidelines for cardiopulmonary resuscitation of newborns, children and adults	F.W7	booklet of practical skills, booklet of practice, clinical case presentation, multiple choice test
W7	principles of functioning of the integrated system National Medical Rescue Service	F.W8	clinical case presentation, multiple choice test
W8	rules of qualification for basic surgical procedures and invasive diagnostic and therapeutic procedures, rules of their performance and the most frequent complications	F.W3	booklet of practice, classroom observation, clinical case presentation, multiple choice test

W9	the principles of suspicion and diagnosis of brain death	F.W15	booklet of practice, clinical case presentation, multiple choice test
W10	the most common complications associated with anesthesia, sedation and perioperative period	F.W19	clinical case presentation, multiple choice test
Skills - Student can:			
U1	identify medical problems and prioritize medical management	O.U1	booklet of practical skills, booklet of practice, classroom observation, clinical case presentation
U2	identify life-threatening conditions that require immediate medical intervention	O.U2	booklet of practical skills, booklet of practice, classroom observation, clinical case presentation
U3	plan the diagnostic procedure and interpret its results	O.U3	booklet of practical skills, booklet of practice, classroom observation, clinical case presentation
U4	implement appropriate and safe therapeutic treatment and predict its effects	O.U4	booklet of practical skills, booklet of practice, classroom observation, clinical case presentation
U5	plan own learning activities and constantly learn in order to update own knowledge	O.U5	booklet of practical skills, classroom observation, clinical case presentation
U6	inspire the learning process of others	O.U6	booklet of practical skills, classroom observation, clinical case presentation
U7	communicate with the patient and his family in an atmosphere of trust, taking into account the needs of the patient	O.U7	booklet of practical skills, classroom observation, clinical case presentation
U8	communicate and share knowledge with colleagues in a team	O.U8	booklet of practical skills, classroom observation, clinical case presentation
U9	critically evaluate the results of scientific research and adequately justify the position	O.U9	booklet of practical skills, classroom observation, clinical case presentation
U10	adhere to the principles of asepsis and antisepsis	F.U3	booklet of practical skills, booklet of practice, classroom observation, clinical case presentation
U11	make a peripheral puncture	F.U5	booklet of practical skills, booklet of practice, clinical case presentation
U12	perform basic resuscitation procedures using an automatic external defibrillator and other emergency procedures and first aid	F.U10	booklet of practical skills, clinical case presentation
U13	operate according to the algorithm of advanced resuscitation activities	F.U11	booklet of practical skills, clinical case presentation

U14	monitor the patient's condition in the post-operative period based on basic vital parameters	F.U12	booklet of practical skills, booklet of practice, clinical case presentation
U15	to pass on information about the death of a close friend and relative	F.U34	booklet of practical skills, classroom observation, clinical case presentation
U16	operate according to a current algorithm for advanced resuscitation activities: a) is able to open the airway using non-instrumented and instrumented techniques endoscopic retrograde cholangiopancreatography) b) is able to ventilate the patient with a self-expanding bag with a face mask c) is able to operate the manual defibrillator safely	F.U27	booklet of practical skills, clinical case presentation
Social competences - Student is ready to:			
K1	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	booklet of practical skills, booklet of practice
K2	to be guided by the well-being of a patient	O.K2	booklet of practical skills, booklet of practice
K3	respect medical confidentiality and patients' rights	O.K3	booklet of practical skills, booklet of practice
K4	take actions towards the patient on the basis of ethical norms and principles, with an awareness of the social determinants and limitations of the disease	O.K4	booklet of practical skills, booklet of practice
K5	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	booklet of practical skills, booklet of practice
K6	promote health-promoting behaviors	O.K6	booklet of practical skills, booklet of practice
K7	use objective sources of information	O.K7	booklet of practical skills, booklet of practice

Calculation of ECTS points

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Evaluation of the patient and preoperative medication. General anesthesia. Recovery from anesthesia, patients selection after recovery. Anesthesia of elderly patients. ALS	W10, W3, W4, W5, W6, W7, W8, W9, U1, U10, U13, U14, U15, U16, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4, K5, K6, K7	classes, seminar, e-learning lecture
2.	Anesthesia for children. Regional anesthesia . Pain management and sedation in ICU patients. Drugs in ICU patients (pharmacokinetics, pharmacodynamics).	W1, W2, W4, W5, W9, U1, U10, U11, U12, U13, U15, U3	classes, seminar

3.	<p>Critical care in neurology and neurosurgery. Seizures. Evaluation of the comatose patient. Brain death.</p> <p>Long term catheters, venous, artery lines. Infections in surgical patients-preventions, laboratory diagnosis, monitoring -related bacteremia and sepsis. Antibiotic prophylaxis in surgical theatres</p>	<p>W10, W3, W4, W5, W6, W7, W8, W9, U1, U10, U11, U12, U13, U14, U15, U16, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4, K5, K6, K7</p>	<p>classes, seminar</p>
4.	<p>Obstetric anesthesia and pain relief in labour.</p> <p>Principles of mechanical ventilation. Respiratory failure.</p>	<p>W1, W10, W2, W3, W4, W5, W6, W7, W8, W9, U1, U10, U11, U12, U13, U14, U15, U16, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4, K5, K6, K7</p>	<p>classes</p>
5.	<p>Cardiovascular management in CCU-diagnosis, monitoring and treatment. Diagnosis and treatment of the shock syndrome.</p> <p>Metabolism in critical patient. Dehydratations and electrolytes supply, nutritional failure, principles of parenteral nutrition and enteral feeding.</p> <p>Drugs in ICU.</p> <p>Infections in surgical ICU-preventions, laboratory diagnosis, monitoring -related bacteriemia and sepsis. Toxic and septic shock. Bacterial hospital-acquired pneumonia and VAP.</p>	<p>W1, W10, W2, W3, W4, W5, W6, W8, U1, U10, U11, U12, U13, U14, U15, U16, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4, K5, K6, K7</p>	<p>classes</p>
6.	<p>ICU patient after Severe trauma. AKI</p>	<p>W1, W10, W2, W3, W4, W5, W6, W7, W8, W9, U1, U10, U11, U12, U13, U14, U15, U16, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4, K5, K6, K7</p>	<p>classes</p>

Course advanced

Semester 7, Semester 8

Teaching methods:

case study, brainstorm, clinical classes, discussion, e-learning, group work, seminar, high fidelity simulation

Activities	Examination methods	Credit conditions
seminar	multiple choice test	Active participation in seminar classes - active participation in scenario, problem solving, assessment of practical ALS skills, ventilation and external heart massage, assessment of compliance with ERC recommendations. No absence available.
classes	booklet of practical skills, classroom observation, multiple choice test	Presence on clinical exercises and practical- active participation and discussion the cases - one justified absence from practical exercises or clinical, it is possible to make up missed classes with other groups (no more than 3-4 students per CLR group).

Semester 9, Semester 10

Teaching methods:

case study, brainstorm, clinical classes, discussion, e-learning, educational film, presentation, group work, lecture with multimedia presentation, practical classes

Activities	Examination methods	Credit conditions
seminar	booklet of practice, clinical case presentation	Active participation in seminar classes. ase presentation
classes	booklet of practical skills, classroom observation, multiple choice test	Presence on clinical exercises and practical-active participation and discution the cases - one justified absence from practical exercises or clinical, it is possible to make up missed classes with other groups (no more than 3-4 students per CLR group). Case presentation.
e-learning lecture	booklet of practice, multiple choice test	Presence on lectures

Entry requirements

completed and passed courses: physiology, anatomy, internal medicine, surgery, padiatrics, neurosurgery, neurology, radiology, orthopedics and traumatology.

Clinical Genetics

Educational subject description sheet

Basic information

<p>Department Faculty of Medicine</p> <p>Field of study Medical Program</p> <p>Study level long-cycle master's degree program</p> <p>Study form full-time</p> <p>Education profile general academic</p> <p>Disciplines Medical science</p> <p>ISCED classification 0912 Medicine</p> <p>Subject related to scientific research Yes</p>	<p>Didactic cycle 2021/22</p> <p>Realization year 2024/25</p> <p>Lecture languages English</p> <p>Block obligatory for passing in the course of studies</p> <p>Mandatory obligatory</p> <p>Examination graded credit</p> <p>Standard group E. --	---	---

Goals

C1	Providing up-to-date knowledge regarding the clinical picture of the most common hereditary diseases (including monogenic diseases, chromosomal aberrations, metabolic diseases and cancers).
C2	Providing current knowledge on conducting genetic counseling.
C3	Providing up-to-date knowledge about prenatal diagnosis and the role of genetics in reproductive failures.
C4	Providing current knowledge on primary, secondary and tertiary prevention of hereditary diseases.
C5	Acquiring knowledge and practical foundations on the subject of modern genetic diagnostics using molecular biology techniques and cytogenetic methods. Rules for the interpretation of genetic testing results in the context of genetic counseling.

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	development, structure and functions of the human body in normal and pathological conditions	O.W1	test
W2	symptoms and course of diseases	O.W2	test
W3	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	test
W4	environmental and epidemiological determinants of the most frequent diseases	E.W1	test
W5	basic methods of fetal diagnostics and therapy	E.W5	test
W6	environmental and epidemiological determinants of the most frequent human neoplastic diseases	E.W23	test
W7	basics of early detection of neoplastic diseases and principles of screening in oncology	E.W24	test
W8	the causes, symptoms, principles of diagnosis and therapeutic management of the most common hereditary diseases	E.W37	test
W9	the types of biological materials to be used for laboratory diagnosis and the rules for the collection of test material	E.W39	test
W10	theoretical and practical basics of laboratory diagnostics	E.W40	test
Skills - Student can:			
U1	identify medical problems and prioritize medical management	O.U1	test
U2	plan the diagnostic procedure and interpret its results	O.U3	test
U3	plan own learning activities and constantly learn in order to update own knowledge	O.U5	test
U4	communicate with the patient and his family in an atmosphere of trust, taking into account the needs of the patient	O.U7	test
U5	communicate and share knowledge with colleagues in a team	O.U8	test
U6	critically evaluate the results of scientific research and adequately justify the position	O.U9	test
U7	carry out a medical history with an adult patient	E.U1	test
U8	carry out a medical interview with the child and his or her family	E.U2	test
U9	carry out a physical examination of a child of all ages	E.U4	test
U10	perform differential diagnosis of the most common diseases of adults and children	E.U12	test
U11	plan diagnostic, therapeutic and prophylactic procedures	E.U16	test

U12	interpret the results of laboratory tests and identify the causes of abnormalities	E.U24	test
U13	maintain patient's medical records	E.U38	test
Social competences - Student is ready to:			
K1	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	test
K2	to be guided by the well-being of a patient	O.K2	test
K3	respect medical confidentiality and patients' rights	O.K3	test
K4	take actions towards the patient on the basis of ethical norms and principles, with an awareness of the social determinants and limitations of the disease	O.K4	test
K5	use objective sources of information	O.K7	test
K6	formulate conclusions from own measurements or observations	O.K8	test

Calculation of ECTS points

preparation for classes	10
preparation for classes	20
preparation of multimedia presentation	6
Student workload	Hours 60
Workload involving teacher	Hours 24

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Basic concepts of genetics, the value of deciphering of the human genome in medical practice. Mutagenesis and teratogens. Phenocopies and genocopies. The basics of dysmorphology.	W1, W4, U1	e-learning lecture
2.	Construction and analysis of a pedigree in medical genetics. Theoretical and empirical risks in genetics.	W2, W8, U1, U10, U7, U8, U9, K1, K2, K3	e-learning lecture
3.	Mendelian and non-Mendelian inheritance; Mitochondrial diseases, complex diseases.	W1, W2, W4, W8, U1, U10, U7, U8, U9	e-learning lecture

4.	Chromosomal aberrations. Phenotype-genotype correlation.	W1, W2, W4, W8, U1, U4, U7, U8, U9	e-learning lecture
5.	Genetic basis of cancer. Diagnostics, genetic counseling and prevention in hereditary cancers.	W1, W2, W6, W7, W9, U1, U11, U3, U4	e-learning lecture
6.	Principles of genetic counseling. Psychological, ethical and social issues in genetic counseling. Patients' support groups.	W2, W3, U1, U11, U13, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4, K6	e-learning lecture
7.	Diagnosing genetically determined diseases based on the analysis of dysmorphic features. Diagnostic strategy in chromosomal aberrations.	W2, W8, W9, U1, U4, U5, U7, U8, U9, K1, K2, K3	e-learning lecture
8.	Genetic diagnosis and counseling in monogenic and in complex diseases.	W2, W8, W9, U1, U4, U5, U7, U8, U9, K1, K2, K3	e-learning lecture
9.	Newborn baby with suspected genetic disease.	W2, W8, W9, U1, U10, U2, U3, U4, U5, U9, K2, K5, K6	e-learning lecture
10.	Disorders of sex determination. Diagnostic strategy and genetic counseling.	W2, W8, U1, U10, U4, U7, U8, U9, K1, K2, K3, K6	e-learning lecture
11.	Genetic aspects of infertility. Preimplantation diagnosis and prenatal testing; indications, methods, interpretation of results.	W2, W4, W5, W8, U1, U11, U2, U4, U7, K1, K2, K3, K5, K6	e-learning lecture
12.	Genetic factors in the etiology of intellectual disability, autism and common neurologic and psychiatric conditions. Behavioral genetics.	W2, W8, U1, U10, U13, U2, U4, U7, U8, U9, K1, K2, K3, K4, K5, K6	e-learning lecture
13.	Genetic aspects of selected diseases of the circulatory, digestive, respiratory, urinary and hematopoietic systems.	W2, W3, W4, U3, K5, K6	e-learning lecture
14.	Inborn errors of metabolisms.	W2, W8, U1, U11, U12, U13, U2, U3, U4, U5, U7, U8, U9, K1, K2, K3, K4, K5, K6	e-learning lecture
15.	Modern molecular and cytogenetic tests. Interpretation of the results of genetic testing in a clinical context.	W10, W2, W3, W5, W8, W9, U1, U11, U12, U13, U2, U6, K5, K6	e-learning lecture

Course advanced

Teaching methods:

case study, classes / practicals, demonstration, discussion, case study method, presentation, group work, seminar, lecture, lecture with multimedia presentation, practical classes

Activities	Examination methods	Credit conditions
e-learning lecture	test	at least 18/30 points (written test)

Additional info

Grading score:

18-20 points - 3.0, 21-22 points - 3.5, 23-24 points - 4.0, 25-26 points - 4.5, 27-30 points - 5.0

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Primary and secondary immunodeficiencies: pathogenesis, clinical symptoms, treatment	W1, W2, U1, U10, U11, U12, U13, U14, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4, K5, K6	classes, seminar
2.	Diagnosis of immunodeficiency. Laboratory tests assessing humoral immunity (immunoglobulin level, specific antibodies, level of circulating B lymphocytes). cellular immunity: Laboratory tests assessing cellular immunity (assessment of T lymphocyte levels and their subpopulations. In vitro functional tests - assessment of lymphocyte response after mitogen and antigen stimulation). Examination of granulocyte function, chemiluminescence test. Assessment of adhesion molecule expression. Flow cytometry. Clinical interpretation of test results	U5, K6	classes, seminar
3.	Autoimmune diseases generalized and organ-related. Immunopathogenesis, immunodiagnostics. The clinical significance of autoantibodies. Differential diagnosis of autoimmune diseases including autoimmune gastrointestinal disorders Diagnostics of organ-specific autoimmune diseases: liver, gastrointestinal tract, endocrine glands, immunological cytopenia.	W1, U2, U5, K6	classes, seminar

4.	Fundamentals of transplantology: HLA antigens, recipient-donor selection, (antibodies panel, cross-test), transplant rejection. Bone marrow / stem cell transplantation, clinical indications, GvH disease, management of patients before and after transplantation.	U11, U2, U3, U4, U6, U7, U9, K1, K2, K3, K4, K5, K6	classes, seminar
5.	Immunotherapy, immunosuppression Immune problems in cancer: host anti-tumor response, tumor-associated antigens and their role in the diagnosis and monitoring of cancer, the role of immunodetection, cancer immunotherapy	U11, K5	seminar

Course advanced

Teaching methods:

case study, clinical classes, laboratories (labs), seminar, practical classes

Activities	Examination methods	Credit conditions
seminar	multiple choice test	final test: multiple choice test containing 30 questions, 5 answers for each question, only one answer is correct
classes	multiple choice test, credit, assessment by the teacher	final test: multiple choice test containing 30 questions, 5 answers for each question, only one answer is correct

Additional info

Absence from classes: students absent from classes for justified reasons must do their classes within the time agreed with the teacher. An unjustified absence results in failure to pass the exam on the first date. A student who was not allowed to pass on the first date due to unjustified absences may proceed to the second date of exam only after completing the outstanding classes.

Entry requirements

Immunology - the knowledge in the field of basics of immunology

Evidence-Based Medicine

Educational subject description sheet

Basic information

<p>Department Faculty of Medicine</p> <p>Field of study Medical Program</p> <p>Study level long-cycle master's degree program</p> <p>Study form full-time</p> <p>Education profile general academic</p> <p>Disciplines Medical science</p> <p>ISCED classification 0912 Medicine</p> <p>Subject related to scientific research Yes</p>	<p>Didactic cycle 2021/22</p> <p>Realization year 2024/25</p> <p>Lecture languages English</p> <p>Block obligatory for passing in the course of studies</p> <p>Mandatory obligatory</p> <p>Examination examination</p> <p>Standard group D. Behavioral and social sciences with elements of professionalism</p>
--	--

<p>Periods Semester 7, Semester 8</p>	<p>Examination examination</p> <p>Activities and hours seminar: 27 classes: 9</p>	<p>Number of ECTS points 2.0</p>
--	---	---

Goals

C1	To teach students about concepts and the language of evidence-based medicine that are necessary to effectively communicate with health care professionals and patients
C2	To explain how to critically appraise evidence (primary studies, systematic reviews and clinical practice guidelines) on treatment, diagnosis and prognosis
C3	To teach the basics of statistics
C4	To encourage students to be critical while analyzing evidence and to gain skills necessary to learn and practice EBM
C5	To make students aware of the problems related to misinterpretation of study results

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	basics of evidence-based medicine	D.W23	multiple choice test
W2	methods of conducting scientific research	O.W5	multiple choice test
Skills - Student can:			
U1	critically analyse medical literature, including in English, and draw conclusions	D.U17	project
U2	critically evaluate the results of scientific research and adequately justify the position	O.U9	project
Social competences - Student is ready to:			
K1	use objective sources of information	O.K7	project

Calculation of ECTS points

Activity form	Activity hours*
seminar	27
classes	9
preparation of a paper	5
preparation for examination	10
information collection	7
preparation for classes	2
Student workload	Hours 60
Workload involving teacher	Hours 36
Practical workload	Hours 9

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
-----	----------------	-----------------------------	------------

1.	Philosophy of EBM, asking clinical questions, types of clinical studies used in efficacy assessment, concepts related to methodology of clinical studies (randomization, concealment of allocation, intention-to-treat analysis, completeness of follow-up, blinding), types of randomized study design (parallel, cross-over, factorial design), clinically important and surrogate outcomes	W1	seminar
2.	Presentation of the study results and their interpretation (risk, RR, RRR, RRI, ARR, OR, HR, NNT, NNH), statistical significance and clinical relevance, p-values and confidence intervals	W1, U1	seminar
3.	Critical appraisal of the articles about therapy and prevention and their interpretation and use in clinical practice; CONSORT checklist; novel randomized study designs - cluster, adaptive, embedded, pragmatic, multiplatform	W1, U1, U2, K1	seminar
4.	Critical appraisal of diagnostic studies, likelihood ratio and its interpretation, ROC curves, work-up bias	W1, U1, U2, K1	seminar
5.	Systematic reviews, metaanalysis - glossary and critical appraisal, forest plots, assessment of heterogeneity	W1, U1, U2, K1	seminar
6.	Cochrane reviews, network metaanalysis. Misleading claims in medical research - analysis of examples of most common traps and mistakes.	W1, W2, U1, U2, K1	seminar
7.	Clinical practice guidelines - glossary, critical appraisal (AGREE II Instrument), methodology used to develop valid guidelines (GRADE)	W1, U1, K1	seminar
8.	Observational studies - methodology, critical appraisal of studies on prognosis, reporting of observational studies (STROBE) Valid sources of evidence, principles of searching and using medical databases	K1	seminar
9.	Basic biostatistics - descriptive statistics, comparison of two or more populations, relationship between two quantitative/qualitative measures, analysis of the example data	W2	classes
10.	Comparison of two or more populations: t test, paired t-test, one-way analysis of variance (ANOVA)	W2	classes
11.	Relationship between two quantitative/ qualitative measures: correlation, simple linear regression, chi-square test	W2	classes
12.	Project presentation (asking the clinical question, searching for evidence, critical appraisal of the identified study and interpretation of its results)	U1, U2	seminar

Course advanced

Teaching methods:

case study, textual analysis, computer classes, discussion, group work, assignments solving, seminar, lecture with multimedia presentation

Activities	Examination methods	Credit conditions
seminar	multiple choice test	20 multiple-choice questions with one correct answer (out of 5: answers A-E), 20 points Biostatistics: 10 multiple-choice questions with one correct answer (out of 5: answers A-E), 10 points Total score: 30sc Minimum number of points to pass the course: 18 (minimum 12 in EBM part and minimum 6 in Biostatistics part) score 2 practical exercises (using software: SAS), 30 min, 8 points during the last statistical seminar -topic 11, for each group grade 18 - 21 3.0 22 - 23 3.5 24 - 25 4.0 26 - 27 4.5 28 - 30 5.0
classes	project	preparing and presenting the project to get credit - a PICO appropriately asked, an appropriate study identified, a methodological validity of the study appropriately assessed, results of the study appropriately presented, appropriate conclusions made

Additional info

Credit requirements:

- attendance at the sessions
- active participation in discussions
- passing test

Entry requirements

knowledge of types of epidemiological studies; knowledge of pathophysiology and propedeutics of medicine; basic knowledge on the use of medicines; good English skills

The participation in the classes is obligatory.

Otorhinolaryngology

Educational subject description sheet

Basic information

<p>Department Faculty of Medicine</p> <p>Field of study Medical Program</p> <p>Study level long-cycle master's degree program</p> <p>Study form full-time</p> <p>Education profile general academic</p> <p>Disciplines Medical science</p> <p>ISCED classification 0912 Medicine</p> <p>Subject related to scientific research Yes</p>	<p>Didactic cycle 2021/22</p> <p>Realization year 2024/25</p> <p>Lecture languages English</p> <p>Block obligatory for passing in the course of studies</p> <p>Mandatory obligatory</p> <p>Examination examination</p> <p>Standard group F. Clinical procedural sciences</p>
--	---

<p>Periods Semester 7, Semester 8</p>	<p>Examination examination</p> <p>Activities and hours seminar: 10 classes: 40</p>	<p>Number of ECTS points 3.0</p>
--	--	---

Goals

C1	- knowledge of the symptoms, course and procedures in specific disease entities of the mouth, head and neck, taking into account age groups
C2	- teaching the students how to recognise the most vital symptoms of laryngological diseases
C3	- providing the knowledge on current treatment methods of the most serious laryngological diseases
C4	- familiarizing the students with the principles of procedure in otolaryngological emergencies

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
------	----------------------	---------	---------------------

Knowledge - Student knows and understands:			
W1	symptoms and course of diseases	O.W2	oral examination
W2	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	oral examination
W3	ethical, social and legal conditions for practicing the medical profession and the principles of health promotion, based on scientific evidence and accepted standards	O.W4	oral examination
W4	the causes, symptoms, diagnostic and therapeutic management principles for the most common diseases requiring surgical intervention, taking into account the distinctness of childhood age, including in particular: 1) acute and chronic abdominal diseases, 2) thoracic diseases, 3) diseases of extremities and head, 4) fractures of bones and injuries to organs	F.W1	oral examination
W5	selected issues in the field of pediatric surgery, including traumatology and otorhinolaryngology, as well as acquired defects and diseases being indications for surgical treatment in children	F.W2	oral examination
W6	rules of qualification for basic surgical procedures and invasive diagnostic and therapeutic procedures, rules of their performance and the most frequent complications	F.W3	oral examination
W7	principles of perioperative safety, patient preparation for surgery, general and local anesthesia and controlled sedation	F.W4	oral examination
W8	postoperative treatment with analgesic therapy and postoperative monitoring	F.W5	oral examination
W9	indications and rules for the use of intensive care	F.W6	oral examination
W10	problems of modern imaging examinations, in particular: 1) radiological symptomatology of major diseases, 2) instrumental methods and imaging techniques used to perform therapeutic procedures, 3) the indications, contraindications and preparation of the patient for particular types of imaging examination and contraindications for the use of contrast agents	F.W10	oral examination
W11	issues related to laryngology, phoniatics and audiology, including 1) causes, clinical course, methods of treatment, complications and prognosis of diseases of the ear, nose, paranasal sinuses, oral cavity, pharynx and larynx, 2) facial nerve disease and selected cervical structures, 3) rules for diagnostic and therapeutic management of mechanical injuries to the ear, nose, larynx and esophagus, 4) rules for emergency management in otorhinolaryngology, in particular in laryngeal dyspnea, 5) principles of diagnostic and therapeutic management of hearing, voice and speech impairments, 6) principles of diagnostic and therapeutic management of head and neck neoplastic diseases	F.W12	oral examination
W12	the most common complications of the procedures listed in F.W2	F.W18	oral examination
W13	the most common complications associated with anesthesia, sedation and perioperative period	F.W19	oral examination

Skills - Student can:			
U1	identify medical problems and prioritize medical management	O.U1	oral examination
U2	identify life-threatening conditions that require immediate medical intervention	O.U2	oral examination
U3	plan the diagnostic procedure and interpret its results	O.U3	oral examination
U4	implement appropriate and safe therapeutic treatment and predict its effects	O.U4	oral examination
U5	plan own learning activities and constantly learn in order to update own knowledge	O.U5	oral examination
U6	inspire the learning process of others	O.U6	oral examination
U7	communicate with the patient and his family in an atmosphere of trust, taking into account the needs of the patient	O.U7	oral examination
U8	communicate and share knowledge with colleagues in a team	O.U8	oral examination
U9	critically evaluate the results of scientific research and adequately justify the position	O.U9	oral examination
U10	assist in a typical surgical procedure, prepare the surgical field and apply local anesthesia to the operated area	F.U1	oral examination
U11	use basic surgical instruments	F.U2	oral examination
U12	adhere to the principles of asepsis and antisepsis	F.U3	oral examination
U13	manage a simple wound, put on and change a sterile surgical dressing	F.U4	oral examination
U14	examine breasts, lymph nodes, thyroid gland and abdominal cavity in terms of acute abdomen and perform digital rectal examination	F.U6	oral examination
U15	evaluate the result of a radiological examination in the most common types of fractures, particularly long bone fractures	F.U7	oral examination
U16	manage external bleeding	F.U9	oral examination
U17	monitor the patient's condition in the post-operative period based on basic vital parameters	F.U12	oral examination
U18	evaluate the condition of the unconscious patient according to international scoring scales	F.U21	oral examination
U19	recognise the symptoms of increasing intracranial pressure	F.U22	oral examination
U20	can tie a single and surgical knot	F.U28	oral examination
U21	identify and indicate methods of management of traumatic peripheral nerve damage	F.U36	oral examination
U22	perform basic laryngological examination of the ear, nose, pharynx and larynx	F.U25	oral examination
U23	conduct an approximate hearing test	F.U26	oral examination
Social competences - Student is ready to:			

K1	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	oral examination
K2	to be guided by the well-being of a patient	O.K2	oral examination
K3	respect medical confidentiality and patients' rights	O.K3	oral examination
K4	take actions towards the patient on the basis of ethical norms and principles, with an awareness of the social determinants and limitations of the disease	O.K4	oral examination
K5	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	oral examination
K6	promote health-promoting behaviors	O.K6	oral examination
K7	use objective sources of information	O.K7	oral examination
K8	formulate conclusions from own measurements or observations	O.K8	oral examination
K9	implement the principles of professional camaraderie and cooperation in a team of specialists, including representatives of other medical professions, also in a multicultural and multinational environment	O.K9	oral examination
K10	formulate opinions on the various aspects of the professional activity	O.K10	oral examination
K11	assume responsibility for decisions taken in the course of their professional activities, including in terms of the safety of oneself and others	O.K11	oral examination

Calculation of ECTS points

textual analysis, classes / practicals, clinical classes, demonstration, discussion, educational film, problem solving method, case study method, group work, assignments solving, seminar, Mentoring

Activities	Examination methods	Credit conditions
seminar	oral examination	min. 60% pts. + 1
classes	oral examination	min. 60% pts. + 1

Additional info

attendance requirements: all classes and seminars

Entry requirements

KNOWLEDGE OF THE BASICS OF ANATOMY AND ORGAN PHYSIOLOGY IN THE FIELD OF HEAD AND NECK. Attendance at classes and seminars is obligatory

Nuclear Medicine

Educational subject description sheet

Basic information

<p>Department Faculty of Medicine</p> <p>Field of study Medical Program</p> <p>Study level long-cycle master's degree program</p> <p>Study form full-time</p> <p>Education profile general academic</p> <p>Disciplines Medical science</p> <p>ISCED classification 0912 Medicine</p>	<p>Didactic cycle 2021/22</p> <p>Realization year 2024/25</p> <p>Lecture languages English</p> <p>Block obligatory for passing in the course of studies</p> <p>Mandatory obligatory</p> <p>Examination graded credit</p> <p>Standard group E. Clinical non-procedural medical disciplines</p>
---	--

<p>Periods Semester 7, Semester 8</p>	<p>Examination graded credit</p> <p>Activities and hours seminar: 12</p>	<p>Number of ECTS points 1.0</p>
--	--	---

Goals

C1	Introduction to nuclear medicine imaging techniques (planar imaging, SPECT, SPECT/CT, PET/CT). Understanding the indication and contraindications to radionuclide imaging, and the role of such imaging in clinical practice. The introduction to radionuclide therapy, including the most common indications, side effects and efficacy. Introduction to radiation protection.
----	---

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	test

W2	<p>the causes, symptoms, principles of diagnosis and therapeutic management of the most common internal diseases and their complications in adults: 1) cardiovascular diseases, including ischemic heart disease, heart defects, endocarditis, myocardial infarction, pericardial infarction, heart failure (acute and chronic), diseases of arteries and venous vessels, arterial hypertension - primary and secondary, pulmonary hypertension, 2) respiratory system diseases, including respiratory tract diseases, chronic obstructive pulmonary disease, bronchial asthma, bronchial dilatation, cystic fibrosis, respiratory infections, interstitial diseases of the lungs, pleura, mediastinum, obstructive and central sleep apnea, respiratory failure (acute and chronic), respiratory tumors, 3) diseases of the digestive system, including diseases of the mouth, esophagus, stomach and duodenum, intestines, pancreas, liver, bile ducts and gallbladder, 4) diseases of the internal secretion system, including diseases of the hypothalamus and pituitary gland, thyroidism, parathyroidism, adrenal cortex and medulla, ovaries and testicles, and neuroendocrine tumors, polyglandular syndromes, various types of diabetes and metabolic syndrome – hypoglycaemia, obesity, dyslipidemia, 5) diseases of the kidneys and the urinary tract, including acute and chronic renal failure, glomerulonephritis and interstitial kidney diseases, kidney cysts, kidney stones, urinary tract infections, urinary tract neoplasms, in particular of bladder and kidney neoplasms, 6) hematopoietic diseases, including bone marrow aplasia, anemia, granulocytopenia and agranulocytosis, thrombocytopenia, acute leukemia, myeloproliferative and myelodysplastic-myeloproliferative tumours, myelodysplastic syndromes, mature B and T lymphocytes tumors, bleeding diatheses, thrombophilia, life-threatening conditions in hematology, blood disorders in other organ diseases, 7) rheumatic diseases, including systemic connective tissue diseases, systemic vasculitis, joint inflammations involving spinal cord, metabolic bone diseases, osteoporosis and osteoarthritis in particular, gout, 8) allergic diseases, including anaphylaxis and anaphylactic shock and angioedema, 9) water-electrolyte and acid-base disorders: dehydration conditions, overhydration conditions, electrolyte, acidic and alkaline disorders</p>	E.W7	test
W3	<p>causes, symptoms, principles of diagnosis and therapeutic management in the most common diseases of the nervous system, including: 1) headaches: migraines, tension headaches and headache syndromes and neuralgia of the nerve V, 2) cerebral vascular diseases, in particular stroke, 3) epilepsy, 4) infections of the nervous system, in particular meningitis, borreliosis, herpetic encephalitis, neurotransmission diseases, 5) dementia, in particular: Alzheimer's disease, frontal dementia, vascular dementia and other dementia syndromes, 6) basal ganglia diseases, Parkinson's disease in particular, 7) demyelinating diseases, multiple sclerosis in particular, 8) diseases of the neuromuscular system, lateral atrophic sclerosis and sciatic neuralgia in particular, 9) craniocerebral injuries, cerebral palsy in particular</p>	E.W14	test

W4	possibilities of modern neoplastic therapy, including multimodal therapy, perspectives of cellular and gene therapies and their adverse effects	E.W25	test
W5	principles of combination therapies in oncology, algorithms of diagnostic and therapeutic procedures in the most common human cancers	E.W26	test
W6	principles of diagnosis and therapeutic management in the most common problems of palliative medicine, including 1) symptomatic treatment of the most common somatic symptoms, 2) cachexia management and the prevention and treatment of bedsores, 3) the most common emergencies in palliative medicine	E.W27	test
W7	principles for the treatment of pain, including cancer and chronic pain	E.W29	test
W8	development, structure and functions of the human body in normal and pathological conditions	O.W1	test
W9	principles for palliative treatment of terminal patient	E.W28	test
Skills - Student can:			
U1	plan the diagnostic procedure and interpret its results	O.U3	test
U2	plan diagnostic, therapeutic and prophylactic procedures	E.U16	test
U3	define the concepts of nuclear medicine, radiopharmacy and radioimmunology	E.U44	test
U4	describe the physical processes that are the basis for radiopharmaceutical imaging	E.U45	test
U5	list radiopharmaceuticals used for scintigraphic diagnostics and PET, indicate indications for various types of diagnostic tests and the principles of interpretation of the obtained images	E.U46	test
U6	list the radioactive isotopes used for nuclear medicine therapies and justify their selection, as well as the basic isotope therapies, the indications for radionuclide therapy, how to assess the effectiveness of the therapy, the possible complications following the therapy	E.U47	test
U7	identify ways in which the ALARA radiological protection principle can be implemented in practice with regard to nuclear medicine	E.U48	test
U8	identify medical problems and prioritize medical management	O.U1	test
U9	implement appropriate and safe therapeutic treatment and predict its effects	O.U4	test
U10	plan own learning activities and constantly learn in order to update own knowledge	O.U5	test
U11	inspire the learning process of others	O.U6	test
U12	communicate with the patient and his family in an atmosphere of trust, taking into account the needs of the patient	O.U7	test
U13	communicate and share knowledge with colleagues in a team	O.U8	test

U14	critically evaluate the results of scientific research and adequately justify the position	O.U9	test
U15	carry out a medical history with an adult patient	E.U1	test
U16	conduct a full and targeted physical examination of an adult patient	E.U3	test
U17	maintain patient's medical records	E.U38	test
Social competences - Student is ready to:			
K1	respect medical confidentiality and patients' rights	O.K3	test
K2	formulate conclusions from own measurements or observations	O.K8	test
K3	use objective sources of information	O.K7	test
K4	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	test
K5	to be guided by the well-being of a patient	O.K2	test
K6	take actions towards the patient on the basis of ethical norms and principles, with an awareness of the social determinants and limitations of the disease	O.K4	test
K7	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	test
K8	implement the principles of professional camaraderie and cooperation in a team of specialists, including representatives of other medical professions, also in a multicultural and multinational environment	O.K9	test
K9	assume responsibility for decisions taken in the course of their professional activities, including in terms of the safety of oneself and others	O.K11	test
K10	promote health-promoting behaviors	O.K6	test
K11	formulate opinions on the various aspects of the professional activity	O.K10	test

seminar	12
preparation for classes	5
preparation for examination	5
case analysis	5
Student workload	Hours 27
Workload involving teacher	Hours 12

Practical workload	Hours 5
---------------------------	-------------------

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Principles of nuclear medicine: definition of nuclear medicine; ionizing radiation, types of radiation, radioisotopes for diagnostics and treatment; production of isotopes, radiotracers/radiopharmaceuticals. Radiation protection Principles of nuclear medicine 2: imaging principles - scintigraphy including SPECT, PET, hybrid systems SPECT/CT, PET/CT, PET/MRI.	W1, U1, U3, U5, U6, U7, K9	seminar
2.	Nuclear endocrinology part 1. neuroendocrine neoplasms imaging and therapy; Imaging and therapy of benign thyroid disorders. (45 minutes)	W1, W2, W3, W4, W5, W6, W7, W8, W9, U1, U2, U3, U4, U5, U6, U8, U9	seminar
3.	Urogenital system imaging (focus on kidney scintigraphy and PET in prostate cancer). (45 minutes)	W1, W2, U5	seminar
4.	Nuclear imaging of bones (bone scintigraphy, NaF PET/CT) (45 minutes)	W1, W2, W4, W5, U1, U10, U11, U12, U13, U14, U15, U16, U17, U2, U5, U6, U9, K1, K10, K11, K2, K3, K4, K5, K6, K7, K8	seminar
5.	·Nuclear endocrinology part 2. Thyroid cancer: from diagnosis to therapy and follow-up.	W1, W2, W4, W5, U1, U2, U5, U6, U8, U9	seminar
6.	PET-CT in oncology	W1, U1, U2, U4, U5, U8	seminar
7.	Nuclear cardiology (myocardial perfusion imaging - SPECT, PET; myocardial viability imaging).	W1, W2, U1, U2, U4, U5	seminar
8.	Immunoscintigraphy: research and implementation.	W1	seminar
9.	Parathyroid scintigraphy; paragangliomas and pheochromocytomas imaging and therapy. Sentinel lymph nodes imaging.	W1, W2, W4, U1, U2, U4, U5, U8, U9	seminar
10.	Introduction to immunoscintigraphy. Basics of nuclear imaging of inflammation.	W1, W2, U1, U2, U4, U5, U8	seminar

Course advanced

Teaching methods:

case study, brainstorm, classes / practicals, clinical classes, demonstration, discussion, case study method, group work, practical classes

Activities	Examination methods	Credit conditions
seminar	test	Test at the end of classes Attendance - 100% of classes Test - minimum 50% of positive answers

Entry requirements

Basic knowledge on nuclear physics (radioactivity, radionuclides, radioactive decay modes, etc.)

Occupational Medicine

Educational subject description sheet

Basic information

<p>Department Faculty of Medicine</p> <p>Field of study Medical Program</p> <p>Study level long-cycle master's degree program</p> <p>Study form full-time</p> <p>Education profile general academic</p> <p>Disciplines Medical science</p> <p>ISCED classification 0912 Medicine</p> <p>Subject related to scientific research Yes</p>	<p>Didactic cycle 2021/22</p> <p>Realization year 2024/25</p> <p>Lecture languages English</p> <p>Block obligatory for passing in the course of studies</p> <p>Mandatory obligatory</p> <p>Examination graded credit</p> <p>Standard group E. Clinical non-procedural medical disciplines</p>
--	--

<p>Periods Semester 7, Semester 8</p>	<p>Examination graded credit</p> <p>Activities and hours classes: 4 seminar: 8 e-learning lecture: 6</p>	<p>Number of ECTS points 1.0</p>
--	--	---

Goals

C1	to get students acquire theoretical and practical knowledge of defining occupational disease and the base of recognition (the legal and medical aspects)
C2	to get students knowledge of epidemiology of occupational diseases
C3	to get students knowledge of defined occupational diseases including: Pneumoconiosis, Berylliosis, Byssinosis, Metal fever, Diseases caused by the action of physical factors, Tumors of occupational origin, Occupational poisoning by heavy metals, Infectious diseases of occupational origin, Allergic disease of the occupational origin as well as issues working environment: environmental and professional monitoring.

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	basis rules of prevention, rules of conduct in the case of occupational exposure on dangerous and harmful factors	E.W32	test
W2	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	test
W3	symptoms and course of diseases	O.W2	test
Skills - Student can:			
U1	plan the diagnostic procedure and interpret its results	O.U3	test
U2	carry out a medical history with an adult patient	E.U1	test
U3	conduct a full and targeted physical examination of an adult patient	E.U3	test
U4	maintain patient's medical records	E.U38	test
Social competences - Student is ready to:			
K1	formulate conclusions from own measurements or observations	O.K8	test
K2	use objective sources of information	O.K7	test
K3	promote health-promoting behaviors	O.K6	test
K4	respect medical confidentiality and patients' rights	O.K3	test
K5	to be guided by the well-being of a patient	O.K2	test
K6	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	test

No.	Course content	Subject's learning outcomes	Activities
1.	Defining occupational disease and the base of recognition (the legal and medical aspects)	W1, U1, K1	classes, seminar
2.	Diseases pseudo-professional	W1, W2, W3, U1, U2, U3, U4, K1, K2, K3, K4, K5, K6	classes, seminar
3.	Epidemiology of occupational diseases	W3, U1, U2, U3, U4, K1	classes, seminar
4.	Pneumoconiosis. Lung diseases caused by hard metals, triggered by man-made fibers. Berylliosis. Byssinosis.	W1, W2, W3, U1, U2, U3, U4, K1, K2, K3, K4, K5, K6	classes, seminar
5.	Metal fever	W1, W2, W3, U1, U2, U3, U4, K1, K2, K3, K4, K5, K6	classes, seminar
6.	Diseases caused by the action of physical factors: ionizing radiation, electromagnetic fields, infrasound and ultrasound, high and low temperature, high and reduced atmospheric pressure. Vibration syndrome.	W1, W2, W3, U1, U2, U3, U4, K1, K2, K3, K4, K5, K6	classes, seminar
7.	Tumors of occupational origin	W1, W2, W3, U1, U2, U3, U4, K1, K2, K3, K4, K5, K6	classes, seminar
8.	Occupational poisoning by heavy metals (lead, mercury)	W1, W2, W3, U1, K1	classes, seminar, e-learning lecture
9.	Occupational exposure to hydrocarbons	W1, W2, W3, U1, U2, U3, U4, K1, K2, K3, K4, K5, K6	classes, seminar
10.	Infectious diseases of occupational origin	W1, W2, W3, U1, U2, U3, U4, K1, K2, K3, K4, K5, K6	classes, seminar
11.	Allergic occupational origin of the disease: pathogenesis of occupational allergy. Characteristics of occupational allergens. Interview and allergy diagnostics in occupational diseases. Skin tests with allergens professional point and patch. Specific and non-specific provocation tests. Occupational asthma. Allergic alveolitis. COPD. Professional anaphylaxis. Occupational skin diseases, respiratory allergic.	W1, W2, W3, U1, U2, U3, U4, K1, K2, K3, K4, K5, K6	classes, seminar, e-learning lecture
12.	Issues working environment: environmental and professional monitoring.	W1, W2, W3, U1, U2, U3, U4, K1	classes, seminar

Course advanced

Teaching methods:

case study, brainstorm, classes / practicals, clinical classes, demonstration, discussion, case study method, group work, lecture

Activities	Examination methods	Credit conditions
classes	test	60% correct answers
seminar	test	60% correct answers
e-learning lecture	test	60% correct answers

Additional info

attendance (limit is a maximum of 1 excused absence)

Entry requirements

Basic knowledge of internal medicine, ENT, dermatology, allergy including symptomatology and diagnosis of diseases of professional background. Knowledge of the pathophysiological processes, including immunology of allergic diseases, intolerance reactions and mechanisms of toxic. Obligatory attendance

Family Medicine

Goals

C1	introduction to principles of family medicine.
C2	introduction to patient-centered model of care
C3	explaining the role of family as a potential source of illness and natural support group
C4	explanation of environmental and epidemiological conditions of most common diseases in family practice
C5	emphasizing importance of health promotion and disease prevention in family practice including primary, secondary and tertiary prevention
C6	presentation of role of family doctor in health care system and principles of cooperation with medical and non-medical institutions in patient/family health care
C7	introduction to principles of monitoring and improvement of quality of care in family practice
C8	teaching of practical skills in family medicine
C9	systematisation of acquired knowledge
C10	preparation of students for independent work

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	symptoms and course of diseases	O.W2	classroom observation, clinical case presentation
W2	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	booklet of practical skills, classroom observation, clinical case presentation
W3	ethical, social and legal conditions for practicing the medical profession and the principles of health promotion, based on scientific evidence and accepted standards	O.W4	clinical case presentation
W4	environmental and epidemiological determinants of the most frequent diseases	E.W1	clinical case presentation
W5	the principles of nutrition of healthy and sick children, including breastfeeding, preventive vaccination and child health monitoring	E.W2	booklet of practical skills, classroom observation, clinical case presentation

W6	<p>the causes, symptoms, principles of diagnosis and therapeutic management of the most common diseases of children: (1) rickets, tetanus, convulsions, (2) heart defects, myocarditis, endocarditis, pericarditis, cardiomyopathy, arrhythmia, heart failure, hypertension, syncope, (3) acute and chronic diseases of the upper and lower airways, congenital defects of the respiratory system, tuberculosis, cystic fibrosis, asthma, allergic rhinitis, urticaria, anaphylactic shock, angioedema, (4) anemia, hemorrhagic diatheses, conditions of bone marrow failure, pediatric neoplastic diseases, including solid tumors typical of childhood, (5) acute and chronic abdominal pain, vomiting, diarrhea, constipation, gastrointestinal bleeding, peptic ulcer disease, non-specific intestinal diseases, pancreatic diseases, cholestasis and liver diseases, and other acquired diseases and congenital defects of the digestive tract, (6) urinary tract infections, congenital anomalies of the urinary system, nephrotic syndrome, renal stones, acute and chronic renal failure, acute and chronic nephritis, systemic kidney diseases, urinary tract disorders, vesicoureteral reflux disease, (7) growing disorders, thyroid and parathyroid diseases, adrenal diseases, diabetes, obesity, disorders of puberty and gonadal functions, (8) cerebral palsy, encephalomyelitis, meningitis, epilepsy, (9) the most common infectious diseases of childhood, (10) genetic syndromes, (11) diseases of connective tissue, rheumatic fever, juvenile arthritis, systemic lupus, dermatomyositis</p>	E.W3	booklet of practical skills, classroom observation, clinical case presentation
W7	<p>issues of abused child and sexual abuse, mental retardation and behavioral disorders – psychoses, addictions, eating disorders and excretion in children</p>	E.W4	classroom observation

W8	<p>the causes, symptoms, principles of diagnosis and therapeutic management of the most common internal diseases and their complications in adults: 1) cardiovascular diseases, including ischemic heart disease, heart defects, endocarditis, myocardial infarction, pericardial infarction, heart failure (acute and chronic), diseases of arteries and venous vessels, arterial hypertension - primary and secondary, pulmonary hypertension, 2) respiratory system diseases, including respiratory tract diseases, chronic obstructive pulmonary disease, bronchial asthma, bronchial dilatation, cystic fibrosis, respiratory infections, interstitial diseases of the lungs, pleura, mediastinum, obstructive and central sleep apnea, respiratory failure (acute and chronic), respiratory tumors, 3) diseases of the digestive system, including diseases of the mouth, esophagus, stomach and duodenum, intestines, pancreas, liver, bile ducts and gallbladder, 4) diseases of the internal secretion system, including diseases of the hypothalamus and pituitary gland, thyroidism, parathyroidism, adrenal cortex and medulla, ovaries and testicles, and neuroendocrine tumors, polyglandular syndromes, various types of diabetes and metabolic syndrome - hypoglycaemia, obesity, dyslipidemia, 5) diseases of the kidneys and the urinary tract, including acute and chronic renal failure, glomerulonephrine and interstitial kidney diseases, kidney cysts, kidney stones, urinary tract infections, urinary tract neoplasms, in particular of bladder and kidney neoplasms, 6) hematopoietic diseases, including bone marrow aplasia, anemia, granulocytopenia and agranulocytosis, thrombocytopenia, acute leukemia, myeloproliferative and myelodysplastic-myeloproliferative tumours, myelodysplastic syndromes, mature B and T lymphocytes tumors, bleeding diatheses, thrombophilia, life-threatening conditions in hematology, blood disorders in other organ diseases, 7) rheumatic diseases, including systemic connective tissue diseases, systemic vasculitis, joint inflammations involving spinal cord, metabolic bone diseases, osteoporosis and osteoarthritis in particular, gout, 8) allergic diseases, including anaphylaxis and anaphylactic shock and angioedema, 9) water-electrolyte and acid-base disorders: dehydration conditions, overhydration conditions, electrolyte, acidic and alkaline disorders</p>	E.W7	booklet of practical skills, classroom observation, clinical case presentation
W9	<p>the causes and basic differences in the most common diseases in the elderly and the principles of management in basic geriatric syndromes</p>	E.W9	classroom observation, clinical case presentation
W10	<p>course and symptoms of the aging process and the principles of the overall geriatric assessment and interdisciplinary care for an elderly patient</p>	E.W8	booklet of practical skills, clinical case presentation
W11	<p>the basic principles of pharmacotherapy for diseases in the elderly</p>	E.W10	booklet of practical skills, clinical case presentation
W12	<p>basic principles of organizing care for the elderly and the burden on the carer of the elderly</p>	E.W12	booklet of practical skills, classroom observation, clinical case presentation
W13	<p>environmental and epidemiological determinants of the most frequent human neoplastic diseases</p>	E.W23	clinical case presentation

W14	rules of conduct in the event of the detection of an infectious disease	E.W33	booklet of practical skills, classroom observation, clinical case presentation
W15	basic features, environmental and epidemiological conditions of the most common human skin diseases	E.W35	booklet of practical skills, classroom observation
W16	causes, symptoms, principles of diagnosis and therapeutic management in the most common diseases and specific problems in the practice of a family physician	E.W38	booklet of practical skills, clinical case presentation
W17	the types of biological materials to be used for laboratory diagnosis and the rules for the collection of test material	E.W39	booklet of practical skills
W18	theoretical and practical basics of laboratory diagnostics	E.W40	booklet of practical skills
W19	health effects of systematic physical activity of children and adolescents and physical activity of adults in prevention of selected diseases	E.W44	booklet of practical skills
W20	principles of immunoprophylaxis of infectious diseases	E.W51	booklet of practical skills, classroom observation, clinical case presentation
W21	the specificity of the study in sports medicine, including exercise capacity tests. Knows the rules of medical certification in children, adolescent and adult sportsmen	E.W45	classroom observation
Skills - Student can:			
U1	identify medical problems and prioritize medical management	O.U1	booklet of practical skills, classroom observation
U2	identify life-threatening conditions that require immediate medical intervention	O.U2	booklet of practical skills, classroom observation
U3	plan the diagnostic procedure and interpret its results	O.U3	classroom observation
U4	implement appropriate and safe therapeutic treatment and predict its effects	O.U4	classroom observation, clinical case presentation
U5	plan own learning activities and constantly learn in order to update own knowledge	O.U5	classroom observation
U6	inspire the learning process of others	O.U6	classroom observation
U7	communicate with the patient and his family in an atmosphere of trust, taking into account the needs of the patient	O.U7	classroom observation
U8	communicate and share knowledge with colleagues in a team	O.U8	classroom observation
U9	carry out a medical history with an adult patient	E.U1	booklet of practical skills, classroom observation
U10	carry out a medical interview with the child and his or her family	E.U2	booklet of practical skills, classroom observation
U11	conduct a full and targeted physical examination of an adult patient	E.U3	booklet of practical skills, classroom observation
U12	carry out a physical examination of a child of all ages	E.U4	booklet of practical skills, classroom observation

U13	conduct an approximate hearing and field of vision examination, and an otoscopic examination	E.U6	booklet of practical skills, classroom observation
U14	compile anthropometric and blood pressure measurements with data on centile grids	E.U9	booklet of practical skills, classroom observation
U15	assess the degree of advancement of puberty	E.U10	booklet of practical skills, classroom observation
U16	conduct routine health checks	E.U11	booklet of practical skills, classroom observation
U17	perform differential diagnosis of the most common diseases of adults and children	E.U12	booklet of practical skills, classroom observation
U18	plan diagnostic, therapeutic and prophylactic procedures	E.U16	booklet of practical skills, classroom observation
U19	analyze the potential adverse reactions of individual medicines and the interactions between them	E.U17	classroom observation, clinical case presentation
U20	qualify the patient for home and hospital treatment	E.U20	classroom observation, clinical case presentation
U21	interpret the results of laboratory tests and identify the causes of abnormalities	E.U24	booklet of practical skills, classroom observation
U22	qualify the patient for vaccination	E.U27	booklet of practical skills, classroom observation
U23	plan specialist consultations	E.U32	booklet of practical skills, classroom observation
U24	maintain patient's medical records	E.U38	classroom observation
U25	understand the importance and organization of support groups for chronic patients and their families, and Balint groups for medical staff	E.U51	classroom observation
U26	qualify children and young people for physical education and sports, and adults for appropriate physical activity. Interprets the stress tests	E.U41	classroom observation
Social competences - Student is ready to:			
K1	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	booklet of practical skills, classroom observation
K2	to be guided by the well-being of a patient	O.K2	booklet of practical skills, classroom observation
K3	respect medical confidentiality and patients' rights	O.K3	booklet of practical skills, classroom observation
K4	take actions towards the patient on the basis of ethical norms and principles, with an awareness of the social determinants and limitations of the disease	O.K4	classroom observation
K5	promote health-promoting behaviors	O.K6	booklet of practical skills, classroom observation, clinical case presentation
K6	use objective sources of information	O.K7	classroom observation, clinical case presentation
K7	implement the principles of professional camaraderie and cooperation in a team of specialists, including representatives of other medical professions, also in a multicultural and multinational environment	O.K9	classroom observation

K8	assume responsibility for decisions taken in the course of their professional activities, including in terms of the safety of oneself and others	O.K11	classroom observation

12.	Acute Illnesses in Family Medicine	W1, W14, W6, W8, U19, U2	clinical classes
13.	The chosen chronic and Civilization diseases	W1, W15, W6, W8, U19	seminar, clinical classes
14.	Care for Chronically and Terminally Ill Patients	W2, U20	seminar, clinical classes
15.	Family Practice Organization and Quality of Care	U24, U8, K2, K7, K8	seminar, clinical classes
16.	Specific Psychological and Clinical Problems of Pediatric, Adult and Senile Population in the Family Medicine Practice and the Methods of Solving Them.	W10, W11, W12, W16, W19, W20, W21, W5, W6, W7, W9, U10, U11, U12, U15, U17, U23, U26, U4, U9	seminar, clinical classes
17.	Prophylaxis, Diagnosis of Oncological and Civilization Diseases.	W13, W4	seminar, clinical classes
18.	Family Abuse.	W7	seminar, clinical classes
19.	Family Medicine Care After Patient Hospitalization	U20	seminar, clinical classes

Course advanced

Semester 7, Semester 8

Teaching methods:

case study, brainstorm, classes / practicals, clinical classes, discussion, e-learning, educational film, case study method, situation method, group work, assignments solving, seminar, simulation, simulated patient, virtual patient

Activities	Examination methods	Credit conditions
seminar	classroom observation	Completion of module requires meeting the following conditions during seminars: 1. attendance in all seminars is needed to have a credit 2. activity in classes 3. attitude and conduct

Activities	Examination methods	Credit conditions
classes	classroom observation	Completion of module requires meeting the following conditions during seminars: 1. attendance in all seminars is needed to have a credit 2. activity in classes 3. attitude and conduct
e-learning lecture	classroom observation, clinical case presentation	Completion of module requires meeting the following conditions during seminars: 1. attendance in all seminars is needed to have a credit 2. activity in classes 3. attitude and conduct

Semester 11, Semester 12

Teaching methods:

clinical classes, practical classes

Activities	Examination methods	Credit conditions
clinical classes	booklet of practical skills, classroom observation, clinical case presentation	Students are assessed based on attendance and participation in classes, obtained skills are confirmed in the "Booklet of practical skills" Module passing requires fulfilling the following conditions: 1. attendance in classes 2. active participation in classes 3. presentation of two clinical cases 4. passing the final test exam: Written (MCQ test) with a pass mark of $\geq 60\%$ (the resit of the exam for all 6th-year students is during the summer examination session)

Additional info

The students are obliged to familiarize themselves with the literature recommended before the classes.

Entry requirements

Knowledge in: epidemiology, sociology, microbiology, psychology, laboratory diagnostics, pharmacology. To start second part of the subject on 6th year the following credits are obligatory: family medicine part 1 (4th year), leading subjects and all other subjects, which are continued from previous years (internal diseases, pediatrics, family medicine, psychiatry, surgery, obstetrics and gynecology, emergency medicine). Presence at all classes is obligatory.

Neurology

Educational subject description sheet

Basic information

<p>Department Faculty of Medicine</p> <p>Field of study Medical Program</p> <p>Study level long-cycle master's degree program</p> <p>Study form full-time</p> <p>Education profile general academic</p> <p>Disciplines Medical science</p> <p>ISCED classification 0912 Medicine</p> <p>Subject related to scientific research Yes</p>	<p>Didactic cycle 2021/22</p> <p>Realization year 2024/25</p> <p>Lecture languages English</p> <p>Block obligatory for passing in the course of studies</p> <p>Mandatory obligatory</p> <p>Examination examination</p> <p>Standard groups C. Preclinical course, E. Clinical non-procedural medical disciplines</p>

<p>Periods Semester 7, Semester 8</p>	<p>Examination examination</p> <p>Activities and hours e-learning seminar: 10 seminar: 34 classes: 46</p>	<p>Number of ECTS points 7.0</p>
--	---	---

Goals

C1	1. The ability of taking medical history and performing neurological examination allowing to identify life-threatening conditions and to make decisions about preliminary diagnosis of the patient's symptoms.
C2	2. Gaining knowledge about frequent and important (from epidemiological and social point of view) diseases of the nervous system.
C3	3. Gaining knowledge about neurological terminology, methods used for diagnosing nervous system disorders and treatment of chronic neurological diseases, which will allow future collaboration with a neurologist.
C4	4. Gaining experience in contact with patients with nervous system disorders.

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	causes, symptoms, principles of diagnosis and therapeutic management in the most common diseases of the nervous system, including: 1) headaches: migraines, tension headaches and headache syndromes and neuralgia of the nerve V, 2) cerebral vascular diseases, in particular stroke, 3) epilepsy, 4) infections of the nervous system, in particular meningitis, borreliosis, herpetic encephalitis, neurotransmission diseases, 5) dementia, in particular: Alzheimer's disease, frontal dementia, vascular dementia and other dementia syndromes, 6) basal ganglia diseases, Parkinson's disease in particular, 7) demyelinating diseases, multiple sclerosis in particular, 8) diseases of the neuromuscular system, lateral atrophic sclerosis and sciatic neuralgia in particular, 9) craniocerebral injuries, cerebral palsy in particular	E.W14	test, oral credit
Skills - Student can:			
U1	carry out a medical history with an adult patient	E.U1	classroom observation
U2	conduct a full and targeted physical examination of an adult patient	E.U3	classroom observation
U3	assess the general condition, state of consciousness and awareness of the patient	E.U7	classroom observation, oral credit
U4	plan diagnostic, therapeutic and prophylactic procedures	E.U16	classroom observation, oral credit
U5	recognize immediate life-threatening conditions	E.U14	classroom observation
Social competences - Student is ready to:			
K1	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	classroom observation
K2	to be guided by the well-being of a patient	O.K2	classroom observation

21.	Neuropathology	W1	seminar
22.	Involuntary movements	W1	seminar

Course advanced

Teaching methods:

case study, clinical classes, discussion, e-learning, seminar, lecture

Activities	Examination methods	Credit conditions
e-learning seminar	test	mandatory attendance, preparation for classes, active participation in classes
seminar	test	mandatory attendance, preparation for classes, active participation in classes
classes	classroom observation, test, oral credit	mandatory attendance, preparation for classes, active participation in classes

Additional info

The students are allowed 1 excused absence at bedside teaching and 1 excused absence in seminars. Additional absences have to be made up for either by attending medical shifts or writing an essay on a recommended topic. The passing score for the final test is 60% + 1 point, the grades are proportional to the final result.

Entry requirements

Passed course in Pharmacology and Radiology.
Neurology exam can be attended with passed exams in Pharmacology and Radiology.
Attending classes is obligatory.

Ophthalmology

Goals

C1	The aim of education is to acquire knowledge about and the ability to recognize eye diseases, provide first aid in the case of eye injuries, recognize symptoms that require immediate specialist assistance, as well as the selection of diagnostic tests and interpretation of the results of ophthalmologic consultations.
----	---

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	symptoms and course of diseases	O.W2	written examination, practical colloquiums
W2	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	written examination, practical colloquiums

W3	issues related to diseases of the visual system, in particular: 1) the causes, symptoms, principles of diagnosis and therapeutic management of the most common ophthalmic diseases, 2) ophthalmic complications of systemic diseases and their ophthalmic symptomatology, and correct methods of dealing with these cases, 3) surgical management of specific eye diseases, 4) the main groups of drugs used in ophthalmology, their adverse reactions and interactions, 5) the groups of generally used medicines with complications and ophthalmic contraindications and their mechanism	F.W11	written examination, practical colloquiums
Skills - Student can:			
U1	identify medical problems and prioritize medical management	O.U1	written examination, practical colloquiums
U2	perform ophthalmic screening tests	F.U19	written examination, practical colloquiums
U3	recognize ophthalmologic conditions requiring immediate specialist help and provide preliminary, qualified help in cases of physical and chemical injuries of the eye	F.U20	written examination, practical colloquiums
Social competences - Student is ready to:			
K1	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	practical colloquiums
K2	respect medical confidentiality and patients' rights	O.K3	practical colloquiums
K3	to be guided by the well-being of a patient	O.K2	practical colloquiums
K4	take actions towards the patient on the basis of ethical norms and principles, with an awareness of the social determinants and limitations of the disease	O.K4	practical colloquiums
K5	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	practical colloquiums
K6	implement the principles of professional camaraderie and cooperation in a team of specialists, including representatives of other medical professions, also in a multicultural and multinational environment	O.K9	practical colloquiums
K7	formulate conclusions from own measurements or observations	O.K8	practical colloquiums

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Lectures are primarily of an informative nature, although the lecturer can also conduct lectures in an interactive form, engaging students in the discussed problem based on previously acquired knowledge; e.g. news on the anatomy and physiology of the eye. During lectures, basic eye diseases are discussed, manifested as "Red eye", diseases that cause sudden deterioration of vision ("acute ophthalmologic conditions"), and chronic ophthalmologic conditions that cause vision loss (cataracts, glaucoma, retinal and macular diseases, uveitis). The topics of lectures also include discussion of ophthalmic conditions associated with systemic diseases (e.g. diabetes, uveitis, Lyme disease) that require interdisciplinary management. Clinical division, diagnostics and treatment of strabismus, as well as issues related to neuroscience are also presented.	W1, W2	classes, e-learning lecture
2.	Classes are interactive, clinical case analysis is conducted during classes, and a didactic discussion on the discussed problem is conducted.	W3	classes
3.	Exercises: Understanding the most important diagnostic methods of the visual system (visual acuity assessment, refractive defect test, tonometry, anterior segment and fundus examination), including imaging (USG, OCT, fluorescein angiography, angio-OCT). Demonstration of patients with various ophthalmic diseases; collecting ophthalmic history, assessing the anterior segment of the eyeball in the slit lamp and the fundus using an ophthalmic speculum. Knowledge of recognition and management of ophthalmic emergencies, ability to provide first ophthalmic aid (conjunctival sac rinsing, inversion of eyelids, removal of foreign bodies from the conjunctival sac), learning to apply ointments, drops into the conjunctival sac and putting on an eye dressing in outpatient and / or hospitalized patients in the Ward. Students during practical classes have the opportunity to observe ophthalmic procedures "live" directly in the operating room or via multimedia in the lecture room.	U1, U2, U3, K1, K2, K3, K4, K5, K6, K7	classes

Course advanced

Teaching methods:

case study, classes / practicals, clinical classes, discussion, e-learning, educational film, group work, seminar, lecture, practical classes

Activities	Examination methods	Credit conditions
e-learning lecture	written examination	The exam in the form of a multiple-choice test, consisting of 35 questions. A condition for admission to the theoretical exam in ophthalmology is attendance at all seminars and exercises and obtaining credit for practical classes (passed practical exam) at the assistant training subgroup.
classes	practical colloquiums	Checking the skills of visual acuity testing using Snellen charts, assessment of the anterior segment of the eyeball in the slit lamp, basics of fundus examination, conjunctival sac flushing, placing the drops into the conjunctival sac, inverting the eyelids.

Entry requirements

Anatomy and physiology of the eye.

Medical Law and Medical Deontology

Goals

C1	Presentation of legal and ethical background of physician's work
----	--

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	ethical, social and legal conditions for practicing the medical profession and the principles of health promotion, based on scientific evidence and accepted standards	O.W4	written examination, classroom observation

W2	the concept of public health, its objectives, tasks and the structure and organization of the health care system at the national and global level, as well as the impact of economic conditions on the health protection options	G.W4	written examination, classroom observation
W3	legal regulations concerning the provision of health services, patient's rights, grounds for practicing the profession of doctor and functioning of medical self-government	G.W5	written examination, classroom observation
W4	basic legal regulations regarding the organization and financing of health care, general health insurance and the principles of organization of units performing medical activities	G.W6	written examination, classroom observation
W5	legal obligations of the doctor concerning pronouncement of death	G.W7	written examination, classroom observation
W6	legal regulations and basic methods of medical experimentation and other medical research, including basic methods of data analysis	G.W8	written examination, classroom observation
W7	legal regulations concerning transplantation, artificial procreation, abortion, aesthetic procedures, palliative treatment, mental illness, etc.	G.W9	written examination, classroom observation
W8	legal regulations concerning medical confidentiality, keeping medical records, criminal, civil and professional liability of a doctor	G.W11	written examination, classroom observation
W9	situations in which there are conflicts between values and principles relating to the medical profession and the provision of health services, and provide a justification for the decisions taken	G.W19	written examination, classroom observation
W10	principles of pharmaceutical law	G.W10	written examination, classroom observation
Skills - Student can:			
U1	communicate with the patient and his family in an atmosphere of trust, taking into account the needs of the patient	O.U7	written examination, classroom observation
U2	explain basic rights and the legal basis for the provision of medical services to recipients of medical services	G.U5	written examination, classroom observation
U3	cooperate with other professions in the field of health protection	G.U10	written examination, classroom observation
U4	identify the relevant legislation containing standards for the provision of health services and the medical profession	G.U11	written examination, classroom observation
U5	apply legal regulations regarding the issue of medical certificates for the needs of patients, their families and other entities	G.U6	written examination, classroom observation
Social competences - Student is ready to:			
K1	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	written examination, classroom observation
K2	to be guided by the well-being of a patient	O.K2	written examination, classroom observation

K3	respect medical confidentiality and patients' rights	O.K3	written examination, classroom observation
K4	take actions towards the patient on the basis of ethical norms and principles, with an awareness of the social determinants and limitations of the disease	O.K4	written examination, classroom observation
K5	implement the principles of professional camaraderie and cooperation in a team of specialists, including representatives of other medical professions, also in a multicultural and multinational environment	O.K9	written examination, classroom observation
K6	formulate opinions on the various aspects of the professional activity	O.K10	written examination, classroom observation

Goals

C1	The aim of this course is to provide knowledge in the field of dentistry and its specialties, acquainting students with selected facts on embryology, anatomy and physiology of the oral cavity and familiarizing them with etiology, diagnostics and treatment of dental, periodontal and oral mucosa diseases.
----	--

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	symptoms and course of diseases	O.W2	oral answer, test

W2	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	oral answer, test
W3	development, structure and functions of the human body in normal and pathological conditions	O.W1	oral answer, test
Skills - Student can:			
U1	plan the diagnostic procedure and interpret its results	O.U3	classroom observation, oral answer
U2	implement appropriate and safe therapeutic treatment and predict its effects	O.U4	classroom observation, oral answer
U3	identify medical problems and prioritize medical management	O.U1	classroom observation, oral answer
Social competences - Student is ready to:			
K1	take actions towards the patient on the basis of ethical norms and principles, with an awareness of the social determinants and limitations of the disease	O.K4	classroom observation, oral answer
K2	promote health-promoting behaviors	O.K6	classroom observation, oral answer
K3	formulate conclusions from own measurements or observations	O.K8	classroom observation, oral answer
K4	use objective sources of information	O.K7	classroom observation, oral answer

Calculation of ECTS points

Goals

C1	Ability to maintain therapeutic contact with psychiatric patient.
C2	Ability to basic clinical decisions making and treatment qualification of patients especially regarding psychotherapy.
C3	Advisory competencies regarding choice or verification of psychotherapy related influences (e.g. counselling, support).

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
------	----------------------	---------	---------------------

Knowledge - Student knows and understands:			
W1	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	classroom observation, multiple choice test
W2	symptoms, principles of diagnosis and therapeutic management in the most frequent mental disorders, including 1) schizophrenia, 2) affective disorders, 3) neurotic and adaptive disorders, 4) nutritional disorders, 5) disturbances related to the intake of psychoactive substances, 6) sleep disorders	E.W17	classroom observation, multiple choice test
W3	the specificity of mental disorders and their treatment in children, adolescents and in old age	E.W19	multiple choice test
W4	symptoms of mental disorders in the course of somatic diseases, their influence on the course of the basic disease and prognosis and the principles of their treatment	E.W20	multiple choice test
W5	the problem of human sexuality and fundamental disorders associated with it	E.W21	classroom observation, multiple choice test
W6	basic psychotherapeutic techniques and principles for combining psychotherapy and pharmacotherapy	E.W58	classroom observation, multiple choice test
W7	principles of implementing psychotherapeutic dialog and types of therapeutic interventions	E.W57	classroom observation, multiple choice test
W8	understands the symptoms, understands the etiology, treatment rules and is able to establish therapeutic contact with patients with the most common disorders: a) anxiety, somatic and other neurotic forms b) post-traumatic disorders c) personality and behavioral disorders of adults	E.W56	classroom observation, multiple choice test
W9	ethical, social and legal conditions for practicing the medical profession and the principles of health promotion, based on scientific evidence and accepted standards	O.W4	classroom observation, multiple choice test
Skills - Student can:			
U1	implement appropriate and safe therapeutic treatment and predict its effects	O.U4	classroom observation, multiple choice test
U2	plan own learning activities and constantly learn in order to update own knowledge	O.U5	classroom observation
U3	communicate with the patient and his family in an atmosphere of trust, taking into account the needs of the patient	O.U7	multiple choice test
U4	communicate and share knowledge with colleagues in a team	O.U8	classroom observation, multiple choice test
U5	critically evaluate the results of scientific research and adequately justify the position	O.U9	classroom observation, multiple choice test
U6	plan the diagnostic procedure and interpret its results	O.U3	classroom observation, multiple choice test
U7	identify life-threatening conditions that require immediate medical intervention	O.U2	classroom observation, multiple choice test
U8	identify medical problems and prioritize medical management	O.U1	classroom observation, multiple choice test

U9	carry out a medical history with an adult patient	E.U1	classroom observation, multiple choice test
U10	conduct a psychiatric examination	E.U5	classroom observation, multiple choice test
U11	evaluate and describe the somatic and mental state of the patient	E.U13	classroom observation, multiple choice test
U12	recognize immediate life-threatening conditions	E.U14	classroom observation, multiple choice test
U13	qualify the patient for home and hospital treatment	E.U20	classroom observation, multiple choice test
U14	recognize states in which the duration of life, functional state or patient preferences limit the conduct in accordance with the guidelines specified for a given disease	E.U21	classroom observation, multiple choice test
U15	recognize the symptoms of drug dependence and propose treatment	E.U19	classroom observation, multiple choice test
U16	propose individualization of existing therapeutic guidelines and other methods of treatment in the face of ineffectiveness or contraindications to standard therapy	E.U18	classroom observation
U17	plan diagnostic, therapeutic and prophylactic procedures	E.U16	classroom observation, multiple choice test
U18	perform differential diagnosis of the most common diseases of adults and children	E.U12	classroom observation, multiple choice test
U19	plan specialist consultations	E.U32	classroom observation, multiple choice test
U20	interpret pharmaceutical characteristics of medicinal products and critically assess advertising materials for medicines	E.U31	classroom observation
U21	maintain patient's medical records	E.U38	multiple choice test
U22	negotiate patient referral for psychotherapy and empathic patient support during a crisis	E.U50	classroom observation, multiple choice test
Social competences - Student is ready to:			
K1	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	classroom observation, multiple choice test
K2	to be guided by the well-being of a patient	O.K2	classroom observation, multiple choice test
K3	respect medical confidentiality and patients' rights	O.K3	classroom observation, multiple choice test
K4	take actions towards the patient on the basis of ethical norms and principles, with an awareness of the social determinants and limitations of the disease	O.K4	classroom observation, multiple choice test
K5	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	classroom observation
K6	promote health-promoting behaviors	O.K6	classroom observation
K7	use objective sources of information	O.K7	classroom observation

K8	formulate conclusions from own measurements or observations	O.K8	classroom observation
K9	implement the principles of professional camaraderie and cooperation in a team of specialists, including representatives of other medical professions, also in a multicultural and multinational environment	O.K9	classroom observation, multiple choice test
K10	formulate opinions on the various aspects of the professional activity	O.K10	classroom observation, multiple choice test
K11	assume responsibility for decisions taken in the course of their professional activities, including in terms of the safety of oneself and others	O.K11	classroom observation, multiple choice test

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Psychotherapy combined with pharmacotherapy	W1, W2, W3, W4, W5, W6, U1, U11, U12, U15, U16, U17, U20, U21, U5, U7, U8, K1, K2, K4, K5, K7, K8, K9	seminar
2.	Neurobiology and psychotherapy	W1, W2, W3, W4, W6, W8, U11, U15, U16, U2, U20, U5, U8, K5, K7	seminar
3.	Psychodynamic etiology of psychiatric disorders treated with psychotherapy	W2, W5, W8, U10, U5, U9, K7, K8	seminar
4.	Psychotherapy effectiveness	W1, W2, W3, W4, W5, W6, W8, W9, U1, U13, U15, U16, U17, U2, U4, U5, K10, K2, K5, K7, K8	seminar

5.	Contact, psychotherapeutic relationship, nonspecific and specific curative factors in psychotherapy process	W1, W2, W3, W4, W5, W6, W7, U1, U10, U11, U12, U15, U17, U22, U3, U4, U9, K1, K10, K2, K3, K4, K5, K8, K9	classes
6.	Psychotherapy versus psychological help	W1, W2, W3, W4, W5, W6, W7, W8, W9, U1, U10, U11, U12, U16, U17, U2, U22, U3, U4, U5, U9, K1, K2, K3, K4, K5, K8, K9	classes
7.	Curative and „developmental“ understanding of psychotherapy (treatment of childhood origin disorders)	W1, W2, W3, W5, W6, W7, W8, U1, U10, U11, U12, U14, U17, U18, U2, U22, U3, U4, U9, K1, K10, K2, K3, K4, K5, K6, K7, K9	classes
8.	Elements of psychotherapy in every medical action	W1, W2, W3, W4, W5, W6, W7, W8, W9, U1, U10, U11, U12, U13, U15, U19, U2, U21, U22, U3, U4, U7, U8, U9, K1, K2, K4, K5, K6, K8, K9	classes
9.	Behavioral rules when in dialogue (basic rules of intervening for doctors, psychotherapists)	W1, W2, W3, W5, W6, W7, W8, U10, U11, U12, U22, U3, U9, K1, K5	classes
10.	Assumptions and rules of psychoanalytic psychotherapy, behavioral, cognitive, systemic	W1, W2, W3, W6, W7, W8, U1, U22, U5, K1, K10, K5, K7	classes
11.	Qualification for psychotherapy	W1, W2, W3, W4, W5, W6, W7, W8, W9, U1, U10, U13, U14, U15, U16, U17, U19, U22, U3, U5, U6, U8, U9, K1, K10, K11, K2, K3, K4, K5, K6, K7, K8, K9	classes
12.	Range, indications for short-term and long-term psychotherapy	W1, W2, W3, W4, W5, W6, W7, W8, U1, U13, U14, U16, U17, U22, U5, U7, K2, K4, K7, K8	classes
13.	Rules of work focused on symptoms, insight-oriented work focused on background, inclusion of biographical data	W1, W2, W3, W4, W5, W6, W7, W8, U1, U10, U11, U16, U17, U18, U22, U3, U6, U9, K1, K11, K2, K4, K8, K9	classes
14.	Psychotherapist's work in group. Influencing therapy group' dynamics and knowing specific and nonspecific curative factors in group psychotherapy process	W1, W2, W3, W4, W5, W6, W7, W8, W9, U1, U11, U13, U14, U16, U17, U2, U22, U3, U4, U7, K1, K10, K11, K2, K3, K4, K5, K8, K9	classes
15.	Learning psychotherapeutic techniques e.g. hypnosis, psychodrama, psychotherapeutic drawing, guided imagery, music therapy etc.	W1, W2, W3, W4, W5, W6, W8, W9, U1, U14, U15, U17, U2, U3, U5, U6, K1, K10, K2, K4, K5, K7, K9	classes

16.	Application of psychotherapeutic influences in various sectors of medicine and in rehabilitation and with patients with various disorders	W1, W2, W3, W4, W5, W6, W7, W8, W9, U1, U10, U11, U12, U14, U15, U16, U17, U18, U2, U21, U22, U3, U4, U5, U7, U8, U9, K1, K10, K11, K2, K3, K4, K5, K6, K7, K8, K9	classes
-----	---	--	---------

Course advanced

Teaching methods:

case study, brainstorm, classes / practicals, clinical classes, classes in simulated conditions, demonstration, discussion, staging, problem solving method, case study method, situation method, group work, seminar, simulation

Activities	Examination methods	Credit conditions
seminar	multiple choice test	Test exam is combined with test exam regarding exercises.
classes	classroom observation, multiple choice test	Practicals credited by Chair and Dept assistants based on skills, knowledge and active participation. Test exam consisted of 25 multiple choice questions (60% correct answers is required). Test 25 questions 0-14 - 2,0 15-16 - 3,0 17-18 - 3,5 19-20 - 4,0 21-22 - 4,5 23-25 - 5,0 Student's high activity can be granted 0,5.

Additional info

The students are required to attend all classes and participate actively in them. The students are expected to complete all assignments requested by the teaching assistant and come to the class fully prepared. Furthermore, the students should participate in the patient's examination, particularly in clinical discussions, including differential diagnosis and treatment planning.

Note: The students must always be on time for the classes. Those arriving late may not join the ongoing patient's examination once it has started.

Should the student's absence be justified with a legitimate reason (in line with the general regulations of the Jagiellonian University Medical College), the teaching assistant shall decide on how the student makes up for the absence.

No change of outfit is required. Business casual or smart casual outfits are recommended.

Entry requirements

Presence is obligatory.

Goals

C1	- to provide students with the role and tasks of public health in Poland, other EU countries, the USA, and worldwide
C2	-to teach health determinants and methods of population diagnosis used to assess public health needs
C3	-to provide knowledge, and some practical skills about health promotion and disease prevention, contributing factors, and possibilities of practical implementation
C4	-to teach students economic determinants of public health
C5	-to present health care models and organization rules at different levels of public health
C6	-to present and discuss public health challenges

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	ethical, social and legal conditions for practicing the medical profession and the principles of health promotion, based on scientific evidence and accepted standards	O.W4	classroom observation, oral answer, essay, assignment report, test, written credit
W2	the concept of public health, its objectives, tasks and the structure and organization of the health care system at the national and global level, as well as the impact of economic conditions on the health protection options	G.W4	classroom observation, oral answer, test, written credit
W3	methods of individual and population health assessment, different systems of disease classification and medical procedures	G.W1	group assessment, oral answer, test, written credit
W4	basic legal regulations regarding the organization and financing of health care, general health insurance and the principles of organization of units performing medical activities	G.W6	group assessment, oral answer, test, written credit
Skills - Student can:			
U1	plan own learning activities and constantly learn in order to update own knowledge	O.U5	classroom observation, group assessment
U2	collect information on the presence of risk factors for communicable and chronic diseases and plan prevention activities at different levels of prevention	G.U2	classroom observation, group assessment, oral answer, essay, assignment report
U3	interpret the measures of the incidence of diseases and disabilities	G.U3	classroom observation, group assessment, oral answer, assignment report, test, written credit
U4	cooperate with other professions in the field of health protection	G.U10	classroom observation, group assessment, oral answer, essay, assignment report
U5	identify the relevant legislation containing standards for the provision of health services and the medical profession	G.U11	classroom observation, group assessment, essay, assignment report
Social competences - Student is ready to:			
K1	promote health-promoting behaviors	O.K6	classroom observation, group assessment
K2	implement the principles of professional camaraderie and cooperation in a team of specialists, including representatives of other medical professions, also in a multicultural and multinational environment	O.K9	classroom observation, group assessment
K3	formulate opinions on the various aspects of the professional activity	O.K10	classroom observation, group assessment, oral answer

5.	Public health programs. Knowledge exchange in public health. Public health in XXI century and public health challenges.	W1, W2, W4, U1, U4, K1, K2, K3	seminar

Course advanced

Teaching methods:

case study, brainstorm, classes / practicals, discussion, problem solving method, project method, presentation, group work,

assignments solving, seminar, workshop, lecture with multimedia presentation, practical classes

Activities	Examination methods	Credit conditions
seminar	classroom observation, group assessment, oral answer, essay, assignment report, test, written credit	There are two type activities which contribute to the final grade: public health skills and written exam. The public health skills are presented by the discussion provided in the written essay or by giving the presentation (requirements are provided during classes) and contribute in 40% to final grade. The written exam: a first term final exam is a MCQ test, 30 questions, the second term exam is dated on the exam sessions for re-takers and consists of 4 (four) open questions. Answers for each question are scored from 0 to 5 points (with intervals of 0.5 pts). The criterion to pass for each term of the final exam $\geq 50\%$. The final grade scheme (% is the final product of skills and written exam): 50% do 59.9% = satisfactory (3.0) 60%-69.9% = satisfactory plus (3.5) 70.0-79.9% = good (4.0) 80%-89.90% = good plus (4.5) 90%-100% = very good (5.0)

Additional info

To be allowed to take the final exam student should fulfill the attendance criterion, meaning he/she should attend and actively participate in all of scheduled meetings (or make up for absence after the acceptance of the teacher responsible for the meeting). If the criterion is not fulfilled student is not allowed to take the final exam and consequently the term is lost. Student is obligated to come on time for course meetings. 2 lateness are allowed without punishment, otherwise student is committed to make up for one of the topic she/he has been late, the topic is drawn by the teacher.

Entry requirements

Attendance on the course in obligatory. To be allowed to participate in the course student should pass an epidemiology course (or other of this type which covered the required teaching effects as described under O.W4-5; G.W1-3,8; O.U5-6,8-9; G.U1-4; O.K6-8 in teaching effects).

Surgery - summer clerkship

Educational subject description sheet

Basic information

<p>Department Faculty of Medicine</p> <p>Field of study Medical Program</p> <p>Study level long-cycle master's degree program</p> <p>Study form full-time</p> <p>Education profile general academic</p> <p>Disciplines Medical science</p> <p>ISCED classification 0912 Medicine</p>	<p>Didactic cycle 2021/22</p> <p>Realization year 2024/25</p> <p>Lecture languages English</p> <p>Block obligatory for passing in the course of studies</p> <p>Mandatory obligatory</p> <p>Examination credit</p> <p>Standard group</p>

Practical workload	Hours 60

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	participation in rounds and morning reports prepared by on-call physicians; participation in the ward operation, performing basic procedures, change of dressings, suture removal, application of infusion drips, collecting specimens for diagnostic tests; principles of aseptics and antiseptics, as well as pre-surgical scrubbing techniques; participation in performing surgeries in an operating theatre.	W1, W2, U1, U2, K1, K2, K3	professional practice

Course advanced

Teaching methods:

professional practice

Activities	Examination methods	Credit conditions
professional practice	booklet of practical skills, booklet of practice	The preceptor is responsible for fulfillment of clerkship outline and grants credit to student by filling out the JU MC SME Certificate of Summer Clerkship Completion. The student is obliged to keep record of all performed procedures and acquired skills in the List of Approved Procedures booklet.

Additional info

2 weeks 60 h (5 days/week, 6 h/day); can be completed over summer vacation months only (July - August). During that time, student must complete four on-call duties between 2 pm and 8 pm (two at each of the wards). Active interns are excused from presence in the obligatory activities before 2 pm on the on-call day. Excused absence can be granted to the active intern only on submitting formal medical certificate. Illness longer than one week causes internship to be lengthened by the time of absence.

-----	----------------	-----------------------------	------------

1.	<p>During clerkship, student should: In the PEDIATRIC part:</p> <ol style="list-style-type: none"> 1. Learn organization of pediatric ward/department and organizational links between the ward/department and the outpatient health care system; learning basic procedures used at the ward and staff competence in terms of: childcare, examinations and diagnostics (with particular emphasis on: admission, stay and discharge record keeping, medical records keeping); 2. learn sanitary and epidemiological regulations at neonatal and pediatric wards, and the methods of preventing hospital infections; 3. participate in morning rounds and learn principles of patient record keeping; participate in the training courses held by the ward; 4. practice assessment of a child's condition and psycho-physical development; improve pediatric physical examination skills; 5. learn infant care; learn about nutrition of healthy and sick infants and children; 6. learn principles of pediatric emergency medicine; 7. practice diagnosing and differentiation of basic disease entities, with special consideration to acute cases; 8. practice interpretation of laboratory, radiological and pathomorphological test and examination results; 9. practice assessment of infants' hydration status and determining indications for hydration treatment (amount and composition of the infusion fluid); 10. practice assessment of acid-base equilibrium in sick children, particularly infants; 11. perform supervised medical procedures such as: application of drip infusion, and injections; 12. participate in multi-specialist consultations; 13. demonstrate a professional and diligent approach to the entrusted tasks. <p>Basic skills: student:</p> <ol style="list-style-type: none"> 1. observes the aseptic and antiseptics principles, and cares for outward appearance (e.g. name tag, clean and pressed lab coat, change of footwear); 2. In medical history taking: collects information on ailments and general complaints, collects medical history, family medical history. In physical examination: carries out detailed physical examination, general health assessment, assessment of somatic and psychophysical development; 3. recognizes causes of basic illnesses, differentiates basic symptoms of the most common illnesses; 4. differentiates basic disease classifications, with particular emphasis on emergencies. Is capable of assessing basic life threatening conditions in pediatrics; 5. assesses child's nutrition and hydration status, knows recommendations for hydration treatment. Proposes treatment and diet plan for the pediatric patient; 6. offers early and final diagnoses; 7. monitors and analyses the following results: blood pressure, pulse, temperature; 8. monitors vital signs (cardiac monitor, oximeter, blood glucose); 9. is familiar with: vaccination schedule, rules in well-child checkups, basic infectious diseases in children, basic metabolic diseases in children. <p>Basic diagnostic skills: student:</p> <ol style="list-style-type: none"> 1. orders, plans and analyzes the course of diagnostic tests: medical imaging, laboratory tests: electrocardiography, pathomorphologic tests etc. Student tries to interpret test results; 2. is familiar with the principles of collecting and securing diagnostic material (blood, urine, fluids, stomach/duodenal matter, smears); 3. is familiar with the principles and indications for injections and needle insertions, and performs them; 4. orders and carries out basic procedures and treatments (oxygen therapy, endotracheal intubation, urinary catheterization, enema/lower gastrointestinal series); 5. participates in: transfusion of blood products, administers medicines/fluids via intravenous therapy. <p>Social skills and commitment: student:</p> <ol style="list-style-type: none"> 1. is punctual and dedicated; 2. carries out the tasks with diligence; 3. uses medical terminology competently; 4. presents and discusses cases; 5. establishes rapport with patients and their families, as well as the ward staff members; 6. efficiently manages his/her work; 7. shows empathy and observes the code of ethics. 	U1, U2, U3, U4, K1, K2, K3, K4, K5	professional practice

Goals

C1	Pharmacology of pain
C2	Drugs for the prevention and treatment of thromboembolic disorders
C3	Pharmacology of emergency
C4	Pharmacologic management of depression
C5	Selected aspects of drug toxicology
C6	Heterogeneity of drug response - individualization of therapy. Pediatric and geriatric pharmacotherapy. Most common drug interaction and side effects. Elements of drug toxicology.
C7	Immunopharmacology.
C8	Pharmacogenetics. Gene therapy.

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	the basic principles of pharmacotherapy for diseases in the elderly	E.W10	classroom observation
W2	principles for the treatment of pain, including cancer and chronic pain	E.W29	classroom observation
W3	principles for palliative treatment of terminal patient	E.W28	classroom observation
W4	indications for the implementation of monitored therapy	E.W42	classroom observation
W5	basic pharmacoeconomic concepts	E.W43	classroom observation
Skills - Student can:			
U1	identify medical problems and prioritize medical management	O.U1	classroom observation
U2	identify life-threatening conditions that require immediate medical intervention	O.U2	classroom observation
U3	implement appropriate and safe therapeutic treatment and predict its effects	O.U4	classroom observation
U4	plan own learning activities and constantly learn in order to update own knowledge	O.U5	classroom observation
U5	inspire the learning process of others	O.U6	classroom observation
U6	monitor the condition of a patient poisoned with chemicals or drugs E.U35. assess bedsores and apply appropriate dressings	E.U34	classroom observation
U7	recognize the condition after drinking alcohol, after using drugs and other substances	E.U15	classroom observation
U8	recognize the symptoms of drug dependence and propose treatment	E.U19	classroom observation
U9	propose individualization of existing therapeutic guidelines and other methods of treatment in the face of ineffectiveness or contraindications to standard therapy	E.U18	classroom observation
U10	analyze the potential adverse reactions of individual medicines and the interactions between them	E.U17	classroom observation
Social competences - Student is ready to:			
K1	use objective sources of information	O.K7	classroom observation
K2	promote health-promoting behaviors	O.K6	classroom observation

Goals

C1	To introduce to the student the influence of the ageing process on the clinical presentation of diseases. To highlight the impact of multimorbidity and geriatric syndromes on the diagnostic and therapeutic process, as well as the prognosis.
C2	To introduce the student to the philosophy, goals and organisational structure of palliative care. To introduce the importance of holistic care for patients at the end of their lives.
C3	To prepare the student to be capable of performing the comprehensive geriatric assessment, properly to analyse its results and use them to plan the patient's care.
C4	To prepare the student to tackle the acute and chronic issues in patients undergoing palliative care.

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	course and symptoms of the aging process and the principles of the overall geriatric assessment and interdisciplinary care for an elderly patient	E.W8	oral credit
W2	the causes and basic differences in the most common diseases in the elderly and the principles of management in basic geriatric syndromes	E.W9	oral credit
W3	the basic principles of pharmacotherapy for diseases in the elderly	E.W10	oral credit
W4	dangers associated with the hospitalisation of the elderly	E.W11	oral credit
W5	basic principles of organizing care for the elderly and the burden on the carer of the elderly	E.W12	oral credit
W6	principles of diagnosis and therapeutic management in the most common problems of palliative medicine, including 1) symptomatic treatment of the most common somatic symptoms, 2) cachexia management and the prevention and treatment of bedsores, 3) the most common emergencies in palliative medicine	E.W27	oral credit
W7	principles for palliative treatment of terminal patient	E.W28	oral credit
W8	principles for the treatment of pain, including cancer and chronic pain	E.W29	oral credit
Skills - Student can:			
U1	identify medical problems and prioritize medical management	O.U1	oral credit
U2	evaluate and describe the somatic and mental state of the patient	E.U13	classroom observation, oral credit
U3	plan diagnostic, therapeutic and prophylactic procedures	E.U16	classroom observation, oral credit
U4	recognize states in which the duration of life, functional state or patient preferences limit the conduct in accordance with the guidelines specified for a given disease	E.U21	oral credit
U5	make a functional assessment of a patient with a disability	E.U22	classroom observation, oral credit
U6	assess pressure ulcers and use appropriate dressings	E.U35	classroom observation, oral credit
Social competences - Student is ready to:			
K1	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	classroom observation
K2	take actions towards the patient on the basis of ethical norms and principles, with an awareness of the social determinants and limitations of the disease	O.K4	classroom observation

K3	implement the principles of professional camaraderie and cooperation in a team of specialists, including representatives of other medical professions, also in a multicultural and multinational environment	O.K9	classroom observation

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Falls in the older patient - a geriatric syndrome.	W1, W2, W4, W5, U1, U2, U3, K2	seminar
2.	Dementia - types, signs and symptoms, diagnosis and therapeutic approach to the patient.	W1, W2, W4, W5, U1, U2, U3, U4, K2	seminar
3.	Frailty syndrome - approach to the patient.	W1, W2, W4, W5, U1, U2, U3, U4, U5, K2	seminar
4.	Risks associated with hospitalisation of the older patient. Principles and systems of long term care.	W2, W5, U1, U3, U4, U5, K2	seminar
5.	Delirium - from predisposing factors to approach to the patient.	W1, W2, W4, W5, U1, U2, U3, U4, K2	seminar
6.	Pain treatment in palliative care patients.	W6, W8, U1, U2, U3, K2	seminar
7.	Gastrointestinal symptoms in palliative care patients.	W6, W7, U1, U2, U3, K2	seminar
8.	Respiratory symptoms in palliative care patients.	W6, W7, U1, U2, U3, K2	seminar
9.	Emergencies in palliative medicine.	W6, W7, U4, K2	seminar

10.	Practical classes at the bedside. The classes will include: performance and interpretation of the comprehensive geriatric assessment, constructing a diagnostic/therapeutic/care-related plan based on a patient's clinical, especially geriatric, profile. The analysis of cases (incontinence, ageing process, pharmacotherapy in the older patient).	W1, W2, W3, W4, W5, U1, U2, U3, U4, U5, U6, K1, K2, K3	classes
11.	Clinical exercises focusing on the approach to patients in the terminal phase of illness, communication with palliative care patients, therapeutic decision-making. Interactive methods: didactic discussion on: Care models during the end of life and organization of palliative care, titration with strong opioids, psychological and communication problems, psychiatric disturbances in palliative care patients, spiritual suffering, palliative sedation, breakthrough pain, urologic problems, cachexia.	W6, W7, W8, U1, U2, U3, U4, U6, K1, K2, K3	classes
12.	The physiology in geriatrics. Ageing and its causes, differences in pharmacokinetics of medications in older age, physiology of pain, examples of the mechanisms of organ system ageing.	W1, W3, W8	seminar
13.	Decubitus ulcerations.	W4, W5, U6, K2	seminar
14.	Malnutrition.	W1, W2, W4, W5, U1, U2, U3, K2	seminar
15.	Ethical decisions at the end of life.	W5, W7, U1, K2	seminar

Course advanced

Teaching methods:

case study, clinical classes, classes in simulated conditions, discussion, seminar

Activities	Examination methods	Credit conditions
seminar	oral credit	Active participation in the seminars.
classes	classroom observation, oral credit	Active participation in the practical classes. Performance of the assigned clinical tasks including patient assessment. The student's team-working abilities and the approach to the patient will be taken into account in the credit assignment process.

Additional info

Absence during classes and seminars may be justified by delivery of a doctor's excuse in the case of illness or other exceptional circumstances. The instructor will make the decision as to the justification of an absence.

Entry requirements

Pathophysiology, Pharmacology, Internal Medicine, Psychology, Neurology, ensuring students: 1. Knowledge relating to pathophysiology, differential diagnosis, and treatment of the most commonly occurring diseases among the geriatric population, 2. Physical examination and communication skills, including neurologic examination 3. Social competences relating to patients' rights, confidentiality, and hospital ward regulations

Emergency Medicine

Educational subject description sheet

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	symptoms and course of diseases	O.W2	practical test
W2	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	practical test
W3	ethical, social and legal conditions for practicing the medical profession and the principles of health promotion, based on scientific evidence and accepted standards	O.W4	practical test
W4	the causes, symptoms, diagnostic and therapeutic management principles for the most common diseases requiring surgical intervention, taking into account the distinctness of childhood age, including in particular: 1) acute and chronic abdominal diseases, 2) thoracic diseases, 3) diseases of extremities and head, 4) fractures of bones and injuries to organs	F.W1	practical test
W5	rules of qualification for basic surgical procedures and invasive diagnostic and therapeutic procedures, rules of their performance and the most frequent complications	F.W3	practical test
W6	indications and rules for the use of intensive care	F.W6	practical test
W7	guidelines for cardiopulmonary resuscitation of newborns, children and adults	F.W7	practical test
W8	principles of functioning of the integrated system National Medical Rescue Service	F.W8	practical test
W9	problems of modern imaging examinations, in particular: 1) radiological symptomatology of major diseases, 2) instrumental methods and imaging techniques used to perform therapeutic procedures, 3) the indications, contraindications and preparation of the patient for particular types of imaging examination and contraindications for the use of contrast agents	F.W10	practical test
W10	procedure in accidental and posttraumatic hypothermia	F.W16	practical test
W11	causes, symptoms, principles of diagnosis and therapeutic management in case of the most frequent diseases of the central nervous system in the scope: 1) cerebral edema and its consequences, with particular reference to emergencies, 2) other forms of intracranial tightness with their consequences, 3) craniocerebral injuries, 4) vascular defects of the central nervous system, 5) neoplastic tumors of the central nervous system, 6) diseases of the vertebral column and spinal cord	F.W13	practical test
Skills - Student can:			
U1	identify medical problems and prioritize medical management	O.U1	practical examination, classroom observation, practical test
U2	identify life-threatening conditions that require immediate medical intervention	O.U2	practical examination, practical test

U3	plan the diagnostic procedure and interpret its results	O.U3	practical examination, practical test
U4	implement appropriate and safe therapeutic treatment and predict its effects	O.U4	practical examination, practical test
U5	plan own learning activities and constantly learn in order to update own knowledge	O.U5	classroom observation, practical test
U6	inspire the learning process of others	O.U6	classroom observation, practical test
U7	communicate with the patient and his family in an atmosphere of trust, taking into account the needs of the patient	O.U7	classroom observation, practical test
U8	communicate and share knowledge with colleagues in a team	O.U8	practical examination, classroom observation, practical test
U9	critically evaluate the results of scientific research and adequately justify the position	O.U9	practical test
U10	adhere to the principles of asepsis and antisepsis	F.U3	classroom observation, practical test
U11	manage a simple wound, put on and change a sterile surgical dressing	F.U4	classroom observation, practical test
U12	make a peripheral puncture	F.U5	classroom observation, practical test
U13	examine breasts, lymph nodes, thyroid gland and abdominal cavity in terms of acute abdomen and perform digital rectal examination	F.U6	classroom observation, practical test
U14	evaluate the result of a radiological examination in the most common types of fractures, particularly long bone fractures	F.U7	classroom observation, practical test
U15	perform temporary immobilization of the limb, choose the type of immobilization necessary for use in typical clinical situations and control the correctness of blood supply to the limb after the insertion of the immobilizing dressing	F.U8	classroom observation, practical test
U16	manage external bleeding	F.U9	practical examination, classroom observation, practical test
U17	perform basic resuscitation procedures using an automatic external defibrillator and other emergency procedures and first aid	F.U10	classroom observation, practical test
U18	operate according to the algorithm of advanced resuscitation activities	F.U11	classroom observation, practical test
U19	recognize subjective and physical symptoms indicating the abnormal course of pregnancy (abnormal bleeding, contractions of the uterus)	F.U13	classroom observation, practical test
U20	evaluate the condition of the unconscious patient according to international scoring scales	F.U21	practical examination, classroom observation, practical test
U21	recognise the symptoms of increasing intracranial pressure	F.U22	practical examination, classroom observation, practical test

U22	can perform and interpret FAST ultrasound (Focused Assessment with Sonography for Trauma)	F.U30	classroom observation, practical test
U23	to take the informed and legally effective consent: a) for high-risk diagnostic procedures (e.g. gastroscopy, colonoscopy), endoscopic retrograde cholangiopancreatography) b) for high-risk diagnostic procedures (transcutaneous biopsy under control) USG) c) surgery to remove the gallbladder	F.U33	classroom observation, practical test
U24	to pass on information about the death of a close friend and relative	F.U34	classroom observation, practical test
U25	provide family with information on the possibility of organ transplantation of the person who was diagnosed with brain death	F.U35	classroom observation, practical test
U26	identify and indicate methods of management of traumatic peripheral nerve damage	F.U36	classroom observation, practical test
Social competences - Student is ready to:			
K1	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	practical examination, classroom observation
K2	to be guided by the well-being of a patient	O.K2	classroom observation
K3	respect medical confidentiality and patients' rights	O.K3	classroom observation
K4	take actions towards the patient on the basis of ethical norms and principles, with an awareness of the social determinants and limitations of the disease	O.K4	classroom observation
K5	promote health-promoting behaviors	O.K6	classroom observation
K6	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	classroom observation
K7	use objective sources of information	O.K7	classroom observation
K8	formulate conclusions from own measurements or observations	O.K8	classroom observation
K9	implement the principles of professional camaraderie and cooperation in a team of specialists, including representatives of other medical professions, also in a multicultural and multinational environment	O.K9	classroom observation
K10	formulate opinions on the various aspects of the professional activity	O.K10	classroom observation
K11	assume responsibility for decisions taken in the course of their professional activities, including in terms of the safety of oneself and others	O.K11	classroom observation

Calculation of ECTS points

Semester 9, Semester 10

Activity form	Activity hours*
e-learning lecture	4

simulations	25
Student workload	Hours 29
Workload involving teacher	Hours 29
Practical workload	Hours 25

* hour means 45 minutes

Semester 11, Semester 12

Activity form	Activity hours*
clinical classes	54
simulations	6
case analysis	30
Student workload	Hours 90
Workload involving teacher	Hours 60
Practical workload	Hours 90

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Trauma team role. Non-technical skills in team training. The role of Emergency Department and Trauma Center in Emergency Medical System.	W1, W10, W11, W2, W3, W4, W5, W6, W7, W8, W9, U1, U10, U11, U12, U13, U14, U15, U16, U17, U18, U19, U2, U20, U21, U22, U23, U24, U25, U26, U3, U4, U5, U6, U7, U8, U9, K1, K10, K11, K2, K3, K4, K5, K6, K7, K8, K9	simulations
2.	Preparation of the patient for transport, transport, patient turn over in the ED, and communication with a specialist. Primary and secondary examination, medical documentation, Organization and management of patient conditions in the ED.	W1, W10, W11, W2, W3, W4, W5, W6, W7, W8, W9, U1, U10, U11, U12, U13, U14, U15, U16, U17, U18, U19, U2, U20, U21, U22, U23, U24, U25, U26, U3, U4, U5, U6, U7, U8, U9	simulations

3.	Trauma team organization in practice. Airway trauma and control. Shock Head, spine, chest, abdomen, and extremities trauma. Assessment and treatment of the child with multiorgan injury	W1, W10, W11, W2, W3, W4, W5, W6, W7, W8, W9, U1, U10, U11, U12, U13, U14, U15, U16, U17, U18, U19, U2, U20, U21, U22, U23, U24, U25, U26, U3, U4, U5, U6, U7, U8, U9	clinical classes, simulations, e-learning lecture
----	--	---	---

Course advanced

Semester 9, Semester 10

Teaching methods:

brainstorm, discussion, e-learning, presentation, seminar, simulation, lecture, lecture with multimedia presentation, practical classes

Activities	Examination methods	Credit conditions
e-learning lecture	practical examination	attendance
simulations	practical examination	attendance

Semester 11, Semester 12

Teaching methods:

brainstorm, classes / practicals, discussion, e-learning, presentation, simulation

Activities	Examination methods	Credit conditions
clinical classes	classroom observation, practical test	attendance
simulations	classroom observation, practical test	attendance

Entry requirements

The student is able to correctly assess the victim according to the ABCDE scheme, perform a full patient examination, collect an interview, measure blood pressure, get intravascular access, interpret basic laboratory tests, X-ray images

Forensic Medicine

---	--	---

Goals

C1	Presentation of main tasks of forensic medicine as well as issues overlapping clinical specialities
----	---

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	methods of conducting scientific research	O.W5	written examination, classroom observation

W2	legal obligations of the doctor concerning pronouncement of death	G.W7	written examination, classroom observation
W3	legal regulations concerning transplantation, artificial procreation, abortion, aesthetic procedures, palliative treatment, mental illness, etc.	G.W9	written examination, classroom observation
W4	the concept of violent and sudden death and the difference between the concepts of injury and damage	G.W12	written examination, classroom observation
W5	legal grounds and rules of doctor's conduct during examination of the body at the place of its disclosure and judicial and medical examination of the body	G.W13	written examination, classroom observation
W6	principles of court-medical diagnostics and opinions in cases concerning infanticide and reconstruction of circumstances of a road accident	G.W14	written examination, classroom observation
W7	principles of judicial and medical opinion on the ability to participate in procedural activities, biological effect and health impairment	G.W16	written examination, classroom observation
W8	the concept of medical error, the most common causes of medical errors and the principle of giving opinions in such cases	G.W17	written examination, classroom observation
W9	principles of material collection for toxicological and hemogenetic tests	G.W18	written examination, classroom observation
W10	legal grounds and rules for conducting judicial and medical autopsy, applying in specific cases additional techniques of autopsy and post-mortem imaging examinations	G.W20	written examination, classroom observation
W11	legal grounds and rules of doctor's conduct during examination of the body at the place of its disclosure and judicial and medical examination of the body	G.W21	written examination, classroom observation
W12	rules for estimating the time of death on the basis of death signs	G.W22	written examination, classroom observation
W13	the importance of environmental xenobiotics, including their exogenous transformation and the role of biomarkers (exposure, effects, vulnerability) in the diagnosis of environmental and occupational diseases	G.W23	written examination, classroom observation
W14	rules of preparation of opinion of expert witness in criminal matters	G.W15	written examination, classroom observation
Skills - Student can:			
U1	plan own learning activities and constantly learn in order to update own knowledge	O.U5	written examination, classroom observation
U2	recognise the behaviors and symptoms indicating the possibility of violence against the child during the examination of the child	G.U7	written examination, classroom observation
U3	act in a manner that avoids medical errors	G.U8	written examination, classroom observation
U4	take blood for toxicological tests and protect the material for hemogenetic tests	G.U9	written examination, classroom observation
U5	identify the relevant legislation containing standards for the provision of health services and the medical profession	G.U11	written examination, classroom observation

U6	when providing emergency aid, make efforts not to destroy important forensic evidence which does not interfere with the primary objective of medical intervention (saving lives / health)	G.U12	written examination, classroom observation
Social competences - Student is ready to:			
K1	use objective sources of information	O.K7	written examination, classroom observation
K2	formulate opinions on the various aspects of the professional activity	O.K10	written examination, classroom observation

Course advanced

Teaching methods:

classes / practicals, e-learning, group work, seminar, lecture with multimedia presentation

Activities	Examination methods	Credit conditions
classes	written examination, classroom observation	Complete attendance. Written exam - 10 open questions: 60-69% - 3.0 70-74% - 3.5 75-79% - 4.0 80-84% - 4.5 >85% - 5.0
e-learning lecture	written examination, classroom observation	Complete attendance. Self-prepared presentation on selected topic
e-learning seminar	classroom observation	Complete attendance.
e-learning classes	classroom observation	Complete attendance.

Additional info

Seminars, practices and lectures on-line (MS Teams) - synchronous and asynchronous mode

Entry requirements

Completed 4th year of studies.

Attendance during all classes is obligatory.

Oncology and Hematology

Educational subject description sheet

Basic information

<p>Department Faculty of Medicine</p> <p>Field of study Medical Program</p> <p>Study level long-cycle master's degree program</p> <p>Study form full-time</p> <p>Education profile general academic</p> <p>Disciplines Medical science</p> <p>ISCED classification 0912 Medicine</p> <p>Subject related to scientific research Yes</p>	<p>Didactic cycle 2021/22</p> <p>Realization year 2025/26</p> <p>Lecture languages English</p> <p>Block obligatory for passing in the course of studies</p> <p>Mandatory obligatory</p> <p>Examination graded credit</p> <p>Standard group E. Clinical non-procedural medical disciplines</p>
--	--

<p>Periods Semester 9, Semester 10</p>	<p>Examination graded credit</p> <p>Activities and hours e-learning lecture: 6 seminar: 18 classes: 32</p>	<p>Number of ECTS points 3.0</p>
---	--	---

Goals

C1	Convey general knowledge of medical oncology, especially regarding systemic treatment of most common malignancies.
C2	Familiarize students with 1) basics of psychological mechanisms guiding human functioning in health and disease; 2) the environmental and epidemiological background of most common human cancers; 3) basics of early cancer diagnosis and principles of screening programs in oncology; 4) the possibilities of modern cancer therapy (including multimedia therapy), prospects of cell and gene therapies and their adverse effects; 5) the principles of adjuvant therapies in oncology, diagnostic and therapeutic algorithms in most common human cancers; 6) the causes, symptoms, principles of diagnosing and therapeutic procedures of most common issues of palliative medicine

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	symptoms and course of diseases	O.W2	written examination
W2	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	written examination
W3	environmental and epidemiological determinants of the most frequent diseases	E.W1	written examination
W4	environmental and epidemiological determinants of the most frequent human neoplastic diseases	E.W23	written examination
W5	basics of early detection of neoplastic diseases and principles of screening in oncology	E.W24	written examination
W6	possibilities of modern neoplastic therapy, including multimodal therapy, perspectives of cellular and gene therapies and their adverse effects	E.W25	written examination
W7	principles of combination therapies in oncology, algorithms of diagnostic and therapeutic procedures in the most common human cancers	E.W26	written examination
W8	principles for the treatment of pain, including cancer and chronic pain	E.W29	written examination
W9	principles for palliative treatment of terminal patient	E.W28	written examination
Skills - Student can:			
U1	identify medical problems and prioritize medical management	O.U1	written examination, classroom observation
U2	plan the diagnostic procedure and interpret its results	O.U3	written examination, classroom observation
U3	implement appropriate and safe therapeutic treatment and predict its effects	O.U4	written examination, classroom observation
U4	communicate with the patient and his family in an atmosphere of trust, taking into account the needs of the patient	O.U7	classroom observation
U5	propose individualization of existing therapeutic guidelines and other methods of treatment in the face of ineffectiveness or contraindications to standard therapy	E.U18	classroom observation
U6	plan specialist consultations	E.U32	classroom observation
U7	assist in the performance of the following procedures and medical procedures: (i) bone marrow aspiration biopsy	E.U39	booklet of practical skills
Social competences - Student is ready to:			
K1	to be guided by the well-being of a patient	O.K2	classroom observation
K2	respect medical confidentiality and patients' rights	O.K3	classroom observation
K3	promote health-promoting behaviors	O.K6	classroom observation
K4	formulate conclusions from own measurements or observations	O.K8	classroom observation

Calculation of ECTS points

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Principles of carcinogenesis	W3, W4, K1	e-learning lecture
2.	Oncology - from carcinogenesis to treatment	W6, W7	e-learning lecture
3.	Modern therapies in oncology.	W6, W7, K3	e-learning lecture
4.	Multidisciplinary approach to breast cancer	W2, W6, W7, W8, W9	seminar
5.	Multidisciplinary approach to melanoma	W1, W4, W5, W6	seminar
6.	Introduction to the course Practical aspects in clinical oncology	W7, U7, K4	seminar
7.	Multidisciplinary approach to lung cancer	W1, W2, W4, W5, W6, W7	seminar
8.	Multidisciplinary approach to head and neck cancer	W1, U1, U2, U6	seminar
9.	Multidisciplinary approach to urological malignancies	W1, W2, W5, W6, W7	seminar
10.	Multidisciplinary approach to Upper GI	W1, W2, W5, W6, W7	seminar
11.	Principles of radiotherapy	U4, K2	seminar
12.	Radiotherapy in oncological emergencies, supportive care in cancer	W1, W2, W5, W6, W7	seminar
13.	Principles of hematology	W1, W2, W5, W6, W7	classes
14.	Multidisciplinary approach to testicular cancer	W1, W2	seminar
15.	Drug, drugs, drugs - workshops	W1, W2, W5, W6, W7	classes
16.	Communications - workshops	W6, W7, U3, U5	classes

17.	Cases - workshops	W1, W2, W5, W6, W7	classes
18.	Treatment planning- workshops	W1, W2, W5, W6, W7	classes
19.	Multidisciplinary approach to colon cancer	W8, W9, U3, U5, K3	seminar

Course advanced

Teaching methods:

classes / practicals, clinical classes, e-learning, seminar, workshop, lecture, PBL Problem Based Learning

Activities	Examination methods	Credit conditions
e-learning lecture	written examination	Final single-choice test (30 questions)
seminar	written examination, classroom observation	Final single-choice test (30 questions)
classes	booklet of practical skills, classroom observation	Final single-choice test (30 questions)

Entry requirements

1. Ability to conduct a medical interview and perform a physical examination of patient.
2. Basic knowledge of anatomy, pathophysiology and patomorphology.
3. Basic knowledge of pharmacology and immunology.

Prerequisites: Internal Medicine II, Pathology, Pharmacology

Seminars, workshops and exercises - obligatory. Lectures - optional

Orthopedics and Traumatology

Educational subject description sheet

Basic information

<p>Department Faculty of Medicine</p> <p>Field of study Medical Program</p> <p>Study level long-cycle master's degree program</p> <p>Study form full-time</p> <p>Education profile general academic</p> <p>Disciplines Medical science</p> <p>ISCED classification 0912 Medicine</p>	<p>Didactic cycle 2021/22</p> <p>Realization year 2025/26</p> <p>Lecture languages English</p> <p>Block obligatory for passing in the course of studies</p> <p>Mandatory obligatory</p> <p>Examination examination</p> <p>Standard group F. Clinical procedural sciences</p>
---	---

<p>Periods Semester 9, Semester 10</p>	<p>Examination examination</p> <p>Activities and hours e-learning lecture: 7 seminar: 25 classes: 25</p>	<p>Number of ECTS points 4.0</p>
---	--	---

Goals

C1	Orthopedics - to familiarize students with the scope of knowledge of orthopedics, to present the most common diseases of the locomotor system of adults and children, methods of diagnosis, principles of preventive and therapeutic treatment, principles of surgical treatment
C2	Traumatology: to familiarize students with the basic skills in the diagnosis, protection and treatment of injuries, understanding the impact of the injury itself on the human body.

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			

W1	symptoms and course of diseases	O.W2	clinical case presentation, test
W2	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	clinical case presentation, test
Skills - Student can:			
U1	identify medical problems and prioritize medical management	O.U1	clinical case presentation, test
U2	plan the diagnostic procedure and interpret its results	O.U3	clinical case presentation, test
U3	evaluate the result of a radiological examination in the most common types of fractures, particularly long bone fractures	F.U7	clinical case presentation, test
U4	perform temporary immobilization of the limb, choose the type of immobilization necessary for use in typical clinical situations and control the correctness of blood supply to the limb after the insertion of the immobilizing dressing	F.U8	clinical case presentation, test

Calculation of ECTS points

Activity form	Activity hours*
e-learning lecture	7
seminar	25
classes	25
preparation for classes	20
preparation for examination	23
Student workload	Hours 100
Workload involving teacher	Hours 57
Practical workload	Hours 25

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Contemporary orthopedics	W1, W2, U1	e-learning lecture

2.	Orthopedics. Motor organs - diagnostics, examination. Children orthopedics - spinal deformities, birth defects, limping child. Adult orthopedics - Pain syndromes of the spine (+ Osteoporosis), cancers, osteoarthritis of large joints , arthroscopy / endoscopy in orthopedics	W1, W2, U1	classes, seminar
3.	Orthopedic examination including elements of neurological examination. The most common birth and acquired defects of the osteoarticular system - principles of diagnosis and treatment. Osteoarthritis. Motor organ neoplasms - symptoms, diagnostics, principles of treatment. Basic issues related to primary and secondary osteoporosis. The most common injuries to the limbs and spine. Multi-organ injuries. Indications and types of orthopedic equipment used.	W1, W2, U1, U2, U3, U4	classes

Course advanced

Teaching methods:

case study, brainstorm, clinical classes, discussion, e-learning, seminar, lecture

Activities	Examination methods	Credit conditions
e-learning lecture	test	attendance and active participation
seminar	test	attendance and active participation
classes	clinical case presentation, test	active participation, presenting practical physical examination skills as well as the ability to plan diagnostics and further treatment of the most common types of injuries and orthopedic diseases

---	---	---

Goals

C1	familiarizing the student with information on the concept of disability
C2	familiarizing the student with the types and use of rehabilitation equipment
C3	familiarizing the student with rehabilitation as a comprehensive process, related to basic treatment
C4	familiarizing the student with rehabilitation in neurology, orthopedics, cardiology, pulmonology, pediatrics, rheumatology and rehabilitation of the elderly.

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			

W1	development, structure and functions of the human body in normal and pathological conditions	O.W1	clinical case presentation, written credit
W2	symptoms and course of diseases	O.W2	clinical case presentation, written credit
W3	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	clinical case presentation, written credit
Skills - Student can:			
U1	identify medical problems and prioritize medical management	O.U1	clinical case presentation, written credit
U2	plan the diagnostic procedure and interpret its results	O.U3	clinical case presentation, written credit
U3	implement appropriate and safe therapeutic treatment and predict its effects	O.U4	clinical case presentation, written credit
U4	adhere to the principles of asepsis and antisepsis	F.U3	clinical case presentation, written credit
Social competences - Student is ready to:			
K1	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	classroom observation
K2	to be guided by the well-being of a patient	O.K2	classroom observation
K3	respect medical confidentiality and patients' rights	O.K3	classroom observation
K4	take actions towards the patient on the basis of ethical norms and principles, with an awareness of the social determinants and limitations of the disease	O.K4	classroom observation
K5	promote health-promoting behaviors	O.K6	classroom observation
K6	assume responsibility for decisions taken in the course of their professional activities, including in terms of the safety of oneself and others	O.K11	classroom observation
K7	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	classroom observation
K8	use objective sources of information	O.K7	classroom observation
K9	formulate conclusions from own measurements or observations	O.K8	classroom observation, clinical case presentation
K10	implement the principles of professional camaraderie and cooperation in a team of specialists, including representatives of other medical professions, also in a multicultural and multinational environment	O.K9	classroom observation
K11	formulate opinions on the various aspects of the professional activity	O.K10	classroom observation

Knowledge - Student knows and understands:			
W1	symptoms and course of diseases	O.W2	multiple choice test, oral credit
W2	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	multiple choice test, oral credit
W3	environmental and epidemiological determinants of the most frequent diseases	E.W1	multiple choice test, oral credit
W4	rules of conduct in the event of the detection of an infectious disease	E.W33	multiple choice test, oral credit
W5	basis rules of prevention, rules of conduct in the case of occupational exposure on dangerous and harmful factors	E.W32	multiple choice test, oral credit
W6	causes, symptoms, principles of diagnosis, therapeutic and prophylactic management in the most common bacterial, viral, parasitic and fungal diseases, including pneumococcal infections, viral hepatitis, acquired immunodeficiency syndrome (AIDS), sepsis and hospital infections	E.W34	multiple choice test, oral credit
W7	epidemiological problems of infectious diseases in the world and in Poland	E.W48	multiple choice test, oral credit
W8	causes and symptoms a) HIV infection and acquired immune deficiency syndrome b) hepatotropic virus infections with HAV, HBV, HCV, HCV c) tick-borne diseases d) zoonoses e) anaerobic infections f) organ mycoses g) infectious diseases of childhood h) fever of unknown origin i) sepsis and septic shock j) infectious diseases of the central nervous system k) tetanus and botulism l) selected tropical diseases m) acute gastrointestinal infections n) influenza and SARS	E.W49	multiple choice test, oral credit
W9	Symptoms and rules for managing infectious diseases that are life-threatening	E.W50	multiple choice test, oral credit
W10	principles of immunoprophylaxis of infectious diseases	E.W51	multiple choice test, oral credit
W11	principles of diagnostics of infectious diseases and can interpret the results	E.W52	multiple choice test, oral credit
W12	basics of therapy of selected infectious diseases a) antibiotic therapy of selected bacterial infections b) use of antiretroviral drugs in HIV c) treatment of chronic hepatitis B and C d) the use of antiviral drugs in selected clinical situations	E.W53	multiple choice test, oral credit
W13	indications and rules for performing lumbar puncture and assisting in the performance of the procedure	E.W54	multiple choice test, oral credit
W14	the indications and rules for performing liver biopsy and assists in performing procedure	E.W55	multiple choice test, oral credit
Skills - Student can:			
U1	identify life-threatening conditions that require immediate medical intervention	O.U2	oral credit
U2	identify medical problems and prioritize medical management	O.U1	oral credit
U3	plan the diagnostic procedure and interpret its results	O.U3	oral credit

U4	implement appropriate and safe therapeutic treatment and predict its effects	O.U4	oral credit
U5	communicate with the patient and his family in an atmosphere of trust, taking into account the needs of the patient	O.U7	oral credit
U6	communicate and share knowledge with colleagues in a team	O.U8	oral credit
U7	critically evaluate the results of scientific research and adequately justify the position	O.U9	oral credit
U8	carry out a medical history with an adult patient	E.U1	oral credit
U9	conduct a full and targeted physical examination of an adult patient	E.U3	oral credit
U10	assess the general condition, state of consciousness and awareness of the patient	E.U7	oral credit
U11	recognize immediate life-threatening conditions	E.U14	oral credit
U12	evaluate and describe the somatic and mental state of the patient	E.U13	oral credit
U13	perform differential diagnosis of the most common diseases of adults and children	E.U12	oral credit
U14	plan diagnostic, therapeutic and prophylactic procedures	E.U16	oral credit
U15	qualify the patient for home and hospital treatment	E.U20	oral credit
U16	interpret the results of laboratory tests and identify the causes of abnormalities	E.U24	oral credit
U17	plan the management of exposure to blood-borne infections	E.U26	oral credit
U18	qualify the patient for vaccination	E.U27	oral credit
U19	make smear tests for malaria	E.U49	oral credit
U20	assist in the performance of the following procedures and medical procedures: 1) transfusion of blood and blood-derived products, 2) drainage of the pleural cavity, 3) puncture of the pericardial sac, 4) puncture of the peritoneal cavity, 5) lumbar puncture, 6) fine-needle biopsy, 7) epidermal tests, 8) intradermal and scarification tests and interpret their results	E.U30	oral credit
Social competences - Student is ready to:			
K1	to be guided by the well-being of a patient	O.K2	oral credit
K2	respect medical confidentiality and patients' rights	O.K3	oral credit
K3	take actions towards the patient on the basis of ethical norms and principles, with an awareness of the social determinants and limitations of the disease	O.K4	oral credit
K4	promote health-promoting behaviors	O.K6	oral credit
K5	use objective sources of information	O.K7	oral credit
K6	formulate conclusions from own measurements or observations	O.K8	oral credit

K7	assume responsibility for decisions taken in the course of their professional activities, including in terms of the safety of oneself and others	O.K11	oral credit

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Current epidemiological problems of infectious diseases in Poland and in the world.	W1, W3, W4, W7, K4, K5	e-learning lecture
2.	HIV infection / AIDS - opportunistic infections and cancer.	W5, W6, W8, U10, U11, U12, U14, U16, U3, U4, U5, U6, U8, U9, K1, K2, K3, K4, K5, K6, K7	classes, e-learning lecture
3.	Viral hepatitis	W12, W14, W4, W6, W8, U16, U20, U3, U4, U5, U7	classes, seminar
4.	Infectious of central nervous system.	W12, W13, W6, W9, U1, U10, U11, U12, U14, U15, U20, U3, U4, U5, U8, U9	classes, e-learning lecture
5.	Infectious and parasitic diseases of the digestive tract.	W2, W3, W4, U10, U3, U4, U8, U9	classes, seminar
6.	Acute infectious toxicosis - tetanus, botulism.	W10, W8, W9, U1, K1	classes, seminar, e-learning lecture
7.	Sepsis.	W10, W11, W6, W9, U1, U14, U15, U16	classes, seminar

8.	Selected tropical and zoonotic diseases	W10, W6, U1, U11, U15, U2, U3, U4, U5, U7	classes, e-learning lecture
9.	Seasonal, pandemic flu, SARS, COVID-19	W10, W4, U1, U10, U11, U2, U3, U4, U8, U9	classes, seminar
10.	Viral infections - CMV, EBV, HSV, VZV.	W11, W4, W6, W7, W8	classes
11.	Immunoprophylaxis in infectious diseases.	W10	classes, seminar
12.	Fever of unknown reason.	W8	classes, seminar
13.	Tick-borne diseases.	W10, W8, U10, U11, U12, U13, U14, U15, U16, U7, U8, U9, K4, K5	classes, seminar
14.	Infectious diseases of childhood.	W6, W8	classes, seminar
15.	Bioterrorism and biological defense.	W1, W4, W9	classes, seminar
16.	New and recurrent infectious diseases.	W1	seminar
17.	Basics of travel medicine.	U18, U19	classes, seminar
18.	Diseases transferred from subtropical and tropical countries.	W11, W4, W9, U1, U19, U2, U3, U4	classes
19.	Principles of antimicrobial treatment - antibiotic therapy and chemotherapy in infectious diseases.	W1, W12, W2, W6, W9, U14, U15, U4, K1, K5	classes, seminar
20.	Management after professional exposure to infectious agents in medical workers.	W10, W3, W7, W9, U17, K7	classes

Course advanced

Teaching methods:

clinical classes, seminar, lecture

Activities	Examination methods	Credit conditions
e-learning lecture	multiple choice test	At least 60% correct answers
seminar	oral credit	Attendance
classes	oral credit	Attendance

Additional info

In case of excused absence from classes it should be worked out with assistance after agreement.

Entry requirements

Pharmacology, patophysiology

Workshop of Clinical Psychological Skills

---	--	---

Goals

C1	Analysing mechanisms of patient functioning specifically in context of patient recourses
C2	Analysing clinical cases
C3	Practicing motivating dialogue techniques practicing skills of increasing patient motivation
C4	Analysing team cooperation. Skills of emotional and strategical support offered for emotinally difficult tasks

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			

W1	the importance of verbal and non-verbal communication in the process of communicating with the patient and the notion of trust in the interaction with the patient	D.W6	clinical case presentation
W2	basic psychological mechanisms of human functioning in health and disease	D.W9	clinical case presentation
W3	principles of teamwork	D.W18	clinical case presentation
W4	issues related to the adaptation of patients and their families to disease as a difficult situation and to related events, including dying and family mourning processes	D.W11	clinical case presentation
Skills - Student can:			
U1	identify signs of anti-health and self-destructive behavior and respond appropriately to them	D.U2	clinical case presentation
U2	take into account the subjective needs and expectations of the patient resulting from socio-cultural conditions in the process of therapeutic management	D.U1	clinical case presentation
U3	involve the patient in the therapeutic process	D.U7	clinical case presentation
U4	communicate with colleagues with constructive feedback and support	D.U12	clinical case presentation
U5	be able to work in a multiprofessional team, in a multicultural and multinational environment	D.U21	clinical case presentation
Social competences - Student is ready to:			
K1	to be guided by the well-being of a patient	O.K2	clinical case presentation
K2	promote health-promoting behaviors	O.K6	clinical case presentation
K3	formulate conclusions from own measurements or observations	O.K8	clinical case presentation

Calculation of ECTS points

Activity form	Activity hours*
simulations	20
case analysis	5
kształcenie samodzielne	5
Student workload	Hours 30
Workload involving teacher	Hours 20
Practical workload	Hours 25

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Physician own resources and coping mechanisms in resolving emotionally difficult clinical tasks	W1, W2, W3, W4, U1, U3, U5, K1, K2, K3	simulations
2.	Motivating dialogue in clinical practice	W2, U1, U2, U3, K1, K2, K3	simulations
3.	Analysing clinical cases in biopsychosocial context	W1, W2, W3, W4, U1, U4, U5, K1, K3	simulations
4.	Burnout prevention. Development of ones own recourses	W2, W3, U1, U2, U4, U5, K1, K2, K3	simulations

Course advanced

Teaching methods:

case study, discussion, case study method, group work, simulation, workshop, lecture with multimedia presentation

Activities	Examination methods	Credit conditions
simulations	clinical case presentation	The course is assessed on the basis of personal engagement as well as attendance, presentation - case study

Mental disorders in children and adolescents. Diagnosis and treatment. Educational subject description sheet

Basic information

<p>Department Faculty of Medicine</p> <p>Field of study Medical Program</p> <p>Study level long-cycle master's degree program</p> <p>Study form full-time</p> <p>Education profile general academic</p> <p>Disciplines Medical science</p> <p>ISCED classification 0912 Medicine</p>	<p>Didactic cycle 2021/22</p> <p>Realization year 2025/26</p> <p>Lecture languages English</p> <p>Block obligatory for passing in the course of studies</p> <p>Mandatory elective</p> <p>Examination graded credit</p> <p>Standard group E. ---	--

<p>Periods Semester 9, Semester 10</p>	<p>Examination graded credit</p> <p>Activities and hours seminar: 30</p>	<p>Number of ECTS points 2.0</p>
---	--	---

Goals

C1	To familiarize students with the issues of child and adolescent psychiatry in the context of new theories of personalized medicine, in which therapeutic decisions are made not only in relation to the diagnosis but also to the individual specific characteristics of each patient.
----	--

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	issues of abused child and sexual abuse, mental retardation and behavioral disorders - psychoses, addictions, eating disorders and excretion in children	E.W4	test
Skills - Student can:			

U1	identify medical problems and prioritize medical management	O.U1	classroom observation, clinical case presentation, test
U2	carry out a medical interview with the child and his or her family	E.U2	classroom observation, clinical case presentation, test
U3	conduct a psychiatric examination	E.U5	classroom observation, clinical case presentation, test
U4	recognize the condition after drinking alcohol, after using drugs and other substances	E.U15	classroom observation, clinical case presentation, test
U5	plan diagnostic, therapeutic and prophylactic procedures	E.U16	classroom observation, clinical case presentation, test
U6	evaluate and describe the somatic and mental state of the patient	E.U13	classroom observation, clinical case presentation, test
U7	communicate and share knowledge with colleagues in a team	O.U8	classroom observation, clinical case presentation, test
U8	communicate with the patient and his family in an atmosphere of trust, taking into account the needs of the patient	O.U7	classroom observation, clinical case presentation, test
U9	inspire the learning process of others	O.U6	classroom observation, clinical case presentation, test
U10	plan own learning activities and constantly learn in order to update own knowledge	O.U5	classroom observation, clinical case presentation, test
U11	critically evaluate the results of scientific research and adequately justify the position	O.U9	classroom observation, clinical case presentation, test
U12	plan specialist consultations	E.U32	classroom observation, clinical case presentation, test
U13	maintain patient's medical records	E.U38	classroom observation, clinical case presentation, test
Social competences - Student is ready to:			
K1	to be guided by the well-being of a patient	O.K2	classroom observation, clinical case presentation
K2	respect medical confidentiality and patients' rights	O.K3	classroom observation, clinical case presentation, test
K3	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	classroom observation, clinical case presentation
K4	use objective sources of information	O.K7	classroom observation, clinical case presentation

K5	implement the principles of professional camaraderie and cooperation in a team of specialists, including representatives of other medical professions, also in a multicultural and multinational environment	O.K9	classroom observation, clinical case presentation
K6	formulate opinions on the various aspects of the professional activity	O.K10	classroom observation, clinical case presentation
K7	take actions towards the patient on the basis of ethical norms and principles, with an awareness of the social determinants and limitations of the disease	O.K4	classroom observation, clinical case presentation, test

Calculation of ECTS points

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Introduction to Child and Adolescent Psychiatry. Classification of mental disorders of developmental age according to ICD-10; DSM-V, ICD 11	W1, U1, U13, U2, U3, U5, U6, K1, K2, K3, K7	seminar
2.	Normal development and risk factors for mental disorders	W1, U11, U12, U5, U6, U7, K3, K4, K5	seminar
3.	Communicating with the patient and his family members. Components of the assessment of the mental state of a child and teenager	W1, U10, U11, U12, U7, U9, K4, K5, K6	seminar
4.	Conducting a diagnostic interview with elements of therapeutic interventions	W1, U12, U13, U5, U7, U8, U9, K1, K2, K4, K5, K6, K7	seminar

5.	Determinants of clinical decisions and their consequences for the outcome	W1, U1, U10, U11, U12, U13, U2, U3, U5, U7, U8, U9, K1, K2, K3, K4, K5, K6, K7	seminar
6.	Modes of treatment in child and adolescent psychiatry and forms of therapeutic interactions	W1, U10, U11, U12, U13, U7, U9, K1, K2, K3, K4, K5, K6, K7	seminar
7.	Basics of psychotherapy of children and adolescents	U10, U11, U12, U13, U3, U5, U6, U8, U9, K1, K2, K3, K4, K5, K6, K7	seminar
8.	Basics of pharmacotherapy of mental disorders in developmental age	W1, U1, U10, U11, U12, U13, U2, U3, U5, U6, U7, U8, U9, K1, K2, K3, K4, K5, K6, K7	seminar
9.	Emergencies in the child and adolescent psychiatry with particular emphasis on auto-aggressive behavior	W1, U1, U10, U11, U12, U13, U2, U3, U4, U5, U6, U7, U9, K1, K2, K3, K4, K5, K6, K7	seminar
10.	The doctor's person in contact with patients with mental disorders in developmental age, transference, counter-transference, therapist's internal dialogue	W1, U1, U10, U13, U2, U5, U7, U8, U9, K1, K2, K3, K4, K5, K6, K7	seminar

Course advanced

Teaching methods:

case study, textual analysis, brainstorm, clinical classes, demonstration, discussion, e-learning, staging, problem solving method, case study method, assignments solving, simulation, simulated patient, virtual patient, practical classes

Activities	Examination methods	Credit conditions
seminar	classroom observation, clinical case presentation, test	Oral presentation. Observation of the student's attitude and commitment during classes. Passing the verification test.

Entry requirements

Psychiatry of children and adolescents, psychotherapy, family therapy, development, emergencies

Self-inflicted injury and suicidal behavior among children and adolescents

Educational subject description sheet

Basic information

<p>Department Faculty of Medicine</p> <p>Field of study Medical Program</p> <p>Study level long-cycle master's degree program</p> <p>Study form full-time</p> <p>Education profile general academic</p> <p>Disciplines Medical science</p> <p>ISCED classification 0912 Medicine</p>	<p>Didactic cycle 2021/22</p> <p>Realization year 2025/26</p> <p>Lecture languages English</p> <p>Block obligatory for passing in the course of studies</p> <p>Mandatory elective</p> <p>Examination graded credit</p> <p>Standard group E. Clinical non-procedural medical disciplines</p>

<p>Periods Semester 9, Semester 10</p>	<p>Examination graded credit</p> <p>Activities and hours seminar: 30</p>	<p>Number of ECTS points 2.0</p>
---	--	---

Goals

C1	The student will recognize and understand the problem of self-injury and suicidal behaviour in children and adolescents.
C2	The student will acquire the ability to recognize the risk of self-injury and suicidal behaviour in children and adolescents.
C3	The student will acquire the ability to make contact with a child-adolescent patient and the family of patient, to demonstrate an attitude of empathy, understanding and responsibility in the care of children and youth.
C4	Based on the identified problems, the student will be able to set therapeutic goals and interventions in relation to the child-adolescent patient and the family.

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
------	----------------------	---------	---------------------

Knowledge - Student knows and understands:			
W1	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	classroom observation, clinical case presentation, test
W2	principles of implementing psychotherapeutic dialog and types of therapeutic interventions	E.W57	classroom observation, clinical case presentation, test
Skills - Student can:			
U1	identify life-threatening conditions that require immediate medical intervention	O.U2	classroom observation, clinical case presentation, test
U2	communicate with the patient and his family in an atmosphere of trust, taking into account the needs of the patient	O.U7	classroom observation, clinical case presentation, test
U3	recognize immediate life-threatening conditions	E.U14	classroom observation, clinical case presentation, test
U4	plan diagnostic, therapeutic and prophylactic procedures	E.U16	classroom observation, clinical case presentation, test
U5	qualify the patient for home and hospital treatment	E.U20	classroom observation, clinical case presentation, test
Social competences - Student is ready to:			
K1	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	classroom observation, test
K2	assume responsibility for decisions taken in the course of their professional activities, including in terms of the safety of oneself and others	O.K11	classroom observation, test
K3	take actions towards the patient on the basis of ethical norms and principles, with an awareness of the social determinants and limitations of the disease	O.K4	classroom observation, test
K4	respect medical confidentiality and patients' rights	O.K3	classroom observation, test
K5	to be guided by the well-being of a patient	O.K2	classroom observation, test

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Self-injury (self-aggression) and suicidal behaviour - concepts discussion, definition problems. Gradation of self-destructive behavior. The difference between self-injury and suicide attempts. Methods of committing suicide and methods of self-injury. The scale of physical injuries and potential life threatening.	W1, U1, U3	seminar
2.	Autoaggression - types of autoaggressive behavior, scale of the phenomenon, risk factors. Self-injury and gender, age, culture, ethnicity, social status, sexuality, mental disorder. The phenomenon of the growing frequency of auto-aggressive behaviour among young people. Body modifications in culture. Tattoos, earrings, scarification, skin burns and other forms of body modification among children and adolescents and their relationship with self-aggression as a psychopathological phenomenon.	W1	seminar
3.	Understanding auto-aggressive behavior - self-aggression and attachment, affect regulation, self-image, attitude towards the body and the impact of traumatic experiences.	W1	seminar
4.	Auto-aggression and suicide attempt - differentiation. Autoaggressive behavior as a precursor of suicidal behavior. Phenomena that may indicate an increasing suicidal risk in people with auto-aggressive behavior.	W1, U1, U3	seminar
5.	Suicide attempts and suicide among young people as a growing problem. How to talk to young people (and children) who inform about suicidal thoughts? Estimating the risk of suicide attempt.	W1, W2, U1, U2, U5, K1, K2, K3, K5	seminar
6.	Suicide attempts in adolescents - multifactorial description - relationship with life situation, functioning styles and mental disorders. Depressive disorders and the risk of suicide. Other risk factors. Frequency of suicidal thoughts and behaviour - statistical data.	W1, U1, U3, U4	seminar
7.	Self-injury and suicide attempts as a signal to significant people. Systemic understanding.	W1, U2, U4, K1, K2, K3, K4, K5	seminar
8.	Management in life-threatening situations - case management. How do you talk to a client who is at risk of suicide attempt (or after a suicide attempt)? The importance of helping person's attitudes. The importance of drug treatment.	U1, U2, U3, U4, U5, K1, K2, K3, K4, K5	seminar

9.	Crisis intervention, description of the method and procedures. The most important assumptions of Self-injury therapy and suicidal behaviour. The importance of posttraumatic disorder therapy. Work with the body. Family therapy	W2, U2, U3, U4, U5, K1, K2, K3, K4, K5	seminar
10.	How to build and extend a support system for people in a state of immediate threat to life? Including a family in a life-threatening situation. What to mobilize the family for when dealing with an auto-aggressive patient, and with a child with a serious risk of suicide?	U1, U2, U3, U4, U5, K1, K2, K3, K4, K5	seminar
11.	How should a helping person deal with emotions? How is the helping person experienced by those with self-aggression? A well-functioning working alliance is the most important healing factor for those who want to kill themselves. How to strengthen a working alliance?	W2, U2, U4, K1, K2, K3, K4, K5	seminar
12.	Legal aspect - regulations regarding how to deal with suspected life or health threat, confidentiality of therapeutic contact and the possibility of disclosing information about patient. How to inform the parent of an underage person?	U2, U4, K1, K2, K3, K4, K5	seminar

Course advanced

Teaching methods:

case study, brainstorm, discussion, educational film, case study method, situation method, presentation, group work, seminar, simulated patient, workshop, lecture, practical classes

Activities	Examination methods	Credit conditions
seminar	classroom observation, clinical case presentation, test	Attendance at 80% of classes. Oral presentation. Observation of the student's attitude and commitment during classes. Passing the verification test.

Entry requirements

Knowledge, skills and competences in the field of psychiatry.

Foundations of psychoanalysis

Educational subject description sheet

Basic information

<p>Department Faculty of Medicine</p> <p>Field of study Medical Program</p> <p>Study level long-cycle master's degree program</p> <p>Study form full-time</p> <p>Education profile general academic</p> <p>Disciplines Medical science</p> <p>ISCED classification 0912 Medicine</p> <p>Subject related to scientific research Yes</p>	<p>Didactic cycle 2021/22</p> <p>Realization year 2025/26</p> <p>Lecture languages English</p> <p>Block obligatory for passing in the course of studies</p> <p>Mandatory elective</p> <p>Examination graded credit</p> <p>Standard group E. <p>Periods Semester 9, Semester 10</p>	<p>Examination graded credit</p> <p>Activities and hours seminar: 16 classes: 14</p>	<p>Number of ECTS points 2.0</p>
---	--	---

Goals

C1	Acquaintance with basic concepts of psychoanalysis
C2	Acquaintance with psychotherapeutic techniques used in psychoanalysis
C3	To familiarize participants with psychological phenomena occurring in psychoanalysis
C4	Teaching basic practical skills, including interviewing and case formulation in the context of psychoanalysis
C5	Acquainting with directions in psychoanalysis development
C6	Expanding the knowledge on psychopathology of neuroses, personality disorders and psychoses in the psychoanalytic approach

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	basic concepts of the pathogenesis of mental disorders	E.W15	classroom observation, multiple choice test
W2	the general symptomatology of mental disorders and the rules for classifying them according to the main classification systems	E.W16	classroom observation, multiple choice test
W3	the problem of human sexuality and fundamental disorders associated with it	E.W21	classroom observation, multiple choice test
W4	understands the symptoms, understands the etiology, treatment rules and is able to establish therapeutic contact with patients with the most common disorders: a) anxiety, somatic and other neurotic forms b) post-traumatic disorders c) personality and behavioral disorders of adults	E.W56	classroom observation, multiple choice test
W5	principles of implementing psychotherapeutic dialog and types of therapeutic interventions	E.W57	multiple choice test
W6	basic psychotherapeutic techniques and principles for combining psychotherapy and pharmacotherapy	E.W58	multiple choice test
Skills - Student can:			
U1	plan the diagnostic procedure and interpret its results	O.U3	classroom observation, multiple choice test
U2	plan own learning activities and constantly learn in order to update own knowledge	O.U5	classroom observation
U3	inspire the learning process of others	O.U6	classroom observation
U4	communicate with the patient and his family in an atmosphere of trust, taking into account the needs of the patient	O.U7	classroom observation
U5	critically evaluate the results of scientific research and adequately justify the position	O.U9	classroom observation, multiple choice test
U6	conduct a psychiatric examination	E.U5	classroom observation
U7	evaluate and describe the somatic and mental state of the patient	E.U13	classroom observation
U8	plan diagnostic, therapeutic and prophylactic procedures	E.U16	classroom observation, multiple choice test
Social competences - Student is ready to:			
K1	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	classroom observation
K2	respect medical confidentiality and patients' rights	O.K3	classroom observation
K3	take actions towards the patient on the basis of ethical norms and principles, with an awareness of the social determinants and limitations of the disease	O.K4	classroom observation
K4	formulate conclusions from own measurements or observations	O.K8	classroom observation

3.	Freud's stages of psychosexual development, types of character	W1, W2, W3, U2, U3, U5, K4	seminar
4.	Personality structure, ego defense mechanisms	W1, W2, W3, U2, U3, U5, K4	seminar
5.	Practice of psychoanalysis - principles, goals and methods	W1, W2, W3, W4, W5, W6, U2, U3	seminar
6.	Directions of psychoanalysis development - analytical psychology by Carl Gustav Jung, individual psychology by Alfred Adler	W1, W2, W3, W6, U2, U3, U5, K4	seminar
7.	Directions of psychoanalysis development - self psychology, ego psychology	W1, W2, W3, W6, U2, U3, U5, K4	seminar
8.	Directions of psychoanalysis development - object relations theory	W1, W2, W3, W6, U2, U3, U5, K4	seminar
9.	Place of psychoanalysis in 21st century medicine, training in psychoanalysis	W1, W2, W5, W6, U2, U3, U5, K4	seminar

10.	Psychoanalysis as a treatment method - analysis of classical cases	W1, W2, W3, W4, U1, U2, U3, U7, U8, K1, K2, K3, K4	classes
11.	Psychoanalytic treatment process - insight and working through - working with clinical material	W1, W2, W3, W4, W5, W6, U1, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4	classes
12.	Psychoanalytic treatment process - resistance and working with resistance - working with clinical material	W1, W2, W3, W4, W5, W6, U1, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4	classes
13.	Psychoanalytic treatment process - dream analysis - working with clinical material	W1, W2, W3, W4, W5, W6, U1, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4	classes
14.	Case study I	W1, W2, W3, W4, W5, W6, U1, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4	classes
15.	Case study II	W1, W2, W3, W4, W5, W6, U1, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4	classes
16.	Case study III	W1, W2, W3, W4, W5, W6, U1, U2, U3, U4, U5, U6, U7, U8, K1, K2, K3, K4	classes

Course advanced

Teaching methods:

case study, clinical classes, discussion, group work, seminar

Activities	Examination methods	Credit conditions
seminar	multiple choice test	Final test carried out after the end of the course, covering 25 questions. There are five possible answers for each question - only one answer is correct. The pass mark is 60%. The following evaluation criteria are used: 0 -14 points - 2.0 15 -16 points - 3.0 17 -18 points - 3.5 19 -20 points - 4.0 21 -22 points - 4.5 23 -25 points - 5.0
classes	classroom observation, multiple choice test	Active student participation in all classes. Theoretical content is included in the final test.

Additional info

The students are required to attend all classes and participate actively in them. The students are expected to complete all assignments requested by the teaching assistant and come to the class fully prepared. Furthermore, the students should participate in the patient's examination, particularly in clinical discussions, including differential diagnosis and treatment planning.

Note: The students must always be on time for the classes. Those arriving late may not join the ongoing patient's examination once it has started.

No change of outfit is required. Business casual or smart casual outfits are recommended.

Absence during the classes or seminars

Should the student's absence be justified with a legitimate reason (in line with the general regulations of the Jagiellonian University Medical College), the teaching assistant shall decide on how the student makes up for the absence. The preferred forms of catch up for absences are writing a final paper or participating in clinical activities proposed by the assistant (observation of the therapeutic group, case study analysis, patient examination)

Entry requirements

Completing the courses: Clinical Psychology, Psychiatry 1/2

Clinical Immunology as modern interdisciplinary science

Educational subject description sheet

Goals

C1	Acquiring a broad knowledge of primary and secondary immunodeficiencies as well as diagnostic and therapeutic methods in these diseases
C2	Introduction to methods used in the immunological laboratory.
C3	Acquiring basic knowledge in the field of transplantology and immunotherapy.

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			

W1	symptoms and course of diseases	O.W2	oral answer
W2	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	oral answer
W3	methods of conducting scientific research	O.W5	oral answer
W4	theoretical and practical basics of laboratory diagnostics	E.W40	oral answer
W5	the types of biological materials to be used for laboratory diagnosis and the rules for the collection of test material	E.W39	oral answer
W6	possibilities of modern neoplastic therapy, including multimodal therapy, perspectives of cellular and gene therapies and their adverse effects	E.W25	oral answer
Skills - Student can:			
U1	plan the diagnostic procedure and interpret its results	O.U3	classroom observation
U2	implement appropriate and safe therapeutic treatment and predict its effects	O.U4	classroom observation
U3	critically evaluate the results of scientific research and adequately justify the position	O.U9	classroom observation
U4	plan diagnostic, therapeutic and prophylactic procedures	E.U16	classroom observation
U5	analyze the potential adverse reactions of individual medicines and the interactions between them	E.U17	classroom observation
U6	interpret the results of laboratory tests and identify the causes of abnormalities	E.U24	classroom observation
U7	propose individualization of existing therapeutic guidelines and other methods of treatment in the face of ineffectiveness or contraindications to standard therapy	E.U18	classroom observation
Social competences - Student is ready to:			
K1	assume responsibility for decisions taken in the course of their professional activities, including in terms of the safety of oneself and others	O.K11	classroom observation
K2	formulate conclusions from own measurements or observations	O.K8	classroom observation
K3	take actions towards the patient on the basis of ethical norms and principles, with an awareness of the social determinants and limitations of the disease	O.K4	classroom observation
K4	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	classroom observation
K5	to be guided by the well-being of a patient	O.K2	classroom observation
K6	respect medical confidentiality and patients' rights	O.K3	classroom observation
K7	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	classroom observation
K8	use objective sources of information	O.K7	classroom observation

Calculation of ECTS points

Activity form	Activity hours*
seminar	14
classes	16
case analysis	4
preparation for classes	5
preparation for classes	5
kształcenie samodzielne	16
Student workload	Hours 60
Workload involving teacher	Hours 30
Practical workload	Hours 20

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Primary immunodeficiencies - discussion of clinical cases, substitution of immunoglobulins in primary immunodeficiencies, laboratory diagnostics including primary immunodeficiencies, autoimmune diseases, HLA typing, flow cytofluorimetric method Secondary immunodeficiencies - diagnosis and treatment	W1, W2, W4, W5, U1, U2, U4, U5, U6, U7, K1, K2, K3, K4, K5, K6	classes, seminar
2.	Therapeutic use of stem cells Hematopoietic stem cell transplantation - practical aspects Patient after hematopoietic stem cell transplantation Stem cell separation / stem cell bank	W3, U2, U3, U5, U6, U7, K1, K2, K3, K4, K5, K6, K7, K8	classes, seminar
3.	Aging of the immune system Selected issues in immunopharmacology Adult patient with primary immunodeficiency Vasculopathies - etiopathogenesis, diagnosis, treatment Cancer immunology - discussion of new diagnostic and treatment methods	W1, W2, W3, W4, W6, U1, U2, U3, U4, U5, U6, U7, K1, K2, K3, K4, K5, K6, K7, K8	classes, seminar

Course advanced

Teaching methods:

case study, clinical classes, laboratories (labs), seminar

Activities	Examination methods	Credit conditions
seminar	classroom observation, oral answer	zaliczenie ustne
classes	classroom observation	zaliczenie ustne

Additional info

Absence from classes: students absent from classes for justified reasons must do their classes within the time agreed with the teacher.

Entry requirements

Knowledge of basic and clinical immunology - passed obligatory classes, basic knowledge in the field of internal medicine and pediatrics

How to survive in emergency care - what the doctor should know

Educational subject description sheet

Goals

C1	The aim of the subject is to familiarize students with the specifics of emergency treatment in general practice.
----	--

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
	Knowledge - Student knows and understands:		

W1	the causes, symptoms, principles of diagnosis and therapeutic management of the most common internal diseases and their complications in adults: 1) cardiovascular diseases, including ischemic heart disease, heart defects, endocarditis, myocardial infarction, pericardial infarction, heart failure (acute and chronic), diseases of arteries and venous vessels, arterial hypertension - primary and secondary, pulmonary hypertension, 2) respiratory system diseases, including respiratory tract diseases, chronic obstructive pulmonary disease, bronchial asthma, bronchial dilatation, cystic fibrosis, respiratory infections, interstitial diseases of the lungs, pleura, mediastinum, obstructive and central sleep apnea, respiratory failure (acute and chronic), respiratory tumors, 3) diseases of the digestive system, including diseases of the mouth, esophagus, stomach and duodenum, intestines, pancreas, liver, bile ducts and gallbladder, 4) diseases of the internal secretion system, including diseases of the hypothalamus and pituitary gland, thyroidism, parathyroidism, adrenal cortex and medulla, ovaries and testicles, and neuroendocrine tumors, polyglandular syndromes, various types of diabetes and metabolic syndrome - hypoglycaemia, obesity, dyslipidemia, 5) diseases of the kidneys and the urinary tract, including acute and chronic renal failure, glomerulonephritis and interstitial kidney diseases, kidney cysts, kidney stones, urinary tract infections, urinary tract neoplasms, in particular of bladder and kidney neoplasms, 6) hematopoietic diseases, including bone marrow aplasia, anemia, granulocytopenia and agranulocytosis, thrombocytopenia, acute leukemia, myeloproliferative and myelodysplastic-myeloproliferative tumours, myelodysplastic syndromes, mature B and T lymphocytes tumors, bleeding diatheses, thrombophilia, life-threatening conditions in hematology, blood disorders in other organ diseases, 7) rheumatic diseases, including systemic connective tissue diseases, systemic vasculitis, joint inflammations involving spinal cord, metabolic bone diseases, osteoporosis and osteoarthritis in particular, gout, 8) allergic diseases, including anaphylaxis and anaphylactic shock and angioedema, 9) water-electrolyte and acid-base disorders: dehydration conditions, overhydration conditions, electrolyte, acidic and alkaline disorders	E.W7	practical examination
W2	the basic principles of pharmacotherapy for diseases in the elderly	E.W10	practical examination
W3	rules of conduct in the event of the detection of an infectious disease	E.W33	practical examination
Skills - Student can:			
U1	identify medical problems and prioritize medical management	O.U1	practical examination
U2	plan the diagnostic procedure and interpret its results	O.U3	practical examination
U3	carry out a medical history with an adult patient	E.U1	practical examination
U4	carry out a medical interview with the child and his or her family	E.U2	practical examination

U5	conduct a full and targeted physical examination of an adult patient	E.U3	practical examination
U6	carry out a physical examination of a child of all ages	E.U4	practical examination
U7	perform differential diagnosis of the most common diseases of adults and children	E.U12	practical examination
U8	plan diagnostic, therapeutic and prophylactic procedures	E.U16	practical examination
U9	qualify the patient for home and hospital treatment	E.U20	practical examination
U10	interpret the results of laboratory tests and identify the causes of abnormalities	E.U24	practical examination
U11	plan specialist consultations	E.U32	practical examination
Social competences - Student is ready to:			
K1	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	group assessment
K2	formulate conclusions from own measurements or observations	O.K8	group assessment
K3	use objective sources of information	O.K7	group assessment

Calculation of ECTS points

---	--	---

Goals

C1	Understanding epidemiology and pathophysiology of heart failure
C2	Learning about diagnosis of heart failure.
C3	Learning about indications for additional tests in patients with heart failure and how to interpret their results.
C4	Understanding therapy of heart failure.

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			

W1	environmental and epidemiological determinants of the most frequent diseases	E.W1	multiple choice test
W2	the causes, symptoms, principles of diagnosis and therapeutic management of the most common internal diseases and their complications in adults: 1) cardiovascular diseases, including ischemic heart disease, heart defects, endocarditis, myocardial infarction, pericardial infarction, heart failure (acute and chronic), diseases of arteries and venous vessels, arterial hypertension - primary and secondary, pulmonary hypertension, 2) respiratory system diseases, including respiratory tract diseases, chronic obstructive pulmonary disease, bronchial asthma, bronchial dilatation, cystic fibrosis, respiratory infections, interstitial diseases of the lungs, pleura, mediastinum, obstructive and central sleep apnea, respiratory failure (acute and chronic), respiratory tumors, 3) diseases of the digestive system, including diseases of the mouth, esophagus, stomach and duodenum, intestines, pancreas, liver, bile ducts and gallbladder, 4) diseases of the internal secretion system, including diseases of the hypothalamus and pituitary gland, thyroidism, parathyroidism, adrenal cortex and medulla, ovaries and testicles, and neuroendocrine tumors, polyglandular syndromes, various types of diabetes and metabolic syndrome - hypoglycaemia, obesity, dyslipidemia, 5) diseases of the kidneys and the urinary tract, including acute and chronic renal failure, glomerulonephritis and interstitial kidney diseases, kidney cysts, kidney stones, urinary tract infections, urinary tract neoplasms, in particular of bladder and kidney neoplasms, 6) hematopoietic diseases, including bone marrow aplasia, anemia, granulocytopenia and agranulocytosis, thrombocytopenia, acute leukemia, myeloproliferative and myelodysplastic-myeloproliferative tumours, myelodysplastic syndromes, mature B and T lymphocytes tumors, bleeding diatheses, thrombophilia, life-threatening conditions in hematology, blood disorders in other organ diseases, 7) rheumatic diseases, including systemic connective tissue diseases, systemic vasculitis, joint inflammations involving spinal cord, metabolic bone diseases, osteoporosis and osteoarthritis in particular, gout, 8) allergic diseases, including anaphylaxis and anaphylactic shock and angioedema, 9) water-electrolyte and acid-base disorders: dehydration conditions, overhydration conditions, electrolyte, acidic and alkaline disorders	E.W7	multiple choice test
W3	the role of medical rehabilitation and methods used in it	E.W31	multiple choice test
Skills - Student can:			
U1	carry out a medical history with an adult patient	E.U1	multiple choice test
U2	conduct a full and targeted physical examination of an adult patient	E.U3	multiple choice test
U3	perform differential diagnosis of the most common diseases of adults and children	E.U12	multiple choice test
U4	recognize immediate life-threatening conditions	E.U14	multiple choice test

U5	plan diagnostic, therapeutic and prophylactic procedures	E.U16	multiple choice test
U6	analyze the potential adverse reactions of individual medicines and the interactions between them	E.U17	multiple choice test
U7	propose individualization of existing therapeutic guidelines and other methods of treatment in the face of ineffectiveness or contraindications to standard therapy	E.U18	multiple choice test
U8	qualify the patient for home and hospital treatment	E.U20	multiple choice test
U9	recognize states in which the duration of life, functional state or patient preferences limit the conduct in accordance with the guidelines specified for a given disease	E.U21	multiple choice test
U10	propose a rehabilitation program for the most common diseases	E.U23	multiple choice test
U11	interpret the results of laboratory tests and identify the causes of abnormalities	E.U24	multiple choice test
Social competences - Student is ready to:			
K1	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	multiple choice test
K2	to be guided by the well-being of a patient	O.K2	multiple choice test
K3	respect medical confidentiality and patients' rights	O.K3	multiple choice test
K4	take actions towards the patient on the basis of ethical norms and principles, with an awareness of the social determinants and limitations of the disease	O.K4	multiple choice test
K5	promote health-promoting behaviors	O.K6	multiple choice test
K6	assume responsibility for decisions taken in the course of their professional activities, including in terms of the safety of oneself and others	O.K11	multiple choice test

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Epidemiology of heart failure Causes of heart failure Pathogenesis of heart failure symptoms Types of heart failure Prognosis in heart failure	W1, W2, U11, U8, K2, K3, K4, K5, K6	seminar
2.	1. Ischemic disease - as a cause of heart failure 2. Heart defects as a cause of heart failure	W2, W3, U1, U10, U11, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3	classes
3.	1. Myocarditis as a cause of heart failure 2. Non-cardiac causes of heart failure	W1, W2, U1, U10, U4, U5, U6, U7, K1, K2, K3, K4, K5, K6	classes
4.	Prevention of heart failure: Epidemiology of risk factors Behavioral risk factors for the development of heart failure - diagnostics and treatment	W1, W2, W3, U1, U10, U11, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4, K5, K6	seminar
5.	Hypertension as a cause of heart failure - management of hypertension	W2, U1, U2, U3, U4, U5, K1, K2, K3, K4, K5, K6	classes
6.	Management of dyslipidemia Management of diabetes	W2, U1, U2, U3, U5, K2, K3, K4	classes
7.	Diagnosis of heart failure: Symptoms and signs of heart failure Imaging in heart failure Biomarkers of heart failure	W2, W3, U10, U11, U5, U6, U7, U8, U9, K1, K2, K3, K4, K5, K6	seminar
8.	Echocardiography in the diagnosis and evaluation of the effectiveness of heart failure treatment Computed tomography and magnetic resonance imaging in the diagnosis of heart failure	W1, W2, W3, U10, U11, U5, U6, U7, U8, U9, K1, K2, K3, K4, K5, K6	classes
9.	Invasive procedures in heart failure diagnosis - coronary angiography, fractional flow reserve, endomyocardial biopsy. Indications, contraindications.	W2, U4, U5, U7, U8, U9, K1, K2, K3, K4, K6	classes
10.	Conservative treatment of heart failure Algorithm of heart failure management Prognosis of heart failure patients	W2, U7, U8, U9, K1, K2, K3, K4, K5, K6	seminar
11.	Diet in the treatment of heart failure: calories, sodium, potassium, and microelements intake. Physical activity in people with heart failure. Indications and contraindications for cardiac rehabilitation.	W3, U10, U5, K1, K2, K3, K4, K5	classes
12.	Pharmacological treatment of heart failure - drug classes, indications, contraindications, effects on symptoms and prognosis.	W2, U5, U6, U7, U8, K1, K2, K3, K4, K5	classes

13.	Surgical treatment of heart failure: Coronary angioplasty procedures - indications, results, long-term prognosis Mechanical support of the circulatory system Heart transplantation - indications, contraindications	W2, W3, U4, U5, U7, U8, U9, K1, K2, K3, K4, K5	seminar
14.	Surgical treatment of aortic stenosis Surgical treatment of mitral valve regurgitation	W2, U7, U8, K1, K2, K3, K4, K5	classes
15.	Resynchronizing therapy - indications, contraindications, results Cardioverter / defibrillator - indications, contraindications Surgical treatment of arrhythmias in patients with heart failure	W2, U7, K1, K2, K3, K4, K5	classes

Course advanced

Teaching methods:

case study, brainstorm, classes / practicals, clinical classes, demonstration, discussion, case study method, situation method, practical classes

---	--	---

Goals

C1	Becoming acquainted with modern technologies in the treatment of diabetes
C2	Acquiring the ability to read and analyze data from insulin pumps, glucometers and systems for continuous glucose monitoring
C3	Acquiring the ability to analyze data from the insulin pump of a patient with gestational diabetes
C4	To acquaint the student with artificial pancreas and DIY systems

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
------	----------------------	---------	---------------------

Knowledge - Student knows and understands:			
W1	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	written examination
Skills - Student can:			
U1	plan the diagnostic procedure and interpret its results	O.U3	booklet of practical skills
U2	implement appropriate and safe therapeutic treatment and predict its effects	O.U4	booklet of practical skills
U3	carry out a medical history with an adult patient	E.U1	classroom observation
U4	plan diagnostic, therapeutic and prophylactic procedures	E.U16	booklet of practical skills
U5	perform basic procedures and medical procedures including: 1) body temperature measurement, heart rate measurement, non-invasive blood pressure measurement, 2) monitoring of vital signs by means of a patient monitor, pulse oximetry, 3) spirometric examination, oxygen therapy, assisted ventilation and replacement ventilation, 4) introduction of the oropharyngeal tube, 5) intravenous, intramuscular and subcutaneous injections, cannulation of peripheral veins, collection of peripheral venous blood, collection of blood for culture, collection of arterialized capillary blood, collection of arterialized capillary blood, 6) taking nasal, throat and skin swabs, puncturing of the pleural cavity, 7) bladder catheterization in women and men, gastric tube, gastric lavage, gastric lavage, enema, 8) standard resting electrocardiogram with interpretation, electrical cardioversion and cardiac defibrillation, 9) simple strip tests and blood glucose measurements	E.U29	booklet of practical skills
U6	select appropriate physical activity in the developmental period of children and adolescents and propose health training in adulthood, both in health and disease	E.U40	classroom observation
U7	qualify children and young people for physical education and sports, and adults for appropriate physical activity. Interprets the stress tests	E.U41	classroom observation
Social competences - Student is ready to:			
K1	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	classroom observation
K2	to be guided by the well-being of a patient	O.K2	classroom observation
K3	promote health-promoting behaviors	O.K6	classroom observation
K4	use objective sources of information	O.K7	classroom observation
K5	assume responsibility for decisions taken in the course of their professional activities, including in terms of the safety of oneself and others	O.K11	classroom observation

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Unmet needs in typ1 diabetes managment. New, CGM based measure of glycemc control	W1, U2, U3, U4, U6, U7, K1, K2, K3, K4, K5	seminar
2.	Insulin pump therapy and systems of continous glucose monitoring: clinical aplications. Which device for whom and when	U3, U5, K3	seminar
3.	The managment of diabetes with personal insulin pumps during pregnancy	U1, U6, U7, K3	seminar
4.	Exercise and sport when on personal insulin pump	U4	seminar
5.	Towards closed loop technologies: available systems, future perspectives	U1, U4	seminar
6.	Presenting Insulin Pump Therapy to your patients, Understanding advantages and disadvantages of insulin pump therapy, When your patient chooses the pump	U1, U2, U3, U4, U7	classes
7.	Insert infusion set, Review insertion technique, tips on inserting infusion set, Estimating for Starting Insulin Pump Parameters	W1, U1, U2, U3, U4, U6, K1, K2, K3, K4, K5	classes
8.	Fine-tuning the overnight Basal rate Worksheet, Testing the overnight basal rate, Testing the daytime basal rate worksheet	U4, U5, K1, K2, K3, K4, K5	classes
9.	Fine-tuning the meal bolus worksheet, Bolus calculator function, Carbohydrate counting, Calculating insulin-to-carbohydrate ratio Calculating insulin for high blood glucose correction	U1, U3, U4, K1, K2, K3, K4, K5	classes
10.	Testing the Correction Bolus, Extended/Dual Boluses, fat-protein exchangers, food mobile applications	U1, U3, U4, U5, K1, K2, K3, K4, K5	classes

11.	Troubleshooting for Insulin Pump Patients <ul style="list-style-type: none"> • Living with pump – sleep, shower, sex • Hyperglycemia & ketones – when & how to check • Travel • Hypoglycemia – causes and treatment • Temporary Removal/Disconnect • managing illness 	W1, U1, U3, U4, K1, K2, K3, K4, K5	classes
12.	Blood glucose pattern interpretation, CGM systems, interpreting SAP data, case studies	W1, U1, U3, U4, U6, K1, K2, K3, K4, K5	classes
13.	Pregnancy and pumps - case studies	U1, U3, U4, K1, K2, K3, K4, K5	classes
14.	Data downloading and interpretation, DIY systems,	U1, U3, U4, K1, K2, K3, K4, K5	classes
15.	Data downloading and interpretation part 2, Mobile Diabetes App	U3, U4, K2	classes

Course advanced

Teaching methods:

case study, brainstorm, classes / practicals, clinical classes, discussion, computer room, seminar

Activities	Examination methods	Credit conditions
seminar	written examination, classroom observation	active participation in all classes, 60% points from the test (20 questions, 1 point per question)
classes	booklet of practical skills	attendance in all classes

Entry requirements

knowledge of diabetes pathophysiology, of insulin action, obligatory presence on seminars and classes

From symptoms to diagnosis - topographic diagnostics in Neurology

Educational subject description sheet

Basic information

<p>Department Faculty of Medicine</p> <p>Field of study Medical Program</p> <p>Study level long-cycle master's degree program</p> <p>Study form full-time</p> <p>Education profile general academic</p> <p>Disciplines Medical science</p> <p>ISCED classification 0912 Medicine</p> <p>Subject related to scientific research Yes</p>	<p>Didactic cycle 2021/22</p> <p>Realization year 2025/26</p> <p>Lecture languages English</p> <p>Block obligatory for passing in the course of studies</p> <p>Mandatory elective</p> <p>Examination graded credit</p> <p>Standard group E. Clinical non-procedural medical disciplines</p>
--	--

<p>Periods Semester 9, Semester 10</p>	<p>Examination graded credit</p> <p>Activities and hours seminar: 30</p>	<p>Number of ECTS points 2.0</p>
---	--	---

Goals

C1	The goal of the course is to make students knowledgeable of neurological symptoms and signs and their usefulness in localizing lesions within nervous system. Such a knowledge is a preliminary requirement for the precise and efficient diagnosis of neurological disease. This course consolidates and expands information provided during the regular neurology course and should be extremely helpful for students who plan their professional career in the fields of neurology, neurosurgery or psychiatry.
----	--

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	basic neurological symptom syndromes	E.W13	multiple choice test

W2	causes, symptoms, principles of diagnosis and therapeutic management in the most common diseases of the nervous system, including: 1) headaches: migraines, tension headaches and headache syndromes and neuralgia of the nerve V, 2) cerebral vascular diseases, in particular stroke, 3) epilepsy, 4) infections of the nervous system, in particular meningitis, borreliosis, herpetic encephalitis, neurotransmission diseases, 5) dementia, in particular: Alzheimer's disease, frontal dementia, vascular dementia and other dementia syndromes, 6) basal ganglia diseases, Parkinson's disease in particular, 7) demyelinating diseases, multiple sclerosis in particular, 8) diseases of the neuromuscular system, lateral atrophic sclerosis and sciatic neuralgia in particular, 9) craniocerebral injuries, cerebral palsy in particular	E.W14	multiple choice test
Skills - Student can:			
U1	carry out a medical history with an adult patient	E.U1	multiple choice test
U2	conduct a full and targeted physical examination of an adult patient	E.U3	multiple choice test
U3	plan diagnostic, therapeutic and prophylactic procedures	E.U16	multiple choice test
Social competences - Student is ready to:			
K1	formulate conclusions from own measurements or observations	O.K8	multiple choice test
K2	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	multiple choice test

Calculation of ECTS points

Activity form	Activity hours*
seminar	30
preparation for classes	15
preparation for examination	15
Student workload	Hours 60
Workload involving teacher	Hours 30

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Neurological history	U1	seminar

2.	Neurological examination	W1, U2, K1	seminar
3.	Non-neurological signs of neurological disorders	U2, K1, K2	seminar
4.	Disorders of vision and ocular movements	W1, W2, U2, U3, K1, K2	seminar
5.	Disorders of smell, taste, hearing and balance	W1, W2, U2, U3, K1, K2	seminar
6.	Disorders of speech and swallowing	W1, W2, U2, U3, K1, K2	seminar
7.	Weakness	W1, W2, U2, U3, K1, K2	seminar
8.	Disorders of reflexes and muscle tone	W1, W2, U2, U3, K1, K2	seminar
9.	Disorders of coordination	W1, W2, U2, U3, K1, K2	seminar
10.	Disorders of gait	W1, W2, U2, U3, K1, K2	seminar
11.	Disorders of somatic sensation	W1, W2, U2, U3, K1, K2	seminar
12.	Disorders of higher cortical functions	W1, W2, U2, U3, K1, K2	seminar
13.	Disorders of consciousness and awareness	W1, W2, U2, U3, K1, K2	seminar

Course advanced

Teaching methods:

discussion, educational film, educational game, case study method, presentation, seminar

Activities	Examination methods	Credit conditions
seminar	multiple choice test	Credit is given to the student who has attended all classes and passed multiple choice test at the end of the course (at least 60% of maximum possible score).

Entry requirements

- Students are required to attend all classes
- It is assumed that all students had attended neurology course and passed exam in neurology

Practice of echocardiography

Educational subject description sheet

Basic information

<p>Department Faculty of Medicine</p> <p>Field of study Medical Program</p> <p>Study level long-cycle master's degree program</p> <p>Study form full-time</p> <p>Education profile general academic</p> <p>Disciplines Medical science</p> <p>ISCED classification 0912 Medicine</p>	<p>Didactic cycle 2021/22</p> <p>Realization year 2025/26</p> <p>Lecture languages English</p> <p>Block obligatory for passing in the course of studies</p> <p>Mandatory elective</p> <p>Examination graded credit</p> <p>Standard group E. Clinical non-procedural medical disciplines</p>
---	--

<p>Periods Semester 9, Semester 10</p>	<p>Examination graded credit</p> <p>Activities and hours seminar: 10 classes: 20</p>	<p>Number of ECTS points 2.0</p>
---	--	---

Goals

C1	Competence in echocardiography at basic level. Competence in the assessment of hemodynamic status and CV risk of the patients based on echocardiography.
----	--

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
	Knowledge - Student knows and understands:		

W1	<p>the causes, symptoms, principles of diagnosis and therapeutic management of the most common internal diseases and their complications in adults: 1) cardiovascular diseases, including ischemic heart disease, heart defects, endocarditis, myocardial infarction, pericardial infarction, heart failure (acute and chronic), diseases of arteries and venous vessels, arterial hypertension - primary and secondary, pulmonary hypertension, 2) respiratory system diseases, including respiratory tract diseases, chronic obstructive pulmonary disease, bronchial asthma, bronchial dilatation, cystic fibrosis, respiratory infections, interstitial diseases of the lungs, pleura, mediastinum, obstructive and central sleep apnea, respiratory failure (acute and chronic), respiratory tumors, 3) diseases of the digestive system, including diseases of the mouth, esophagus, stomach and duodenum, intestines, pancreas, liver, bile ducts and gallbladder, 4) diseases of the internal secretion system, including diseases of the hypothalamus and pituitary gland, thyroidism, parathyroidism, adrenal cortex and medulla, ovaries and testicles, and neuroendocrine tumors, polyglandular syndromes, various types of diabetes and metabolic syndrome – hypoglycaemia, obesity, dyslipidemia, 5) diseases of the kidneys and the urinary tract, including acute and chronic renal failure, glomerulonephrine and interstitial kidney diseases, kidney cysts, kidney stones, urinary tract infections, urinary tract neoplasms, in particular of bladder and kidney neoplasms, 6) hematopoietic diseases, including bone marrow aplasia, anemia, granulocytopenia and agranulocytosis, thrombocytopenia, acute leukemia, myeloproliferative and myelodysplastic-myeloproliferative tumours, myelodysplastic syndromes, mature B and T lymphocytes tumors, bleeding diatheses, thrombophilia, life-threatening conditions in hematology, blood disorders in other organ diseases, 7) rheumatic diseases, including systemic connective tissue diseases, systemic vasculitis, joint inflammations involving spinal cord, metabolic bone diseases, osteoporosis and osteoarthritis in particular, gout, 8) allergic diseases, including anaphylaxis and anaphylactic shock and angioedema, 9) water-electrolyte and acid-base disorders: dehydration conditions, overhydration conditions, electrolyte, acidic and alkaline disorders</p>	E.W7	practical examination
Skills - Student can:			
U1	recognize immediate life-threatening conditions	E.U14	practical examination
Social competences - Student is ready to:			
K1	formulate conclusions from own measurements or observations	O.K8	practical examination

Calculation of ECTS points

Workload involving teacher	Hours 30
Practical workload	Hours 20

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Normal and pathologic values of measurements in echocardiography.	W1	classes, seminar
2.	Competence in the assessment of hemodynamic status and CV risk of the patients based on echocardiography	U1, K1	classes, seminar

Course advanced

Teaching methods:

clinical classes, seminar

Activities	Examination methods	Credit conditions
seminar	practical examination	Echocardiography performing at basic level.
classes	practical examination	Echocardiography performing at basic level.

Additional info

Obligatory presence during the first day, 1 day off only possible during the next days.

Entry requirements

Heart anatomy, circulatory system physiology, internal medicine background.
Presence during the first day obligatory, one day off only during the next days possible.

The role of genetics in modern prenatal diagnosis and in reproduction failure

Educational subject description sheet

Basic information

<p>Department Faculty of Medicine</p> <p>Field of study Medical Program</p> <p>Study level long-cycle master's degree program</p> <p>Study form full-time</p> <p>Education profile general academic</p> <p>Disciplines Medical science</p> <p>ISCED classification 0912 Medicine</p>	<p>Didactic cycle 2021/22</p> <p>Realization year 2025/26</p> <p>Lecture languages English</p> <p>Block obligatory for passing in the course of studies</p> <p>Mandatory elective</p> <p>Examination graded credit</p> <p>Standard group E. Clinical non-procedural medical disciplines</p>
---	--

<p>Periods Semester 9, Semester 10</p>	<p>Examination graded credit</p> <p>Activities and hours seminar: 10 classes: 20</p>	<p>Number of ECTS points 2.0</p>
---	--	---

Goals

C1	Acquiring information regarding: • breeding failures, • indications for prenatal diagnosis in the context of specific clinical cases, • Advantages and disadvantages of NIPT tests in the context of modern prenatal diagnostics • Preimplantation diagnostics • Conducting differential diagnosis of a newborn baby (in the context of genetic diseases) • Modern genetic diagnostics technologies • Chromosome aberrations and the most common monogenic diseases diagnosed in newborns
C2	Acquiring skills regarding: • Diagnosis of reproductive failures, • Indications for prenatal diagnosis in the context of specific clinical cases, • Construction and interpretation of pedigrees, • Clinical interpretation of results obtained by classical and molecular cytogenetics techniques in reproductive failures, • Clinical interpretation of results obtained by classical and molecular cytogenetics techniques in prenatal diagnosis, • Preimplantation diagnostics • Conducting differential diagnosis of a newborn baby (in the context of genetic diseases) • Methods of modern genetic diagnostics and the most common monogenic diseases diagnosed in newborns

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	basic methods of fetal diagnostics and therapy	E.W5	group assessment
W2	the causes, symptoms, principles of diagnosis and therapeutic management of the most common hereditary diseases	E.W37	group assessment, clinical case presentation
W3	symptoms and course of diseases	O.W2	group assessment, clinical case presentation
W4	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	group assessment
W5	theoretical and practical basics of laboratory diagnostics	E.W40	group assessment
W6	the types of biological materials to be used for laboratory diagnosis and the rules for the collection of test material	E.W39	group assessment
Skills - Student can:			
U1	collect and retain test material for use in laboratory diagnostics	E.U28	group assessment
U2	interpret the results of laboratory tests and identify the causes of abnormalities	E.U24	clinical case presentation
U3	plan diagnostic, therapeutic and prophylactic procedures	E.U16	clinical case presentation
U4	assess the condition of the newborn on the Apgar scale and its maturity, and examine neonatal reflexes	E.U8	group assessment
U5	perform differential diagnosis of the most common diseases of adults and children	E.U12	clinical case presentation
U6	communicate with the patient and his family in an atmosphere of trust, taking into account the needs of the patient	O.U7	group assessment
U7	plan the diagnostic procedure and interpret its results	O.U3	clinical case presentation
U8	identify medical problems and prioritize medical management	O.U1	clinical case presentation
U9	communicate and share knowledge with colleagues in a team	O.U8	clinical case presentation
U10	critically evaluate the results of scientific research and adequately justify the position	O.U9	clinical case presentation
U11	carry out a medical history with an adult patient	E.U1	group assessment
Social competences - Student is ready to:			
K1	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	group assessment
K2	to be guided by the well-being of a patient	O.K2	group assessment
K3	respect medical confidentiality and patients' rights	O.K3	group assessment

K4	use objective sources of information	O.K7	group assessment, clinical case presentation
----	--------------------------------------	------	---

Calculation of ECTS points

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Diagnosis of reproductive failures	W3, W5, W6, U1, U10, U11, U2, U3, U6, U7, U8, U9, K1, K3, K4	classes, seminar
2.	Construction and interpretation of pedigrees	W2, W3, U11, U3, U6, K1	classes
3.	Clinical interpretation of results obtained by classical and molecular cytogenetics techniques in prenatal diagnosis and reproductive failure	W2, W3, W4, W5, W6, U1, U10, U2, U3, U5, U6, U7, U8, U9, K1, K2, K3, K4	classes, seminar
4.	Advantages and disadvantages of NIPT tests in the context of modern prenatal diagnostics	W1, W2, W5, W6, U1, U10, U11, U2, U3, U6, U7, K1, K3, K4	classes, seminar
5.	Contemporary preimplantation diagnostics	W1, W4, W5, W6, U1, U10, U11, U3, U6, U7, U9, K1, K2, K3, K4	seminar
6.	Differential diagnosis of the newborn baby (in the context of genetic diseases)	W2, W3, W4, U2, U3, U4, U5, U6, U8, K1, K2, K3, K4	classes, seminar
7.	Chromosomal aberrations and the most common monogenic disorders diagnosed in newborns	W2, W3, U3, U4, U5, U7, U8, U9, K2, K3, K4	classes, seminar

Course advanced

Teaching methods:

case study, problem solving method, case study method, group work, assignments solving, lecture with multimedia presentation

Activities	Examination methods	Credit conditions
seminar	group assessment	evaluation of class attendance
classes	clinical case presentation	presentation of clinical case by student

Entry requirements

Completion of preliminary modules: • Gynecology and obstetrics 1/4 • Gynecology and obstetrics 2/4 • Clinical genetics • Pediatrics 1/4 • Pediatrics 2/4

Systemic vasculitis

Educational subject description sheet

Basic information

<p>Department Faculty of Medicine</p> <p>Field of study Medical Program</p> <p>Study level long-cycle master's degree program</p> <p>Study form full-time</p> <p>Education profile general academic</p> <p>Disciplines Medical science</p> <p>ISCED classification 0912 Medicine</p> <p>Subject related to scientific research Yes</p>	<p>Didactic cycle 2021/22</p> <p>Realization year 2025/26</p> <p>Lecture languages English</p> <p>Block obligatory for passing in the course of studies</p> <p>Mandatory elective</p> <p>Examination graded credit</p> <p>Standard group E. Clinical non-procedural medical disciplines</p>
--	--

<p>Periods Semester 9, Semester 10</p>	<p>Examination graded credit</p> <p>Activities and hours seminar: 10 classes: 20</p>	<p>Number of ECTS points 2.0</p>
---	--	---

Goals

C1	Transfer of knowledge in the field of pathophysiology, symptoms, diagnosis and treatment of systemic vasculitis
C2	To familiarize students with the symptoms and course of systemic vasculitis and methods for assessing severity of the course.

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	symptoms and course of diseases	O.W2	classroom observation

W2	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	classroom observation
W3	environmental and epidemiological determinants of the most frequent diseases	E.W1	classroom observation
W4	the causes, symptoms, principles of diagnosis and therapeutic management of the most common internal diseases and their complications in adults: 1) cardiovascular diseases, including ischemic heart disease, heart defects, endocarditis, myocardial infarction, pericardial infarction, heart failure (acute and chronic), diseases of arteries and venous vessels, arterial hypertension - primary and secondary, pulmonary hypertension, 2) respiratory system diseases, including respiratory tract diseases, chronic obstructive pulmonary disease, bronchial asthma, bronchial dilatation, cystic fibrosis, respiratory infections, interstitial diseases of the lungs, pleura, mediastinum, obstructive and central sleep apnea, respiratory failure (acute and chronic), respiratory tumors, 3) diseases of the digestive system, including diseases of the mouth, esophagus, stomach and duodenum, intestines, pancreas, liver, bile ducts and gallbladder, 4) diseases of the internal secretion system, including diseases of the hypothalamus and pituitary gland, thyroidism, parathyroidism, adrenal cortex and medulla, ovaries and testicles, and neuroendocrine tumors, polyglandular syndromes, various types of diabetes and metabolic syndrome - hypoglycaemia, obesity, dyslipidemia, 5) diseases of the kidneys and the urinary tract, including acute and chronic renal failure, glomerulonephrine and interstitial kidney diseases, kidney cysts, kidney stones, urinary tract infections, urinary tract neoplasms, in particular of bladder and kidney neoplasms, 6) hematopoietic diseases, including bone marrow aplasia, anemia, granulocytopenia and agranulocytosis, thrombocytopenia, acute leukemia, myeloproliferative and myelodysplastic-myeloproliferative tumours, myelodysplastic syndromes, mature B and T lymphocytes tumors, bleeding diatheses, thrombophilia, life-threatening conditions in hematology, blood disorders in other organ diseases, 7) rheumatic diseases, including systemic connective tissue diseases, systemic vasculitis, joint inflammations involving spinal cord, metabolic bone diseases, osteoporosis and osteoarthritis in particular, gout, 8) allergic diseases, including anaphylaxis and anaphylactic shock and angioedema, 9) water-electrolyte and acid-base disorders: dehydration conditions, overhydration conditions, electrolyte, acidic and alkaline disorders	E.W7	classroom observation
Skills - Student can:			
U1	identify medical problems and prioritize medical management	O.U1	classroom observation
U2	plan the diagnostic procedure and interpret its results	O.U3	classroom observation
U3	communicate and share knowledge with colleagues in a team	O.U8	classroom observation
U4	carry out a medical history with an adult patient	E.U1	classroom observation

U5	propose individualization of existing therapeutic guidelines and other methods of treatment in the face of ineffectiveness or contraindications to standard therapy	E.U18	classroom observation
U6	plan specialist consultations	E.U32	classroom observation
U7	maintain patient's medical records	E.U38	classroom observation
U8	understand the importance and organization of support groups for chronic patients and their families, and Balint groups for medical staff	E.U51	classroom observation
Social competences - Student is ready to:			
K1	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	classroom observation
K2	use objective sources of information	O.K7	classroom observation
K3	formulate conclusions from own measurements or observations	O.K8	classroom observation
K4	to be guided by the well-being of a patient	O.K2	classroom observation

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	symptoms and course of diseases	O.W2	clinical case presentation
W2	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	clinical case presentation

Skills - Student can:			
U1	identify medical problems and prioritize medical management	O.U1	clinical case presentation
U2	identify life-threatening conditions that require immediate medical intervention	O.U2	clinical case presentation
U3	plan the diagnostic procedure and interpret its results	O.U3	clinical case presentation
U4	implement appropriate and safe therapeutic treatment and predict its effects	O.U4	clinical case presentation
U5	plan own learning activities and constantly learn in order to update own knowledge	O.U5	classroom observation, clinical case presentation
U6	inspire the learning process of others	O.U6	clinical case presentation
U7	communicate with the patient and his family in an atmosphere of trust, taking into account the needs of the patient	O.U7	classroom observation
U8	communicate and share knowledge with colleagues in a team	O.U8	classroom observation, clinical case presentation
U9	critically evaluate the results of scientific research and adequately justify the position	O.U9	clinical case presentation
Social competences - Student is ready to:			
K1	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	classroom observation
K2	to be guided by the well-being of a patient	O.K2	classroom observation
K3	respect medical confidentiality and patients' rights	O.K3	classroom observation
K4	take actions towards the patient on the basis of ethical norms and principles, with an awareness of the social determinants and limitations of the disease	O.K4	classroom observation
K5	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	classroom observation
K6	promote health-promoting behaviors	O.K6	classroom observation
K7	use objective sources of information	O.K7	classroom observation
K8	formulate conclusions from own measurements or observations	O.K8	classroom observation
K9	implement the principles of professional camaraderie and cooperation in a team of specialists, including representatives of other medical professions, also in a multicultural and multinational environment	O.K9	classroom observation
K10	formulate opinions on the various aspects of the professional activity	O.K10	classroom observation
K11	assume responsibility for decisions taken in the course of their professional activities, including in terms of the safety of oneself and others	O.K11	classroom observation

Calculation of ECTS points

Activity form	Activity hours*
---------------	-----------------

seminar	10
classes	20
case analysis	30
Student workload	Hours 60

1.	<p>Seminars</p> <ol style="list-style-type: none"> Seminar 1: Acid-base, fluid and electrolyte disorders. Acute kidney injury. Seminar 2: Chronic kidney disease (CKD). Seminar 3: Acute and chronic glomerulonephritis. Seminar 4: Acute and chronic tubulointerstitial nephritis. Seminar 5: Renal replacement therapies: peritoneal dialysis, haemodialysis, kidney transplantation. <p>Bedside teaching</p> <ol style="list-style-type: none"> Acute kidney injury - diagnosis and treatment. Hepatorenal syndrome. Cardiorenal syndrome. Contrast - induced nephropathy. Kidney imaging techniques. Kidney biopsy. Hereditary renal disorders: polycystic and acquired cystic diseases, Alport's syndrome, medullary cystic disease. Infection-associated glomerulonephritis (GN): viral hepatitis-associated GN, HIV-associated kidney disorders, streptococcal - and staphylococcal-related GN. Onconeurology. Primary glomerular disorders: minimal change disease, FSGS, membranous nephropathy, membranoproliferative GN. Secondary glomerular disorders: lupus nephritis, vasculitides. Diabetic kidney disease. Acid-base and electrolyte disorders. Posttransplant infection and malignancies. Primary care of the kidney transplant recipient. Continuous renal replacement therapy. Primary and secondary hypertension: diagnostics and treatment. Hypertensive emergencies. Drug dosing in patients with chronic kidney disease. Nutrition in CKD. Palliative care in nephrology. 	W1, W2, U1, U2, U3, U4, U5, U6, U7, U8, U9, K1, K10, K11, K2, K3, K4, K5, K6, K7, K8, K9	classes, seminar

Course advanced

Teaching methods:

case study, textual analysis, brainstorm, clinical classes, discussion, seminar

Activities	Examination methods	Credit conditions
seminar	clinical case presentation	Participation in all seminars and clinical duties is required. The condition for passing is attendance of all classes. A formal-end-of-rotation test including 20 questions will require a pass rate of 60%.
classes	classroom observation, clinical case presentation	Opis wybranego przez asystenta przypadku klinicznego w zakresie diagnostyki i leczenia z możliwością późniejszej publikacji w dostępnych czasopismach nefrologicznych.

Additional info

Continuous personal supervision by clinical preceptors within the department will be provided. Case-based discussions will be held as a means of informally assessing a student's knowledge base and clinical problem-solving. Evaluation at the patient's bedside will also occur. This will include assessment of physical examination skills, presentation of patient histories, formulation and communication of differential diagnoses, and proposals of investigation and management plans.

Entry requirements

Understanding the basics of the pathophysiology, clinical manifestations, and management of kidney diseases

Emergency in allergology and clinical immunology

Educational subject description sheet

Goals

C1	Acquiring knowledge about life-threatening conditions in allergology
C2	Recognition the causes, symptoms, classification, diagnostic methods, and treatment of hypersensitivity reactions, including anaphylaxis
C3	Comprehension of severe asthma exacerbation
C4	Knowledge of pathology, diagnosis and treatment of severe drug hypersensitivity reactions

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
------	----------------------	---------	---------------------

Knowledge - Student knows and understands:			
W1	symptoms and course of diseases	O.W2	classroom observation, oral credit
W2	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	classroom observation, oral credit
W3	environmental and epidemiological determinants of the most frequent diseases	E.W1	classroom observation, oral credit
W4	the causes, symptoms, principles of diagnosis and therapeutic management of the most common internal diseases and their complications in adults: 1) cardiovascular diseases, including ischemic heart disease, heart defects, endocarditis, myocardial infarction, pericardial infarction, heart failure (acute and chronic), diseases of arteries and venous vessels, arterial hypertension - primary and secondary, pulmonary hypertension, 2) respiratory system diseases, including respiratory tract diseases, chronic obstructive pulmonary disease, bronchial asthma, bronchial dilatation, cystic fibrosis, respiratory infections, interstitial diseases of the lungs, pleura, mediastinum, obstructive and central sleep apnea, respiratory failure (acute and chronic), respiratory tumors, 3) diseases of the digestive system, including diseases of the mouth, esophagus, stomach and duodenum, intestines, pancreas, liver, bile ducts and gallbladder, 4) diseases of the internal secretion system, including diseases of the hypothalamus and pituitary gland, thyroidism, parathyroidism, adrenal cortex and medulla, ovaries and testicles, and neuroendocrine tumors, polyglandular syndromes, various types of diabetes and metabolic syndrome - hypoglycaemia, obesity, dyslipidemia, 5) diseases of the kidneys and the urinary tract, including acute and chronic renal failure, glomerulonephrine and interstitial kidney diseases, kidney cysts, kidney stones, urinary tract infections, urinary tract neoplasms, in particular of bladder and kidney neoplasms, 6) hematopoietic diseases, including bone marrow aplasia, anemia, granulocytopenia and agranulocytosis, thrombocytopenia, acute leukemia, myeloproliferative and myelodysplastic-myeloproliferative tumours, myelodysplastic syndromes, mature B and T lymphocytes tumors, bleeding diatheses, thrombophilia, life-threatening conditions in hematology, blood disorders in other organ diseases, 7) rheumatic diseases, including systemic connective tissue diseases, systemic vasculitis, joint inflammations involving spinal cord, metabolic bone diseases, osteoporosis and osteoarthritis in particular, gout, 8) allergic diseases, including anaphylaxis and anaphylactic shock and angioedema, 9) water-electrolyte and acid-base disorders: dehydration conditions, overhydration conditions, electrolyte, acidic and alkaline disorders	E.W7	classroom observation, oral credit
W5	possibilities and limitations of laboratory tests in emergency situations	E.W41	classroom observation, oral credit
Skills - Student can:			

U1	identify medical problems and prioritize medical management	O.U1	classroom observation, group assessment, oral credit
U2	identify life-threatening conditions that require immediate medical intervention	O.U2	classroom observation, group assessment, oral credit
U3	plan the diagnostic procedure and interpret its results	O.U3	classroom observation, group assessment, oral credit
U4	implement appropriate and safe therapeutic treatment and predict its effects	O.U4	classroom observation, oral credit
U5	carry out a medical history with an adult patient	E.U1	classroom observation
U6	conduct a full and targeted physical examination of an adult patient	E.U3	classroom observation
U7	perform differential diagnosis of the most common diseases of adults and children	E.U12	classroom observation, group assessment
U8	recognize immediate life-threatening conditions	E.U14	classroom observation, group assessment, oral credit
U9	plan diagnostic, therapeutic and prophylactic procedures	E.U16	classroom observation, group assessment, oral credit
U10	analyze the potential adverse reactions of individual medicines and the interactions between them	E.U17	classroom observation, group assessment, oral credit
U11	qualify the patient for home and hospital treatment	E.U20	classroom observation, group assessment, oral credit
U12	interpret the results of laboratory tests and identify the causes of abnormalities	E.U24	classroom observation, group assessment, oral credit
U13	perform basic procedures and medical procedures including: 1) body temperature measurement, heart rate measurement, non-invasive blood pressure measurement, 2) monitoring of vital signs by means of a patient monitor, pulse oximetry, 3) spirometric examination, oxygen therapy, assisted ventilation and replacement ventilation, 4) introduction of the oropharyngeal tube, 5) intravenous, intramuscular and subcutaneous injections, cannulation of peripheral veins, collection of peripheral venous blood, collection of blood for culture, collection of arterialized capillary blood, collection of arterialized capillary blood, 6) taking nasal, throat and skin swabs, puncturing of the pleural cavity, 7) bladder catheterization in women and men, gastric tube, gastric lavage, gastric lavage, enema, 8) standard resting electrocardiogram with interpretation, electrical cardioversion and cardiac defibrillation, 9) simple strip tests and blood glucose measurements	E.U29	classroom observation, group assessment

U14	assist in the performance of the following procedures and medical procedures: 1) transfusion of blood and blood-derived products, 2) drainage of the pleural cavity, 3) puncture of the pericardial sac, 4) puncture of the peritoneal cavity, 5) lumbar puncture, 6) fine-needle biopsy, 7) epidermal tests, 8) intradermal and scarification tests and interpret their results	E.U30	classroom observation, group assessment
Social competences - Student is ready to:			
K1	to be guided by the well-being of a patient	O.K2	classroom observation, group assessment
K2	respect medical confidentiality and patients' rights	O.K3	classroom observation, group assessment
K3	use objective sources of information	O.K7	classroom observation, group assessment
K4	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	classroom observation, group assessment
K5	formulate conclusions from own measurements or observations	O.K8	classroom observation, group assessment

Study content

No.	Course content	Subject's learning outcomes	Activities
-----	----------------	-----------------------------	------------

1.	Types of hypersensitivity reactions and their main causes. Clinical course of hypersensitivity reactions. General principles for the treatment of hypersensitivity reactions. Characteristics of life-threatening state in the course of hypersensitivity reactions. Further management of a patient who has undergone a hypersensitivity reaction - diagnostic and prophylactic recommendations. Practical performance and interpretation of skin prick and intradermal tests, as well as patch skin tests. Interpretation of laboratory test results of blood total IgE and antigen specific IgE. Significance and interpretation of the nasal mucosa cytology. General principles of allergen immunotherapy.	W1, W2, W3, W5	classes, seminar
2.	Anaphylaxis - causes, symptoms, degrees of severity, and principles of treatment. Further management of a patient who has undergone an anaphylactic reaction.	W1, W2, U1, U11, U12, U14, U2, U3, U4, U5, U6, U8, U9, K1, K2, K3, K4, K5	classes, seminar
3.	Allergic and non-allergic hypersensitivity to the most commonly used medications. Intolerance and allergy to local anesthetics - facts and myths. Perioperative anaphylaxis.	W1, W2, W5, U1, U10, U11, U12, U14, U2, U3, U4, U5, U6, U8, U9, K1, K2, K3, K4, K5	classes, seminar
4.	Severe asthma exacerbation - prevention and treatment. New recommendations for the treatment of severe asthma. Performing and interpretation of spirometry, bodyplethysmography and measurement of diffusing capacity for carbon monoxide. Peak expiratory flow (PEF) measurements - performance, interpretation and practical limitations. Acute and chronic respiratory failure.	W1, W2, W3, W4, W5, U1, U10, U11, U12, U13, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4, K5	classes, seminar
5.	Macrophage activation syndrome (MAS), as a unique type of hypersensitivity reaction in terms of the innate immune system function.	W1, W2, W3, W4, W5, U1, U10, U11, U12, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4, K5	classes, seminar
6.	Idiopathic thrombocytopenic purpura (ITP), thrombotic thrombocytopenic purpura (TTP), post-heparin thrombocytopenia - three different examples of thrombocytopenia resulting from activation of various mechanisms of allergic hypersensitivity	W1, W2, W3, W4, W5, U1, U10, U11, U12, U2, U3, U4, U5, U6, U8, K1, K2, K3, K4, K5	classes, seminar

Course advanced

Teaching methods:

case study, brainstorm, classes / practicals, clinical classes, laboratories (labs), demonstration, discussion, case study method, presentation, group work, seminar, PBL Problem Based Learning, practical classes

Activities	Examination methods	Credit conditions
seminar	oral credit	oral exam
classes	classroom observation, group assessment	observation of student work, group assessment

Entry requirements

The student is obliged to participate in 4 courses (from 5 planned)

Knowledge is also required: - basics of immunology - types of hypersensitivity reactions, allergic hypersensitivity,

anaphylaxis, autoimmune reactions - physiology and pathology of the respiratory system - principles of subjective and physical examination - basics of psychology and medical ethics

Nervous system diseases in children and neurophysiology methods in diagnostics

Educational subject description sheet

Basic information

---	--	---

Goals

C1	Among the most important goals there is to broaden the Students' knowledge of early detection of developmental nervous system disorders, diagnostics and therapy of acute and chronic central and peripheral nervous system diseases as well as life threatening conditions in neuropaediatrics.
----	--

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			

W1	development, structure and functions of the human body in normal and pathological conditions	O.W1	oral credit
W2	symptoms and course of diseases	O.W2	oral credit
W3	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	oral credit
W4	ethical, social and legal conditions for practicing the medical profession and the principles of health promotion, based on scientific evidence and accepted standards	O.W4	oral credit
W5	environmental and epidemiological determinants of the most frequent diseases	E.W1	oral credit
W6	the principles of nutrition of healthy and sick children, including breastfeeding, preventive vaccination and child health monitoring	E.W2	oral credit
W7	the causes, symptoms, principles of diagnosis and therapeutic management of the most common diseases of children: (1) rickets, tetanus, convulsions, (2) heart defects, myocarditis, endocarditis, pericarditis, cardiomyopathy, arrhythmia, heart failure, hypertension, syncope, (3) acute and chronic diseases of the upper and lower airways, congenital defects of the respiratory system, tuberculosis, cystic fibrosis, asthma, allergic rhinitis, urticaria, anaphylactic shock, angioedema, (4) anemia, hemorrhagic diatheses, conditions of bone marrow failure, pediatric neoplastic diseases, including solid tumors typical of childhood, (5) acute and chronic abdominal pain, vomiting, diarrhea, constipation, gastrointestinal bleeding, peptic ulcer disease, non-specific intestinal diseases, pancreatic diseases, cholestasis and liver diseases, and other acquired diseases and congenital defects of the digestive tract, (6) urinary tract infections, congenital anomalies of the urinary system, nephrotic syndrome, renal stones, acute and chronic renal failure, acute and chronic nephritis, systemic kidney diseases, urinary tract disorders, vesicoureteral reflux disease, (7) growing disorders, thyroid and parathyroid diseases, adrenal diseases, diabetes, obesity, disorders of puberty and gonadal functions, (8) cerebral palsy, encephalomyelitis, meningitis, epilepsy, (9) the most common infectious diseases of childhood, (10) genetic syndromes, (11) diseases of connective tissue, rheumatic fever, juvenile arthritis, systemic lupus, dermatomyositis	E.W3	oral credit
W8	issues of abused child and sexual abuse, mental retardation and behavioral disorders - psychoses, addictions, eating disorders and excretion in children	E.W4	oral credit
W9	the most common life-threatening conditions in children and the rules of conduct in these conditions	E.W6	oral credit
W10	basic neurological symptom syndromes	E.W13	oral credit

W11	causes, symptoms, principles of diagnosis and therapeutic management in the most common diseases of the nervous system, including: 1) headaches: migraines, tension headaches and headache syndromes and neuralgia of the nerve V, 2) cerebral vascular diseases, in particular stroke, 3) epilepsy, 4) infections of the nervous system, in particular meningitis, borreliosis, herpetic encephalitis, neurotransmission diseases, 5) dementia, in particular: Alzheimer's disease, frontal dementia, vascular dementia and other dementia syndromes, 6) basal ganglia diseases, Parkinson's disease in particular, 7) demyelinating diseases, multiple sclerosis in particular, 8) diseases of the neuromuscular system, lateral atrophic sclerosis and sciatic neuralgia in particular, 9) craniocerebral injuries, cerebral palsy in particular	E.W14	oral credit
W12	the concept of impairment and disability	E.W30	oral credit
W13	the role of medical rehabilitation and methods used in it	E.W31	oral credit
W14	rules of conduct in the event of the detection of an infectious disease	E.W33	oral credit
W15	Symptoms and rules for managing infectious diseases that are life-threatening	E.W50	oral credit
W16	indications and rules for performing lumbar puncture and assisting in the performance of the procedure	E.W54	oral credit
Skills - Student can:			
U1	identify medical problems and prioritize medical management	O.U1	oral credit
U2	identify life-threatening conditions that require immediate medical intervention	O.U2	oral credit
U3	plan the diagnostic procedure and interpret its results	O.U3	oral credit
U4	implement appropriate and safe therapeutic treatment and predict its effects	O.U4	oral credit
U5	plan own learning activities and constantly learn in order to update own knowledge	O.U5	oral credit
U6	inspire the learning process of others	O.U6	oral credit
U7	communicate with the patient and his family in an atmosphere of trust, taking into account the needs of the patient	O.U7	oral credit
U8	communicate and share knowledge with colleagues in a team	O.U8	oral credit
U9	critically evaluate the results of scientific research and adequately justify the position	O.U9	oral credit
U10	carry out a medical interview with the child and his or her family	E.U2	oral credit
U11	carry out a physical examination of a child of all ages	E.U4	oral credit
U12	assess the general condition, state of consciousness and awareness of the patient	E.U7	oral credit

U13	perform differential diagnosis of the most common diseases of adults and children	E.U12	oral credit
U14	evaluate and describe the somatic and mental state of the patient	E.U13	oral credit
U15	recognize immediate life-threatening conditions	E.U14	oral credit
U16	recognize the condition after drinking alcohol, after using drugs and other substances	E.U15	oral credit
U17	plan diagnostic, therapeutic and prophylactic procedures	E.U16	oral credit
U18	analyze the potential adverse reactions of individual medicines and the interactions between them	E.U17	oral credit
U19	make a functional assessment of a patient with a disability	E.U22	oral credit
U20	interpret the results of laboratory tests and identify the causes of abnormalities	E.U24	oral credit
U21	assist in the performance of the following procedures and medical procedures: 1) transfusion of blood and blood-derived products, 2) drainage of the pleural cavity, 3) puncture of the pericardial sac, 4) puncture of the peritoneal cavity, 5) lumbar puncture, 6) fine-needle biopsy, 7) epidermal tests, 8) intradermal and scarification tests and interpret their results	E.U30	oral credit
U22	plan specialist consultations	E.U32	oral credit
U23	maintain patient's medical records	E.U38	oral credit
Social competences - Student is ready to:			
K1	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	oral credit
K2	to be guided by the well-being of a patient	O.K2	oral credit
K3	respect medical confidentiality and patients' rights	O.K3	oral credit
K4	take actions towards the patient on the basis of ethical norms and principles, with an awareness of the social determinants and limitations of the disease	O.K4	oral credit
K5	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	oral credit
K6	promote health-promoting behaviors	O.K6	oral credit
K7	use objective sources of information	O.K7	oral credit
K8	formulate conclusions from own measurements or observations	O.K8	oral credit
K9	implement the principles of professional camaraderie and cooperation in a team of specialists, including representatives of other medical professions, also in a multicultural and multinational environment	O.K9	oral credit
K10	formulate opinions on the various aspects of the professional activity	O.K10	oral credit
K11	assume responsibility for decisions taken in the course of their professional activities, including in terms of the safety of oneself and others	O.K11	oral credit

Goals

C1	Understanding the relationship between physical activity and health. The aim of teaching the subject "Sports Medicine" is to provide the basics of diagnosis and treatment of sports injuries and the basic principles of sports training physiology. During the classes, the principles of preventing pathological phenomena in sport (doping) and the basics of sport psychology are taught.
----	--

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	development, structure and functions of the human body in normal and pathological conditions	O.W1	classroom observation, test

W2	symptoms and course of diseases	O.W2	classroom observation, test
W3	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	classroom observation, test
W4	ethical, social and legal conditions for practicing the medical profession and the principles of health promotion, based on scientific evidence and accepted standards	O.W4	classroom observation, test
W5	methods of conducting scientific research	O.W5	classroom observation, test
Skills - Student can:			
U1	carry out a medical history with an adult patient	E.U1	classroom observation, test
U2	carry out a medical interview with the child and his or her family	E.U2	classroom observation, test
U3	conduct a full and targeted physical examination of an adult patient	E.U3	classroom observation, test
U4	carry out a physical examination of a child of all ages	E.U4	classroom observation, test
U5	conduct an approximate hearing and field of vision examination, and an otoscopic examination	E.U6	classroom observation, test
U6	conduct routine health checks	E.U11	classroom observation, test
U7	assess the degree of advancement of puberty	E.U10	classroom observation, test
U8	critically evaluate the results of scientific research and adequately justify the position	O.U9	classroom observation, test
U9	communicate and share knowledge with colleagues in a team	O.U8	classroom observation, test
U10	communicate with the patient and his family in an atmosphere of trust, taking into account the needs of the patient	O.U7	classroom observation, test

No.	Course content	Subject's learning outcomes	Activities
1.	History and specificity of sports medicine Training physiology	W1, W2, W3, W4, W5	lecture, seminar
2.	Qualification for sports	U1, U2, U3, U4, U5, U6, U7, U8, U9	seminar
3.	Sports injury - pathomechanism, physiology of healing Head injuries Chest injuries Injuries to the spine and shoulder girdle	W1, W2, W3, W4, W5	seminar
4.	Upper limb injuries Pelvic injuries Lower limb injuries	W1, W5, U11, U4, U6, U9	seminar
5.	The specificity of sports in the elderly	W1, W2, W4, U1, U2, U3	seminar
6.	Principles of nutrition in sport Fluid replenishment	U11, U12, U13, U14, U15	seminar
7.	Doping issues in sport	U12, U14	seminar
8.	Sports cardiology	W1, W2, W3, W4, W5	seminar
9.	Adaptation of the body to exercise	W1, W3	seminar
10.	Prevention of chronic diseases	W1, W2, W3	seminar
11.	Sports training theory	U12, U13, U14, U15, U16	seminar
12.	Emergencies in the sports arena	U10, U16, U17	seminar
13.	Basics of psychology	K1, K2, K3, K4, K5, K6, K7, K8	seminar
14.	Fatigue, overtraining	K10, K11, K9	seminar
15.	Clinical cases	W1	seminar

Course advanced

Teaching methods:

case study, clinical classes, discussion, e-learning, case study method, group work, seminar

Activities	Examination methods	Credit conditions
lecture	classroom observation, test	60% +1

Activities	Examination methods	Credit conditions
seminar	test	60% +1

Advanced Life Support

Educational subject description sheet

Basic information

<p>Department Faculty of Medicine</p> <p>Field of study Medical Program</p> <p>Study level long-cycle master's degree program</p> <p>Study form full-time</p> <p>Education profile general academic</p> <p>Disciplines Medical science</p> <p>ISCED classification 0912 Medicine</p> <p>Subject related to scientific research Yes</p>	<p>Didactic cycle 2021/22</p> <p>Realization year 2025/26</p> <p>Lecture languages English</p> <p>Block obligatory for passing in the course of studies</p> <p>Mandatory elective</p> <p>Examination graded credit</p> <p>Standard group F. Clinical procedural sciences</p>
--	---

<p>Periods Semester 9, Semester 10</p>	<p>Examination graded credit</p> <p>Activities and hours classes: 20 e-learning lecture: 1 e-learning seminar: 9</p>	<p>Number of ECTS points 2.0</p>
---	--	---

Goals

C1	Familiarisation with the Advanced Life Support Algorithm.
C2	Care of the deteriorating patient. Prevention of cardiac arrest.
C3	Recognition and treatment of reversible causes of cardiac arrest 4Ts and 4 Hs.
C4	Special circumstances: Asthma, Anaphylaxis, Pregnancy, Toxins, Hyperkalaemia, Hypovolaemia
C5	Post cardiac arrest care
C6	Non-technical skills in cardiopulmonary resuscitation

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			
W1	guidelines for cardiopulmonary resuscitation of newborns, children and adults	F.W7	written examination, practical examination
Skills - Student can:			
U1	identify life-threatening conditions that require immediate medical intervention	O.U2	classroom observation
U2	plan the diagnostic procedure and interpret its results	O.U3	classroom observation
U3	implement appropriate and safe therapeutic treatment and predict its effects	O.U4	classroom observation
U4	communicate and share knowledge with colleagues in a team	O.U8	classroom observation
U5	critically evaluate the results of scientific research and adequately justify the position	O.U9	classroom observation
U6	operate according to the algorithm of advanced resuscitation activities	F.U11	classroom observation
U7	perform basic resuscitation procedures using an automatic external defibrillator and other emergency procedures and first aid	F.U10	classroom observation
Social competences - Student is ready to:			
K1	to be guided by the well-being of a patient	O.K2	classroom observation
K2	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	classroom observation
K3	take actions towards the patient on the basis of ethical norms and principles, with an awareness of the social determinants and limitations of the disease	O.K4	classroom observation

Calculation of ECTS points

Activity form	Activity hours*
classes	20
e-learning lecture	1
preparation for classes	25
e-learning seminar	9
Student workload	Hours 55
Workload involving teacher	Hours 30
Practical workload	Hours 20

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Cardiac arrest teaching simulation	W1, U1, U2, U3, U4, U5, U6, U7, K1, K2, K3	classes
2.	Advanced Life Support Algorithm	W1, U4, U6	e-learning lecture, e-learning seminar

Course advanced

Teaching methods:

case study, classes in simulated conditions, discussion, seminar, simulation, lecture, lecture with multimedia presentation

Activities	Examination methods	Credit conditions
classes	classroom observation	Active participation
e-learning lecture	written examination, practical examination	MCQ, Cardiac Arrest Scenario TEST
e-learning seminar	written examination, practical examination	MCQ, Cardiac Arrest Scenario TEST

Entry requirements

Knowledge:

Basic Life Support algorithm. Advanced Life Support algorithm. Peri-arrest arrhythmias.

Skills:

ABCDE approach, Cardiopulmonary resuscitation (BLS).

Practical aspects of surgery in children

Educational subject description sheet

Basic information

<p>Department Faculty of Medicine</p> <p>Field of study Medical Program</p> <p>Study level long-cycle master's degree program</p> <p>Study form full-time</p> <p>Education profile general academic</p> <p>Disciplines Medical science</p> <p>ISCED classification 0912 Medicine</p>	<p>Didactic cycle 2021/22</p> <p>Realization year 2025/26</p> <p>Lecture languages English</p> <p>Block obligatory for passing in the course of studies</p> <p>Mandatory elective</p> <p>Examination graded credit</p> <p>Standard group F. ---	---

<p>Periods Semester 9, Semester 10</p>	<p>Examination graded credit</p> <p>Activities and hours e-learning lecture: 6 seminar: 8 classes: 16</p>	<p>Number of ECTS points 2.0</p>
---	---	---

Goals

C1	To familiarize students with practical aspects of surgical management in children.
----	--

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
	Knowledge - Student knows and understands:		

W1	the causes, symptoms, diagnostic and therapeutic management principles for the most common diseases requiring surgical intervention, taking into account the distinctness of childhood age, including in particular: 1) acute and chronic abdominal diseases, 2) thoracic diseases, 3) diseases of extremities and head, 4) fractures of bones and injuries to organs	F.W1	clinical case presentation
W2	selected issues in the field of pediatric surgery, including traumatology and otorhinolaryngology, as well as acquired defects and diseases being indications for surgical treatment in children	F.W2	clinical case presentation
W3	rules of qualification for basic surgical procedures and invasive diagnostic and therapeutic procedures, rules of their performance and the most frequent complications	F.W3	clinical case presentation
W4	principles of perioperative safety, patient preparation for surgery, general and local anesthesia and controlled sedation	F.W4	clinical case presentation
W5	problems of modern imaging examinations, in particular: 1) radiological symptomatology of major diseases, 2) instrumental methods and imaging techniques used to perform therapeutic procedures, 3) the indications, contraindications and preparation of the patient for particular types of imaging examination and contraindications for the use of contrast agents	F.W10	clinical case presentation
Skills - Student can:			
U1	use basic surgical instruments	F.U2	classroom observation
U2	assist in a typical surgical procedure, prepare the surgical field and apply local anesthesia to the operated area	F.U1	classroom observation
U3	adhere to the principles of asepsis and antisepsis	F.U3	classroom observation
U4	manage a simple wound, put on and change a sterile surgical dressing	F.U4	classroom observation
U5	assist in typical urological procedures (diagnostic and therapeutic endoscopy of the urinary tract, lithotripsy, prostate puncture)	F.U24	classroom observation
Social competences - Student is ready to:			
K1	use objective sources of information	O.K7	group assessment
K2	promote health-promoting behaviors	O.K6	group assessment
K3	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	group assessment
K4	formulate conclusions from own measurements or observations	O.K8	group assessment
K5	to be guided by the well-being of a patient	O.K2	group assessment
K6	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	group assessment

Calculation of ECTS points

Activity form	Activity hours*
e-learning lecture	6
seminar	8
classes	16
preparation for classes	6
information collection	6
case analysis	6
consultations with lecturer	2
conducting literature research	2
practice	2
analysis of the research material	6
Student workload	Hours 60
Workload involving teacher	Hours 30
Practical workload	Hours 30

* hour means 45 minutes

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Urology: Minimally invasive surgical techniques used in children	W1, W3, W4, W5	e-learning lecture
2.	Physical examination, analysis of medical documentation and interpretation of the results of diagnostic tests. Conducting the diagnostic process, choosing the surgical treatment and preparing the patient for surgery.	W5, U1, U2, U3, U4, U5	classes
3.	Participation in surgical procedures, dealing with surgical instruments, preparation of the surgical field, principles of perioperative antibiotic prophylaxis and the elements postoperative care	W2, K5, K6	classes
4.	case presentation	K1, K2, K3, K4	seminar
5.	Neurosurgery: cranio-cerebral injuries - diagnostics and therapeutic management	W1, W5	e-learning lecture

6.	General surgery: prevention of surgical diseases of childhood and special techniques used in emergency operations in children.	W1, W5	e-learning lecture
----	--	--------	--------------------

Course advanced

Teaching methods:

case study, brainstorm, classes / practicals, clinical classes, classes in clinical skills room, demonstration, discussion, e-learning, educational film, case study method, presentation, group work, seminar, simulation, lecture, lecture with multimedia presentation, practical classes

Activities	Examination methods	Credit conditions
e-learning lecture	group assessment	attendance
seminar	clinical case presentation	case presentation
classes	classroom observation	demonstrating skills to carry out the diagnostic process and to propose proper surgical treatment and prepare the patient for surgery

Entry requirements

Basic knowledge of physiology of newborns and children. Student is able to take the medical history and familiar with physical general examination.

Treatment of cancer of the abdominal cavity in elderly people

Educational subject description sheet

Basic information

<p>Department Faculty of Medicine</p> <p>Field of study Medical Program</p> <p>Study level long-cycle master's degree program</p> <p>Study form full-time</p> <p>Education profile general academic</p> <p>Disciplines Medical science</p> <p>ISCED classification 0912 Medicine</p> <p>Subject related to scientific research Yes</p>	<p>Didactic cycle 2021/22</p> <p>Realization year 2025/26</p> <p>Lecture languages English</p> <p>Block obligatory for passing in the course of studies</p> <p>Mandatory elective</p> <p>Examination graded credit</p> <p>Standard group F. Clinical procedural sciences</p>
--	---

<p>Periods Semester 9, Semester 10</p>	<p>Examination graded credit</p> <p>Activities and hours e-learning lecture: 4 seminar: 6 classes: 20</p>	<p>Number of ECTS points 2.0</p>
---	---	---

Goals

C1	To acquaint the student with the basic concepts of the surgical treatment in the older patients with cancer. This includes both knowledge (taking surgically directed medical history and physical examination, preoperative evaluation of the older patient, planning of oncological treatment, postoperative follow-up) as well as basic manual skills (i.e. dressing change, suturing, suture and drains removal, insertion of the catheters and probes, etc.).
----	--

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
------	----------------------	---------	---------------------

Knowledge - Student knows and understands:			
W1	development, structure and functions of the human body in normal and pathological conditions	O.W1	oral answer, clinical case presentation, oral credit
W2	symptoms and course of diseases	O.W2	oral answer, clinical case presentation, oral credit
W3	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	oral answer, clinical case presentation, oral credit
W4	ethical, social and legal conditions for practicing the medical profession and the principles of health promotion, based on scientific evidence and accepted standards	O.W4	oral answer, clinical case presentation, oral credit
W5	methods of conducting scientific research	O.W5	oral answer, clinical case presentation, oral credit
W6	rules of qualification for basic surgical procedures and invasive diagnostic and therapeutic procedures, rules of their performance and the most frequent complications	F.W3	oral answer, clinical case presentation, oral credit
W7	principles of perioperative safety, patient preparation for surgery, general and local anesthesia and controlled sedation	F.W4	oral answer, clinical case presentation, oral credit
W8	postoperative treatment with analgesic therapy and postoperative monitoring	F.W5	oral answer, clinical case presentation, oral credit
W9	problems of modern imaging examinations, in particular: 1) radiological symptomatology of major diseases, 2) instrumental methods and imaging techniques used to perform therapeutic procedures, 3) the indications, contraindications and preparation of the patient for particular types of imaging examination and contraindications for the use of contrast agents	F.W10	oral answer, clinical case presentation, oral credit
W10	the most common complications associated with anesthesia, sedation and perioperative period	F.W19	oral answer, clinical case presentation, oral credit
W11	the rules of qualification, what they consist of, how they take place and what are the possible complications and consequences of surgical procedures: a) removal of appendix, gallbladder b) excision of the thyroid, parathyroid, adrenal glands c) excision of part and entirety of the stomach, large intestine d) abdominal hernias, using synthetic mesh e) surgical treatment of obesity	F.W20	oral answer, clinical case presentation, oral credit
Skills - Student can:			
U1	plan the diagnostic procedure and interpret its results	O.U3	classroom observation, oral answer, oral credit
U2	implement appropriate and safe therapeutic treatment and predict its effects	O.U4	classroom observation, oral answer, oral credit
U3	communicate and share knowledge with colleagues in a team	O.U8	classroom observation, oral answer, oral credit
U4	communicate with the patient and his family in an atmosphere of trust, taking into account the needs of the patient	O.U7	classroom observation, oral answer, oral credit
U5	critically evaluate the results of scientific research and adequately justify the position	O.U9	classroom observation, oral answer, oral credit

U6	assist in a typical surgical procedure, prepare the surgical field and apply local anesthesia to the operated area	F.U1	classroom observation, oral answer, oral credit
U7	adhere to the principles of asepsis and antisepsis	F.U3	classroom observation, oral answer, oral credit
U8	manage a simple wound, put on and change a sterile surgical dressing	F.U4	classroom observation, oral answer, oral credit
U9	monitor the patient's condition in the post-operative period based on basic vital parameters	F.U12	classroom observation, oral answer, oral credit
U10	can tie a single and surgical knot	F.U28	classroom observation, oral answer, oral credit
U11	insert a catheter into the bladder	F.U32	classroom observation, oral answer, oral credit
Social competences - Student is ready to:			
K1	to establish and maintain deep and respectful contact with patients and to show understanding for differences in world views and cultures	O.K1	classroom observation, oral answer, clinical case presentation, oral credit
K2	to be guided by the well-being of a patient	O.K2	classroom observation, oral answer, clinical case presentation, oral credit
K3	respect medical confidentiality and patients' rights	O.K3	classroom observation, oral answer, clinical case presentation, oral credit
K4	use objective sources of information	O.K7	classroom observation, oral answer, clinical case presentation, oral credit
K5	perceive and recognize own limitations and self-assessing educational deficits and needs	O.K5	classroom observation, oral answer, clinical case presentation, oral credit

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Basic concepts of surgical oncogeriatrics.	W1, W11, W2, W3, W6, W9	e-learning lecture
2.	Problem Based Learning - Colorectal cancer	W1, W3, W5, W6, U1, U2, U3, U4, U5, K1, K2, K4, K5	classes, seminar, e-learning lecture
3.	Problem Based Learning - Pancreas tumor	W1, W10, W11, W2, W3, W4, W5, W6, W7, W8, W9, U1, U10, U11, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4, K5	classes, seminar, e-learning lecture
4.	Problem Based Learning - Liver tumor	W1, W10, W11, W2, W3, W4, W5, W6, W7, W8, W9, U1, U10, U11, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4, K5	classes, seminar, e-learning lecture
5.	Problem Based Learning - Gastric cancer	W1, W10, W11, W2, W3, W4, W5, W6, W7, W8, W9, U1, U10, U11, U2, U3, U4, U5, U6, U7, U8, U9, K1, K2, K3, K4, K5	classes, seminar, e-learning lecture

Course advanced

Teaching methods:

case study, brainstorm, classes / practicals, clinical classes, educational film, problem solving method, project method, case study method, group work, seminar, lecture, practical classes

Activities	Examination methods	Credit conditions
e-learning lecture	oral credit	Attendance at all classes. The clinical case presentation prepared by the students.
seminar	oral answer, clinical case presentation	Attendance at all classes. The clinical case presentation prepared by the students.
classes	classroom observation, oral answer, clinical case presentation	Attendance at all classes. The clinical case presentation prepared by the students.

Entry requirements

Basic knowledge of general surgery and pathomorphology (especially in the area of the most common abdominal cancers). Knowledge of the principles of safety in the operating theater, surgical scrubbing and assisting at the surgery.

Videoscope technique in surgical fields

Educational subject description sheet

Basic information

<p>Department Faculty of Medicine</p> <p>Field of study Medical Program</p> <p>Study level long-cycle master's degree program</p> <p>Study form full-time</p> <p>Education profile general academic</p> <p>Disciplines Medical science</p> <p>ISCED classification 0912 Medicine</p>	<p>Didactic cycle 2021/22</p> <p>Realization year 2025/26</p> <p>Lecture languages English</p> <p>Block obligatory for passing in the course of studies</p> <p>Mandatory elective</p> <p>Examination graded credit</p> <p>Standard group F. Clinical procedural sciences</p>
---	---

<p>Periods Semester 9, Semester 10</p>	<p>Examination graded credit</p> <p>Activities and hours seminar: 10 classes: 20</p>	<p>Number of ECTS points 2.0</p>
---	--	---

Goals

C1	To familiarize students with basic rules of application of minimal invasive surgery
C2	To familiarize students with ergonomics in surgery
C3	To familiarize students with safety precautions when using videoscopic equipment
C4	To familiarize students with independent work on laparoscopic trainer and with methods of monitoring of progress.

Subject's learning outcomes

Code	Outcomes in terms of	Effects	Examination methods
Knowledge - Student knows and understands:			

W1	methods of diagnostic and therapeutic procedures appropriate for specific disease states	O.W3	practical examination, practical test
W2	rules of qualification for basic surgical procedures and invasive diagnostic and therapeutic procedures, rules of their performance and the most frequent complications	F.W3	practical examination, practical test
W3	the causes, symptoms, principles of diagnosis and therapeutic management of the most common diseases requiring surgical intervention, taking into account the distinctness of childhood age and in particular: a) diseases of arterial and venous vessels b) diseases of the urinary tract c) heart and blood vessel diseases d) craniofacial diseases, acute and chronic diseases of the central nervous system	F.W17	practical examination, practical test
W4	the rules of qualification, what they consist of, how they take place and what are the possible complications and consequences of surgical procedures: a) removal of appendix, gallbladder b) excision of the thyroid, parathyroid, adrenal glands c) excision of part and entirety of the stomach, large intestine d) abdominal hernias, using synthetic mesh e) surgical treatment of obesity	F.W20	practical examination, practical test
Skills - Student can:			
U1	plan the diagnostic procedure and interpret its results	O.U3	practical examination, practical test
U2	assist in a typical surgical procedure, prepare the surgical field and apply local anesthesia to the operated area	F.U1	practical examination, practical test
U3	use basic surgical instruments	F.U2	practical examination, practical test
Social competences - Student is ready to:			
K1	assume responsibility for decisions taken in the course of their professional activities, including in terms of the safety of oneself and others	O.K11	practical examination, practical test

Calculation of ECTS points

Study content

No.	Course content	Subject's learning outcomes	Activities
1.	Basic rules of application of videoscopic techniques	W3	seminar
2.	Ergonomics in videoscopic surgery	W4	seminar
3.	Safety measures in minimally invasive surgery	W4, K1	seminar
4.	Utilization of laparoscopic trainer device	W2, U3	seminar
5.	Laparoscopic procedures: appendectomy, gastric surgery, bariatric surgery, cholecystectomy – steps and key aspects.	W3	seminar
6.	Basic skills: laparoscopic equipment	W2	classes
7.	Manual exercises	U2, U3	classes
8.	Laprosopic suturing	W1, U2, U3	classes
9.	Endocorporeal knot tying.	W1, U1, U2, U3	classes

Course advanced

Teaching methods:

classes / practicals, classes in simulated conditions, seminar

Activities	Examination methods	Credit conditions
seminar	practical examination	70% or more on basic laparoscopic drill test
classes	practical test	70% or more on basic laparoscopic drill test

Additional info

This course is about skill and knowledge in laparoscopic surgery. Main focus is to increase students' manual dexterity and familiarize them with most important concepts increasing the safety of laparoscopic surgery. Especially deisgned task trainers and series of exercises will gradually rise the students form a begginer level to intracorporeal knot tying. We will also explain major steps of most frequent surgical procedures.

Entry requirements

Passed Laboratory Training of Surgical Skills.

Minimally invasive techniques in urology

Educational subject description sheet

Basic information

<p>Department Faculty of Medicine</p> <p>Field of study Medical Program</p> <p>Study level long-cycle master's degree program</p> <p>Study form full-time</p> <p>Education profile general academic</p> <p>Disciplines Medical science</p> <p>ISCED classification 0912 Medicine</p>	<p>Didactic cycle 2021/22</p> <p>Realization year 2025/26</p> <p>Lecture languages English</p> <p>Block obligatory for passing in the course of studies</p> <p>Mandatory elective</p> <p>Examination graded credit</p> <p>Standard group F. professional practice

Activities	Examination methods	Credit conditions
professional practice	booklet of practical skills, booklet of practice	The preceptor is responsible for fulfillment of clerkship outline and grants credit to student by filling out the JU MC Certificate of Summer Clerkship Completion. The student is obliged to keep record of all performed procedures and acquired skills in the List of Approved Procedures booklet.

Additional info

2 weeks (60 h) (5 days/week, 6 h/day); can be completed over summer vacation months only (July - August). During that time, student must complete two on-call duties at each ward between 2 pm and 8 pm on the ward of student's choosing. On the on-call days, active interns are excused from presence in the obligatory activities before 2pm. Excused absence can be granted to the active intern only on submitting formal medical certificate. Illness longer than one week causes internship to be lengthened by the time of absence.

Obstetrics and Gynecology - summer clerkship
